Index 533

Preface

Welcome to the *EMS User's Manual*. The purpose of the *EMS User's Manual* is to answer your questions and guide you through the procedures necessary to use the EMS application efficiently and effectively.

Using the manual

You will find the *EMS User's Manual* easy to use. You can simply look up the topic that you need in the table of contents or the index. Later, in this Preface, you will find a brief discussion of each chapter to further assist you in locating the information that you need.

Special information about the manual

The *EMS User's Manual* has a dual purpose design. It can be distributed electronically and then printed on an as-needed basis, or it can be viewed online in its fully interactive capacity. If you print the document, for best results, it is recommended that you print it on a duplex printer; however, single-sided printing will also work. If you view the document online, a standard set of bookmarks appears in a frame on the left side of the document window for navigation through the document. For better viewing, decrease the size of the bookmark frame and use the magnification box to increase the magnification of the document to your viewing preference.

If you do print the document using a single-sided printer, you might see a single blank page at the end of some chapters. This blank page has been added solely to ensure that the next chapter begins on an odd-numbered page. This blank page in no way indicates that your book is missing information.

Conventions used in the manual

The *EMS User's Manual* uses the following conventions:

- The tab, field, and menu labels that are described in this User's manual are those used in the standard implementation of EMS. Your EMS administrator might have customized some of these labels to better suit your organization's business needs. Therefore, the labels that are referenced in this User's manual might be different than what you observe for your implementation.
- The colors that are shown in this User's manual for the windows and their components (for example, a reservation in the Reservation Book or the colors for the booking statuses) are those used in the standard implementation of EMS. Your EMS administrator might have customized some of these colors to better suit your organization's business needs.

Therefore, the colors that are shown in this User's manual might be different than what you observe for your implementation.

- The fields (required and optional), categories, and dropdown list values that are described in this User's manual are those used in the standard implementation of EMS. Your EMS administrator might have customized some of these values to better suit your organization's business needs. Therefore, the fields, categories, and values that are referenced in this User's manual might be different than what you observe for your implementation.
- The EMS application provides multiple ways of accessing the same EMS functions and although this manual does not address all these ways, you can use whatever method best suits your working needs.
- Information that can vary in a command—variable information—is indicated by alphanumeric characters enclosed in angle brackets; for example, <Room Type>. Do not type the angle brackets when you specify the variable information.
- A new term, or term that must be emphasized for clarity of procedures, is *italicized*.
- Page numbering is "online friendly." Pages are numbered from 1 to x, *starting with the cover* and ending on the last page of the index.

Although numbering begins on the cover page, this number is not visible on the cover page or front matter pages. Page numbers are visible beginning with the first page of the table of contents.

- This manual is intended for both print and online viewing.
  - If information appears in blue, it is a hyperlink. Table of Contents and Index entries are also hyperlinks. Click the hyperlink to advance to the referenced information.

Assumptions for the manual

The *EMS User's Manual* assumes that:

- You are familiar with windows-based applications and basic Windows functions and navigational elements.

Organization of the manual

In addition to this Preface, the *EMS User's Manual* contains the following chapters and appendices:

- Chapter 1, "Getting Started with EMS," on page 25 details the procedures for opening and logging on to the EMS application as well as an overview of the major functional areas in the application, including the title bar, the main window, the toolbar, and the main menu.
- Chapter 2, "Reservations and Bookings," on page 33 details the two essential EMS components for meeting and event scheduling—reservations and bookings. It explains the structure of a reservation in EMS, it explains the concept of an event timeline for a reservation booking, and it describes the three ways to make a reservation in EMS.
- Chapter 3, "The Navigator," on page 69 details the Navigator, which is a window in EMS that you use to view and manage all aspects of a reservation including bookings and booking details. It also provides detailed procedures for using the Navigator to add one or more bookings to a reservation, edit and copy reservations, edit and copy one or more bookings, cancel one or more bookings, add comments to reservations and bookings, and to manage booking details and items.
- Chapter 4, "Search Tools," on page 177 details the variety of options that are available to you for searching for reservations and bookings in your EMS database, including the Browser, the Calendar, the Navigator, Groups, and Web Requests.
- Chapter 5, "EMS Dashboard," on page 207 details the EMS Dashboard, which is a window that centralizes critical information about reservations and web requests in a single location. The information that is displayed on this window provides you with the necessary input to manage your work in the EMS application.
- Chapter 6, "Groups and Contacts," on page 231 details the procedures for adding and editing groups and contacts in your EMS database. It also details the procedures for sending an email to a group or a contact, deleting a group or a contact, and printing and exporting group and contact information.
- Chapter 7, "Confirmations," on page 265 details a confirmation, which is a document that details the critical information for a reservation—the date, the time, the location, the scheduled resources, and so on. The chapter describes how to specify the settings for confirmations and how to generate a confirmation both manually and automatically. It also describes the procedures for printing a confirmation and for emailing a confirmation.

- Chapter 8, "Reports and Queries," on page 275 details the reports that are available in EMS, including daily reports, statistical reports, and exception reports.
- Chapter 9, "Billing," on page 313 details the functions that are available in EMS for working with invoices and transactions for reservations and bookings and for reporting on this information.
- Chapter 10, "User Settings," on page 347 details the preferences that are available to you for customizing some of the basic functions of your EMS user account.
- Chapter 11, "Other Reservation Functions," on page 357 details several miscellaneous standalone functions that are available in EMS to assist you in managing and maintaining reservations and bookings in your system as well as managing your general work requirements.
- Chapter 12, "EMS Workplace," on page 375 details the EMS Workplace module, which is a facility scheduling system for managing hoteling requirements, as well as the booking of meeting/event space and resources.
- Chapter 13, "Academic Planning (EMS Campus)," on page 385 details the EMS Campus module, which is a a complete campus-wide space management package.

Chapter 1
Getting Started with EMS

EMS is user-friendly room scheduling software that is designed to manage the meetings and events that take place in your facility. Standard features, which you use to create, manage, and report on events, include the following:

- The Reservation Wizard room booking tool
- A graphical reservation book
- The Browser and month-at-a-glance Calendar Inquiry
- Numerous daily, sales, and statistical reports

This chapter covers the following topics:

- "Starting EMS" on page 27.
- "The EMS Window" on page 29.

Chapter 1
Getting Started with EMS

Starting EMS

After EMS has been installed on your desktop, a shortcut icon for the application is placed on your desktop. An option for the application is also available from your Start menu. You can double-click the desktop icon to launch the EMS application, or you can select the option from your Start menu.

To start EMS

1. Do one of the following:

   - On your desktop, double-click the EMS icon

.
   - Open the Windows start menu, in the Search field, enter “EMS” and then select the EMS Enterprise option.

Figure 1-1: EMS Login window

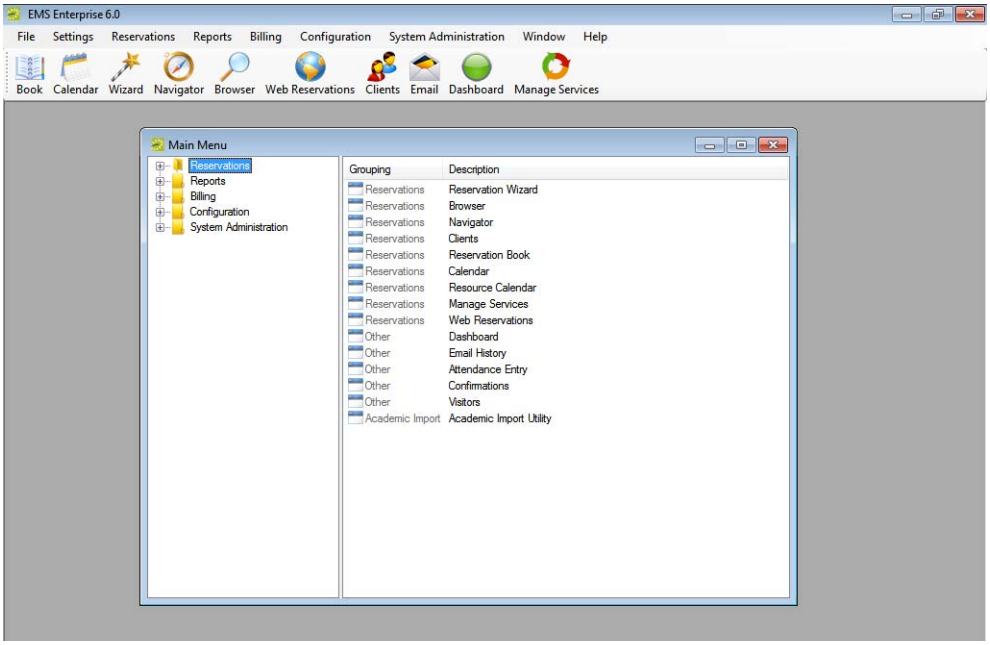
2. In the User ID field, enter your User ID.
3. In the Password field, enter your password.

If you do not know your User ID or password, contact your EMS administrator.

4. Click OK.

   The EMS application opens. The main menu is open in the application.

Figure 1-2: EMS main window with main menu

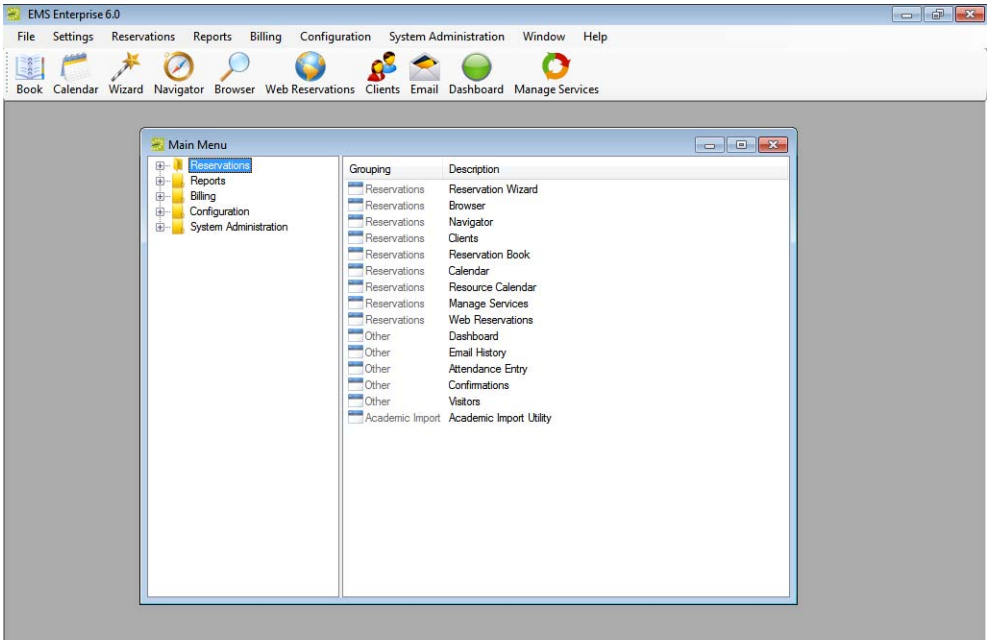


The EMS Window

The EMS main window is your starting point for the EMS application. The window provides quick access to all the EMS functions (Reservations, Reports, Configuration, and so on) and system tools. The EMS Main window has four major components:

- The title bar. See “Title bar.”
- The menu bar. See “Menu bar” on page 30.
- The toolbar. See “Toolbar” on page 30.
- The main menu. See “Main menu” on page 31.

Figure 1-3: EMS main window with main menu



Title bar

The name “EMS” and the version number of the application appear in the title bar across the top of the EMS main window.

Figure 1-4: Title bar

Menu bar

The menu bar is set up in a standard Windows menu format with menu commands grouped into menus (File, Settings, Reservations, and so on) across the menu bar. Some of these menu commands are also available in the Main Menu.

Figure 1-5: Menu bar

Toolbar

The toolbar provides quick access to the commonly used EMS functions—Book, Calendar, Wizard, Navigator, Browser, Web Reservations, Clients, Email, Dashboard, and Manage Services. Some of these functions are also available from the Main Menu. You can customize the appearance of this toolbar to best suit your business needs.

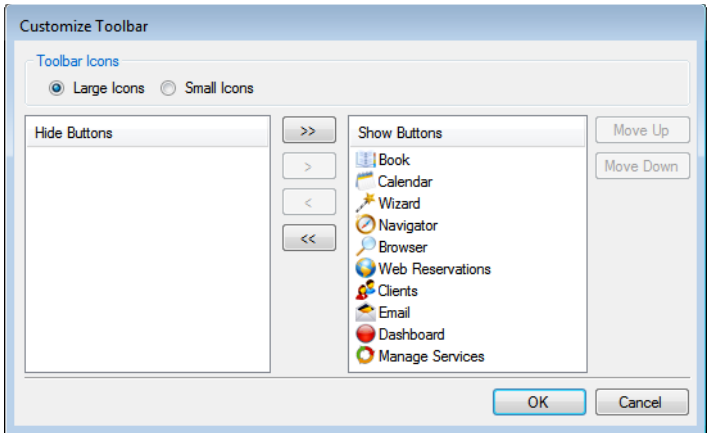
Figure 1-6: Toolbar

To customize the toolbar

1. Right-click the toolbar and click Customize.

   The Customize Toolbar dialog box opens.

Figure 1-7: Customize Toolbar dialog box



2. Do one or more of the following:

   - To display the toolbar icons as large icons, select Large Icons; otherwise, click Small Icons.
   - To hide an icon from the toolbar display, in the Show Buttons panel, select a button (CTRL-click to select multiple icons) and then click the Hide button (<). Conversely, to show an icon on the toolbar display, in the Hide Buttons panel, select a button (CTRL-click to select multiple icons) and then click the Show button (>).

You can also move a toolbar icon between the Hide and Show panels by double-clicking the icon. To move all icons from one panel to another in a single step, you do not have to select any icons. Instead, click the appropriate Hide All button (<<) or Show All button (>>).

   - To change the order (from left to right) in which the icons are displayed on the toolbar, select the icon, and then click Move Up or Move Down as needed.

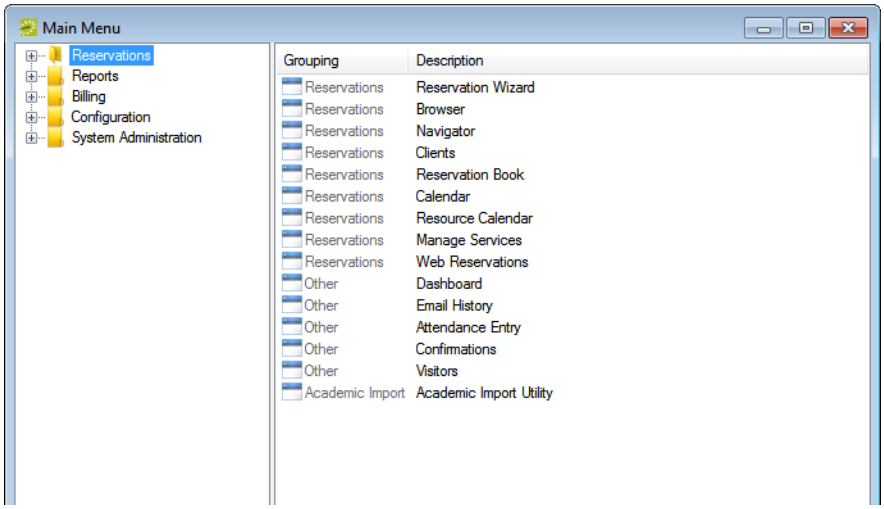
3. Click OK.

   The Customize Toolbar dialog box closes. The toolbar display is updated to reflect the changes that you made.

Main menu

Every time you open EMS, the main menu opens in the EMS main window. You can access the primary EMS system functions—Reservations, Reports, Billing, Configuration, and System Administration—from the main menu.

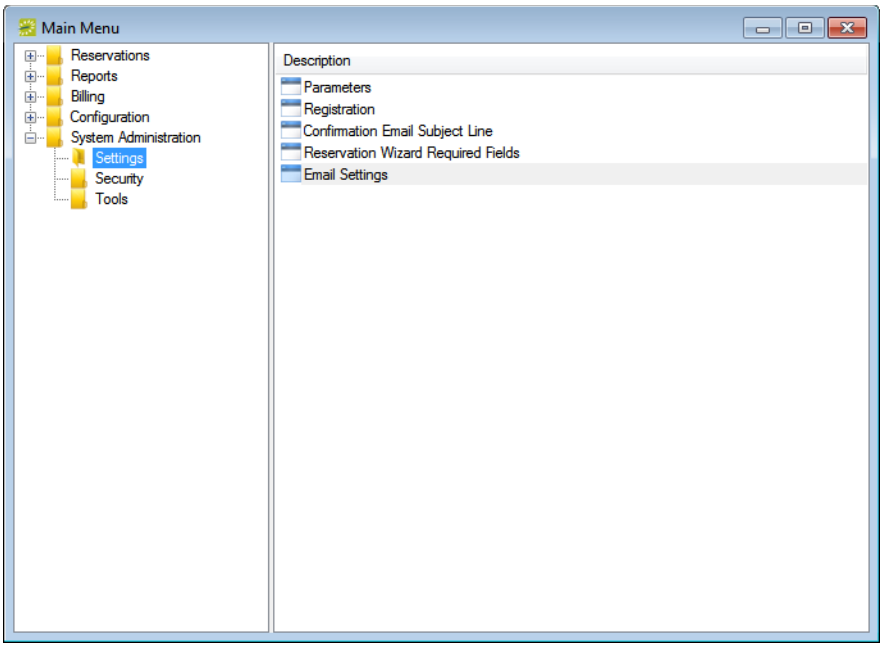
Figure 1-8: EMS main menu



The main menu is arranged in a Windows Explorer-style folder structure. The top-level folders are the system functions of Reservations, Reports, Billing, Billing, Configuration, and System Administration. The available tasks for each top-level folder are further

organized into subfolders. For example, to carry out a system administration task, you must first open the top-level System Administration folder, and then open the correct subfolder to view the list of available tasks.

Figure 1-9: Opening a System Administration subfolder



You can always close the main menu by clicking the Close button (x) in the upper right hand corner of the menu. To open the main menu again, on the menu bar, click File > Show Main Menu.

Chapter 2
Reservations and Bookings

The two essential EMS components for meeting and event scheduling are reservations and bookings. To use EMS efficiently and effectively, you must understand the structure of a reservation in EMS, you must understand the concept of an event timeline for a reservation booking, and you must know how to make a reservation.

This chapter covers the following topics:

- "Reservation Structure" on page 35.
- "Event Timeline" on page 36.
- "Making a Reservation Using the Reservation Wizard" on page 37.
- "Viewing and Editing Reservations in the Reservation Book" on page 52.
- "Finding and Making a Reservation for a Group" on page 64.

Chapter 2
Reservations and Bookings

Reservation Structure

An event in EMS is comprised of the following:

- A reservation
- One or more bookings
- Booking details

These three components exist in a hierarchy—a reservation contains one or more bookings and each booking can have one or more details associated with it.

Reservation and bookings

A *reservation* is the who and the what of an event. For example, Group X (the who) can reserve some space for an Event Y (the what). A *booking* is the where and the when of an event. For example, Group X can schedule the conference room (the where) for a staff meeting on the second Monday in January (the when). Group X now has a single reservation with a single booking in EMS. If, however, Group X schedules the conference room (the where) for a staff meeting on the second Monday of each month for a calendar year (the when), then Group X now has a single reservation with twelve bookings in EMS.

Booking details

A booking can have one or more booking details associated with it. *Booking details* are the resources or services that are needed for an event, the notes for the event, the room charges for the event, or any combination of these. For example, for Group X's staff meeting, the resources could include the requested catering (coffee service, bagels and muffins, and so on) and the A/V equipment (a projector, a speaker's podium, and so on).

Event Timeline

The following time designators are used for an event in EMS:

- Event Time: The time period during which the event actually takes place.
- Setup/Teardown Hours: The hours, or fractions of hours, that you add to the event time to allow staff to prepare a room for the event or to clean up after the event.
- Reserved Time: The total time for which the space (the where) is reserved. This time is the event time *plus* the setup/teardown time.

For example:

Variable	Time
Reserved Start Time	8:00 am
Setup Hours	1 hour
Event Start Time	9:00 am
Event End Time	4:00 pm
Teardown Hours	1.5 hours
Reserved End Time	5:30 pm
Reserved Time	9.5 hours

Making a Reservation Using the Reservation Wizard

You use the Reservation Wizard to check for available space for an event and to make a reservation for the event. You can search for rooms that are available for a particular time on one day (a simple reservation with one booking) or on multiple days (a series reservation with multiple bookings). You can also create a series reservation by selecting one date and time, but multiple rooms. To make a reservation using the wizard, you must:

- Specify the event date and time information. See "To specify the event date" on page 38.
- Specify the event time and status. See "To specify the event time and status" on page 41.
- Select the event location. See "To select the event location" on page 42.
- Specify the event information. See "To specify the event information" on page 48.

The following procedure describes how to make a reservation by selecting values for the required and optional fields. If your job entails making multiple reservations that require the same information, (the building, the event time zone, the event status, the event type, the event name, the event time, and/or the reservation source), then you do not have to select a value for these fields every time you make a reservation. Instead, you can set default values for these fields. See "Setting User Preferences and Default Values" on page 349.

To specify the event date

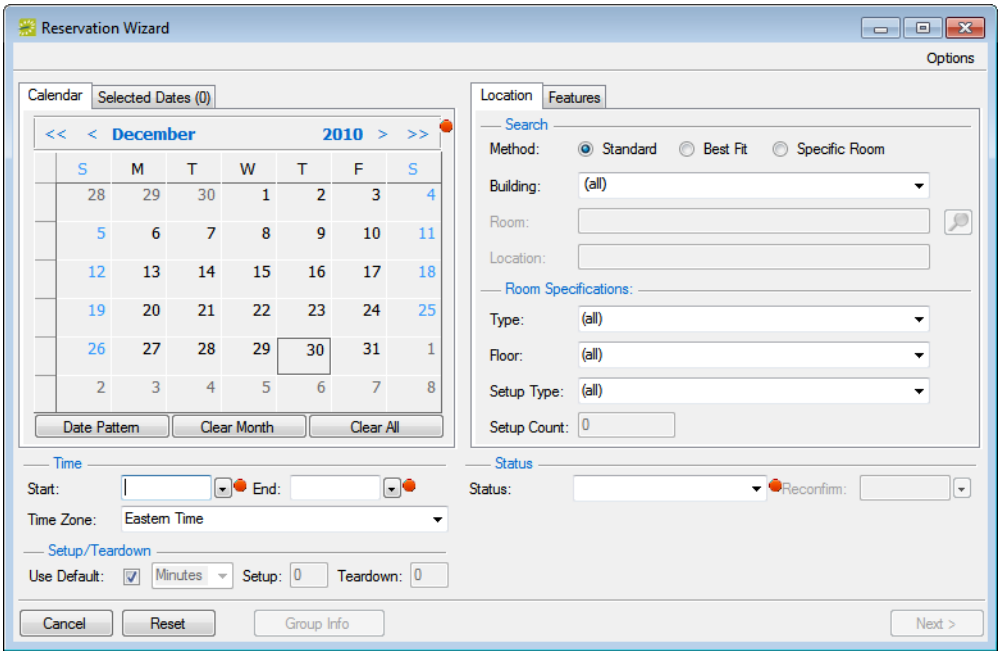
1. On the toolbar, click the Wizard icon

.

   The Reservation Wizard opens.

All required fields in the wizard are marked with a red dot. Your EMS Administrator configures the required fields.

Figure 2-1: Reservation Wizard



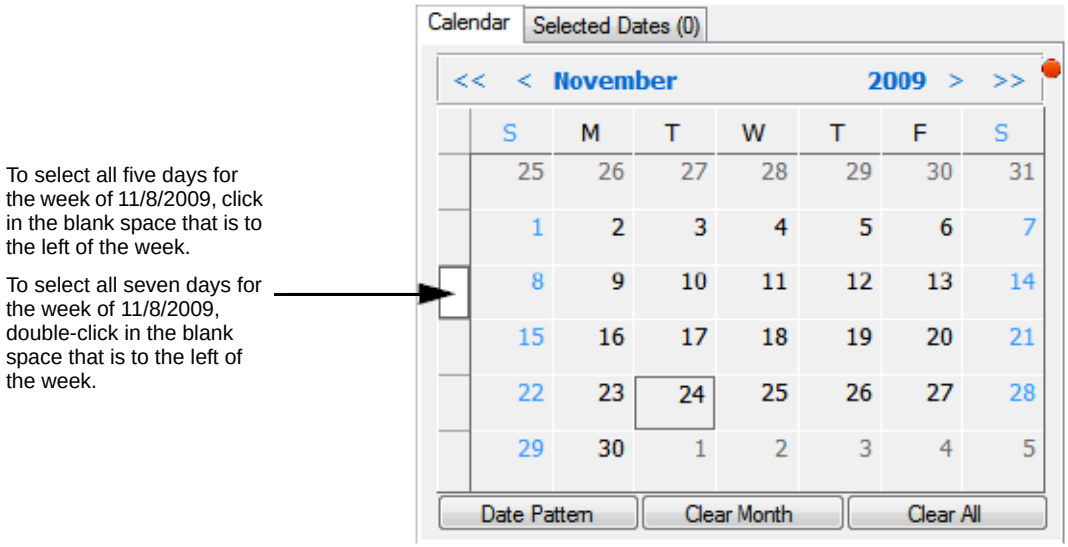
2. If needed, use the scroll features on the top of the Calendar to open the calendar for a different month (< or >) or for a different year (<< or >>).

You can also click a month at the top of the calendar to open a dropdown list from which you can select a different month and you can also click a year at the top of the calendar to open a dropdown list from which you can select a different year.

3. If the event dates do *not* follow a pattern, use one or more of the following options for entering a date; otherwise, go to Step 4.

   - Click on the dates on the calendar that the event is to take place.
   - To select all five days in a work week, click in the blank space that is to the left of the week.
   - To select all seven days in a week, double-click in the blank space that is to the left of the week.

Figure 2-2: Example of selecting the days of the week



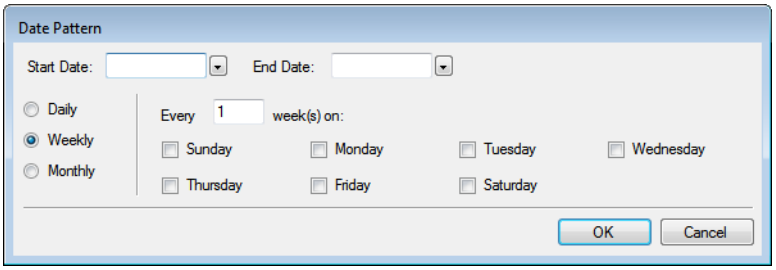
To select all five days for the week of 11/8/2009, click in the blank space that is to the left of the week.
To select all seven days for the week of 11/8/2009, double-click in the blank space that is to the left of the week.
Calendar
Selected Dates (0)
<< < November 2009 > >>
S M T W T F S
25 26 27 28 29 30 31
1 2 3 4 5 6 7
8 9 10 11 12 13 14
15 16 17 18 19 20 21
22 23 24 25 26 27 28
29 30 1 2 3 4 5
Date Pattern
Clear Month
Clear All

   - To select every occurrence of a specific day of the week for the displayed month (for example, all Tuesdays in November, 2009), click the heading (S, M, T, and so on) for the day.
   - To select every occurrence of a specific day of the week that is currently displayed onscreen (regardless if the day falls within the same month), double-click the heading (S, M, T, and so on) for the day.

If you need to clear a single selected date, click the date again. To clear multiple selected dates in a single step, click Clear Month to clear all currently selected dates for the currently displayed month or click Clear All to clear all currently selected dates regardless of month or year.

4. If the event dates do follow a pattern, (for example, the third Friday of every month), click Date Pattern to open the Date Pattern dialog box and enter your event date information.

Figure 2-3: Date Pattern dialog box



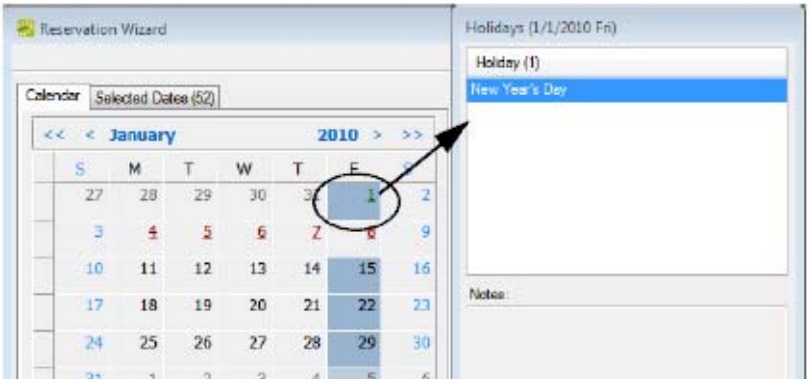
As you specify the event dates, the following occurs:

- The Selected Dates tab is automatically updated with the selected dates.
- If your EMS administrator has configured any of the dates that you selected as a holiday or as closed, then messages open indicating this.
- Dates that are closed appear in red on the Calendar tab and are linked to information about the closure. Dates that are holidays appear in green on the Calendar tab and are linked to information about the holiday.

For dates that are configured as a holiday or as closed, you can:

- Click the link on the Calendar tab to open a dialog box that displays information about the date.

Figure 2-4: Viewing information about a holiday or closed date from the Calendar tab



- Remove the date from the list of selected dates: Open the Selected Dates tab, select the date, or CTRL-click to select multiple dates, and then click Remove.

When you make a reservation for multiple dates, the process is easier if you first remove all holidays or closed dates from the list of selected dates; however, be very careful when selecting dates for removal as you are not prompted to confirm your selection before you click Remove.

In addition, for dates that are configured as holidays, you can:

- View the date link on the Calendar tab: Open the Selected Dates tab, scroll to the date, and then click Go to Date. You can now click the date link on the Calendar tab to open a dialog box that displays information about the holiday.
- View information about the date from the Selected Dates tab: Open the Selected Dates tab, scroll to the date, and then click Holidays.

5. Continue to "To specify the event time and status" on page 41.

To specify the event time and status

1. Do one of the following to specify the start time and end time for the event:
   - Select a time from the dropdown list for each field.
   - Manually enter the time in each field.

When you manually enter the time, you can use a shortcut. For example, for 9:00 am, you need to enter only "9a" and for 2:00 pm, you need to enter only "2p" and so on. If you enter an end time that is earlier than the start time, then the system assumes that the end time is the next day and the phrase "Next Day" appears to the right of the End time field.

2. Do one of the following to specify the Setup and Teardown times.
   - To use the default setup and teardown times that your EMS administrator has assigned to the rooms in your system, leave Use Default selected.
   - To override the default setup/teardown times, clear Use Default, select Minutes or Hours, and then enter your own setup and teardown times.

Remember, setup and teardown times are the hours, or fractions of hours, that you add to the event time to allow staff to prepare a room for the event or to clean up after the event. For example, for a 30 minute setup time, you can enter 30 minutes or 0.5 hours.

3. Indicate the status for the event.

Depending on the status that you select, for example, Tentative or Hold, you might be required to enter a reconfirm date. You can monitor reservations that must be reconfirmed on the Reconfirm Dates tab on the EMS Dashboard. See Chapter 5, "EMS Dashboard," on page 207.

Time zone is discussed in "To select the event location" on page 42.

4. Continue to "To select the event location" below.

To select the event location

When the Reservation Wizard opens, the time zone is set to Eastern Time and you cannot select a different value. If you select a specific building, area, or view when carrying out a standard room search or best fit room search, the time zone is automatically set to the value that your EMS administrator has configured for the selected building, area, or view, and you cannot select a different value. If you select (all) buildings, areas, or views, all applicable time zones become available on the Time Zone dropdown list, and you can select the appropriate time zone for the event. If you carry out a specific room search, the time zone is automatically set to the value that your EMS administrator has configured for the selected building/room, and you cannot select a different value. In addition, you can select a single room or multiple rooms for the event location A single location can actually be a *combination room*, which is a room made of multiple rooms. You have three options for selecting the event location, which are indicated on the first window of the Reservation Wizard:

Search Method	Description
Standard	Use this option to display a list of all the available rooms that meet all the requested dates. See "To search for a standard room" on page 42.
Best Fit	Use this option if no one room can meet all the requested dates. The system lists rooms along with the number of bookings for which you can reserve the room. You can piece together the entire reservation using Best Fit, or just part of it. See "To search for a best fit room" on page 44.
Specific Room	Use this option to confirm the availability and reserve of one specific room for the scheduled event. See "To search for a specific room" on page 46.

By default, EMS looks for an available room or rooms in only the first 50 rooms that it finds in the pre-configured Rooms list. To search more than 50 rooms, before you begin any search, click Options > Max. Number of Rooms to Search, and then select a different number of rooms to search.

To search for a standard room

By default, when you search for a standard room, rooms that are available all day are marked with an asterisk (*). To set or clear this option, click Options > Standard Search > Show Available All Day Indicator.

1. Select Standard.
2. Leave Building set to the default value of (all), or select a specific building in which to search for a standard room.
3. If applicable, select the appropriate time zone for the event.

4. Do one of the following for room specifications:

   - *Type* is the class or category of the room, for example a meeting room, a workspace, an auditorium, and so on. Leave Type set to the default of (all) to search for all pre-configured room types or select a specific room type from the Type dropdown list.
   - *Floor* is optional information when you are searching for a room. A room can be assigned to only a single floor. Example of floors include First Floor, Basement, and Garden Level. Leave Floor set to the default value of (all) to search for all pre-configured floors or select the floor from the Floor dropdown list.
   - *Setup Type* is the physical *layout* or *arrangement* of a room, for example, theater-style, rounds of 6. Leave Setup Type set to the default value of (all) to search for all pre-configured setup types or select the setup type from the Setup Type dropdown list.
   - *Setup count* is the anticipated attendance for the event. If you selected a specific setup type, then you must enter the setup count.

The selected setup type and setup count are applied to all the bookings that you add to this reservation. If any of the bookings require a different setup type or count, you can change this information after you complete the reservation. See "To edit a booking in the Navigator" on page 97 or "Editing Multiple Bookings in the Navigator" on page 99.

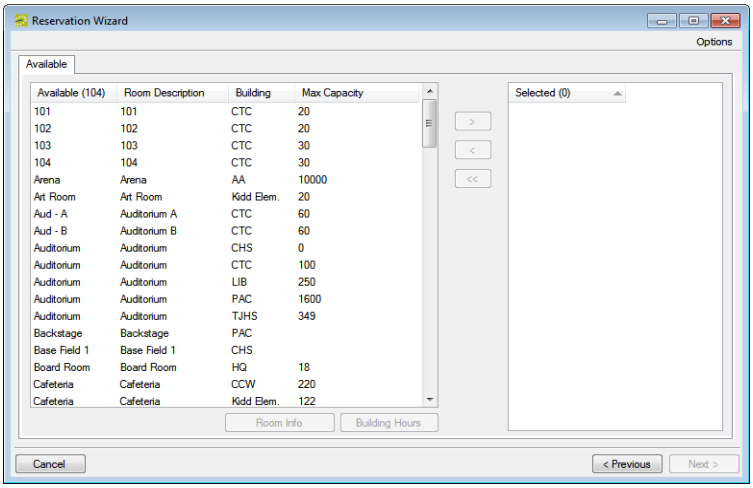
5. Optionally, open the Features tab, and on the tab, select the feature or CTRL-click to select multiple features that the room must have.
6. Click Next.

   Two tabs are available:

   - The Available, which is the active tab, lists all the rooms that meet *all* your event criteria. If you have selected the Available All Day Indicator, the rooms that are available all day are marked with an asterisk (*).
   - The Conflicts tab lists all the rooms that are not available for the requested dates/ times. Optionally, you can open the Conflicts tab to view the list of rooms that were not available for scheduling as well as list of the events that are scheduled for each room.

   See Figure 2-5 on page 44.

Figure 2-5: Example of standard room search results



7. Select the room or CTRL-click to select multiple rooms that are to be scheduled for the event.
8. Optionally, do one or both of the following:
   - Click Room Info to open the Room Info dialog box and view information about any bookings for the room, the room properties, its pricing, and/or to view an image of the room.
   - Click Building Hours to open the Building Hours dialog box which displays the hours that the selected room/building is open on the reserved date.

   Otherwise, click the Move button (>) to move the rooms to the Selected list.

If you select more than one room, all the selected rooms are booked for all the event dates.

9. Click Next to continue to "To specify the event information" on page 48.

To search for a best fit room

1. Select Best Fit.
2. Leave Building set to the default value of (all), or select a specific building in which to search for a standard room.
3. If applicable, select the appropriate time zone for the event.

4. Do one of the following for room specifications:

   - *Type* is the class or category of the room, for example a meeting room, a workspace, an auditorium, and so on. Leave Type set to the default of (all) to search for all pre-configured room types or select a specific room type from the Type dropdown list.
   - *Floor* is optional information when you are searching for a room. A room can be assigned to only a single floor. Example of floors include First Floor, Basement, and Garden Level. Leave Floor set to the default value of (all) to search for all pre-configured floors or select the floor from the Floor dropdown list.
   - *Setup Type* is the physical *layout* or *arrangement* of a room, for example, theater-style, rounds of 6. Leave Setup Type set to the default value of (all) to search for all pre-configured setup types or select the setup type from the Setup Type dropdown list.
   - *Setup count* is the anticipated attendance for the event. If you selected a specific setup type, then you must enter the setup count.

The selected setup type and setup count are applied to all the bookings that you add to this reservation. If any of the bookings require a different setup type or count, you can change this information after you complete the reservation. See "To edit a booking in the Navigator" on page 97 or "Editing Multiple Bookings in the Navigator" on page 99.

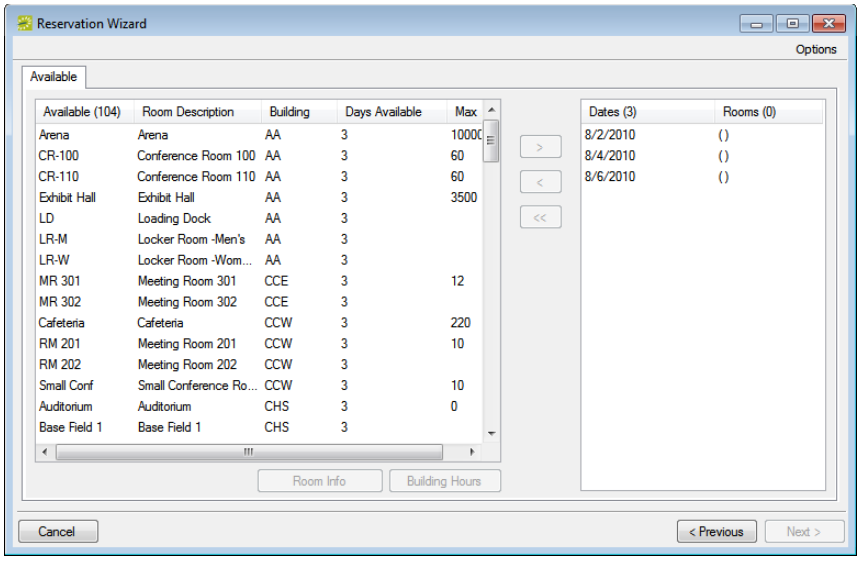
5. Optionally, open the Features tab, and on the tab, select the feature or CTRL-click to select multiple features that the room must have.
6. Click Next.

   Two tabs are available:

   - The Available tab, which is the active tab, opens with two lists. The list in the left pane is a list of all the rooms that meet *some or all* of your event criteria. The list in the right pane is a list of all the event dates that must be fulfilled.
   - The Conflicts tab lists all the rooms that are not available for the requested dates. Optionally, you can open the Conflicts tab to view the list of rooms that were not available for scheduling for the event as well as list of the events that are scheduled for each room.

   See Figure 2-6 on page 46.

Figure 2-6: Example of best fit room search results



7. Optionally, do one or both of the following;otherwise, go to Step 8.

   - Click Room Info to open the Room Info dialog box and view information about any bookings for the room, the room properties, its pricing, and/or to view an image of the room.
   - Click Building Hours to open the Building Hours dialog box which displays the hours that the selected room/building is open on the reserved date.

8. Do one of the following:

   - If one is available, select the single room that is available for all the requested dates, and then click the Move button (>) to move the room to the Event Dates list.
   - If a single room is not available, select a room that is available for *some* of your requested dates, and then click the Move button (>) to move the room to the Event Dates list. Repeat this step as needed to fulfill all the event dates.

9. Click Next to continue to “To specify the event information” on page 48.

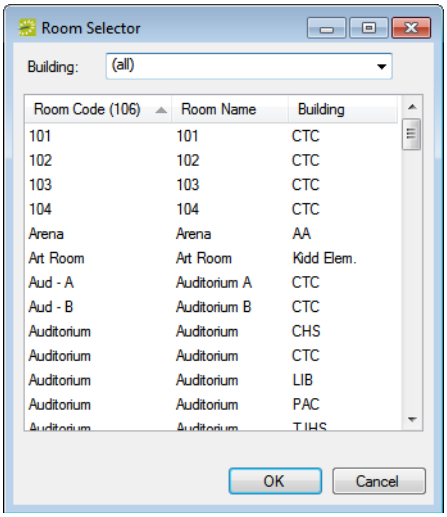
To search for a specific room

You can use the specific room search to book a standard EMS room or a room or area that is not managed in EMS. An *override room*, or “override description,” is used to book an event in a space that has not been configured in your EMS system. For example, your EMS administrator might have configured an override room named “Other Area” in the Engineering building. To book an event in Dr. Wilson's office, which is a room that is not defined in EMS, in the Engineering building, you can select the “Other Area” room and specify “Dr. Wilson's Office” for the location. EMS does not track availability for events booked in override rooms; however, EMS reports on events that are scheduled in an override room just like any other event scheduled for any other room.

1. Select Specific Room.

   The Room Selector dialog box opens.

Figure 2-7: Room Selector dialog box



2. Do one of the following:

   - To select a room from a list of all rooms in all available buildings, select (all) on the Building dropdown list, select a room, and then click OK. If the room is configured as an override room, go to Step 3; otherwise, go to Step 4.
   - To select a room from a list of rooms in a specific building, select the building on the Building dropdown list, select a room, and then click OK. If the room is configured as an override room, go to Step 3; otherwise, go to Step 4.

3. In the Location field, enter the location of the override room, and then click Next to continue to "To specify the event information" on page 48.

4. Click Next.

   Two results are possible:

   - If the event is scheduled for a single date and the room is available, then continue to "To specify the event information" on page 48.
   - In all other cases, (for example, the event is scheduled for a single date but the room is not available or it is a multiple date event), the Available tab opens. This tab lists all the event dates for which the specific room is available. Continue to Step 5.

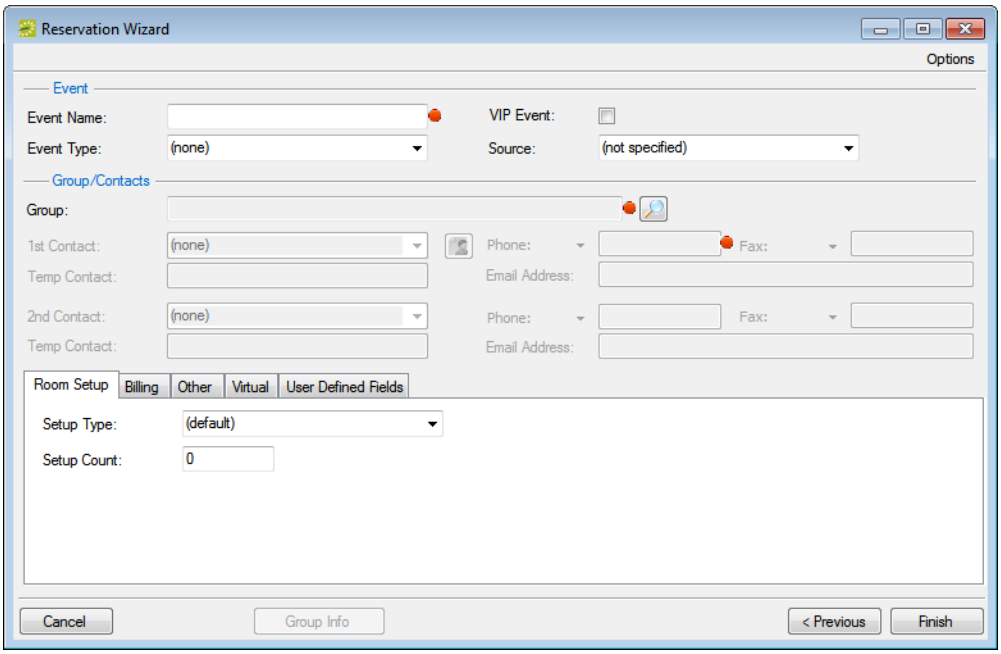
You can open the Conflicts tab to view the list of dates for which the specific room is not available as well as list of the events that are scheduled for the room.

5. Optionally, before you move a date to the Selected list, click Building Hours to open the Building Hours dialog box which displays the hours that the selected room/building is open on the selected date; otherwise, do one of the following:
   - If the specific room is available for all the event dates, then click the Move All button (>>) to schedule the room for all the event dates.
   - If the specific room is not available, try another approach such as reserving a different specific room, or using the Standard or Best Fit search method.
6. Click Next to continue to continue to "To specify the event information" below.

To specify the event information

After you select an event location or locations, you must specify other information for the event. You must enter information in the required fields.

Figure 2-8: Event Information window



1. Enter the event information.

Field	Description
Event	
Event Name	A name or description for the event.
Event Type	The classification for the event.
VIP	Select this option to mark the event as a Very Important event.
Source	The reservation source.

Field	Description
Group/Contact	
Group	Dropdown list of all groups that are available in your system for hosting/ sponsoring an event. **Note:** If the pre-configured list of groups is too extensive to scroll, then click the Search icon to open the Groups window and search for a specific group. See "Searching for Reservations by Group" on page 195. If the group that you want to select for the reservation is not available on the pre-configured list, then you can add the group. See Chapter 6, "Groups and Contacts," on page 231. **Note:** Optionally, after you select a group for the event, you can click Group Info to open a dialog box that provides information (Properties, User Defined Fields, and Comments) about the group.
1st Contact Temp Contact	When you select a group, if a *default* contact has been defined for the group, then this field is automatically populated with the name of the contact; otherwise, the field is blank. You have several options for defining the 1st Contact for a reservation: • If the field is blank, but contacts have been configured for the group, you can select a contact from the pre-configured list. • If the field is populated with a default value, but other contacts have been configured for the group, you can select a different contact from the pre-configured list. • If the field is blank, and no contacts have been configured for the group, or the contact that you want to select for the group is not available on the pre-configured list, you can click the Contact icon to open the Contact dialog box and create a *permanent* contact for the group. See Chapter 6, "Groups and Contacts," on page 231. • If you want to create a *temporary* contact just for this event, then select (temporary contact), and in the Temp Contact field, enter the name for the temporary contact. **Note:** If a default contact has been configured for the group, then any modifications that you make for the contact apply to this reservation only. The next time you or anyone else creates a reservation for this group, the 1st Contact field is again automatically populated with the name of the default contact.
Phone Fax Email Address	One more of these fields might be automatically populated depending on how a selected contact has been configured. You can manually edit these values if needed. **Note:** The Phone and Fax fields have a dropdown list available on which you can select a different value (Phone, Fax, Mobile, or Other) for the field label, or you can enter a user-defined value. To enter a user-defined value, double-click the current field label to select it, and then enter the user-defined value over the selected label. **Note:** If default values have been configured for a selected contact, then any modifications that you make apply to this reservation only. The next time you or anyone else creates a reservation for the same contact, these fields are again automatically populated with the default information.

Field	Description
2nd Contact Temp Contact	Define if necessary for the event.
Room Setup tab	
Setup Type	If you selected a specific value for the setup type when searching for an event location, this value is carried forward to this field; otherwise, the field is set to (default). You can modify this value.
Setup Count	If you selected a specific value for the setup type when searching for an event location, this value is carried forward to this field; otherwise, the field is blank. You can enter a value in this field.
Billing tab	
Pricing Plan	Indicates what type of pricing is to be used for the event.
Billing Reference	• The internal alphanumeric billing code that is associated with the group.
Sales Category	• How the group is sorted for purposes of tracking sales figures, for example, local, regional, national, and so on.
Payment Type	• Indicates how the group paid for the event (cash, check, charged, and so on).
PO Number	• The internal alphanumeric purchase order number that is associated with the group.
Salesperson	• The user who “sold” the event to the group.
Note: Depending on the group that you select, one or more of these fields might be automatically populated with default values. You can edit these default values but any modifications that you make apply to this reservation only. The next time you or anyone else creates a reservation for the same group, these fields are again automatically populated with the default billing information.	
Other tab	
Event Coordinator	The Event Coordinator who is assigned to the event.
Estimated Event Attendance	The estimated number of people who are expected to attend the event.
Calendar Style	Dropdown list of all the available formats for printing this event on the Event Calendar and Event Schedule reports.

Field	Description
Virtual tab	
Web User	To specify the web users who can view/manage this reservation in VEMS, click the Search icon to open the Web Users dialog box and search from a list of registered web users. • You can search by User Name or Email Address. • To search a list of all available web users, leave the Search field in the Web Users dialog box blank, and then click Display. • To search for a specific web user, enter a search string in the Search field, and then click Display. **Note:** The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if searching by Email Address, a search string of "bb" returns **bb**osworth@dea.com but not dbobbett@dea.com. • To return this field to the (no change) value at any time, click Reset.
Web Process Template	The web process template that defines the functions that are available for the selected web user. **Note:** A web user might be assigned to more than one web process template, so make sure to select the template that is applicable for this reservation.
User Defined Fields tab	
	User-defined fields are additional fields that store custom data for a reservation. Your EMS Administrator configures the types of fields that are available as well as the allowed values for these fields. • To enter or modify a value for a field, select the field, and then click Set Value. • To clear a value for a field, select the field, and then click Clear Value. **Note:** If a user-defined field is not required here, you can always supply a value for it at a later date in the Navigator. See "Working with User Defined Fields in the Navigator" on page 164.

2. Click Finish.

   The Navigator window opens. The reservation information appears in the window. You use this window to add booking details and to make any needed modifications to the reservation and its bookings. See Chapter 3, "The Navigator," on page 69.

A reservation is not complete and rooms are not removed from the Available list until you click Finish. Although unlikely, it is possible for another user to select and reserve a room during the time period after you have selected the room but before you have finalized the reservation. If this occurs, after you click Finish, a message opens stating that your reservation conflicts with an existing reservation.

Viewing and Editing Reservations in the Reservation Book

The Reservation Book provides a graphical view of all the confirmed reservations (the reserved time as well as the room for which the reservation is scheduled) for your organization. (Cancelled bookings are not shown.) You use the Reservation Book to the view information for a reservation, to edit an existing reservation, and to make a new reservation. In addition, when the Reservation Book first opens, before you edit or make a reservation, you can change the Reservation Book view so that it better suits your working needs.

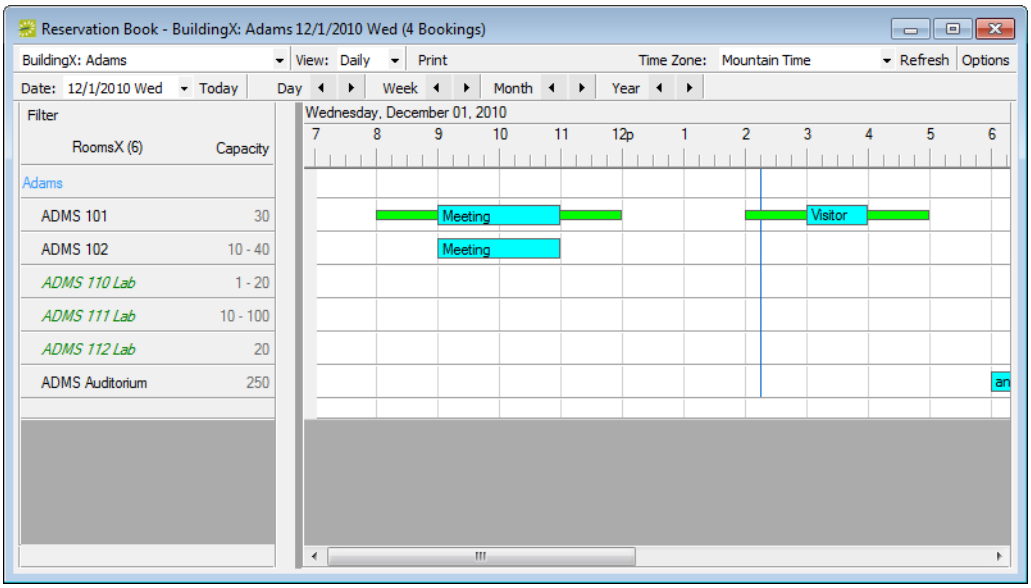
Reservation Book

To open the Reservation Book, on the toolbar, click the Book icon

. When the Reservation Book *first* opens, by default, it opens in the Daily view and all reservations scheduled in all buildings for the current day's date are displayed. (You might need to use the Scroll feature on the right side of the book to scroll through all the reservations that are scheduled for the current day's date.) Minimum and maximum capacities are displayed next to room descriptions. The current time is shown by a vertical line in the grid, called the Current Time Indicator. A reservation in the book has three components:

- A left bar that indicates the setup time.
- A middle bar that indicates the event time and location.
- A right bar that indicates the teardown time.

Figure 2-9: Reservation Book

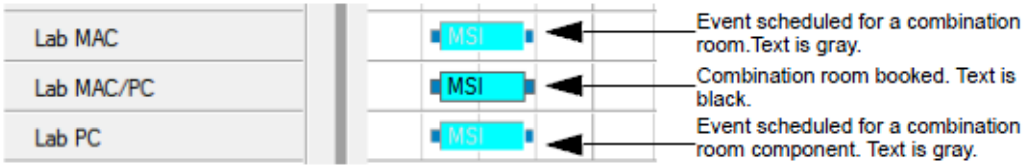


If an event is scheduled for a room that is a component of a combination room, then the reservation text is displayed in black. A duplicate reservation is also shown for the combination room; however, the reservation text is displayed in gray to indicate that a component of the combination room is currently booked for the indicated time and therefore, the combination room is not available.

Figure 2-10: Components booked and combination room unavailable

Conversely, if an event is scheduled for a combination room, then the reservation text for the combination room is displayed in black and the reservation text for each component is displayed in gray. This reversed color coding indicates that the component room is currently booked for the selected time and that none of the components is available.

Figure 2-11: Combination room booked and components unavailable



You can carry out the following actions in the Reservation Book:

- Change the Reservation Book view. See “To change the Reservation Book view” on page 54.
- View reservation information. See “To view reservation information” on page 59.
- Make a new reservation. See “To make a new reservation” on page 62.
- Edit an existing reservation. See “To edit an existing reservation” on page 63.

To change the Reservation Book view

1. On the toolbar, click the Book icon

.

   The Reservation Book opens in the Daily view. See Figure 2-9 on page 52.

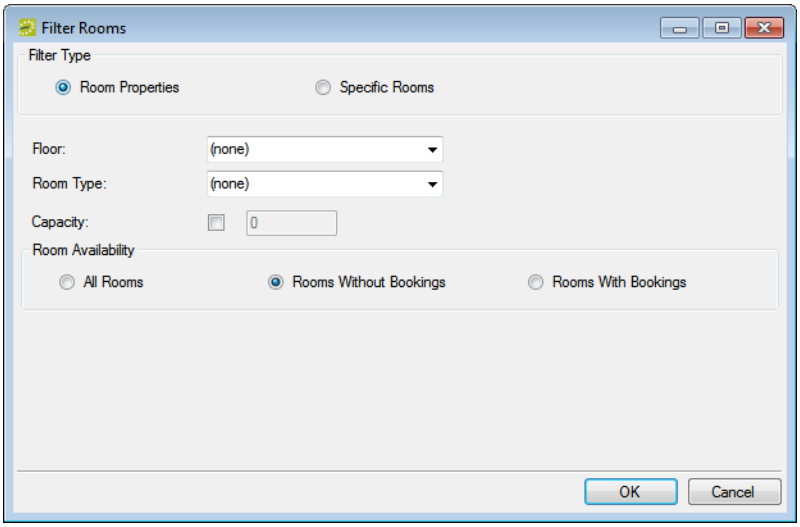
2. Optionally, you can do one or more of the following to change the Reservation Book view:

   - Change the list of rooms that are displayed in the Reservation Book based on room properties.

Above the Rooms list, click Filter to open the Filter Rooms dialog box and select Room Properties. On this dialog box, you can change the room display to show one of the following:

- All rooms or all rooms that have a specific capacity and that might be on a specific floor and/or have a specific room type
- Only those rooms without bookings or only those rooms without bookings that have a specific capacity and that might be on a specific floor and/or have a specific room type
- Only those rooms with bookings or only those rooms with bookings that have a specific capacity and that might be on a specific floor and/or have a specific room type

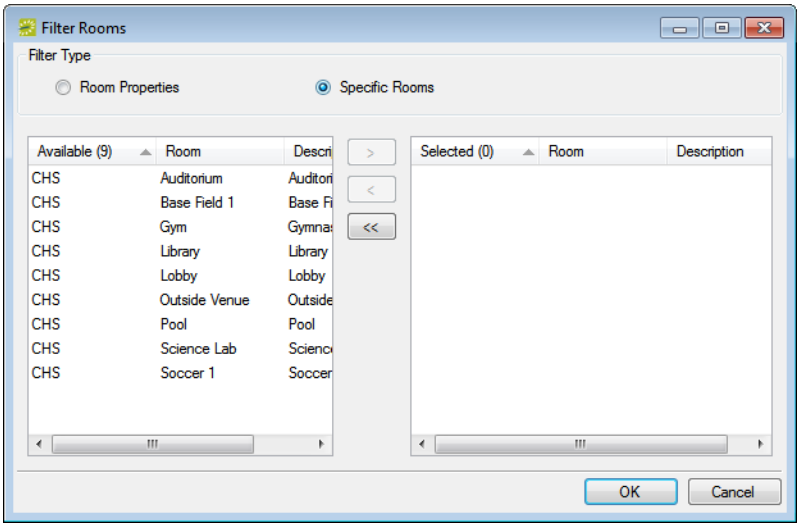
Figure 2-12: Filter Rooms dialog box, Room Properties selected



- Change the list of rooms that are displayed in the Reservation Book based on a specific room or rooms.

Above the Rooms list, click Filter to open the Filter Rooms dialog box and select Specific Room. Select the room, or CTRL-click to select multiple rooms on the Available list, and then click the Move (>) button to move the selected rooms to the Selected list. The Reservation Book is updated to show bookings only for the selected rooms.

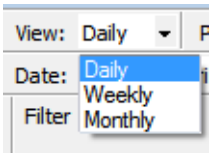
Figure 2-13: Filter Rooms dialog box, Specific Room selected



- Change the Reservation Book view.

On the View dropdown list, select Daily, Weekly, or Monthly.

Figure 2-14: View dropdown list



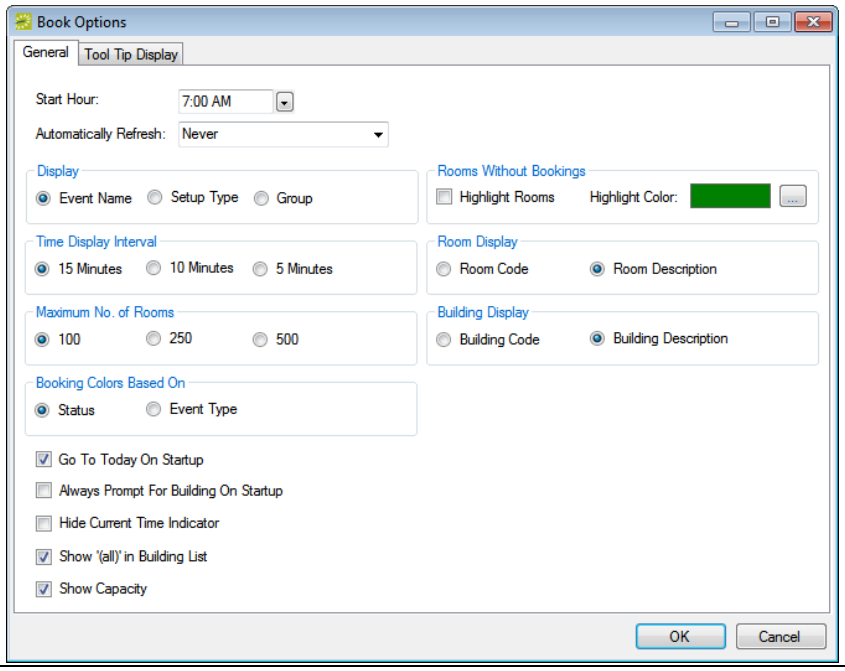
Note: Although you can view currently scheduled reservations in either the daily, weekly, or monthly view, you can make a new reservation only in the daily view.

- Change multiple display options for a reservation.

Click Options (upper right hand corner of Reservation Book) to open the Book Options dialog box and change multiple display options for a reservation:

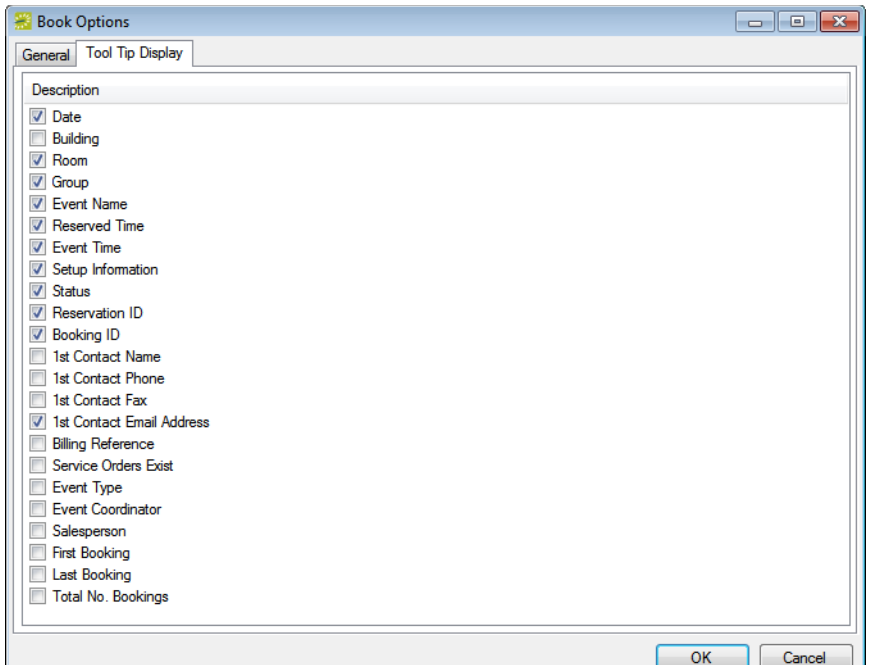
- Start Hour—Daily start time for display.
- Automatically Refresh—The time interval at which the Reservation Book is automatically refreshed.
- Display—The information that appears in the middle bar for a reservation.
- Time Display Interval—Changes the granularity of the time display interval.
- Maximum No. of Rooms—The maximum number of rooms to display in the book.
- Booking Colors Based On—The color of the bookings in the reservation. Select one: Status, Event Type, or Check-in Status (for EMS Workplace only.)
- Rooms without Bookings—Whether to highlight rooms without bookings and if so, the highlight color.
- Room Display—Display room code or room name for a reservation.
- Building Display—Display building code or building name for a reservation.
- Go to Today on Startup—If selected, the Reservation Book opens to the current day's date; otherwise, it opens to the last date viewed
- Always Prompt for Building on Startup—Open the Buildings/Views dropdown list from which you must select a building, an area, or a view to display the corresponding reservations. (A *view* is simply a user-defined grouping of specific rooms. See "Defining your Views" on page 354.) If this option is not selected, then all reservations for all rooms in all buildings are displayed.
- Hide Current Time Indicator—Show or hide the vertical bar that indicates the current time.
- Show "(all)" in Building List—Show the "all" option on the Building dropdown list; otherwise, a user must select a specific building.
- Show Capacity—Show the minimum and maximum capacities next to the room description.

Figure 2-15: Book Options dialog box



- Select which items to include in the tooltip that opens when you rest the mouse pointer on an event in the Reservation Book.

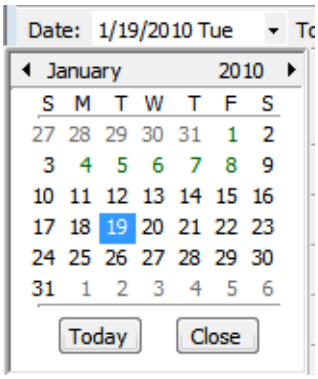
Figure 2-16: Book Options dialog box, Tooltip Display tab



- Change the display date using the calendar.

On the Date field, click the dropdown arrow to open the Calendar. Use the scroll features (< and >) at the top of the calendar to change the month or year. To select a different date for a month, click the date.

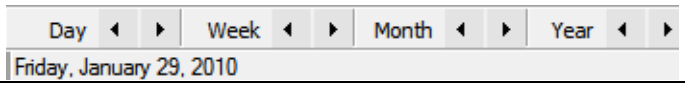
Figure 2-17: Reservation Book calendar



- Change the display date using the Reservation Book scroll features.

Use the scroll features at the top of the reservation book display to scroll to a different day, week, month, year, or any different combination of these.

Figure 2-18: Reservation Book calendar scroll features



To view reservation information

1. On the toolbar, click the Book icon

.

   The Reservation Book opens in the Daily view. See Figure 2-9 on page 52.

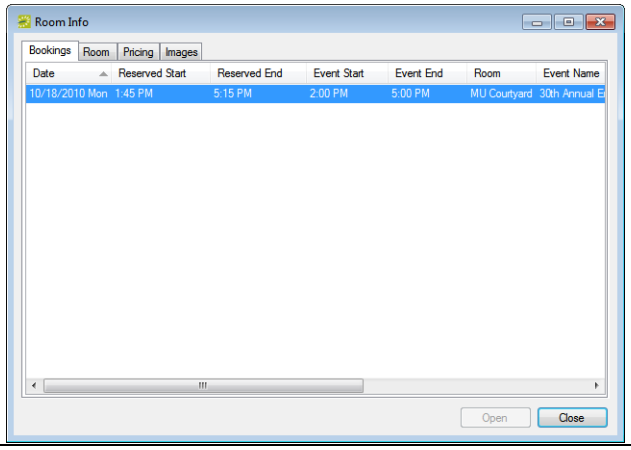
Optionally, when the Reservation Book first opens, before you view, edit or make a reservation, you can change the Reservation Book view so that it better suits your working needs. See "To change the Reservation Book view" on page 54.

2. Optionally, you can do one or more of the following to view the reservation information:
   - View the reservation in the Navigator by doing one of the following:
     - Double-click the middle bar for the reservation entry.
     - Right-click the reservation entry and on the context menu that opens, click Open.

     See Chapter 3, "The Navigator," on page 69.
   - List the bookings for a room.

Click on the room name or code in the Rooms list to open the Bookings tab for the Room Info dialog box. The tab on this dialog box lists all the bookings for the selected room based on the current view (Daily, Weekly, Monthly) and on the date that is shown in the Date field.

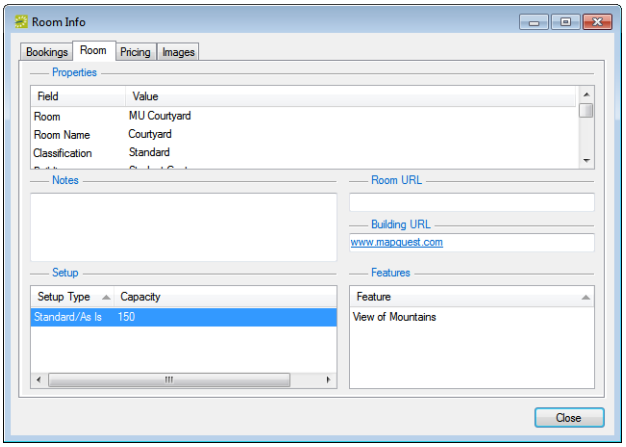
Figure 2-19: Room Info dialog box, Bookings tab



- View the properties for a room.

Click on the room name or code in the Rooms list to open the Bookings tab for the Room Info dialog box, and then open the Room tab. The tab on this dialog box lists all the properties for the room, such as the room code, the room name, the room classification, and so on. It also lists the setup type and capacity for the room, and any notes that have been entered for the room.

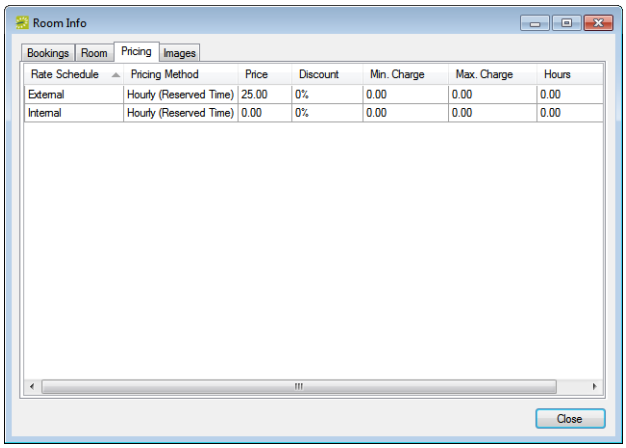
Figure 2-20: Room Info dialog box, Room tab



- View the pricing for a booked room.

Click on the room name or code in the Rooms list to open the Bookings tab for then Room Info dialog box, and then open the Pricing tab. This tab displays any pricing information that was defined for the room.

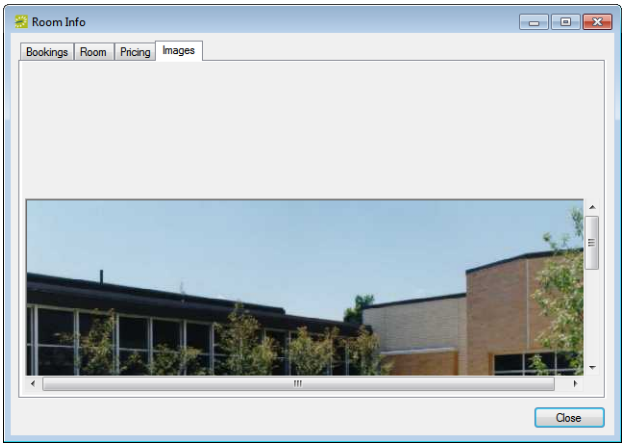
Figure 2-21: Room Info dialog box, Pricing tab



- View images of a room.

Click on the room name or code in the Rooms list to open the Bookings tab for then Room Info dialog box, and then open the Images tab. This tab displays any uploaded images of the room.

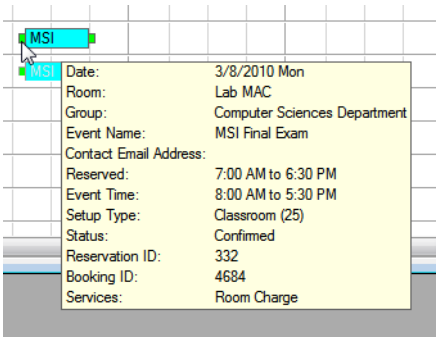
Figure 2-22: Room Info dialog box, Images tab



- View the setup information, event information, or teardown information for a reservation.

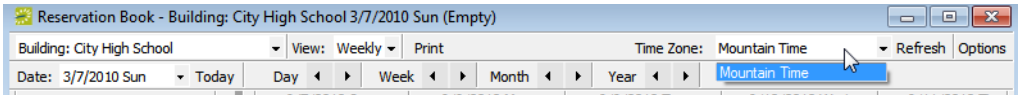
Rest the mouse pointer on the left bar, middle bar, or right bar for the reservation entry. A tooltip showing the respective setup, event, or teardown information opens.

Figure 2-23: Viewing setup information



- If buildings that are located in multiple time zones are currently displayed, you can specify the time zone in which to view all of your bookings.

Figure 2-24: Changing the time zone



To make a new reservation

1. On the toolbar, click the Book icon

.

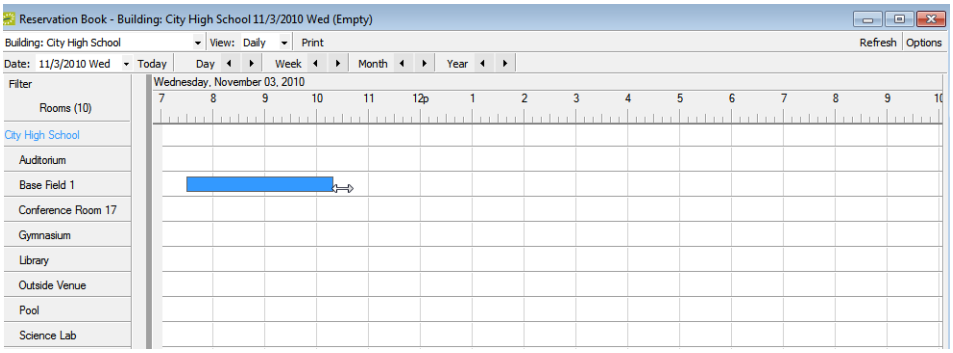
   The Reservation Book opens in the Daily view. See Figure 2-9 on page 52.
2. Change the display to show the room for which you are making the reservation.
3. Select the date for which you are making the reservation.

You must leave the Date view in the Daily display.

4. In the Time Grid next to the room, click and hold the left mouse button, drag the mouse to schedule the room and time, and then release the mouse button to open the Reservation Wizard.

As you drag the mouse, the cursor changes to a double-headed arrow and a blue horizontal bar is displayed.

Figure 2-25: Making a new reservation in the Reservation Book



5. Continue to “Making a Reservation Using the Reservation Wizard” on page 37.

To edit an existing reservation

1. On the toolbar, click the Book icon

.

   The Reservation Book opens in the Daily view. See Figure 2-9 on page 52.

Optionally, when the Reservation Book first opens, before you view, edit or make a reservation, you can change the Reservation Book view so that it better suits your working needs. See "To change the Reservation Book view" on page 54.

2. Optionally, you can do one or more of the following to edit an existing reservation:

Step	Action
Change the setup time for a reservation	• Drag the left bar horizontally to a new time. • Click Yes in the Confirm Change dialog box.
Change the event time	• Drag the middle bar horizontally to a new time. • Click Yes in the Confirm Change dialog box.
Change the teardown time for a reservation	• Drag the right bar horizontally to a new time. • Click Yes in the Confirm Change dialog box.
Edit the reservation building, room, time, or both	• Drag and drop the reservation to a new room that is the same building or in a different building, and/or to a new time. • Click Yes in the Confirm Change dialog box.

3. Optionally, you can right-click on a reservation and on the context menu that opens, select one of the following:

Option	Description
Open	Opens a reservation in the EMS Navigator.
Add to Personal Calendar	Adds the reservation to your personal calendar.
Move Forward	Move the reservation date forward by one day or one week.
Move Backward	Move the reservation date backward by one day or one week.
Move to Specific Date	Move the reservation to a specific date.
Change Status	Change the status of the reservation.
Copy Bookings	Opens the Copy Bookings wizard. See "Copying Multiple Bookings in the Navigator" on page 116.
Swap Rooms	Swap the room assignments of two events. The swap option is applicable only for two events that have identical meeting patterns.
Highlight Related Reservations	Highlights the bookings that belong to the same reservation.

Finding and Making a Reservation for a Group

You can also make a reservation by finding a group in EMS and then making a reservation for the group from the Groups window. In EMS Workplace, you can make a group reservation from the Group Reservation window.

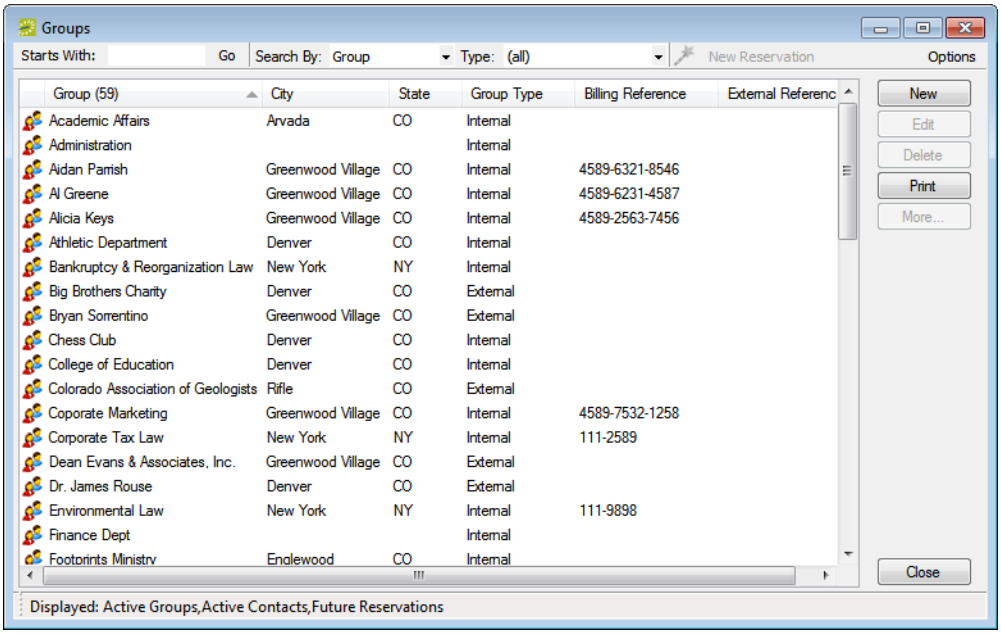
To find and make a reservation for a group

1. On the toolbar, click the Groups icon

.

   The Groups window opens.

Figure 2-26: Groups window

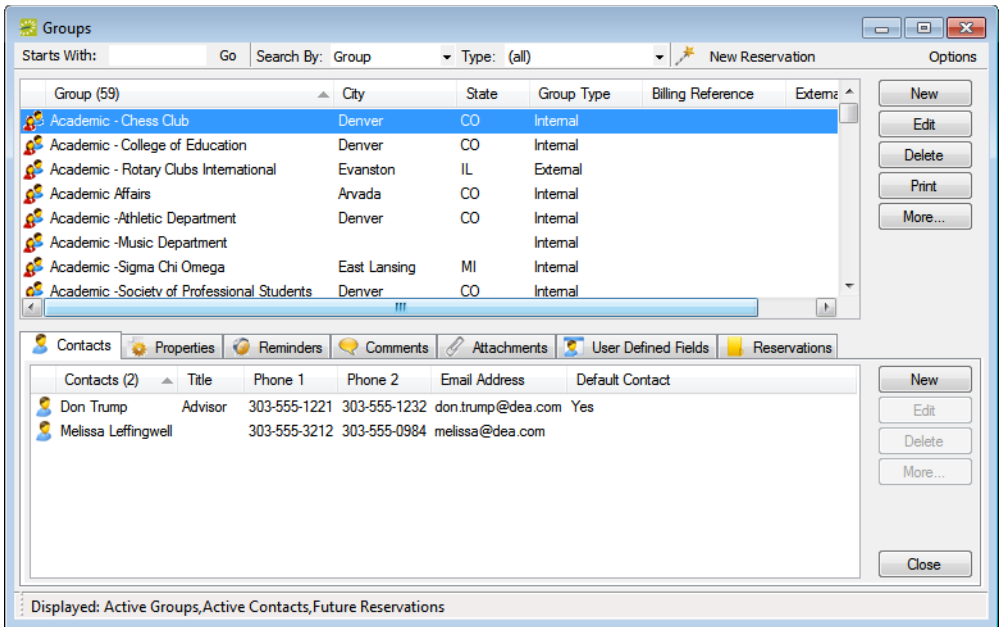


2. Select the group for which you are making the reservation.

If needed, you can use the search features at the top of the Groups window to search for the correct group. See "Searching for Reservations by Group" on page 195.

Seven tabs—Contacts, Properties, Reminders, Comments, Attachments, User Defined Fields, and Reservations—appear on the lower part of the Groups window. See Figure 2-27 on page 65.

Figure 2-27: Group windows with additional tabs



For a complete description of each of these tabs, see "Overview of the Groups window" on page 233.

3. Do one of the following to open the Reservation Wizard and make a reservation for the group:

   - At the top of the Groups window, click New Reservation.
   - Open the Reservations tab for the group, and on the tab, click New.

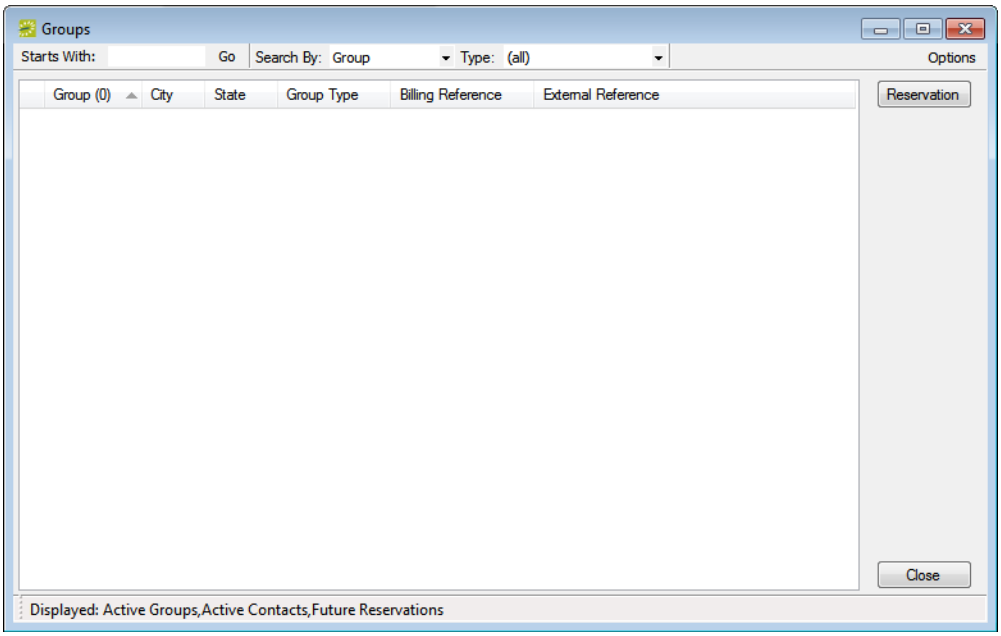
   See "Making a Reservation Using the Reservation Wizard" on page 37.

To make a group reservation from the Group Reservation window (EMS Workplace Only)

1. On the toolbar, click the Group Reservation icon 
.

   The Group Reservation window opens.

Figure 2-28: Group Reservation window

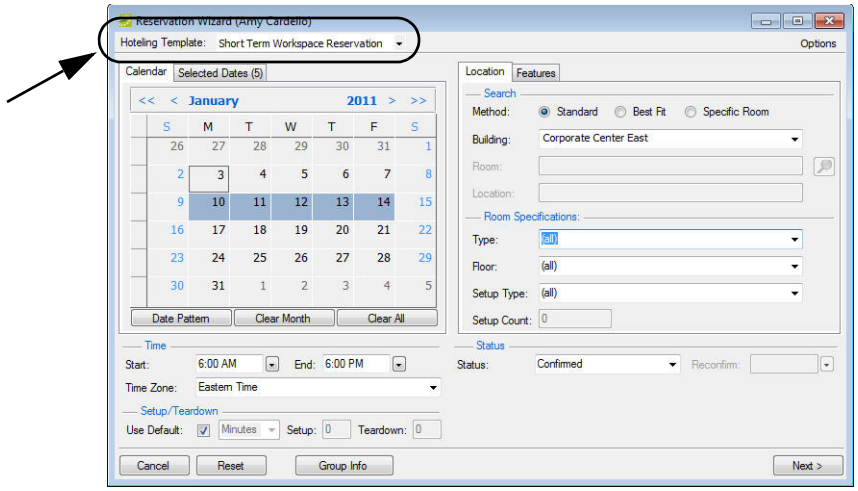


2. Search for the group for which you are making a reservation. (See "To search for a group in the Groups window" on page 235.)
3. Select the group, click Reservation, and then select the appropriate hoteling template.

   The Reservation Wizard opens. The Hoteling Template dropdown list is available at the top of the wizard with the template that you selected in the Group Reservation area displayed on the Hoteling Template dropdown list. See Figure 2-29 on page 67.

To create a Hoteling template, see "Configuring Hoteling Wizard Templates" on page 382.

Figure 2-29: Reservation Wizard with Hoteling Template option



4. Continue making the reservation as you normally would. See “Making a Reservation Using the Reservation Wizard” on page 37.

Chapter 2
Reservations and Bookings

Chapter 3
The Navigator

The Navigator is a window in EMS that you use to view and manage all aspects of a reservation including bookings and booking details.

This chapter covers the following topics:

- "Navigator Overview" on page 71.
- "Adding Bookings to a Reservation in the Navigator" on page 84.
- "Editing a Reservation in the Navigator" on page 85.
- "Repricing Categories and Room Charges for a Reservation" on page 87.
- "Changing the Status for a Reservation from the Reservation Summary tab" on page 89.
- "Copying a Reservation in the Navigator" on page 93.
- "Editing a Booking in the Navigator" on page 96.
- "Editing Multiple Bookings in the Navigator" on page 99.
- "Moving Bookings to a Different Reservation" on page 114.
- "Copying Multiple Bookings in the Navigator" on page 116.
- "Booking Details and Items Overview" on page 119.
- "Adding Booking Details and Items to Individual Bookings" on page 123.
- "Adding Booking Details and Items to Multiple Bookings" on page 132.
- "Adding Booking Detail Items to Multiple Bookings" on page 139.
- "Editing Booking Detail Items for Individual Bookings" on page 141.
- "Editing Booking Detail Item Charges in the Navigator" on page 145.
- "Editing Count Information for a Booking in the Navigator" on page 147.
- "Applying a Reservation Discount" on page 149.
- "Copying Booking Details between Bookings" on page 151.
- "Deleting Booking Detail Items for Multiple Bookings" on page 153.
- "Deleting Booking Details from Multiple Bookings" on page 156.
- "Working with Comments and Reminders in the Navigator" on page 158.
- "Adding Multiple Comments and Reminders to a Reservation" on page 162.
- "Working with User Defined Fields in the Navigator" on page 164.

- “Working with Attachments in the Navigator” on page 168.
- “Working with Drawings in the Navigator” on page 172.
- “Running the Resource Utility Conflicts Tool” on page 175.

Navigator Overview

This section provides an overview of opening a reservation the Navigator, the Navigator's folder structure, and the commands that are available in the Navigator.

Opening a reservation in the Navigator

After you create a new reservation using the Reservation Wizard, the reservation opens automatically in the Navigator. You can also manually open the Navigator by:

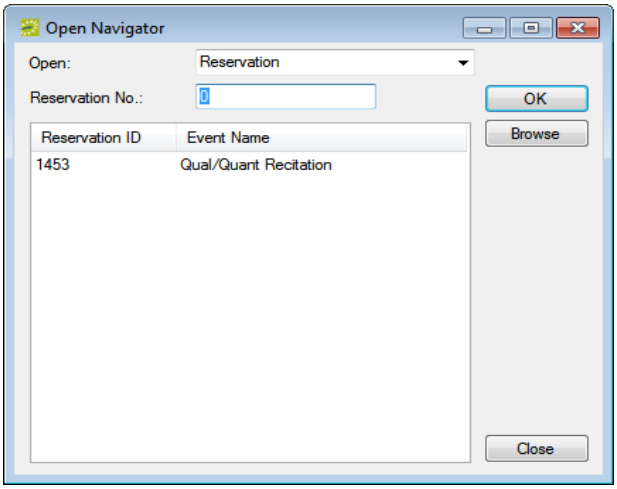
- "Opening a reservation directly in the Navigator."
- "Opening a reservation through the Reservation Book."
- "Opening a reservation through a group."
- "Opening a reservation through a search."

Opening a reservation directly in the Navigator

1. On the toolbar, click the Navigator icon

to open the Open Navigator dialog box.

Figure 3-1: Open Navigator dialog box



2. On the Open dropdown list, select the item that is to be opened (reservation, booking, or service order).

3. Do one of the following:
   - In the Reservation No. field, enter the number for the reservation, and then click OK.
   - To enter the last reservation, booking, or service order, that you made during your *current* or *last* EMS session, double-click in the field, and then click OK.

If you do not know the reservation number, you can search for the reservation. On the Navigator, click Browse to open the Browser, and then continue to "Searching with the Browser or with the Web Reservation Tool"

Opening a reservation through the Reservation Book

On the toolbar, click the Book icon

to open the Reservation Book, and then in the Reservation Book, double-click a booking for the reservation. See "Viewing and Editing Reservations in the Reservation Book" on page 52.

Opening a reservation through a group

On the toolbar, click the Groups icon

to open the Groups window and do the following:

- Select a specific group.
- Open the Reservations tab at the bottom of the Groups window and double-click the reservation that you are editing.

See "Finding and Making a Reservation for a Group" on page 64.

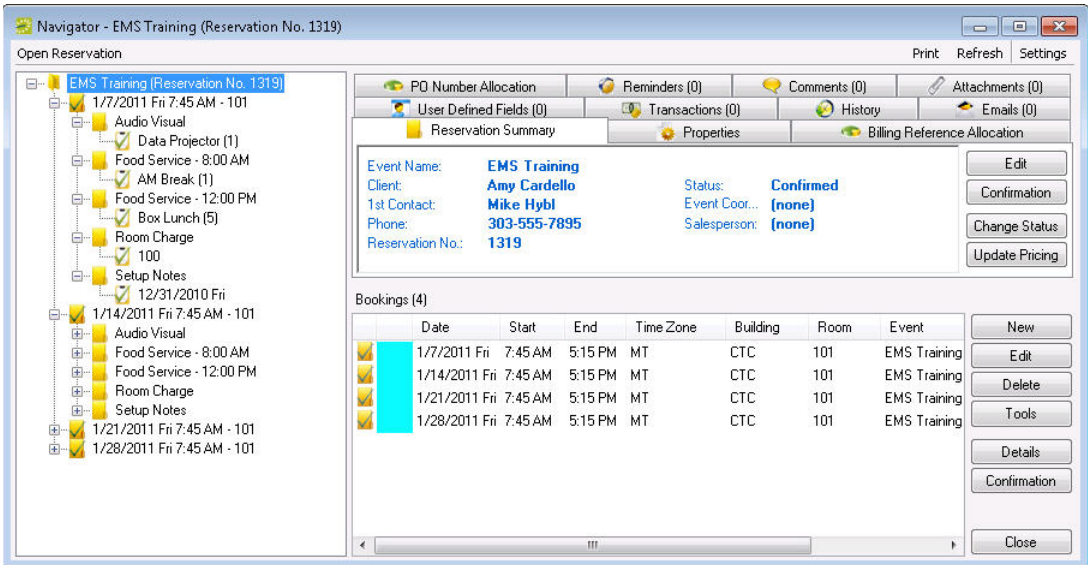
Opening a reservation through a search

See Chapter 4, "Search Tools," on page 177.

Folder structure

The left pane in the Navigator is arranged in a Windows Explorer-style folder structure. A top-level folder in the left pane is referred to as a *reservation folder.* The folders that are located beneath a reservation folder are referred to as *booking folders*. The folders that are located beneath a booking folder are referred to as *booking detail folders*.

Figure 3-2: Navigator window with a reservation folder selected



Reservation folder

A reservation folder contains the *who* and the *what* information for the reservation. With a reservation folder selected in the left pane of the Navigator, the following tabs are displayed in the upper right pane of the Navigator:

- Reservation Summary tab—The Reservation Summary displays information about the selected reservation, including the event name, the group for which the reservation was made, the group contact name, the group contact phone number, and the reservation number.
- Properties tab—The Properties tab displays not only the same information as the Reservation Summary tab, but also, information such as the event type, the second group contact, the date that the reservation was added, the date that the reservation was changed, and so on.

- Billing Reference Allocation tab—By default, the charge for a reservation can be allocated to a single billing reference number. On the Billing Reference Allocation tab, you can allocate the charge for a reservation to multiple billing reference numbers by percentage. See "To allocate charges to multiple billing reference numbers and/or PO numbers" on page 75.

Your EMS administrator must enable the Use Billing Reference Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

- PO Number Allocation tab—By default, the charge for a reservation can be allocated to a single purchase order (PO) number. On the PO Number Allocation tab, you can allocate the charge for a reservation to multiple billing PO numbers by percentage. See "To allocate charges to multiple billing reference numbers and/or PO numbers" on page 75.

Your EMS administrator must enable the Use PO Number Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

- Reminders tab—The Reminders tab displays any reminders that were created for the selected reservation. See "Working with Comments and Reminders in the Navigator" on page 158.
- Comments—The Comments tab displays any text entries that were made for the selected reservation. See "Working with Comments and Reminders in the Navigator" on page 158.
- Attachments tab—The Attachments tab displays any attachments (files) that have been saved with the reservation. See "Working with Attachments in the Navigator" on page 168.
- User Defined Fields—The User Defined Fields tab displays the additional fields that store custom data for a reservation. Your EMS Administrator configures the types of fields that are available as well as the allowed values for these fields. See "Working with User Defined Fields in the Navigator" on page 164.
- Transactions—The Transactions tab displays any invoices that were generated for the selected reservation or any payments that were applied to the selected reservation. See Chapter 9, "Billing," on page 313 for detailed information about invoices and other financial transactions in EMS Professional.
- History tab—The History tab displays the history for the reservation—the date that a change was made to the reservation, the ID of the user who made the change, the field that was changed, the old field value, and the new field value.
- Emails tab—The Emails tab displays any summarizing information for any emails that were sent via SMTP to the group for whom the reservation was made. See "Sending Email from EMS" on page 360.

The bookings for the selected reservation are displayed in the Bookings pane (the lower right pane) of the Navigator. The colored rectangle to the left of a booking indicates the booking's status. If a booking has been canceled, a Canceled icon is displayed on the booking folder in both the Reservation (left) pane and the Bookings pane.

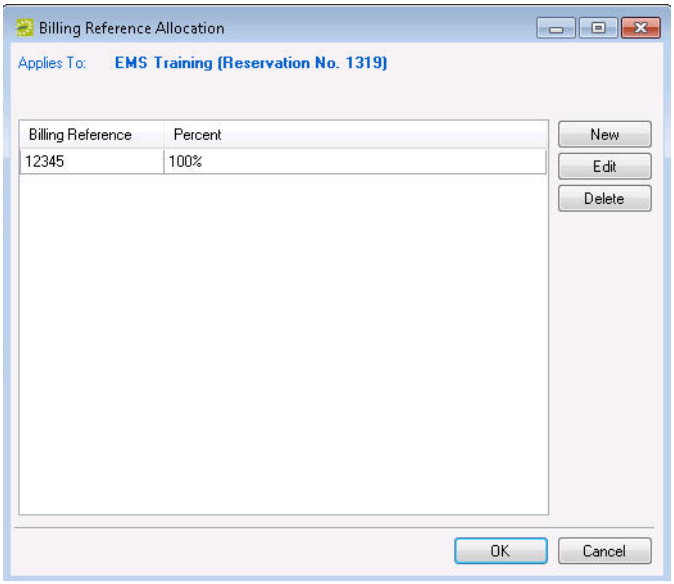
To allocate charges to multiple billing reference numbers and/or PO numbers

The following procedure details how to allocate the charge for a reservation to multiple billing reference numbers/PO numbers; however, by analogy, you can follow this procedure to allocate the charge for a booking, or booking detail to multiple billing reference numbers and/or PO numbers as well.

1. For a selected reservation, open the Billing Reference Allocation tab, and then click Edit.

   The Billing Reference Allocation dialog box opens. By default, when this dialog box first opens, it displays the charge for the reservation allocated 100% to a single billing reference number.

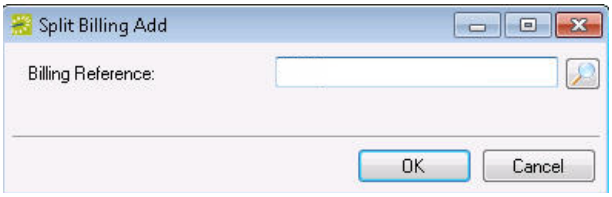
Figure 3-3: Billing Reference Allocation dialog box



2. Click New.

   The Split Billing Add dialog box opens.

Figure 3-4: Split Billing Add dialog box



3. Enter a new billing reference number to which to allocate the reservation charge, and then click OK.

   The Split Billing Add dialog box closes. You return to the Billing Reference Allocation dialog box with the newly added billing reference numbers displayed with a 0% allocation.

4. Repeat Step 2 and Step 3 until you have added all the needed billing reference numbers.

5. For each new billing reference number, double-click to select the percent, and then change the percent to the appropriate value.

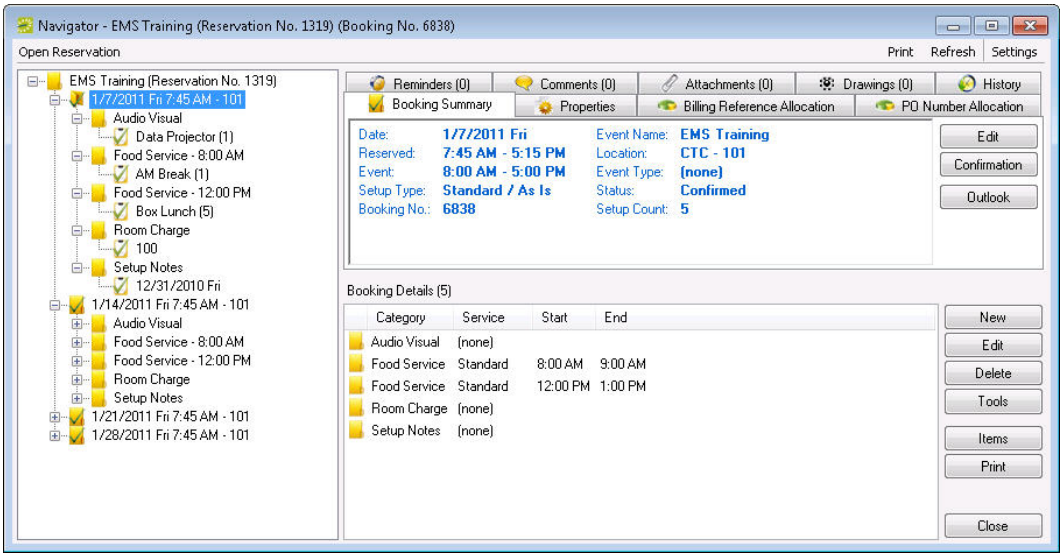
6. Click OK to close the Billing Reference Allocation dialog box and return to the Billing Reference Allocation tab.

   All the billing reference numbers and their percent allocation are displayed on the tab.

Booking folder

Booking folders contain the *where* and *when* information for the reservation. If you can expand a booking folder, this indicates that details have been added to the booking. The booking details for the selected booking are displayed in the Booking Details pane (the lower right pane) of the Navigator. A green background for a booking detail folder indicates that one or more booking detail items have been invoiced for the booking.

Figure 3-5: Navigator window with a booking folder selected



With a booking folder selected in the left pane of the Navigator, the following tabs are displayed in the upper right pane of the Navigator:

- Booking Summary tab—The Booking Summary displays information about the selected booking, including the event date, the reserved time, the event time, and so on.

To add the selected booking to your personal calendar, click Outlook. > Add to Personal Calendar.

- Properties tab—The Properties tab displays not only the same information as the Booking Summary tab, but also, information such as the event type, the setup count, the date that the booking was added, the date that the booking was changed, and so on.
- Billing Reference Allocation tab—By default, the charge for a booking can be allocated to a single billing reference number. On the Billing Reference Allocation tab, you can allocate the charge for a booking to multiple billing reference numbers by percentage. See "To allocate charges to multiple billing reference numbers and/or PO numbers" on page 75.

Your EMS administrator must enable the Use Billing Reference Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

- PO Number Allocation tab—By default, the charge for a booking can be allocated to a single purchase order (PO) number. On the PO Number Allocation tab, you can allocate the charge for a reservation to multiple billing PO numbers by percentage. See "To allocate charges to multiple billing reference numbers and/or PO numbers" on page 75.

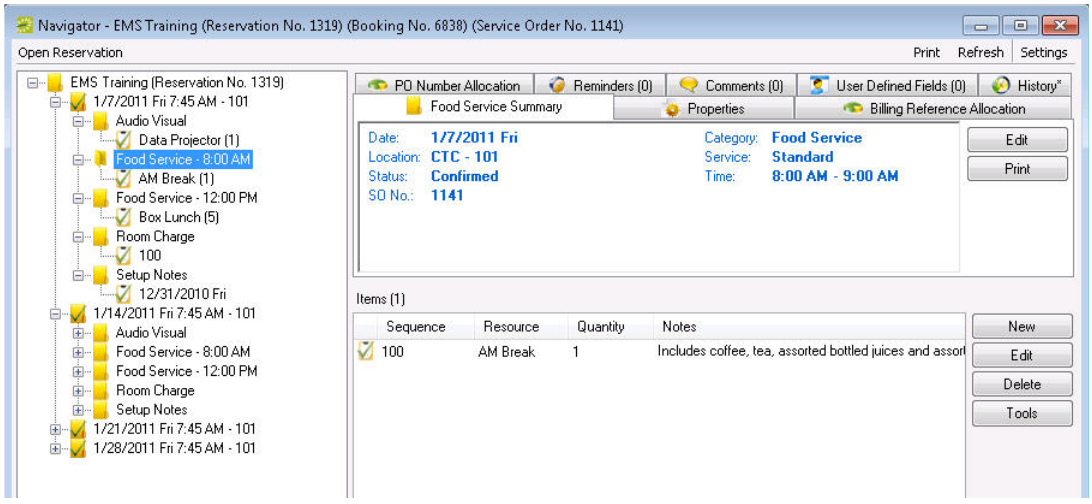
Your EMS administrator must enable the Use PO Number Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

- Reminders tab—The Reminders tab displays any reminders that were created for the selected booking. See "Working with Comments and Reminders in the Navigator" on page 158.
- Attachments—The Attachments tab displays any attachments that were saved with the booking. See "Working with Attachments in the Navigator" on page 168.
- Comments—The Comments tab displays any comments that were made for the selected booking. See "Working with Comments and Reminders in the Navigator" on page 158.
- Drawings—The Drawings tab displays a list of files that were attached to the selected booking. See "Working with Drawings in the Navigator" on page 172.
- History—The History tab displays a list of changes made for the selected booking—the date the change was made to the booking, the user who made the change to the booking, and information (field) that was changed for the booking.

Booking Detail folder

If you can expand a booking folder, this indicates that details have been added to the booking. *Booking details*, which are also called *categories*, are the services (catering, A/V equipment, and so on), notes, attendees, or activities that you can assign to a booking.

Figure 3-6: Navigator window with a booking detail folder selected



Booking Detail folders are discussed in "Booking Details and Items Overview" on page 119.

Navigator commands

The Navigator has three constant commands in the upper right hand corner—Print, Refresh, and Settings.

Command	Description
Print	• For printing an invoice or a confirmation at the *reservation level*. See Chapter 7, "Confirmations," on page 265. • For printing the Setup Worksheet for Reservation report and the Service Orders report. See Chapter 8, "Reports and Queries," on page 275. • For printing the Transaction report. See "Generating an EMS Billing Report" on page 343.
Refresh	For refreshing the Navigator display based on the settings that you have specified in the Navigator Options dialog box.
Settings	• Options—Opens the Navigator Options dialog box in which you can specify such things as what is to be displayed in the Navigator, mouse actions in the Navigator, and so on. • Confirmation Settings—Opens the Confirmation Settings dialog box which provides a variety of options that you can specify for manual and automatic generation of a confirmation for a reservation or a booking. See Chapter 7, "Confirmations," on page 265.

All other navigator commands are available as buttons in the upper right pane and lower right pane of the Navigator.

Navigator Options dialog box

The Navigator Options dialog box has three tabs—General, At a Glance, and Highlight Categories.

- General tab—On the General tab, you select the options for such things as which types of bookings to show in the Navigator (old bookings and/or canceled bookings), the result of double-clicking a listed folder (opens the item or expands the folder), the booking time that is displayed (reserved time or event time), and the highlight color for invoiced items. See Figure 3-7 below.
- At A Glance tab—On the At A Glance tab, you specify whether reminders, comments, attachments, and so on are to be displayed in the left pane of the Navigator when a reservation folder, booking folder, and/or booking detail folder is opened. See Figure 3-8 on page 81.
- Highlight Categories—On the Highlight Categories tab, you indicate whether a checkmark is to be displayed on all booking detail item folders for the selected booking detail. The default is to Highlight All, which means every booking detail item folder for every booking detail is denoted with a checkmark. See Figure 3-9 on page 81.

Figure 3-7: Navigator Options dialog box, General tab

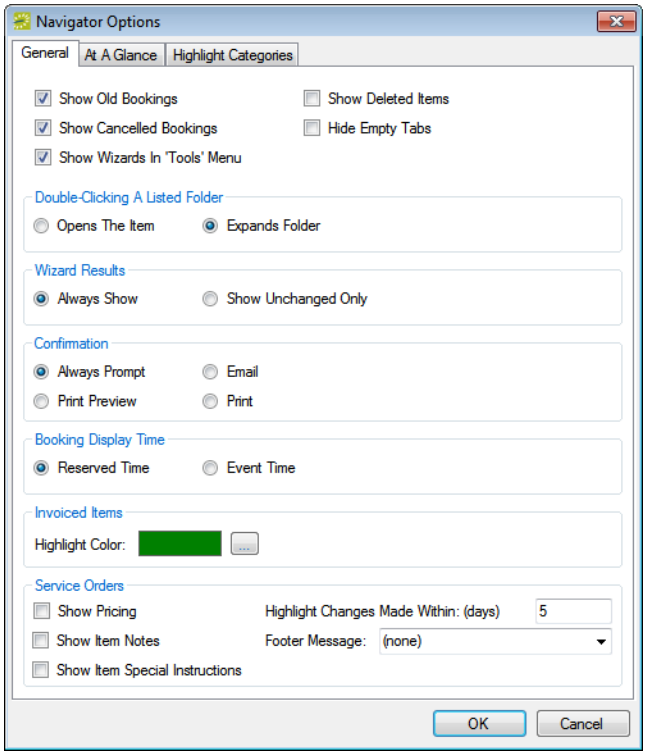


Table 3-1: Options on the Navigator Options dialog box

Field	Description
General	
Show Old Bookings	Show bookings in the Navigator that occurred before the current day's date.
Show Cancelled Bookings	Selected, show bookings in the Navigator with a canceled status.
Show Wizards in Tools menu	Show all on the Tools menu in the Bookings pane. If cleared, show only the "Wizards" option, which you must click to open a form from which you can select a tool.
Show Deleted Items	Show all deleted items (bookings, deleted resource items, and so on) for a reservation in the Navigator.
Hide Empty Tabs	Hide the tabs that do not have any data displayed on them for a selected reservation, booking, or booking detail.
Double-Clicking a Listed Folder	
Opens the item	Opens the item for editing.
Expands folder	Opens the next level of folders.
Wizard Results	
Always Show	Show a confirmation of all changes, regardless if they were successful, on a wizards Results page.
Show Unchanged Only	Show only those changes that were not successful on a wizard Results page.
Confirmation	
Always prompt	When you click Confirmation, opens a Confirmation filter which you can use to change the default filter options for a confirmation before generating it.
Print Preview	When you click Confirmation, opens an onscreen preview of the confirmation.
Email	When you click Confirmation, opens an email of the confirmation.
Print	When you click Confirmation, prints an immediate confirmation.
Booking Display Time	
Reserved Time	Show the total time for which the space is reserved. This time is the event time plus the setup/teardown times.
Event Time	Show only the event time for which the space is reserved.
Invoiced Items	
Highlight Color	The color with which invoiced items are highlighted in the Navigator window.
Service Orders	
Show Pricing	Show pricing on a service order.
Show Item Notes	Show item notes on a service order.
Show Item Special Instructions	Show special instructions for items on a service order.
Highlight Changes Made Within (days)	Highlight any changes that have been made to a service order within the specified number of days.

Table 3-1: Options on the Navigator Options dialog box (continued)

Field	Description
Footer Message	Show a reconfigured blocks of text that appear in footer of a service order (for example, a Cancellation policy).

Figure 3-8: Navigator Options, At A Glance tab

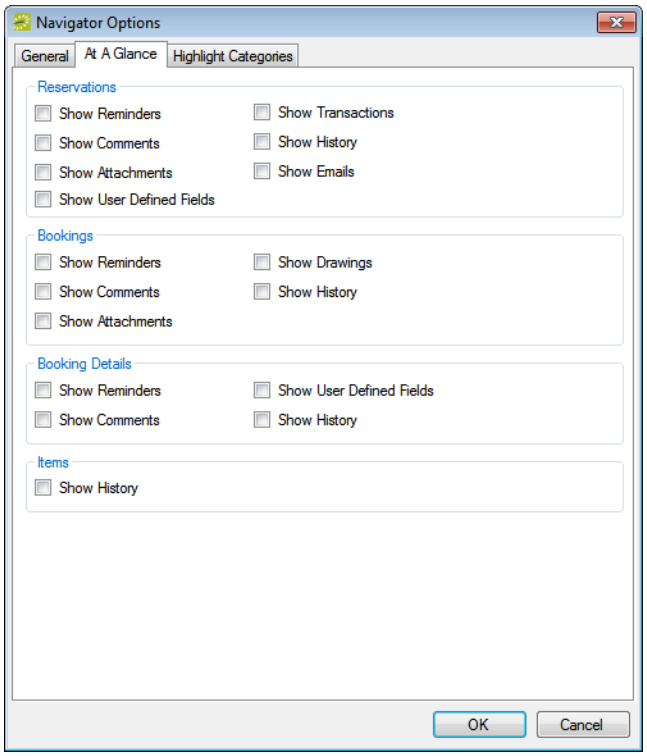

Figure 3-9: Navigator Options dialog box, Highlight Categories tab

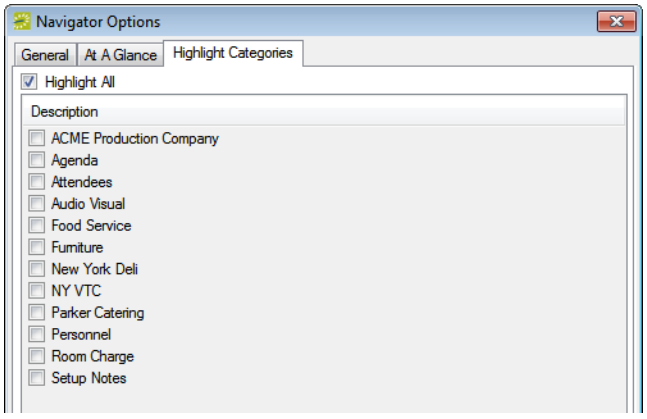

Other Navigator commands

All other Navigator commands are available as buttons in the upper right pane and lower right pane of the Navigator. The buttons that are available are dynamically updated based not only on the folder or item that is currently selected in the left pane of the Navigator, but also, what tab is open in the upper right pane of the Navigator.

Figure 3-10: Buttons available in the Navigator window with a reservation folder selected

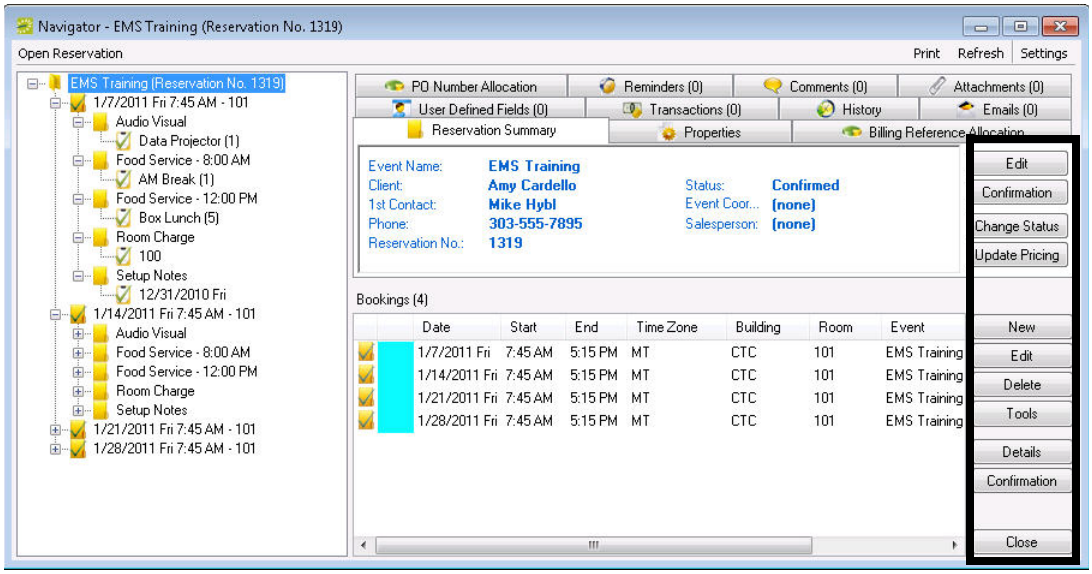

Figure 3-11: Buttons available in the Navigator window with a booking folder selected

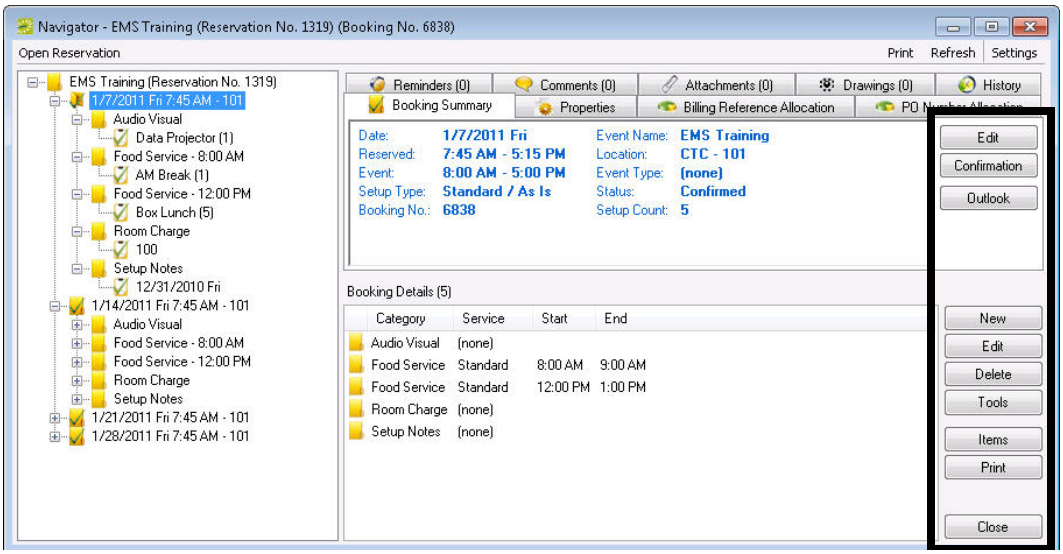
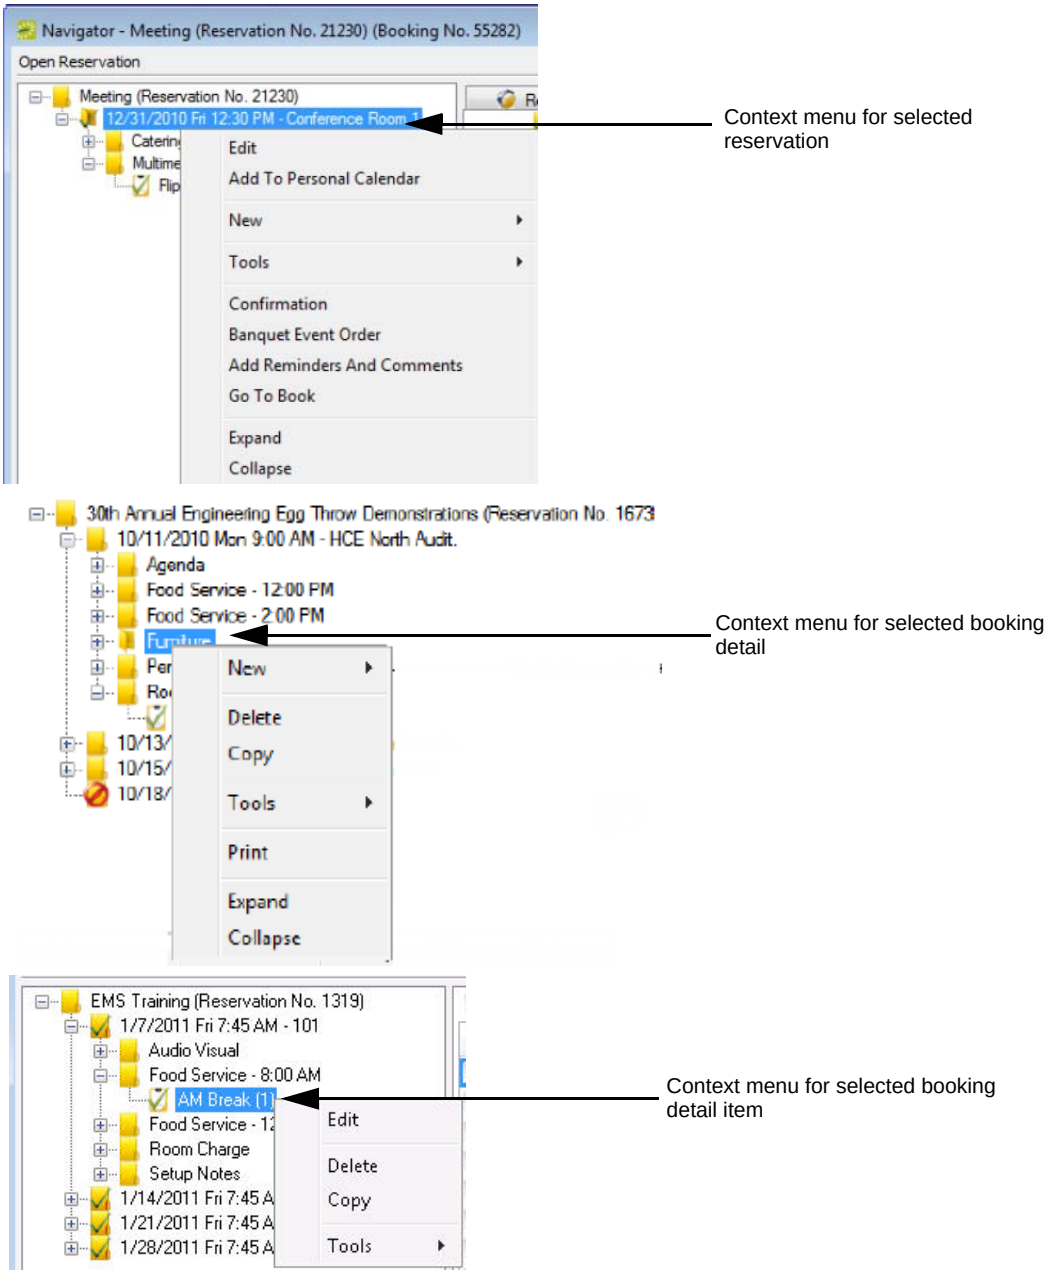


Many of these same commands are also available on a context menu, which is a menu that opens when you right-click on a folder or item in the Navigator. All the context menus that are available in the Navigator offer a limited set of choices based on not only what is currently selected in the Navigator, but also, in what pane of the Navigator that it is selected.

Figure 3-12: Comparing context menus



The majority of the Navigator functions are accessible through the Tools command button in the Bookings pane. For consistency, this chapter references this approach whenever possible; however, you can use whatever approach best suits your working needs.

Adding Bookings to a Reservation in the Navigator

You can use the Navigator to add one or more bookings to an existing reservation.

To add bookings to a reservation

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation to which the bookings are being added, and in the Bookings pane, click New.

   The Reservation Wizard opens. See “Making a Reservation Using the Reservation Wizard” on page 37.

Editing a Reservation in the Navigator

When you edit a reservation in the Navigator, you are working with the *who* and the *what* information for the event—the event name, the group name, and so on. When you edit a reservation, you can edit the *reservation* information (event name, event coordinator, and so on) and you can edit the *billing* information (pricing plan, payment type, and so on).

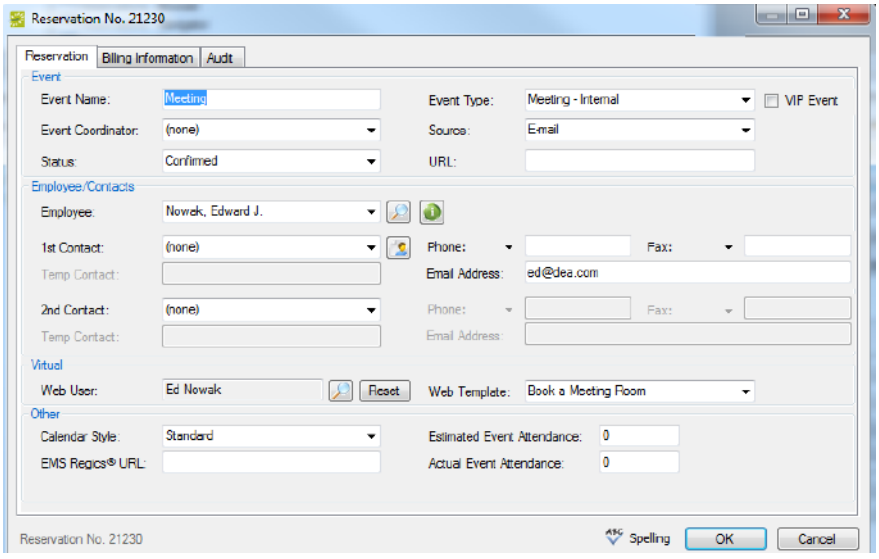
When you edit a reservation, if you select a different pricing plan, then the pricing plan is applied at the reservation level only. Categories and room charges are not automatically repriced. To reprice your categories or room charges based on a new pricing plan, you must use the Update Pricing Plan wizard. See "Repricing Categories and Room Charges for a Reservation" on page 87.

To edit a reservation in the Navigator

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In left pane the Navigator, select the reservation that is being edited, and on the Reservation Summary tab or on the Properties tab, click Edit.

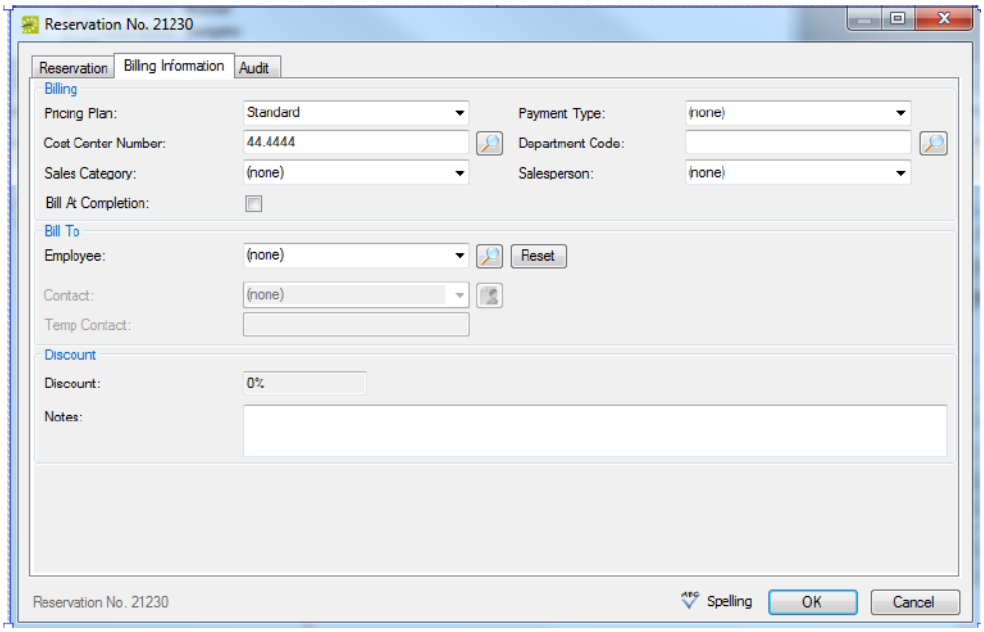
   The Reservation window opens. The Reservation tab is the active tab.

Figure 3-13: Reservation window, Reservation tab



3. Do one or both of the following:
   - On the Reservation tab, edit any and all the reservation information as needed.
   - Open the Billing tab, and edit any and all the billing information as needed.

Figure 3-14: Reservation window, Billing tab



If you select a different pricing plan, then the pricing plan is applied at the reservation level only. Categories and room charges are not automatically repriced. To reprice your categories or room charges based on a new pricing plan, you must use the Update Pricing Plan wizard. See *"Repricing Categories and Room Charges for a Reservation" on page 87.*

4. Click OK.

   The Reservation window closes and you return to the Navigator, which now shows the updated information for the reservation.

Repricing Categories and Room Charges for a Reservation

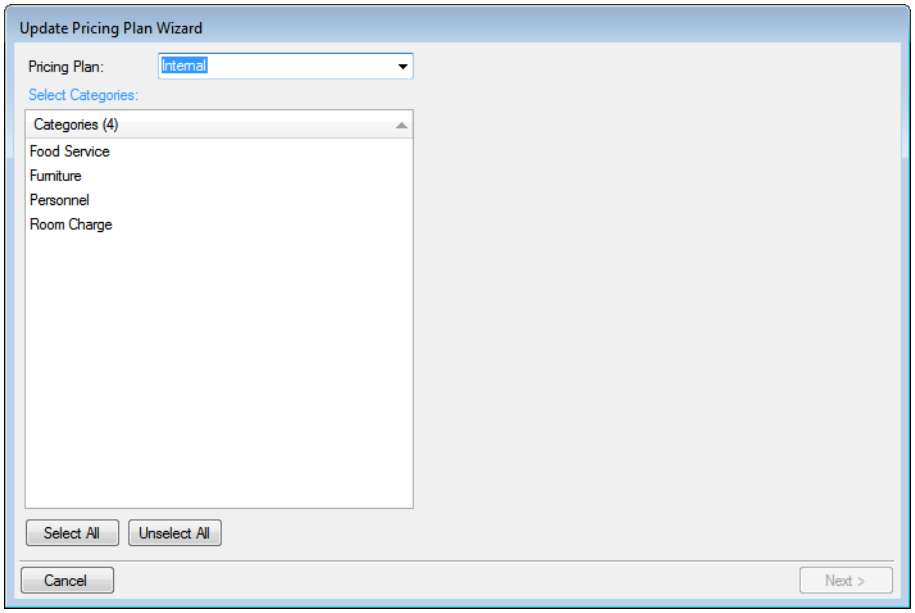
When you edit a reservation, if you select a different pricing plan, then the pricing plan is applied at the reservation level only. Categories and room charges are not automatically repriced. To reprice your categories or room charges based on a new pricing plan, then you must use the Update Pricing Plan wizard.

To reprice categories and room charges for a reservation

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In left pane the Navigator, select the reservation that is being edited, and on the Reservation Summary tab, click Update Pricing.

   The Update Pricing Plan wizard opens. The current pricing plan for the reservation is displayed in the Pricing Plan field. The window displays all the categories, including room charges, that can be repriced in one or more of the reservation bookings.

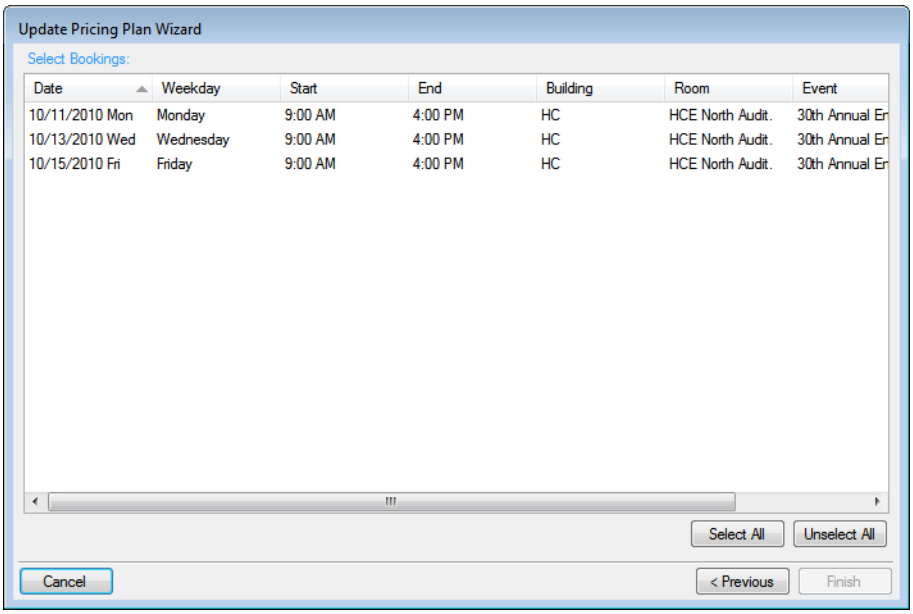
Figure 3-15: Update Pricing Plan wizard



3. Select the category, or CTRL-click to select multiple categories that are to be repriced the reservation.
4. Click Next.

   The Select Bookings window opens. This window lists all the bookings with one or more of the selected categories that can be repriced.

Figure 3-16: Update Pricing Plan wizard, Select Bookings window



You can reprice a room charge for a booking only if the room charge has not been invoiced. To reprice a room charge that has been invoiced, you must first void the invoice. See "To void an invoice" on page 324.

5. CTRL-click to select the bookings that are to have their categories or room charges repriced, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.
6. Click OK to close the message and return to the Navigator.

Changing the Status for a Reservation from the Reservation Summary tab

Even though the Change Booking Status Wizard is available for changing the status of multiple bookings in a reservation, most reservationists who approve reservations that are submitted from VEMS do so by using the Change Status function that is available on the Reservation Summary tab in the Navigator. This is because unlike the Change Booking Status Wizard, when you use the Change Status function in the Navigator to change the status of a reservation, an option is available for automatically generating and sending a confirmation to the group for whom the reservation was made.

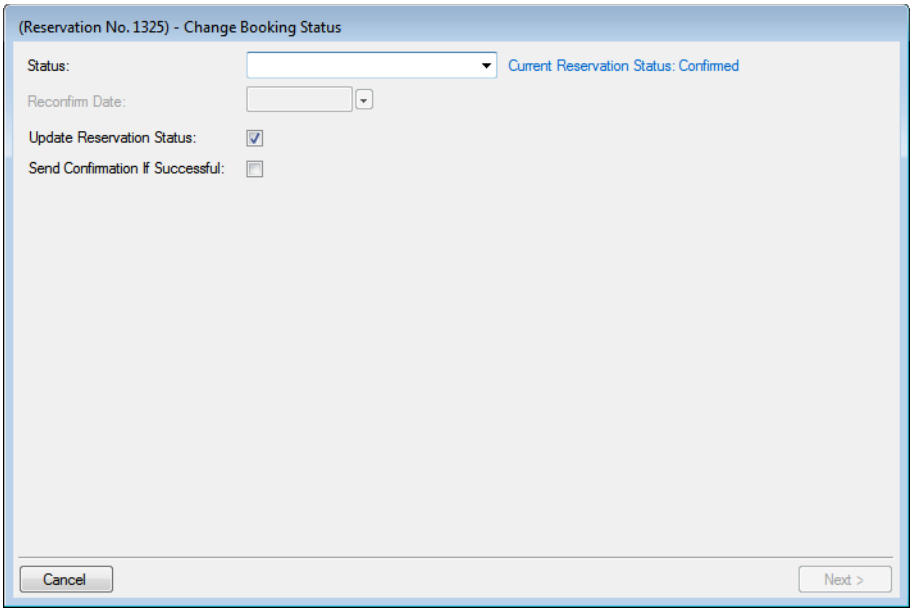
You must have been granted the appropriate security access to change the status of a booking, which includes canceling a booking. If you want to change the status of a booking using the Change Booking Status Wizard, see "Editing Multiple Bookings in the Navigator" on page 99.

To change the status for a reservation

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In left pane the Navigator, select the reservation that is being edited, and on the Reservation Summary tab, click Change Status.

   The Change Booking Status window opens. See Figure 3-17 on page 90.

Figure 3-17: Change Booking Status window



3. On the Status dropdown list, select the new status for the bookings.

If you select any type of Canceled status, then three additional fields—Reason, Who Cancelled and Notes—are displayed on the Change Booking Status window. You must enter data in all three of these fields before you can continue in the Wizard.

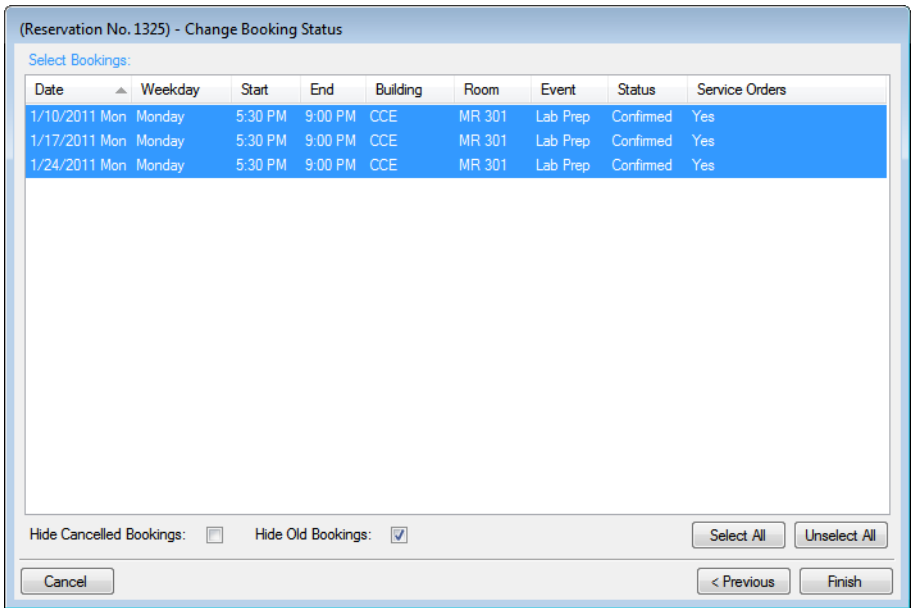
4. Enter a Reconfirm Date if it is required for the new status that you selected.
5. Optionally, do one or both of the following:
   - Leave Update Reservation Status selected to have the reservation-level status changed as well.
   - Select Send Confirmation If Successful to have an email automatically generated and sent to the group for whom the reservation was made.

The confirmation is generated based on the system confirmation settings that you have specified. See "Specifying your Confirmation Settings" on page 266.

6. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date and that do not have invoiced items. By default, all the bookings are selected.

Figure 3-18: Select Bookings window

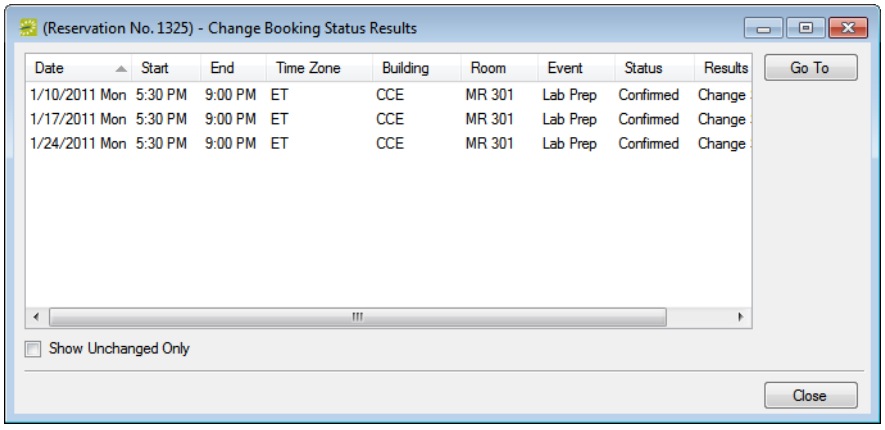


To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

7. Select the booking or CTRL-click to select multiple bookings that are to have their status changed, and then click Finish.

   The Change Booking Status Results window opens. This window displays a list of all the selected bookings, whether the status change was successful or not.

Figure 3-19: Change Booking Status Results window



Optionally, to view only the bookings for the selected reservation that were NOT successfully changed, select Show Unchanged Only. To view the details for a specific booking that was changed, select the booking, and then click Go To.

8. Click Close to close the Change Status Results window and return to the Navigator.

If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

Copying a Reservation in the Navigator

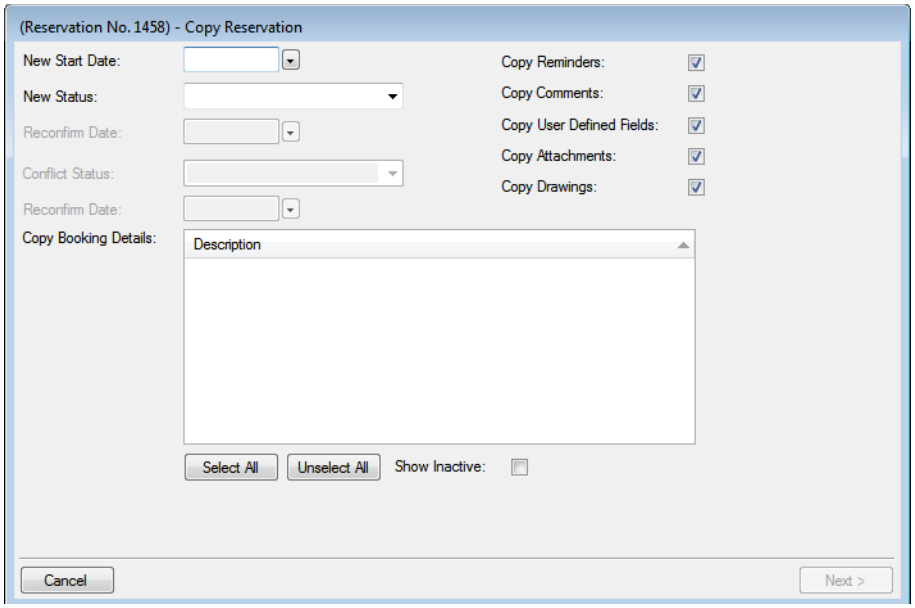
An easy way for you to make a new reservation in the Navigator is to copy an existing reservation and then make any necessary changes to the reservation. When you copy an existing reservation, you must provide a new start date and a new status; however, you can copy the existing reservation reminders, comments, user-defined fields, and drawings as is and you can copy one or more or all the existing booking details.

To copy a reservation in the Navigator

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation that is being copied, and in the Bookings pane, click Tools, and then click Copy Reservation Wizard.

   The Copy Reservation Wizard opens.

Figure 3-20: Copy Reservation Wizard



3. Enter the information for the new reservation.

Information	Description/Comments
Start Date	If you are copying a reservation with multiple bookings, then the start date should be the date of the earliest booking for the existing reservation.
New Status	The status for the *new* reservation.
Reconfirm Date	You must enter a date if it is required for the new status that you selected.
Conflict Status	You must enter a conflict status in the event that the new bookings are in conflict with any existing bookings.
Reconfirm Date	You must enter a date if it is required for the new conflict status that you selected.
• Copy Reminders • Copy Comments • Copy User Defined Fields • Copy Attachments • Copy Drawings	Leave the appropriate options selected to copy the existing items as is, or clear the option for each item that is not to be copied to the new reservation.
Copy Booking Details	Select the booking details that are being copied (CTRL-click to select multiple details) or to select all the details for copying, click Select All. **Note:** By default, only active booking details are displayed. To show inactive booking details for copying, click Show Inactive.

4. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the copied reservation.

Figure 3-21: Copy Reservation Wizard, Select Bookings window

To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

5. CTRL-click to select the bookings that are being recreated in the new reservation, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.

The start date that you specified becomes the date of the first booking for the new reservation. In addition, the copied bookings are scheduled according to the same pattern as the existing reservation. For example, if the existing reservation has three bookings and each booking was scheduled every seven days (12/14, 12/21, and 12/28), and the start date for the new reservation is 12/15, then the new reservation has three bookings with dates of 12/15, 12/22, and 12/29.

When you copy multiple bookings, the bookings are simply copied and pasted as is—the bookings are not moved to different location. If you need to move a booking to a different location, see *"To change rooms for a booking" on page 105.*

6. Click OK to close the message and return to the Navigator.

   Both the existing reservation and the new reservation are now displayed in the left pane of the Navigator. The new reservation is assigned a number based on the next available reservation number in the database. If any of the new bookings are in conflict with existing bookings, this conflict is indicated in the Navigator.

Editing a Booking in the Navigator

When you edit a booking in the Navigator, you are working with the *when* and *where* information for the event—the event time, the event location, and so on. To edit a booking, you must have the appropriate security access. For example, you cannot move a booking to a room if your EMS administrator has not granted you access to the room. Likewise, you cannot change the status for a booking from tentative to confirmed if your EMS administrator has not granted you access to the confirmed status.

Under certain circumstances, bookings or booking details in EMS can become *locked*. Locked items are displayed in EMS, but you cannot edit or cancel the items. This locking can affect the basic booking information (date, time, room, and so on) or the details for the booking (catering, equipment, and so on). Locks are typically independent of one another. Just because one item is locked does not mean other items in the reservation are locked. Bookings can be locked in the following situations:

- Insufficient security—To edit a booking, you must have access to the room and status and as well as the correct security processes assigned to your user account.

Contact your EMS administrator for assistance.

- Old bookings—A booked event is locked a certain number of days after it has taken place. Your EMS administrator sets the value for this system parameter. Old bookings are locked to prevent you and other users from changing the facts for a past event, which could cause discrepancies between documents printed for the event and the information in EMS. When a booking is locked because it is old, all its details are also locked. You cannot edit or delete existing details, and you cannot add new details.
- Invoiced bookings—When you create an invoice for a booking, you can bill for the entire booking (the room fee plus all the fees for all the booking details) or for only certain items that you choose (for example, the room fee and the equipment fees, but not the catering fees). In either case, if a booking has one or more invoiced items, the booking is locked. This means that you cannot edit or delete the booking, which includes changing the booking status, and editing and deleting invoiced resources. You can, however, still add more details to the bookings. For rooms, this means you cannot edit the room charge. You also cannot move bookings that are invoiced to a new or existing reservation. You can, however, still copy these bookings to a new or existing reservation.

To edit billable information for a booking, see "Editing Booking Detail Item Charges in the Navigator" on page 145.

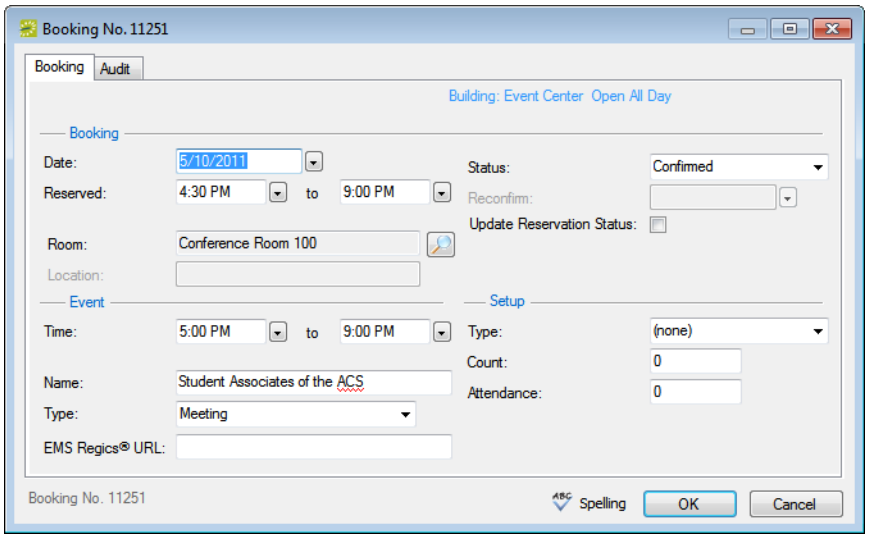
Remember, you can also edit certain booking information in the Reservation Book. See "To edit an existing reservation" on page 63.

To edit a booking in the Navigator

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In left pane of the Navigator, expand the folder structure for the reservation until the appropriate booking folder is visible.
3. Select that booking that is being edited, and on the Booking Summary tab or on the Properties tab, click Edit.

   The Booking window opens. A message is displayed at the top of the window that indicates the hours for the building that contains the selected room. If the booking has any type of booking detail assigned to it, then “This Booking has Service Orders” is displayed at the top of the window.

Figure 3-22: Booking window



4. On the Booking tab, edit the information for the booking as needed, and then click OK.

If you have been granted the appropriate security access, you change the status of a booking, which includes cancelling a booking.

Two results are possible:

- If you edited anything other than the date, time, or location for a booking, the Booking window closes and you return to the Navigator, which now shows the updated information for the booking.

If you cancel a booking, a Cancel Status dialog box opens in which you must identify the user who canceled the booking and provide notes (for example, a cancellation reason) about the cancellation. If you change the status for a booking, you can select Update Reservation Status to have the reservation-level status changed as well.

- If you edited the date, time, or location for a booking, a dialog box opens, warning you that critical booking information has changed and asking you if you want to continue.

5. Click Yes.

   The Booking window closes and you return to the Navigator, which now shows the updated information for the booking.

If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

Editing Multiple Bookings in the Navigator

Four wizards are available for editing the *when* and *where* information for multiple bookings in a reservation:

- The Change Booking Date/Time Wizard
- The Change Booking Status Wizard (which includes canceling multiple bookings in a single step)
- The Change Rooms Wizard
- The Change Miscellaneous Booking information Wizard (which includes type, setup type, and setup count)

To edit billable information for a booking, see "Editing Booking Detail Item Charges in the Navigator" on page 145.

Remember, you can also edit certain booking information in the Reservation Book. See "To edit an existing reservation" on page 63.

To edit multiple bookings in the Navigator

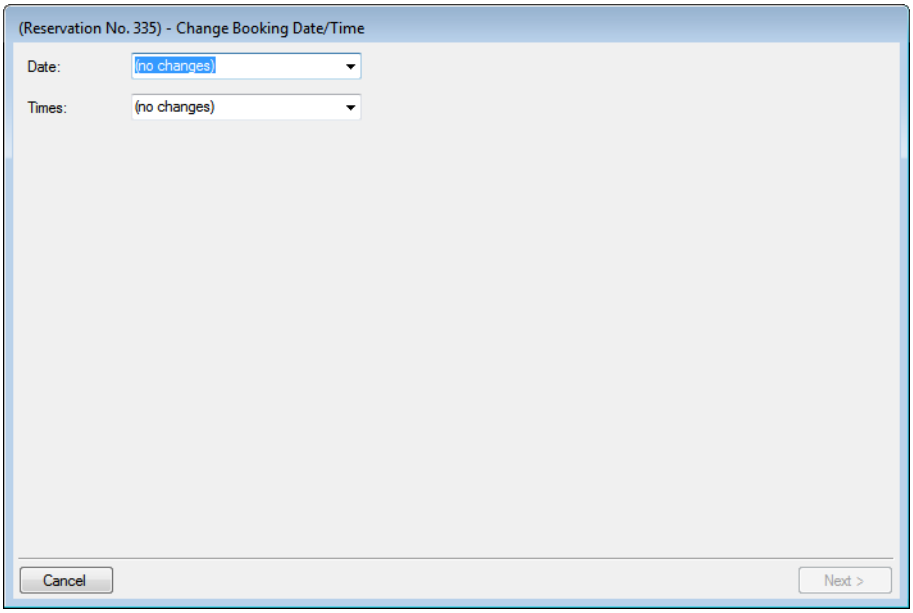
1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, select the reservation for which the bookings are being edited, and in the Bookings pane, click Tools.
3. Continue to the following as appropriate:
   - "To edit the booking date and/or time" on page 100.
   - "To edit the booking status" on page 103.
   - "To change rooms for a booking" on page 105.
   - "To edit miscellaneous booking information" on page 112.

To edit the booking date and/or time

1. Click Change Booking Date/Time Wizard.

   The Change Booking Date/Time Wizard opens.

Figure 3-23: Change Booking Date/Time Wizard



2. Change the value for the date, time, or both.

Value	Description
Date	
• No changes	• The default value.
• Reschedule Booking Earlier	• Reschedule the bookings to an earlier date that is based on the number of days that you specify.
• Reschedule Booking Later	• Reschedule the bookings to a later date based on the number of days that you specify.
• Reschedule Booking to Specific Date	• Reschedule the bookings to a new date that you specify.
Time	
• No changes	• The default value.
• End booking earlier	• Resets the event end time and the reserved end time to an earlier time, based on the number of hours that you specify.
• End booking later	• Resets the event end time and the reserved end time to a later time, based on the number of hours that you specify.
• Reschedule Booking Earlier	• Resets both the event start and end times *and* the reserved start and end times to an earlier time, based on the number of hours that specify.

Value	Description
• Reschedule Booking Later	• Resets both the event start and end times *and* the reserved start and end times to a later time, based on the number of hours that specify.

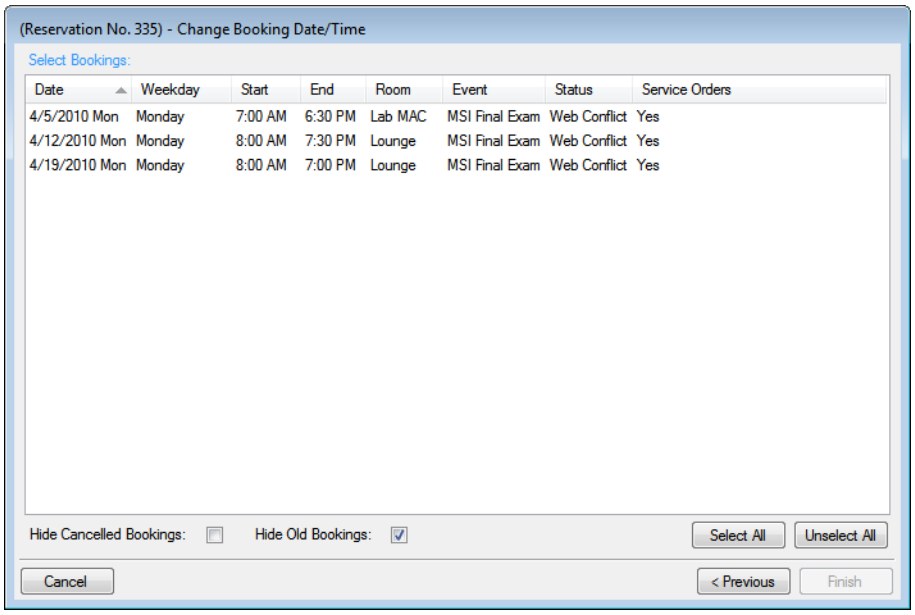
• Reschedule Booking to Specific Time	• Resets the following values based on the specific times that you select:
	  • Reserved Start
	  • Event Start
	  • Event End
	  • Reserved End

• Set Setup/Teardown	• Resets the setup or teardown times based on the hours or minutes that you specify.
• Start Booking Earlier	• Resets the event start time and the reserved start time to an earlier time, based on the number of hours that you specify.
• Start Booking Later	• Resets the event start time and the reserved start time to a later time, based on the number of hours that you specify.

3. Click Next.

   The Select Bookings window opens. By default, this window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date.

Figure 3-24: Change Booking Date/Time Wizard, Select Bookings window

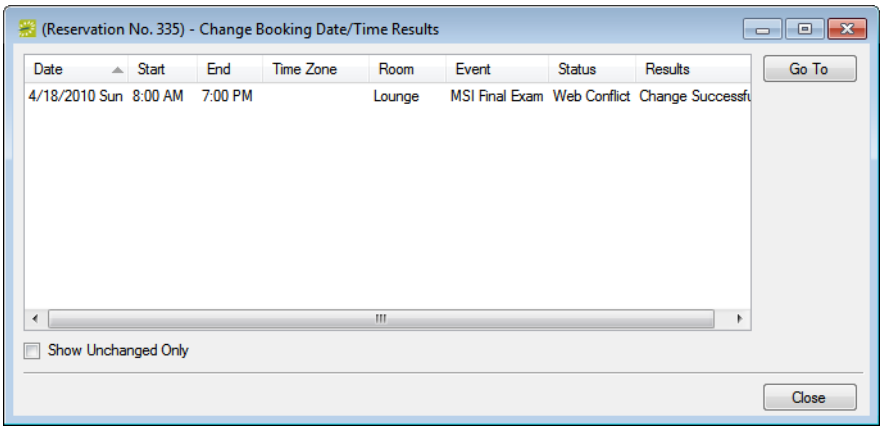


To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

4. CTRL-click to select the bookings that are being edited, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   The Change Booking Date/Time Results window opens. This window displays a list of all the selected bookings, whether the date/time change was successful or not.

Figure 3-25: Change Booking Date/Time Results window



Optionally, to view only the bookings for the selected reservation that were NOT successfully changed, select Show Unchanged Only. To view the details for a specific booking that was changed, select the booking, and then click Go To.

5. Click Close to close the Change Booking Date/Time Results window and return to the Navigator.

If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

To edit the booking status

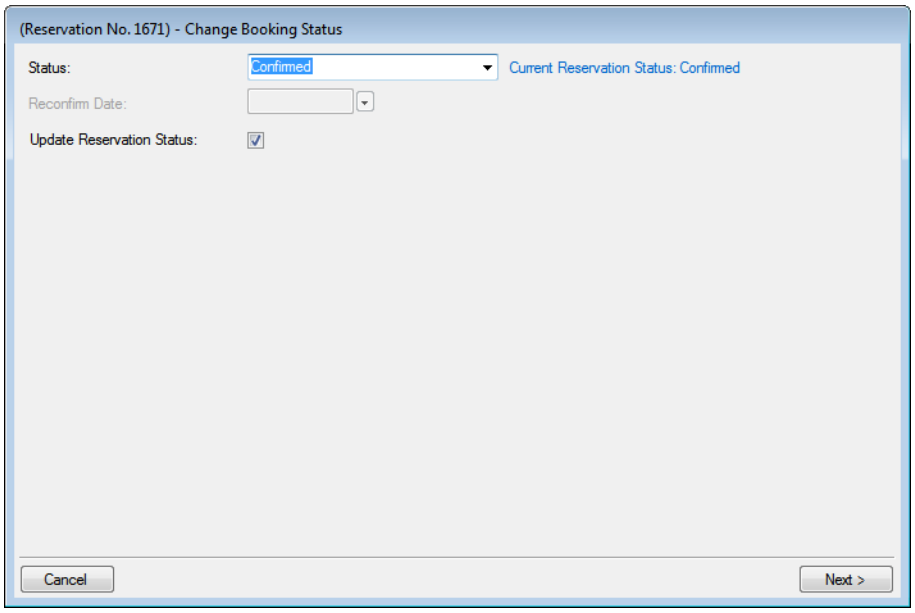
If you have been granted the appropriate security access, you can change the status of a booking, which includes canceling a booking. If you change the status for a booking, you can leave the option of Update Reservation Status selected to have the reservation-level status changed as well.

1. Click Change Booking Status Wizard.

   The Change Booking Status Wizard opens.

This is the same Wizard that opens if you select a reservation in the Navigator, and then on the Reservation Summary tab, click Change Status. See "Changing the Status for a Reservation from the Reservation Summary tab" on page 89.

Figure 3-26: Change Booking Status Wizard



2. On the Status dropdown list, select the new status for the bookings.

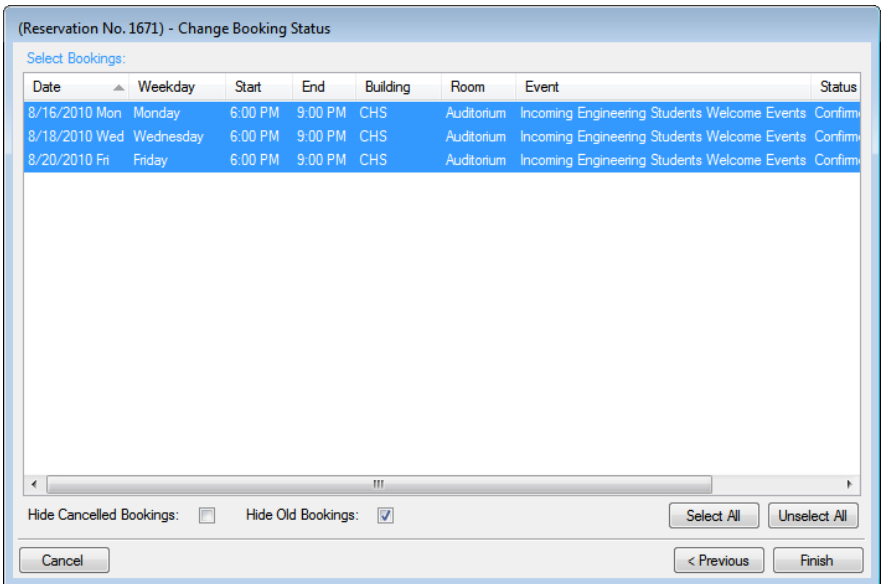
If you select any type of Canceled status, then three additional fields—Reason, Who Cancelled and Notes—are displayed on the Change Booking Status window. You must enter data in all three of these fields before you can continue in the Wizard.

3. Enter a Reconfirm Date if it is required for the new status that you selected.
4. Optionally, leave Update Reservation Status selected to have the reservation-level status changed as well.

5. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date and that do not have invoiced items. By default, all the bookings are selected.

Figure 3-27: Change Booking Status Wizard, Select Bookings window

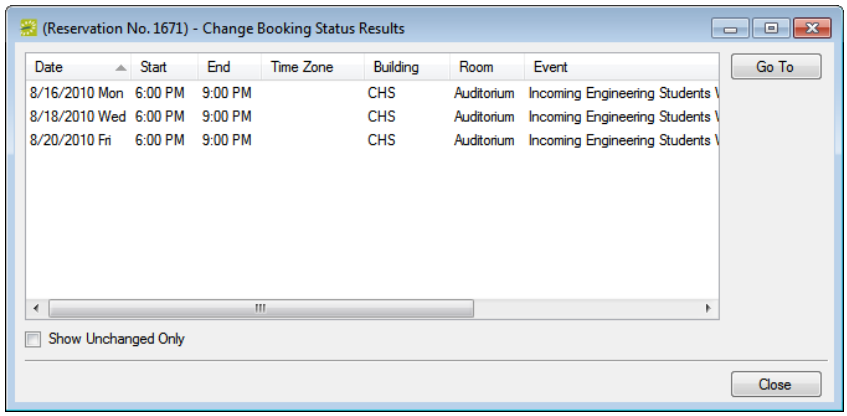


To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

6. Select the booking or CTRL-click to select multiple bookings that are to have their status changed, and then click Finish.

   The Change Booking Status Results window opens. This window displays a list of all the selected bookings, whether the status change was successful or not.

Figure 3-28: Change Booking Status Results window



Optionally, to view only the bookings for the selected reservation that were NOT successfully changed, select Show Unchanged Only. To view the details for a specific booking that was changed, select the booking, and then click Go To.

7. Click Close to close the Change Status Results window and return to the Navigator.

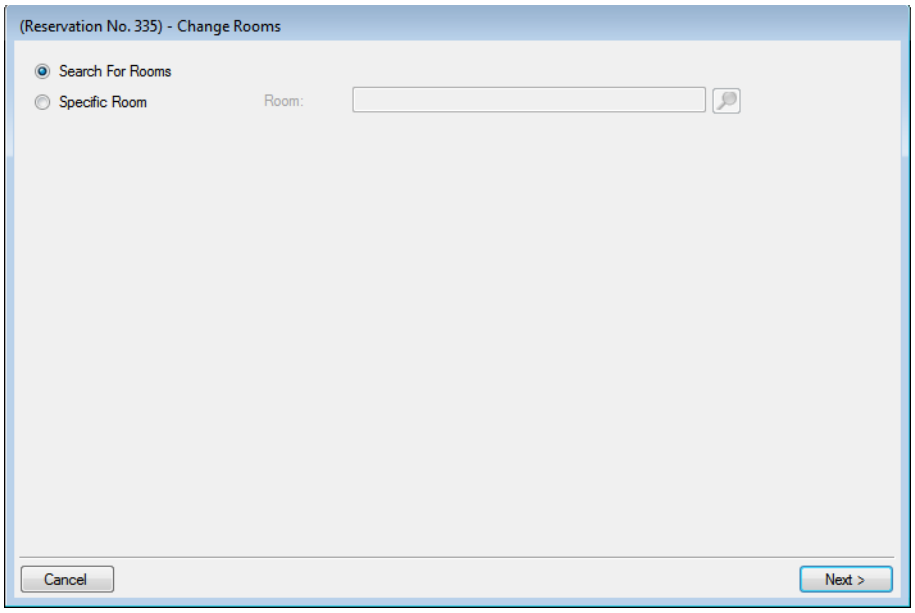
If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

To change rooms for a booking

1. Click Change Room Wizard.

   The Change Room Wizard opens. Search for Rooms is selected by default.

Figure 3-29: Change Room Wizard



2. Do one of the following:

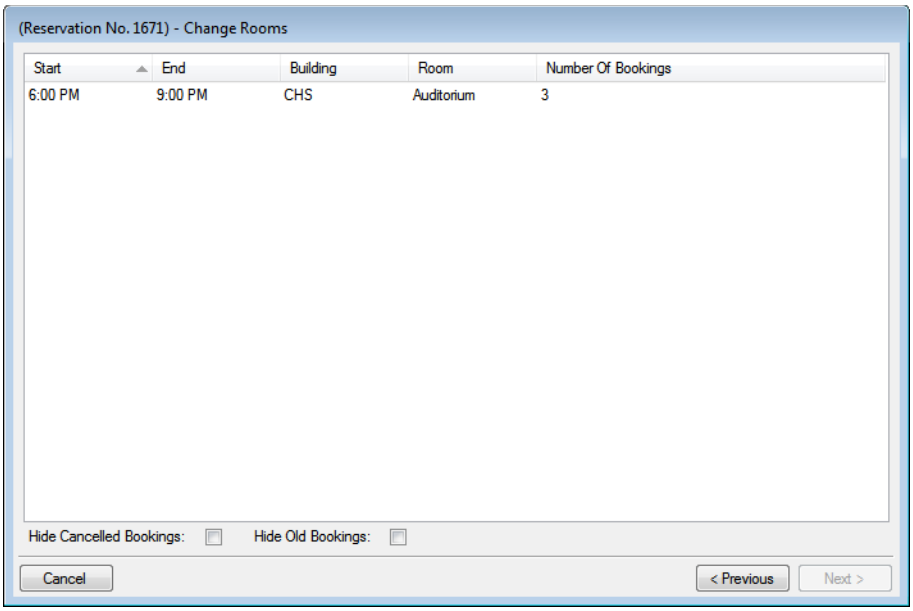
   - To search for rooms, click Next, and then continue to "To search for rooms" on page 106.
   - To select a specific room, select Specific Room, and then continue to "To select a specific room" on page 110.

To search for rooms

1. Click Next.

   The Change Room Wizard Select Bookings winodw opens with a list of all the bookings for the selected reservation with a date greater than or equal to the current day's date.

Figure 3-30: Change Room Wizard, Select Bookings window

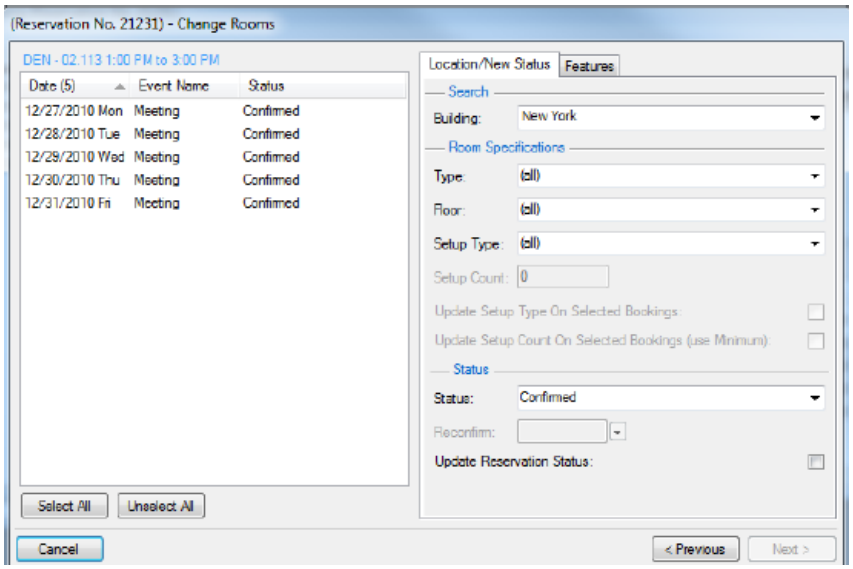


To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

2. Select the time/room combination with which to work. (For example, an 8 a.m. event and a 2 p.m. event in the same room are displayed as two separate items; however, multiple 10 a.m. bookings in the same room on different dates are displayed as a single item.)

   The Change Rooms window is refreshed with options for changing the building, the room, the status, or any combination of these. See Figure 3-31 on page 107.

Figure 3-31: Change Rooms Wizard with location and status options



3. In the left pane of the Change Rooms window, CTRL-click to select the bookings that are being moved to a new room, or to select all bookings in a single step, click Select All.
4. In the right pane, change the building, the room specifications, the status, the room features, or any combination of these as needed for the selected bookings, and then click Next.

Optionally, if you change the booking status, you can select Update Reservation Status to have the reservation-level status changed as well.

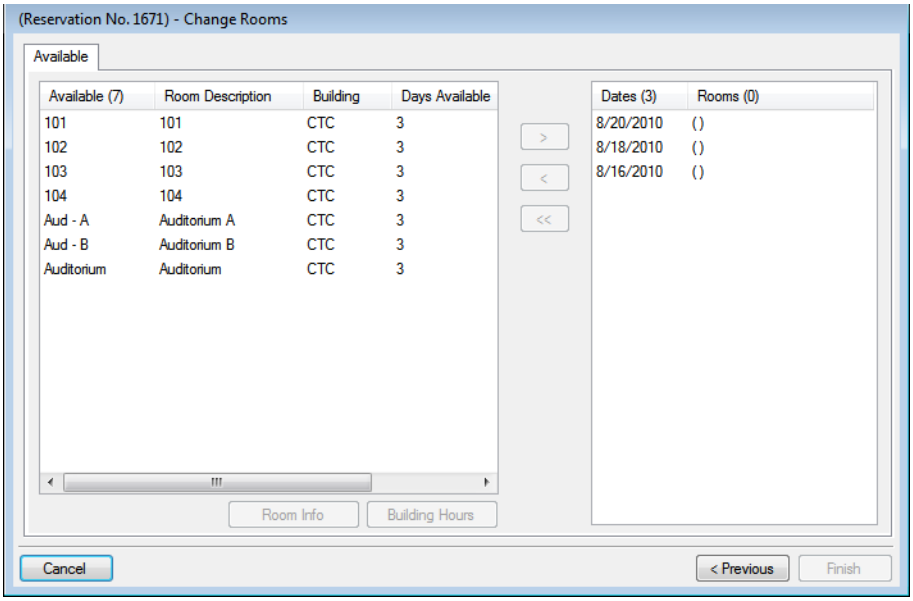
The Change Room Wizard is refreshed with an Available tab, and if applicable, a Conflicts tab. The Available is always the active tab.

- The Available contains two panes. The left pane lists all the rooms that meet *some or all* of your event criteria. The right pane lists all the event dates that must be fulfilled.
- The Conflicts tab lists all the rooms that are not available for the requested dates. Optionally, you can open the Conflicts tab to view the list of rooms that were not available for scheduling for the event as well as list of the events that are scheduled for each room.

The Conflicts tab is displayed only if there are any rooms that are not available for the requested dates based on your room search specifications. If no rooms are in conflict, then the tab is not displayed.

See Figure 3-32 on page 108.

Figure 3-32: Change Rooms Wizard, Available tab



5. Select the room that is to be scheduled for the event.
6. Optionally, do one or both of the following:
   - Click Room Info to open the Room Info dialog box and view information about the room properties, setup type, features, and pricing.
   - Click Building Hours to open the Building Hours dialog box which displays the hours that the selected room/building is open on the reserved date.

   Otherwise, click the Move button (>) to move the room to the Selected list.

   The selected room is displayed in the Rooms list in the right pane of the Available tab for every event date for which the room is available.
7. If all the event dates are fulfilled, click Finish; otherwise, repeat Step 5 and Step 6 until all the event dates are fulfilled, and then click Finish.

   A message opens, asking you if you want to change any more rooms.
8. Click Yes to repeat this procedure for any other bookings for the selected reservation; otherwise, click No close close the message.

   The Change Room Wizard Results window opens with a list of bookings for which the room was successfully changed. See Figure 3-33 on page 109.

To view the details for a specific booking that was changed, select the booking, and then click Go To.

9. Click Close to close the Change Room Results window and return to the Navigator.

If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

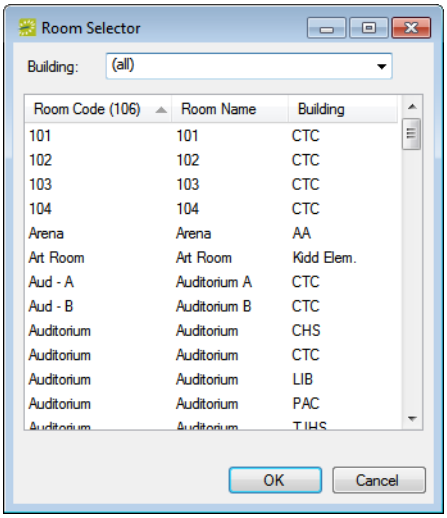
To select a specific room

When you search for a specific room, you can search for a room within your facilities, or you can search for an *override* room, which is a room that is within your facilities but that is not typically scheduled for events or it is outside of your facilities. If you specify an override room for an event, you must manually specify the location for the event.

1. Click the Search icon .

   The Room Selector dialog box opens. This dialog box lists all the rooms in all the buildings to which you have been granted access.

Figure 3-34: Room Selector dialog box



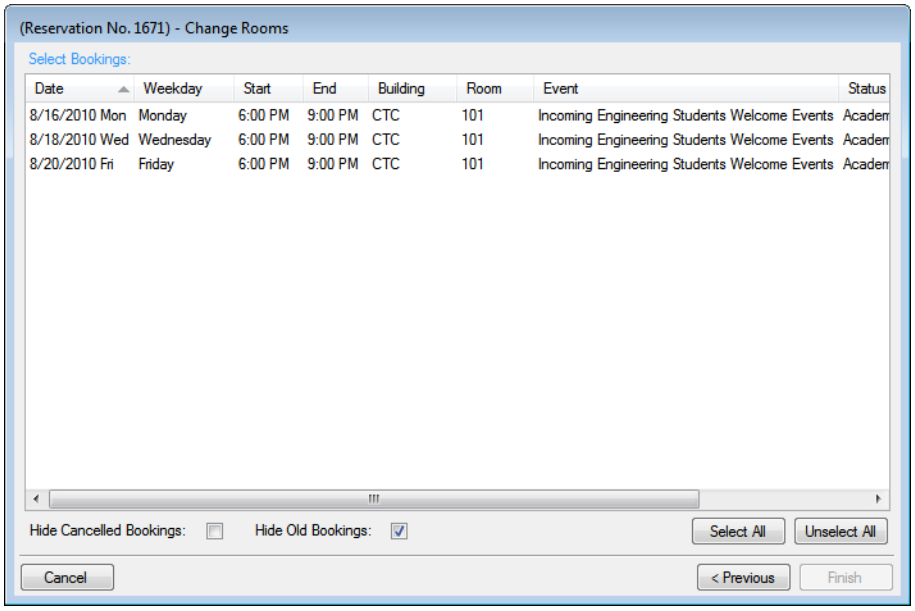
2. Do one of the following:

   - To select a standard or combo room, select a building, area, or view, select a room, and then click OK. Go to Step 4.
   - To select an override room, select (all) on the Building dropdown list, or select a specific building, select an override room (for example, one named OVR), and then click OK. Go to Step 3.

3. In the Location field, enter the location of the override room.
4. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date. See Figure 3-35 on page 111.

Figure 3-35: Change Room Wizard, Select Bookings window

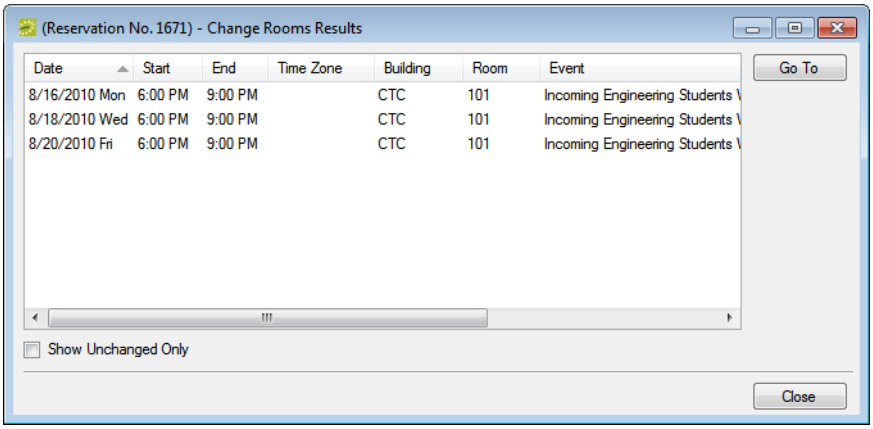


To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

5. CTRL-click to select the bookings that are being edited, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   The Change Rooms Results window opens. This window displays a list of all the selected bookings, whether the room change was successful or not.

Figure 3-36: Change Rooms Results window



Optionally, to view only the bookings for the selected reservation that were NOT successfully changed, select Show Unchanged Only. To view the details for a specific booking that was changed, select the booking, and then click Go To.

6. Click Close to close the Change Rooms Results window and return to the Navigator.

If you reserve a resource and then edit the date, time, location, or status of a booking, and there is a resource inventory conflict, a Resource Inventory Conflicts report opens onscreen. If you close this report, you can manually run an Resource Inventory Conflict check. In the Bookings folder of the Navigator, select Tools > Resource Inventory Conflict.

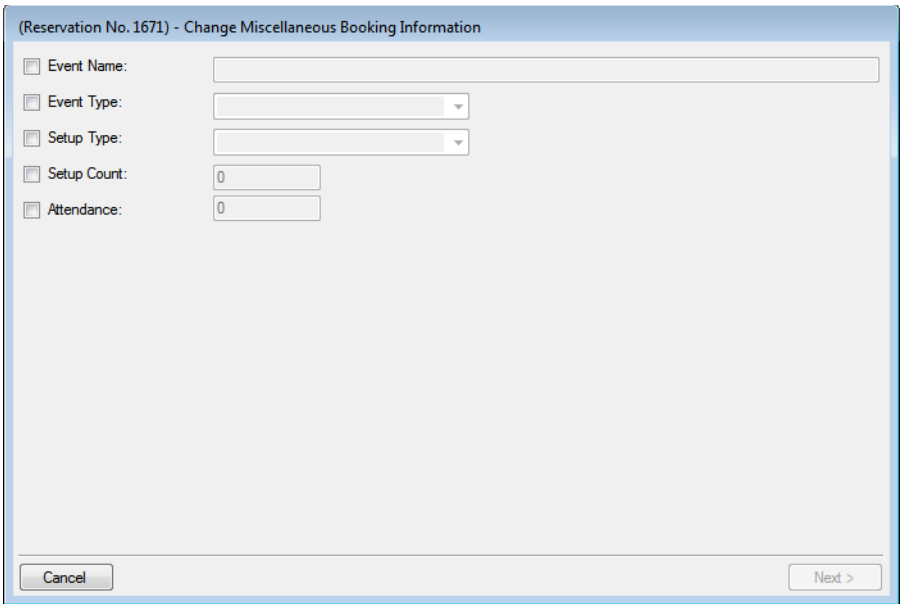
To edit miscellaneous booking information

Miscellaneous information that you can change for multiple bookings includes the event name, the event type, the type, the setup type, the setup count, and the attendance.

1. Click Change Miscellaneous Booking Information Wizard.

   The Change Miscellaneous Booking Information Wizard opens.

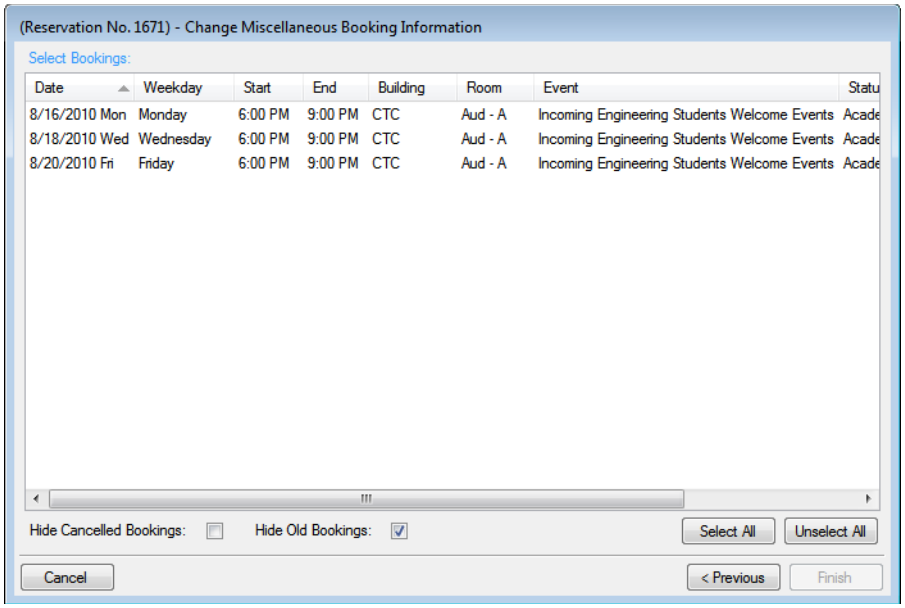
Figure 3-37: Change Miscellaneous Booking Information Wizard



2. Select the information that you want to change, enter the new values for the selected information, and then click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date. See Figure 3-38 on page 113.

Figure 3-38: Change Miscellaneous Booking Information Wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

3. CTRL-click to select the bookings that are being edited, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens, indicating that the changes were made successfully.

4. Click OK to close the message and return to the Navigator.

Moving Bookings to a Different Reservation

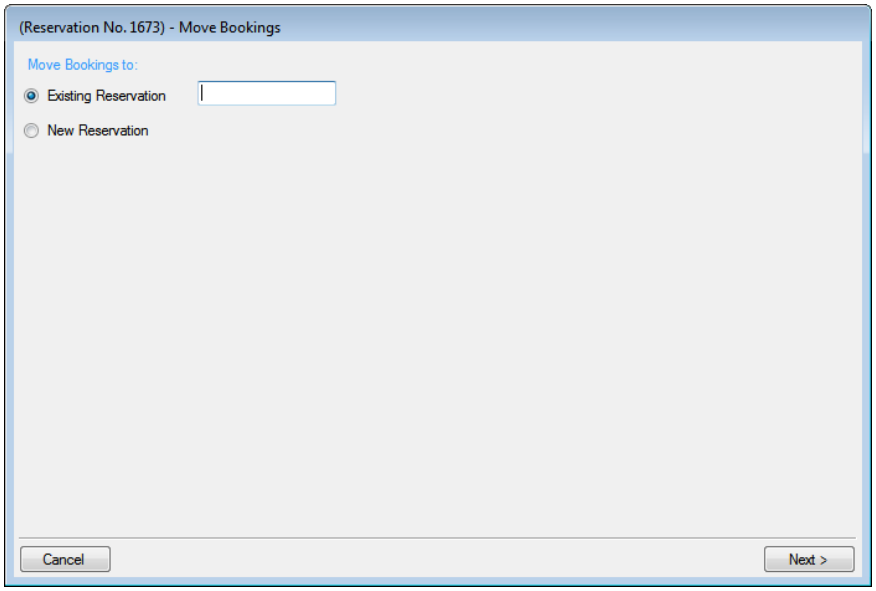
You use the Move Bookings reservation to move one or more bookings that *do not have invoiced items* from a selected reservation to an existing reservation or to an entirely new reservation. When you move a booking from a selected reservation, the booking and all its associated details are *removed entirely* from the selected reservation.

To move bookings to a different reservation

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation from which the bookings are being moved.
3. In the Bookings pane, click Tools, and then click Move Bookings Wizard.

   The Move Bookings Wizard opens. The option to copy to an Existing Reservation is selected by default.

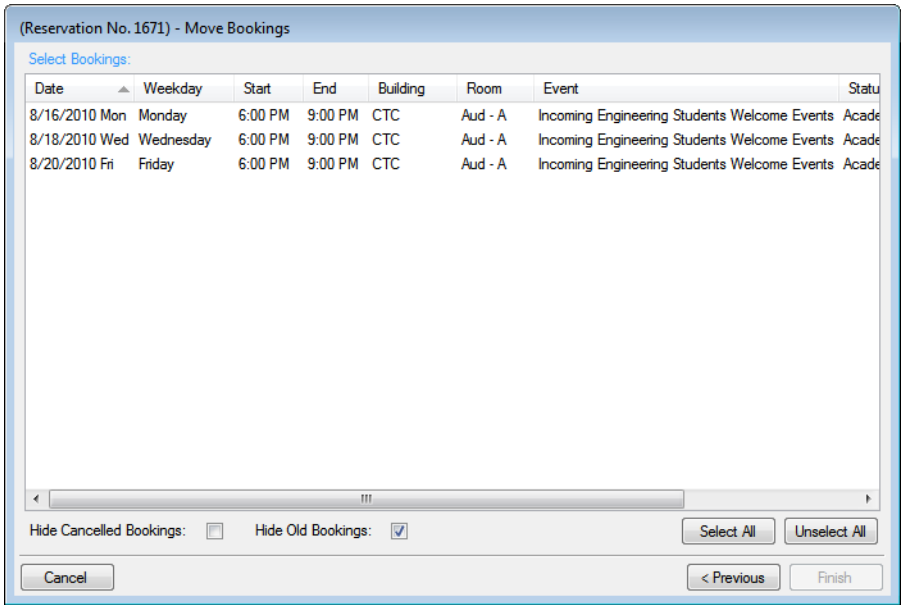
Figure 3-39: Move Bookings Wizard



4. Do one of the following:
   - In the Existing Reservation field, enter the reservation number for the existing reservation to which the bookings are to be moved.
   - Click New Reservation.
5. Click Next.

   The Select Bookings window opens. This window lists all the bookings for the selected reservation that do *not* have invoiced items.

Figure 3-40: Move Bookings Wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

6. CTRL-click to select the bookings that are being moved to the new or existing, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.
7. Click OK to close the message and return to the Navigator.

   Both the old reservation and the new or existing reservation are now displayed in the left pane of the Navigator. If you moved the bookings to a *new* reservation, then the new reservation that is created is assigned the next available reservation number in the database. If you moved the bookings to an *existing* reservation and any of the moved bookings are in conflict with bookings in the existing reservation, then this conflict is indicated in the Navigator.

Copying Multiple Bookings in the Navigator

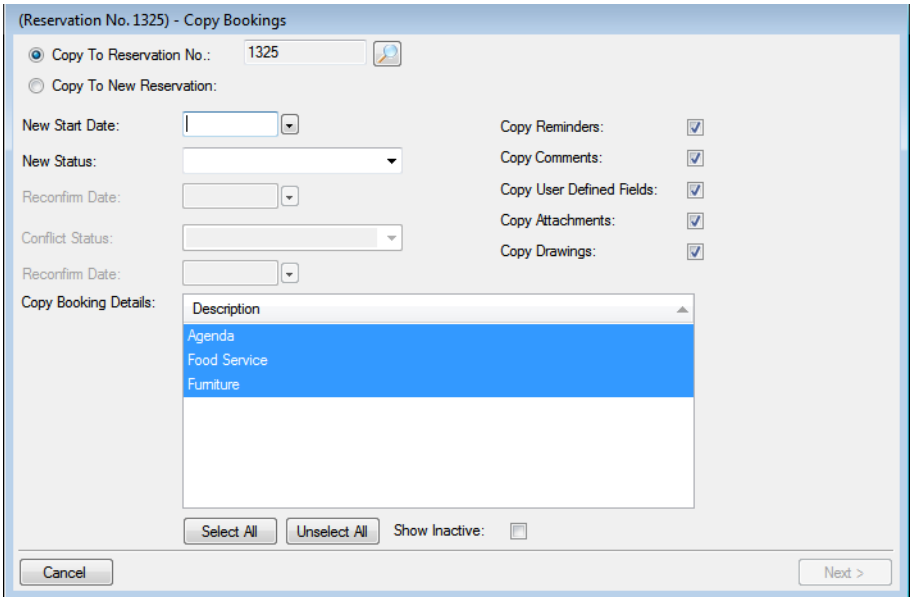
You use the Copy Bookings Wizard to copy one or more bookings to a new date or to a set of dates, either within the same reservation or to a new reservation.

To copy multiple bookings in the Navigator

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation from which the bookings are being copied.
3. In the Bookings pane, click Tools, and then click Copy Bookings Wizard.

   The Copy Bookings Wizard opens. Copy to Reservation No. is selected by default.

Figure 3-41: Copy Bookings Wizard



4. Do one of the following:

   - To copy the bookings to an existing reservation, click the Search icon to open the Open Navigator dialog box and search for the reservation. (See "Opening a reservation in the Navigator" on page 71.)
   - To copy the bookings to a new reservation, click Copy to New Reservation.

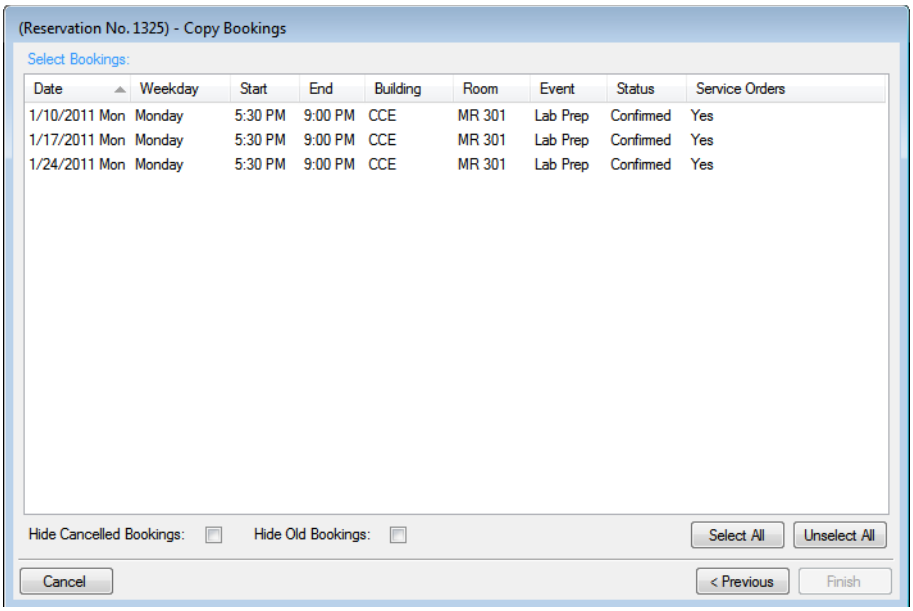
5. Enter the information for the new reservation.

Information	Description/Comments
Start Date	If you are copying a reservation with multiple bookings, then the start date should be the date of the earliest booking for the existing reservation.
New Status	The status for the new reservation.
Reconfirm Date	Enter if required for the new status that you selected.
Conflict Status	You must enter a conflict status in the event that the new bookings are in conflict with the existing bookings.
Reconfirm Date	Enter if required for the new conflict status that you selected.
• Copy Reminders • Copy Comments • Copy User Defined Fields • Copy Attachments • Copy Drawings	Leave the appropriate options selected to copy the existing items as is, or clear the option for each item that is not to be copied to the new reservation.
Copy Booking Details	Select the booking details that are being copied (CTRL-click to select multiple details) or to select all the details for copying, click Select All. **Note:** By default, only active booking details are displayed. To show inactive booking details for copying, click Show Inactive.

6. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the copied reservation, regardless of the date or status. See Figure 3-42 on page 118.

Figure 3-42: Copy Bookings Wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

7. CTRL-click to select the bookings that are being recreated in the new reservation, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.

The start date that you specified becomes the date of the first booking for the new reservation. In addition, the copied bookings are scheduled according to the same pattern as the existing reservation. For example, if the existing reservation has three bookings and each booking was scheduled every seven days (12/14, 12/21, and 12/28), and the start date for the new reservation is 12/15, then the new reservation has three bookings with dates of 12/15, 12/22, and 12/29.

When you copy multiple bookings, the bookings are simply copied and pasted as is—the bookings are not moved to different location. If you need to move a booking to a different location, see "To change rooms for a booking" on page 105.

8. Click OK to close the message and return to the Navigator.

   Both the existing reservation and the new reservation are now displayed in the left pane of the Navigator. If you moved the bookings to a new reservation, then the new reservation that is created is assigned the next available reservation number in the database. If any of the new bookings are in conflict with existing bookings, this conflict is indicated in the Navigator.

Booking Details and Items Overview

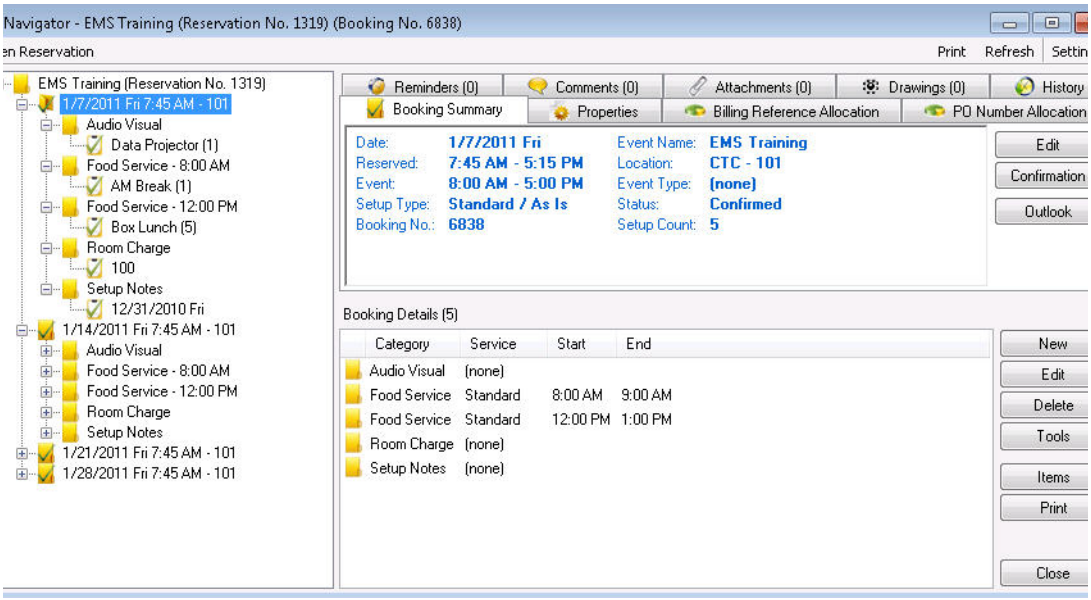
Booking details, which are also called *categories*, are the services (catering, A/V equipment, and so on), notes, attendees, activities, or room charges that you can assign to a booking. *Booking detail items*, also called *resources*, are the individual items (coffee, sandwich, projector, and so on) that you assign to a booking detail. When you add a resource to a booking, for example, coffee, various selections might be available or required, for example, regular, decaf, Italian roast, breakfast blend, and so on. Depending on how your EMS administrator has configured your categories, a resource might require service order times to be specified.

Your EMS Administrator can configure buildings and categories so that a particular category can be used only in a particular building or buildings. This means that when you are adding booking details to a reservation, some booking details (categories) might not be displayed as an option.

The booking details for a selected booking are displayed in the Booking Details pane (the lower right pane) of the Navigator.

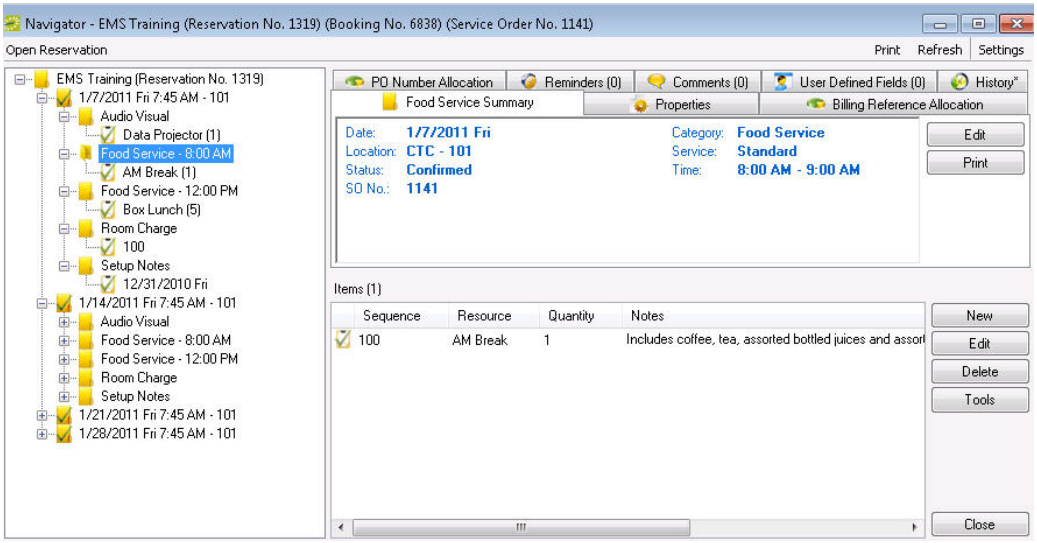
From this point on in the manual, categories that contain resources, but do not require service times are referred to as "resource categories." Categories that contain resources and that require service times are referred to as "service order categories." Categories that are used to manage food service are referred to as "catering categories." Categories that are used to manage miscellaneous notes (setup notes), agenda items, attendees/visitors, or room charges are referred to as "non-resource categories."

Figure 3-43: The Navigator window with a booking folder selected



If you select a booking detail folder in the left pane of the Navigator, the tabs that are displayed in the upper right pane of the Navigator depends on the type of booking detail that is selected:

Figure 3-44: The Navigator window with a booking detail folder selected



- <Booking Detail> Summary tab—The Summary displays information about the selected booking detail, including the event date, the event location, and the event status.
- Properties tab—The Properties tab also displays information about the booking detail, including the date that it was added to the booking, who added the detail, and, if applicable, the date that the detail was changed and who made the change.

If the booking detail has a price/charge associated with it, for example, a room charge, then the following two tabs are also displayed:

- Billing Reference Allocation tab—By default, the charge for a booking detail can be allocated to a single billing reference number. On the Billing Reference Allocation tab, you can allocate the charge for a reservation to multiple billing reference numbers by percentage. ee “To allocate charges to multiple billing reference numbers and/or PO numbers” on page 75.

Your EMS administrator must enable the Use Billing Reference Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

- PO Number Allocation tab—By default, the charge for a booking detail can be allocated to a single purchase order (PO) number. On the PO Number Allocation tab, you can allocate the charge for a reservation to multiple billing PO numbers by percentage. See “To allocate charges to multiple billing reference numbers and/or PO numbers” on page 75.

Your EMS administrator must enable the Use PO Number Allocation parameter for this tab to be displayed. See EMS System Parameters in the EMS Setup Guide.

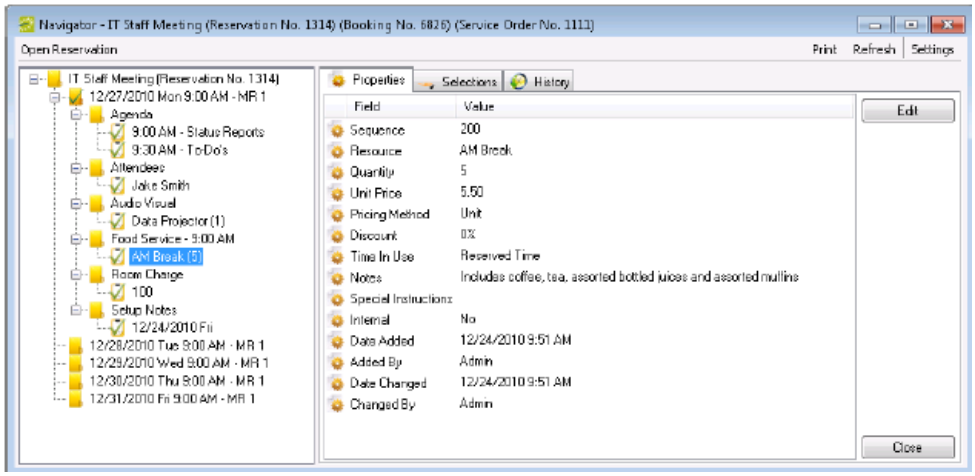
If the selected booking detail requires a service order or catering category, then the following four tabs are also displayed:

- User Defined Fields—The User Defined Fields tab displays the additional fields that store custom data for the booking detail. Your EMS Administrator configures the types of fields that are available as well as the allowed values for these fields. See "Working with User Defined Fields in the Navigator" on page 164.
- Reminders tab—The Reminders tab displays any reminders that were created for the selected booking detail. See "Working with Comments and Reminders in the Navigator" on page 158.
- Comments—The Comments tab displays any comments that were made for the selected booking detail. See "Working with Comments and Reminders in the Navigator" on page 158.
- History—The History tab displays the history for the booking detail—the date that a change was made to the detail, the ID of the user who made the change, the field that was changed, the old field value, and the new field value.

The booking detail items for the selected booking detail are displayed in the Items pane (the lower right pane) of the Navigator. A green check mark appears in front of each individual item that has been added to a booking.

If you select a booking details item in the left pane of the Navigator, then the entire right pane of the Navigator is refreshed with three tabs—a Properties that displays for the selected item, a Selections tab that displays the selections for the booking detail item (if applicable), and a History tab that details the history of the item.

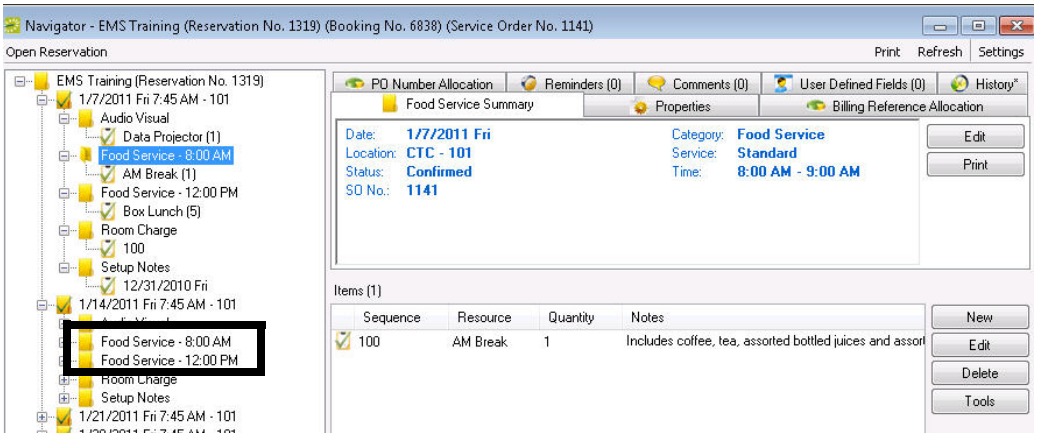
Figure 3-45: The Navigator window with a booking detail item selected



Service order

A booking detail might include a *service order.* A service order is a request to use the resource for a specified time period as opposed to using the resource for the entire event. For example, an event that meets from 10:00 am to 2:00 pm, might have food service from 11:00 am to noon. A service order consists of the service type, start and end times, and a unique, system-generated service order ID. For a catering booking detail, you can also indicate estimated count, guaranteed count, and actual count. You can create multiple service orders in the same booking. For example, you might have a number of catering services (breakfast, lunch, and afternoon refreshments) in the course of a one day training event. In this case, multiple folders are displayed under the booking folder on the left side of the Navigator window, with each folder representing a unique service order.

Figure 3-46: The Navigator window showing multiple service orders in the same booking



If you reserve an item from a category that does not require a service order, your only choices are to reserve the item for the event time or for the entire reserved time.

Your EMS administrator might have configured a default service type for some or all of your system's categories, but you can always select a different value. In addition, your EMS administrator might have configured states to manage your service order process. For detailed information about states, see Configuring Categories in the EMS Setup Guide.

Adding Booking Details and Items to Individual Bookings

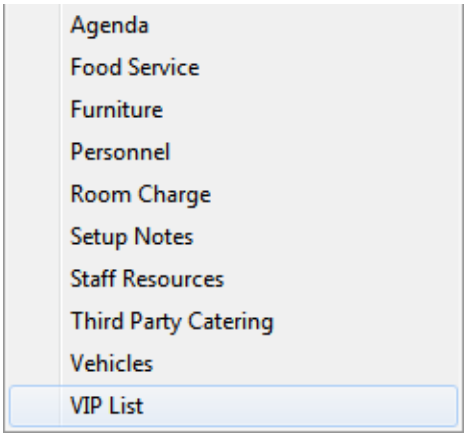
The steps that you follow to add booking details and items to individual bookings depend on the category type. Also, you can add multiple occurrences of a booking detail to a booking only if the detail is of the type “resource with service order” for catering or service order categories. If the booking detail is *not* from a catering or service order category, and the detail is already added to a booking, you cannot add the detail again to the booking. (You can, however, add more items to the booking detail.)

To add booking details and items to individual bookings

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, expand the folder structure for the reservation until the appropriate booking folder is visible.
3. Select the booking folder, and then in the Booking Details pane, click New.

   The Booking Details list opens.

Figure 3-47: Example of a booking details list



4. Select the booking detail that is to be added to the booking.

   A dialog box opens.

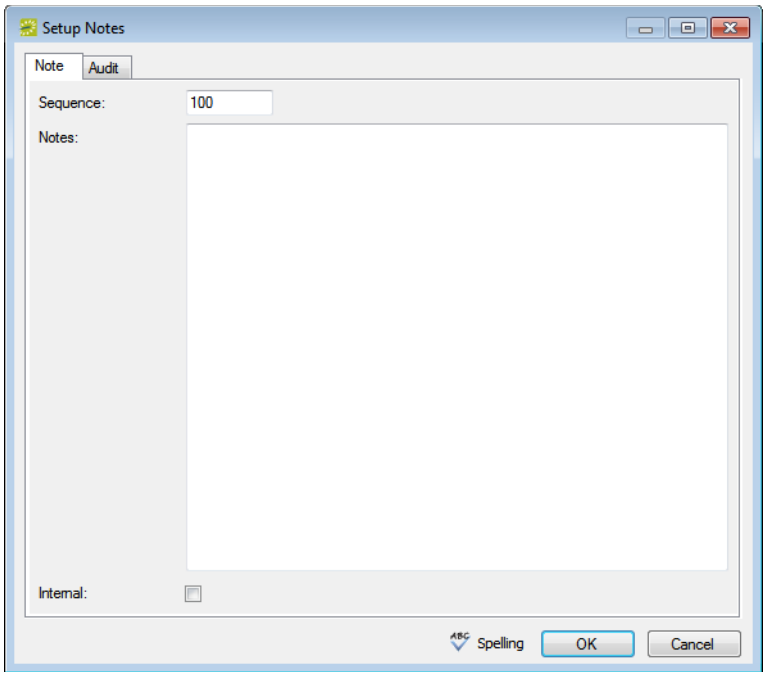
5. Continue to one of the following:
   - "To add a booking detail from a non-resource category."
   - "To add a booking detail from a service order, catering, or resource category" on page 129.

To add a booking detail from a non-resource category

A booking detail that is from a non-resource category can be setup notes, attendees, agenda (activities), or a room charge.

To add setup notes

Figure 3-48: Setup Notes dialog box



1. Enter the sequence number for the setup notes.

The sequence number determines the order in which the notes are displayed in the Items pane in the Navigator when the booking detail (Setup Notes) is selected for a booking.

2. Enter the appropriate notes or comments.
3. Optionally, if these notes are to be printed on internal reports only (the notes would be excluded from external reports like a confirmation), then select Internal.

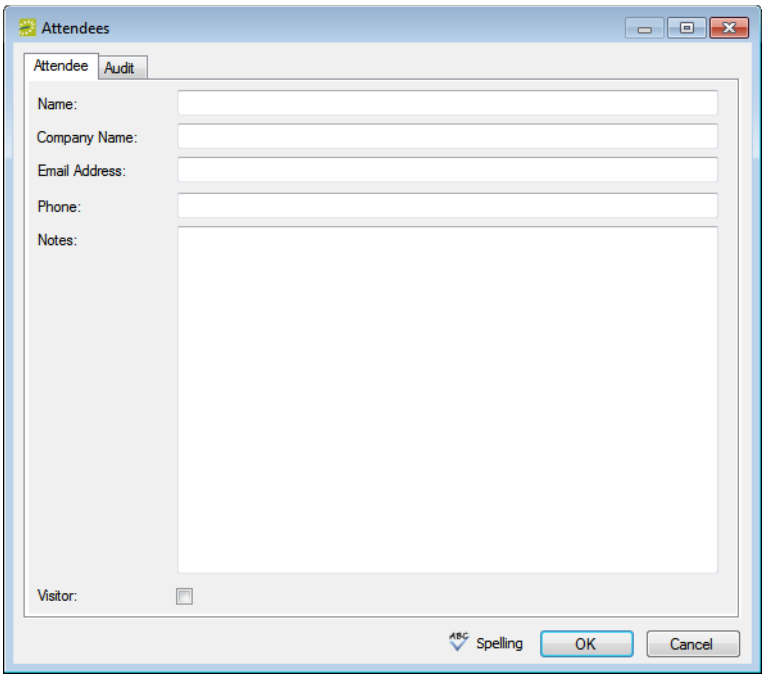
4. Click OK

   The Setup Notes dialog box closes. The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

If you must add multiple setup notes to a booking, then after you add setup notes for the first time to a booking, Setup Notes is no longer an available option on the Booking Details dropdown list. To add more setup notes to the booking, select the Setup Notes folder for the booking or click a Setup Note in the Items pane, and then click New.

To add attendees

Figure 3-49: Attendees dialog box



1. Enter the information for the attendee. At a minimum, you must enter the attendee name.
2. If the attendee is a visitor (that is, not registered for the event), then select Visitor.
3. Click OK.

   The Attendee dialog box remains open.

4. Repeat Step 1 through Step 3 until you have added all the needed attendees/visitors to the booking.

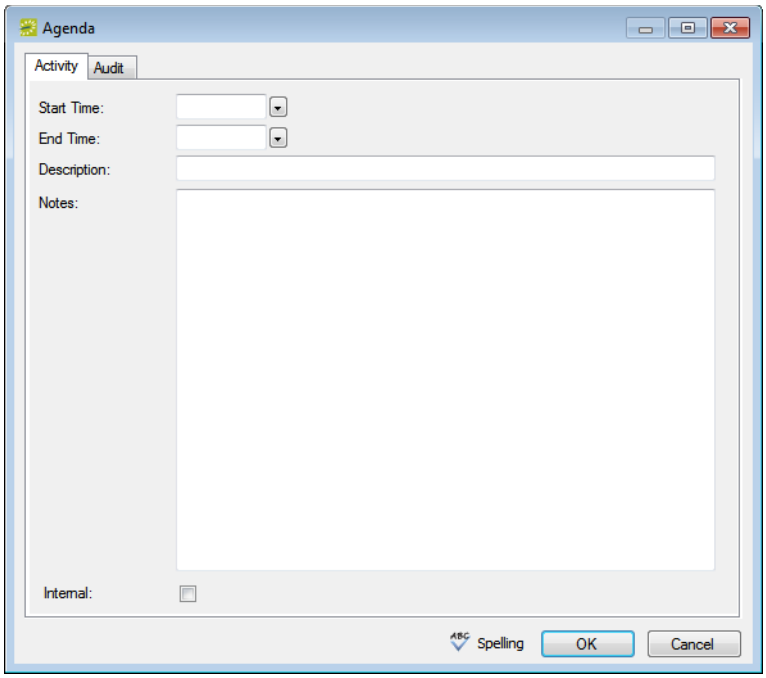
5. Click Cancel.

   The Attendees dialog box closes. The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

If you close the Attendees dialog box before you have added all the needed attendees/visitors to the booking, then Attendees is no longer an available option on the Booking Details dropdown list. To add more attendees/visitors to the booking, select the Attendees folder for the booking or click an attendee/visitor in the Items pane, and then click New.

To add an agenda (activities)

Figure 3-50: Agenda dialog box



1. Enter the start time, the end time, and a description for the agenda.
2. Optionally, in the Description field, enter a description or name for the agenda.

The description or name can be a maximum of 30 characters, including spaces.

3. Optionally, if these notes are to be printed on internal reports only (the notes would be excluded from external reports like a confirmation), then select Internal.
4. Click OK.

   The Agenda dialog box remains open.

5. Repeat Step 1 through Step 4 unit you have added all the needed agendas.

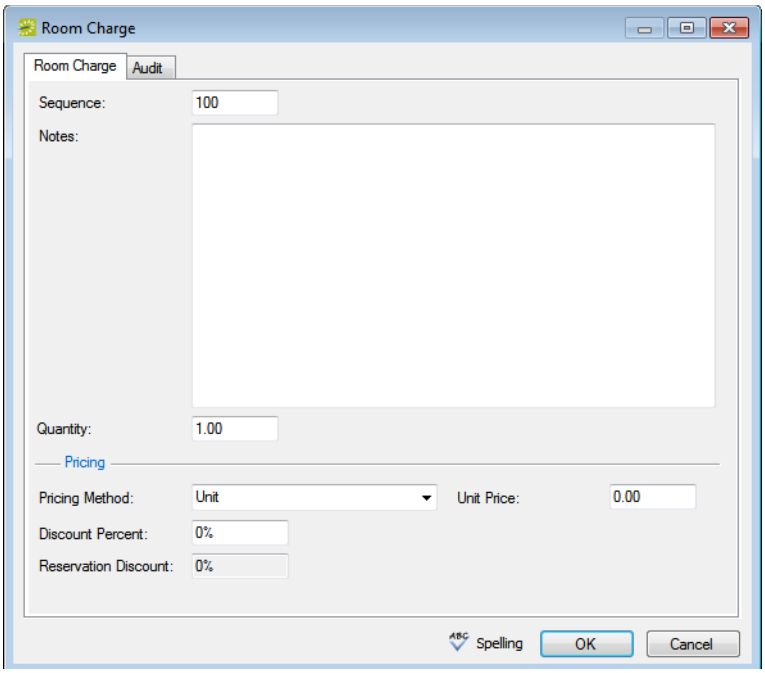
6. Click Cancel.

   The Agenda dialog box closes. The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

If you close the Agenda dialog box before you have added all the needed agendas/ activities to the booking, then the Agenda is no longer an available option on the Booking Details dropdown list. To add more agenda/activities to the booking, select the Agenda folder for the booking or click an agenda in the Items pane, and then click New.

To add a room charge

Figure 3-51: Room Charge dialog box



1. Enter the sequence number for the room charge.

The sequence number determines the order in which the charges are displayed in the Items pane in the Navigator when the booking detail (Room Charge) is selected for a booking.

2. Optionally, enter notes or comments about the room charge.
3. If needed, modify the quantity.

4. Select the appropriate pricing method, and then enter any other additional information as needed after you select a pricing method.

Pricing Method	Additional Fields
Unit	Unit Price
Half Day/Full Day (Event Time)	• Half Day Price • Full Day Price • Hours
Half Day/Full Day (Reserved Time)	• Half Day Price • Full Day Price • Hours
Hourly (Event Time)	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge
Hourly (Reserved Time)	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge
Hourly (Specific)	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge

5. Optionally, enter a discount percent and/or a reservation discount.
6. Click OK.

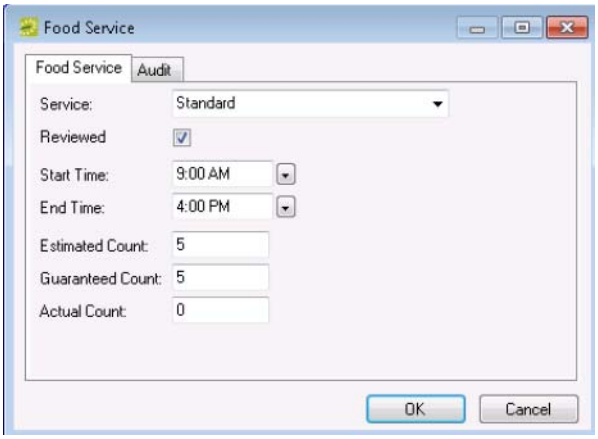
   The Room Charge dialog box closes. The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

If you must add multiple room charges to a booking, then after you add charges for the first time to a booking, Room Charge is no longer an available option on the Booking Details dropdown list. To add more charges to the booking, select the Room Charge folder for the booking or click a Room Charge in the Items pane, and then click New.

To add a booking detail from a service order, catering, or resource category

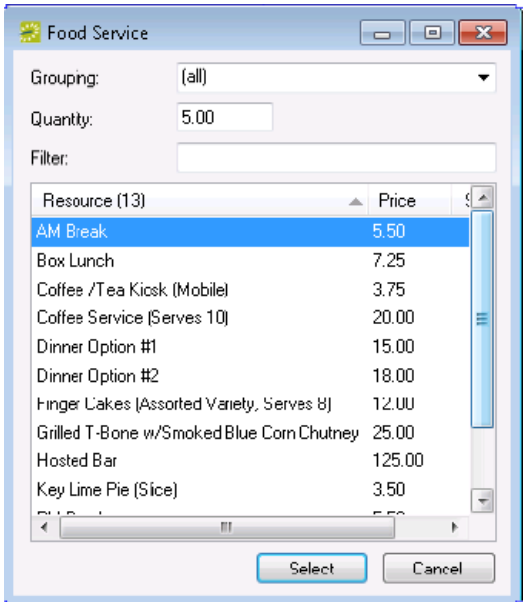
- If you select a service order or catering category, a Service Order dialog box opens with, at a minimum, options for Service, Reviewed, Service Start Time, and End Time. If a catering category is selected, additional fields for Estimated, Guaranteed and Actual Counts are displayed. Go to Step 1.

Figure 3-52: Example of a Service Order dialog box for a catering category



- If you select a resource category, then a Resource Selection dialog box opens with a pre-configured list from which you must select one or more resources. Go to Step 4.

Figure 3-53: Example of a Resource Selection dialog box that displays available resources



1. Select the service type.

2. Enter the start time, and optionally, the end time, estimated count, guaranteed count, and if applicable, select Reviewed and/or a state.

For more information about reviewing service orders and selecting states, see "Searching with the Service Order Management Browser" on page 203.

3. Click OK.

   A Resource Selection dialog box opens with a list of resources from which to choose.

4. Do one of the following on the Grouping dropdown list:

   - Leave the default value of (all) as is to search for all items in all groupings.
   - Select a specific grouping to search for only those items in the grouping. (For example, if the selected resource category is A/V Equipment, then available groupings could include Computer, Phone, Video, and so on. To search only for the available phones to add to a booking detail, select the Phones grouping.)

5. Optionally, in the Filter field, enter a search string by which to filter your search.

---

*Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "co" search results can include **co**ffee service, **co**nference phone, and mini-**co**pier.*

6. In the Quantity field, leave the default value of 1.00; otherwise, enter a new value.

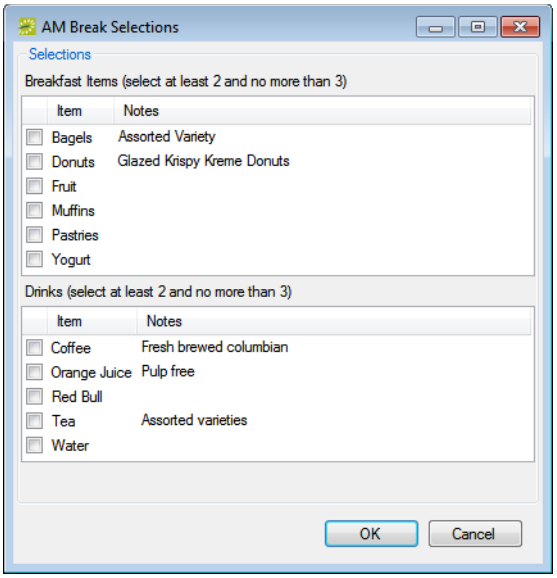
7. On the Items list, select the resource item that is to be added to the booking.

Your EMS administrator might have configured an override resource (also known as an override description) so that you can book a resource that has not been configured in your EMS database. For example, the administrator might have configured an override resource named "Other." If you select the "Other" resource, then a Description field is displayed on the Resource Selection dialog box. You must enter a description or name for the override resource. EMS does not track availability of override resource items; however, EMS reports on override resource items just like any other resource item.

8. Click Select.

   If your EMS administrator configured selections for the resource, then either you might be required to make selections for the resource, or you have the option to make selections for the resource (see Figure 3-54 on page 131); otherwise, go to Step 9.

Figure 3-54: Example of a Resource Selections dialog box



9. Repeat Step 4 through Step 8 until you have added all the necessary booking detail items for the selected booking.
10. Click Close.

    The Resource Selection dialog box closes. The resource and its items are displayed as folders under the Booking folder in the Navigator window.

If you close the Resource Selection dialog box before you have added all the needed resource items to the booking, and the booking detail is not from a catering or service order category, then the booking detail is no longer an available option on the Booking Details dropdown list. To add more resource items to the booking, you can select the Booking Detail folder for the booking or you can click a booking detail item in the Items pane, and then click New.

Adding Booking Details and Items to Multiple Bookings

You use the Add Booking Details Wizard to add booking details and items to multiple bookings in a single step. The steps that you follow depend on the category type. Also, you can add multiple occurrences of a booking detail to bookings only for catering and service order categories. If the booking detail is *not* from a catering or service order category, and the detail is already added to the bookings, you cannot add the detail again to the bookings. (You can, however, add more items to the bookings. See “Adding Booking Detail Items to Multiple Bookings” on page 139.)

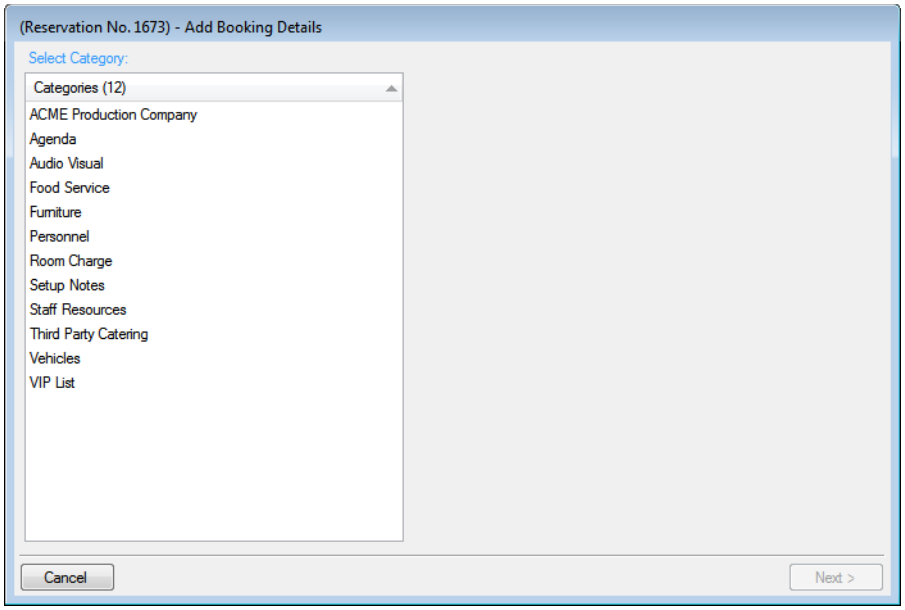
You can also manually copy booking details and items from one booking to another. To copy a booking detail, right-click on the booking detail that is to be copied, and on the context menu that opens, click Copy. Right-click on the booking to which the booking detail is is being copied, and on the context menu that opens, click Paste.

To add booking details and items to multiple bookings

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation to which the booking details are being added.
3. In the Bookings pane, click Tools, and then click Add Booking Details Wizard.

   The Add Booking Details Wizard opens. See Figure 3-55 on page 133.

Figure 3-55: Add Booking Details Wizard



4. Select the booking detail that is to be added to all the bookings for the selected reservation, and then continue to one of the following:
   - "To add a booking detail from a non-resource category."
   - "To add a booking detail from a catering, service order, or resource category" on page 135.

To add a booking detail from a non-resource category

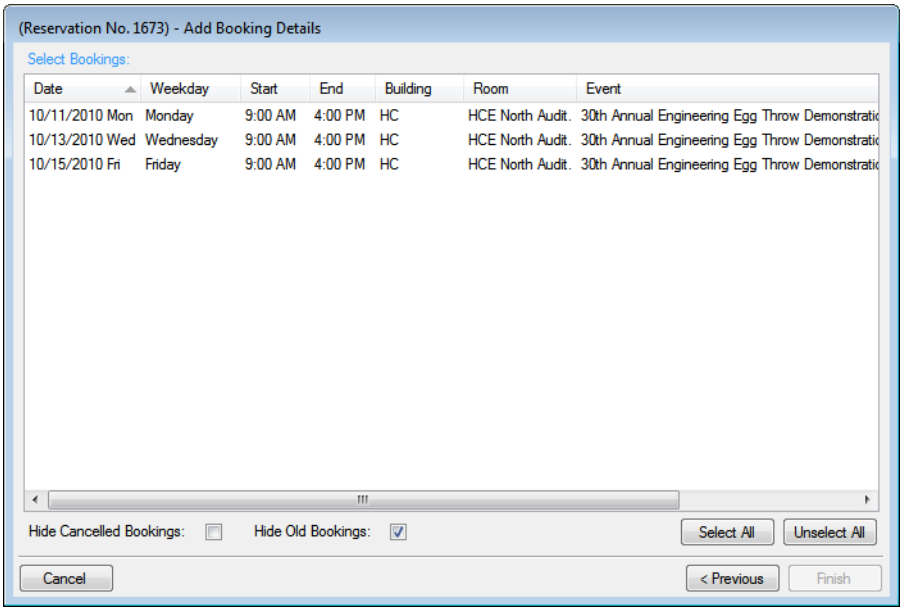
If you select a booking detail of any type other than resource or catering, (for example, attendees or setup notes), then to add the detail to the bookings, you follow the same general steps:

1. Click Next, and then enter the information for the booking detail.
   - If you are adding setup notes, see "To add setup notes" on page 124.
   - If you are adding attendees/visitors, see "To add attendees" on page 125.
   - If you are adding an agenda or activities, see "To add an agenda (activities)" on page 126.
   - If you are adding room charges, see "To add a room charge" on page 127.

2. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date, *and* that do not already have the selected booking detail added.

Figure 3-56: Add Booking Details Wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

3. CTRL-click to select the bookings to which the details are being added, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens asking you if you want to add more booking details.

4. Do one of the following:

   - Click Yes to return to the Add Booking Details Wizard.
   - Click No.

     A message opens indicating that the changes were made successfully.

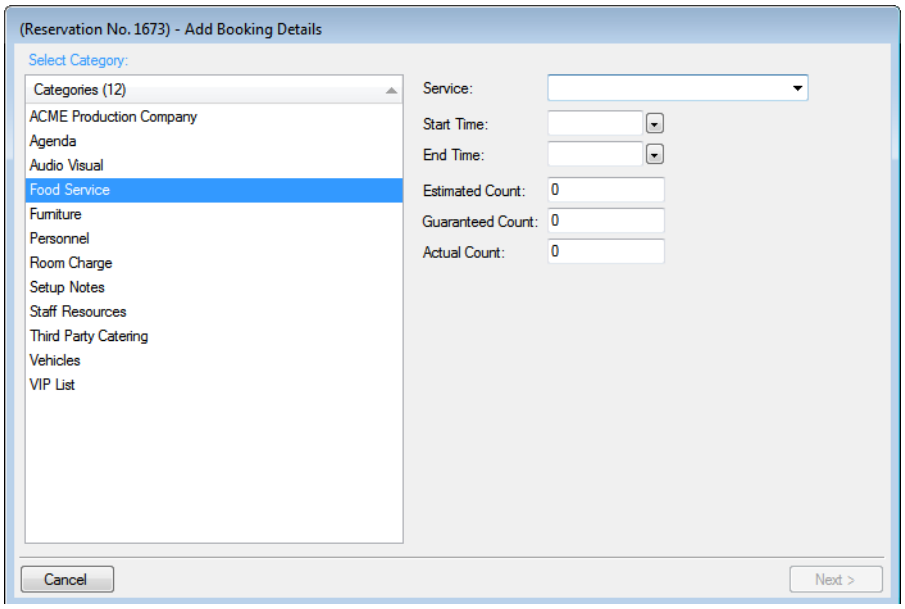
5. Click OK to close the message and return to the Navigator.

   The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

To add a booking detail from a catering, service order, or resource category

- If you select a service order or catering category, a Service Order dialog box opens with, at a minimum, options for Service, Reviewed, Service Start Time, and End Time. If a catering category is selected, additional fields for Estimated, Guaranteed and Actual Counts are displayed. Go to Step 1.

Figure 3-57: Example of the Add Booking Details Wizard for a resource with a service order



- If you select a resource category, then a Resource Selection dialog box opens with a pre-configured list from which you must select one or more resources. Optionally, if applicable, select Reviewed and/or select a state, and then go to Step 4.

For more information about reviewing service orders and selecting states, see "Searching with the Service Order Management Browser" on page 203.

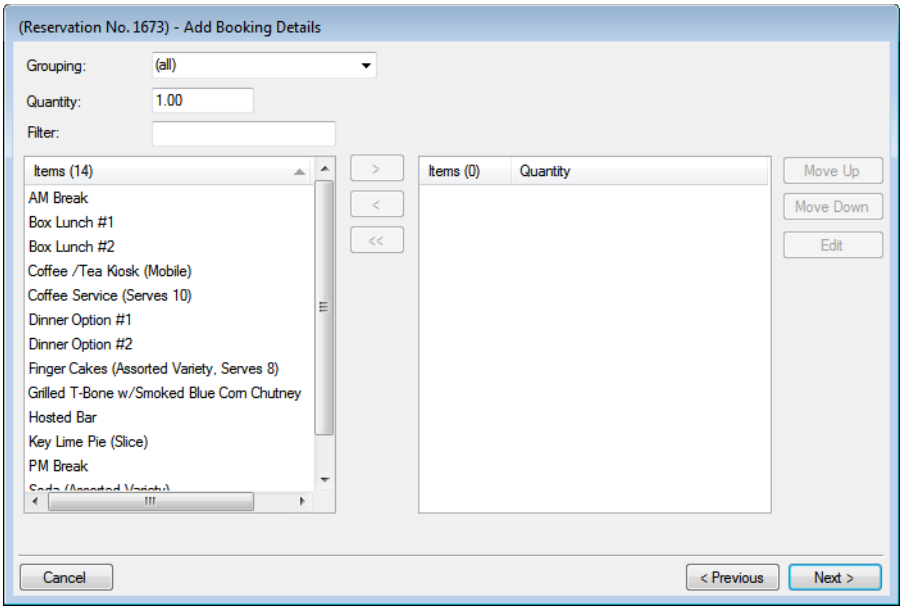
1. Select the service type.
2. Enter the start time, and optionally, the end time, estimated count, guaranteed count, and select Reviewed and/or a state.

For more information about reviewing service orders and selecting states, see "Searching with the Service Order Management Browser" on page 203.

3. Click Next.

   The Add Booking Details Wizard is refreshed with a list of resource items that you can add for the selected resource.

Figure 3-58: Example of the Add Booking Details Wizard with a list of resource items



4. Do one of the following on the Grouping dropdown list:

   - Leave the default value of (all) as is to search for all items in all groupings.
   - Select a specific grouping to search for only those items in the grouping. (For example, if the selected resource category is A/V Equipment, then available groupings could include Computer, Phone, Video, and so on. To search only for the available phones to add to a booking detail, select the Phones grouping.)

5. Optionally, in the Filter field, enter a search string by which to filter your search.

Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "co" search results can include ***co****ffee service,* ***co****nference phone, and mini-****co****pier.*

6. In the Quantity field, leave the default value of 1.00; otherwise, enter a new value.

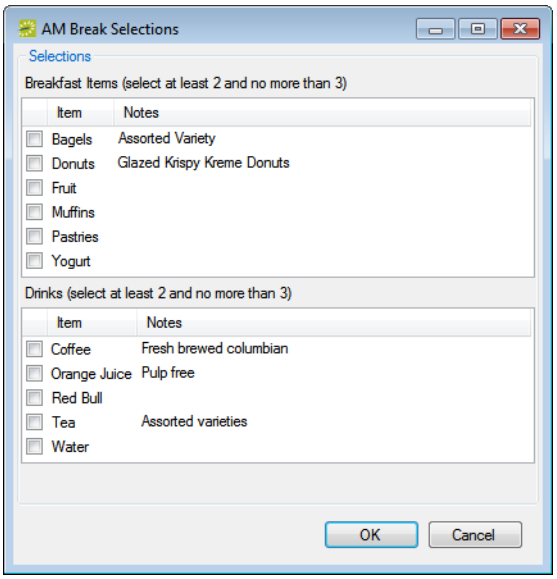
7. Select the needed item in the Items list (CTRL-click to select multiple items), and then click the Move button (>).

Your EMS administrator might have configured an override resource (also known as an override description) so that you can book a resource that has not been configured in your EMS database. For example, the administrator might have configured an override resource named "Other." If you select the "Other" resource, then a Description field is displayed on the Resource Selection dialog box. You must enter a description or name for the override resource. EMS does not track availability of override resource items; however, EMS reports on override resource items just like any other resource item.

Use the Move Up and Move Down options to order the selected items. To edit a selected item before you add it to multiple bookings, click the item, and then click Edit.

If your EMS administrator configured selections for the resource, then either you might be *required* to make selections for the resource, or you have the option to make selections for the resource; otherwise, go to Step 8.

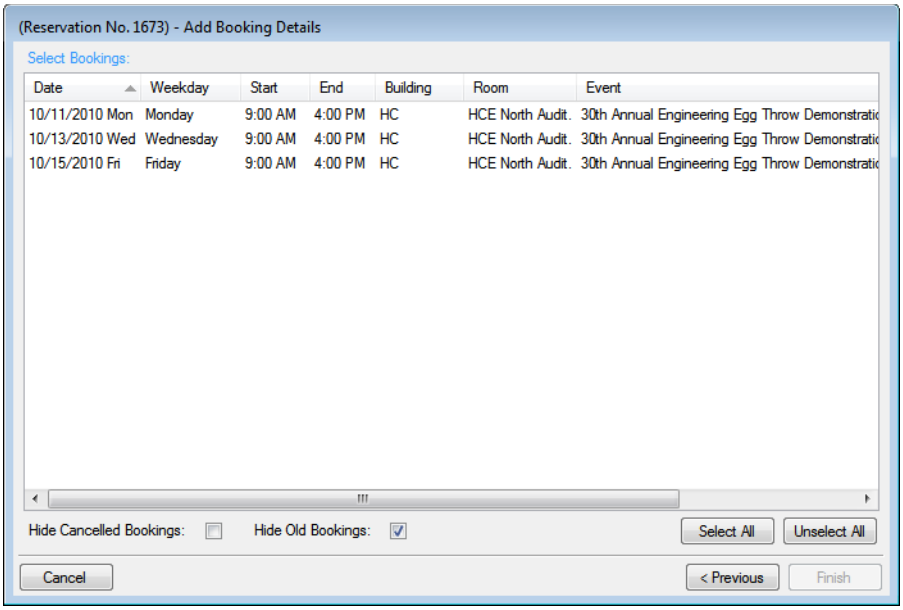
Figure 3-59: Example of a Resource Selections dialog box



8. Click Next.

The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date, *and* that do not already have the selected booking detail added. See Figure 3-60 on page 138.

Figure 3-60: Add Booking Details Wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

9. CTRL-click to select the bookings to which the details are being added, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens asking you if you want to add more booking details.

10. Do one of the following:

    - Click Yes to return to the Add Booking Details Wizard.
    - Click No.

      A message opens indicating that the changes were made successfully.

11. Click OK to close the message and return to the Navigator.

    The booking detail and its items are displayed as folders under the Booking folder in the Navigator window.

Adding Booking Detail Items to Multiple Bookings

You use the Add Item Wizard to add booking details items to multiple bookings for categories that *are already added* to the bookings. For example, you can use this Wizard to add food service items only if any of the bookings already has food service added as a booking detail.

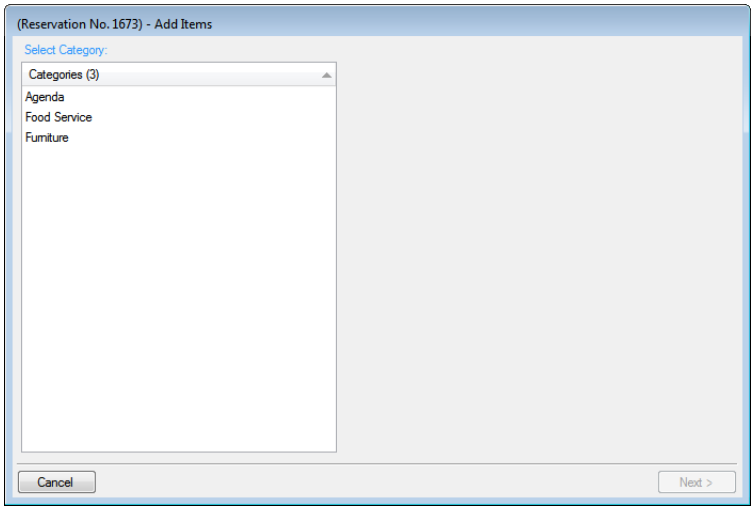
To add booking details and items for categories that are not already in use, see "Adding Booking Details and Items to Multiple Bookings" on page 132.

To add items to multiple bookings

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, select the reservation to which the bookings details and items are being added.
3. In the Bookings pane, click Tools, and then click Add Item Wizard.

   The Add Item Wizard opens. The first window in this Wizard, the Select Category window, displays only those categories *that are already in use* for any of the bookings in the reservation.

Figure 3-61: Add Item Wizard



4. Select the category to which you want to add items.
5. Click Next.

   The steps that you now must follow depend on the category type. See:

   - “To add a booking detail from a non-resource category” on page 133.
   - “To add a booking detail from a catering, service order, or resource category” on page 135.

Editing Booking Detail Items for Individual Bookings

After you have added booking details and items to bookings for a reservation, you can edit any of these items on an individual basis.

To edit the pricing information for multiple non-invoiced items in a single booking, or for multiple non-invoiced items in multiple bookings, see "Editing Booking Detail Item Charges in the Navigator" on page 145.

To edit booking detail items

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, expand the folder structure for the reservation until the appropriate booking details item folder is visible, and then do the following:
   - Select the folder for the booking details item that you are editing.
   - In the Items pane, select the item that you are editing.

The item cannot be invoiced. If the item is invoiced, the Edit button is not available. To edit an invoiced item, you must first void the invoice. See "To void an invoice" on page 324.

3. Continue to one of the following:
   - "To edit a booking detail item from a non-resource category" on page 142.
   - "To edit a booking detail item from a catering, service order, or resource category" on page 142.

To edit a booking detail item from a non-resource category

1. Click Edit.

   The <Booking Detail> dialog box opens.

2. Edit the item as necessary, and then click OK to close the <Booking Detail> dialog box and return to the Navigator.

   For detailed information about editing a booking detail item from a non-resource category, see:

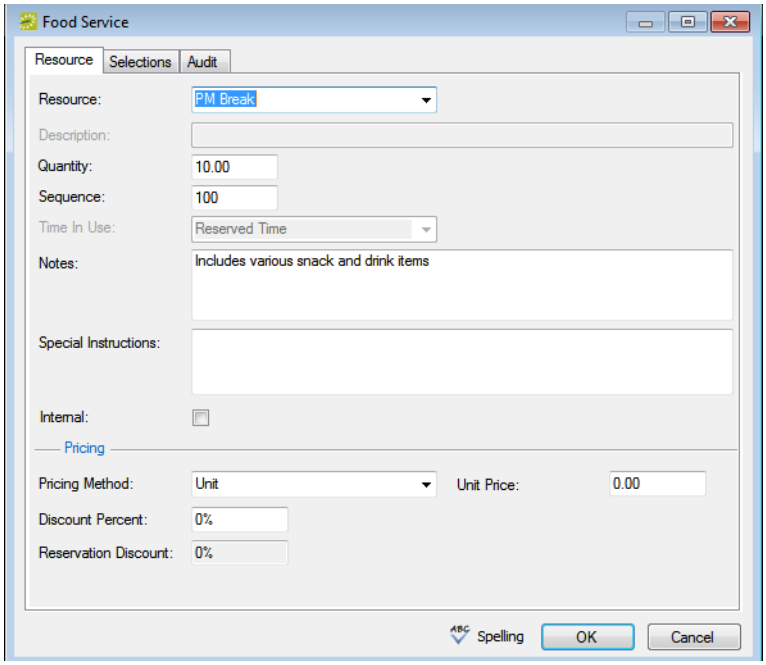
   - “To add setup notes” on page 124.
   - “To add attendees” on page 125.
   - “To add an agenda (activities)” on page 126.
   - “To add a room charge” on page 127.

To edit a booking detail item from a catering, service order, or resource category

1. Click Edit.

   The <Resource> dialog box opens. The Resource tab is the active tab. If selections are available for the resource, then the dialog box also has a Selections tab.

Figure 3-62: <Resource> dialog box, Resource tab



2. On the Resource tab, edit the information as necessary.
   - The sequence number determines the order in which the items (for example, juice, muffins, and so on) are displayed in the list in the Items pane in the Navigator when the booking detail (for example, Catering) is selected for a booking.
   - The Time in Use indicates the time that the resource is to be available for the booking.

For a definition of Event Time or Reserved Time, see "Event Timeline" on page 36. Service Order Time is available only for resources with a service order.

   - If the notes are to be printed on internal reports only (the notes would be excluded from external reports like a confirmation), then select Internal.
   - If you edit the pricing method, then make sure to enter any other additional information as needed.

Pricing Method	Additional Fields
Unit	Unit Price
Half Day/Full Day (Event Time)	• Half Day Price • Full Day Price • Hours
Half Day/Full Day (Reserved Time)	• Half Day Price • Full Day Price • Hours
Half Day/Full Day (Service Time) **Note:** Available only for a resource with a service order.	• Half Day Price • Full Day Price • Hours
Hourly (Event Time)	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge
Hourly (Reserved Time)	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge
Hourly (Service Time) **Note:** Available only for a resource with a service order.	• Hourly Price • Minimum Charge • Maximum Charge • Initial Flat Charge

Pricing Method	Additional Fields
Hourly (Specific)	• Hourly Price • Minimum Charge • Maximum Charge •

- If applicable, open the Selection tab, and modify the resource selections as needed.

3. Click OK.

   The <Resource> dialog box closes, and you return to the Navigator with the modified item still selected in the Items pane.

If you need to modify counts and/or times for individual items in a catering, service order, or resource category, see "Editing Count Information for a Booking in the Navigator" on page 147.

Editing Booking Detail Item Charges in the Navigator

You can edit resource quantities and billing information (price, pricing method, and so on) for individual items (see "Editing Booking Detail Items for Individual Bookings" on page 141) or you can edit this information for multiple *non-invoiced* items using the Edit Charges tool.

To edit the billing information for invoiced items, you must first void the invoice. See "To void an invoice" on page 324.

To edit booking detail item charges in the Navigator

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In left pane of the Navigator, do one of the following:
   - To edit all billable items in all the bookings for a reservation, select the reservation.
   - To edit only the billable items in a selected booking, expand the reservation folder, and under the expanded reservation folder, select the booking that contains the items that are being edited.
3. In the lower right pane of the Navigator, click Tools > Edit Charges.

   The Edit Charges window opens. If you selected a reservation, then all non-invoiced billable items in all the bookings for the selected reservation are displayed in the window; otherwise, only the non-invoiced billable items for the selected booking are displayed. See Figure 3-63 on page 146.

Recalculate
Close

4. Optionally, on the Category dropdown list, select a category to narrow the list of items that are displayed.
5. To edit the quantity, pricing method, price, or discount percentage for an item, click in the appropriate field for the item and make the necessary edits.
6. Click Close.

   Any resulting recalculations are carried out automatically. The Edit Charges window closes and you return to the Navigator.

Editing Count Information for a Booking in the Navigator

You use the Edit Counts tool to edit the count information for a booking, including the setup count and attendance count, the estimated count, guaranteed count, and actual count for a booking detail with a category type of catering, and the counts for *non-invoiced* booking detail items. You can edit the counts for all bookings in a reservation or for just a selected booking.

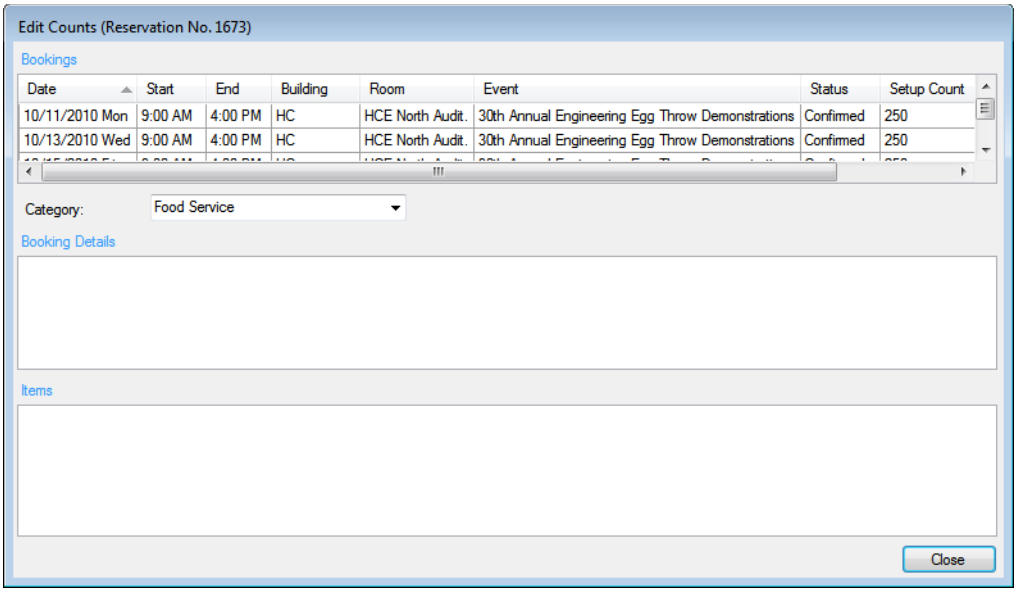
Much of the information that you can edit using the Edit Counts tool is also available for editing in other areas of the application. The purpose of this tool is simply to collate all the count information in a single location for editing.

To edit counts

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, do one of the following:
   - Select the reservation.
   - Expand the reservation folder, and under the reservation folder, select a specific booking.
3. In the Bookings pane, click Tools, and then click Edit Counts.

   The Edit Counts window opens. If you selected the reservation, then the Bookings (top) pane of the window lists all the bookings for the selected reservation; otherwise, the pane lists just the selected booking. See Figure 3-64 on page 148.

Figure 3-64: Edit Counts window



4. Select the booking for which the count information is to be edited.
5. On the Category dropdown list, select the booking detail (category) for which the count information is to be edited.

   The Booking Details (middle) pane is refreshed with the information for the selected category. If the category is a resource with a service order, then the pane displays the service type and the start and end times for the category. If the category is catering, then the pane also displays the estimated count, guaranteed count, and actual count for the booking detail.
6. In the Booking Details pane, select the booking detail that contains the items for which the count information is to be modified.

   The Items (lower) pane is refreshed with a list of all the non-invoiced items for the selected detail.
7. To modify the count information for any booking detail or detail item, click in the appropriate field and make the necessary edits.
8. To edit the count information for multiple bookings, repeat Step 4 through Step 7 as needed for each booking.
9. Click Close.

   The edits are made. You return to the Navigator.

Applying a Reservation Discount

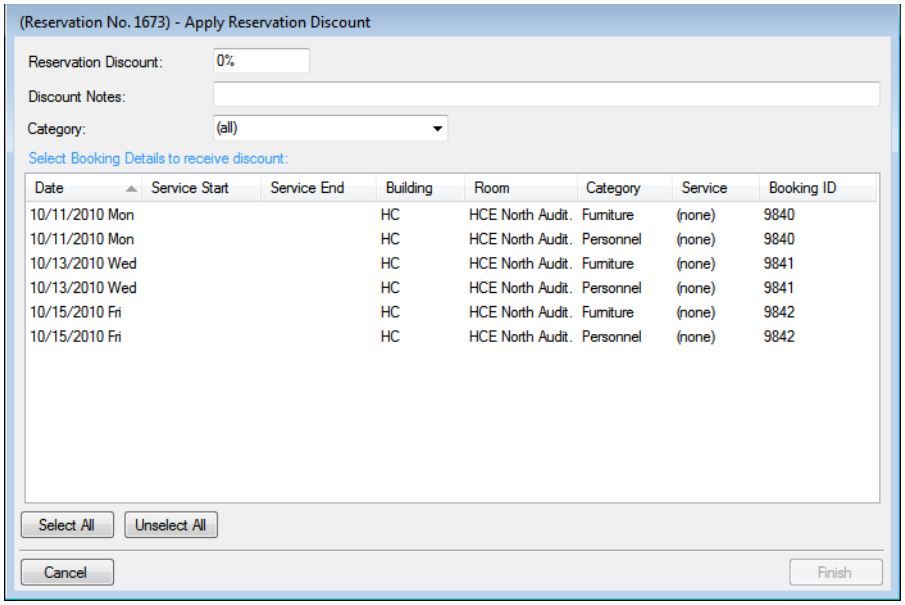
You use Apply Reservation Discount Wizard to apply a reservation discount to details in a booking. The discount is applied as a percentage of the total charge for an item and it is added to any existing discounts that have already been applied to the item.

To apply a reservation discount

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation to which the discount is being applied.
3. In the Bookings pane, click Tools, and then click Apply Reservation Discount.

   The Apply Reservation Discount window opens. All the bookings for the selected reservation with their categories that have not been invoiced are displayed.

Figure 3-65: Apply Reservation Discount window



4. Leave the Category set to the default value of (all), or optionally, to apply a discount to all the items in a specific category, on the Category dropdown list, select a category.

   The Apply Reservation Discount window is updated with the bookings that have the selected category.

5. Enter the discount percentage.
6. Optionally, enter any notes that are relevant about the discount.
7. CTRL-click to select the bookings to which the discount is to be applied, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.

8. Click OK to close the message and return to the Navigator.

After you apply a reservation discount, you can view it and/or edit it when you are editing the reservation on the Billing Information tab of the Reservation window in the Navigator. See *"Editing a Reservation in the Navigator" on page 85.*

Copying Booking Details between Bookings

You use the Copy Booking Details Wizard to copy the details from one booking in a reservation and paste them into other bookings for the same reservation or for a different reservation.

To copy booking details between bookings

1. Open the reservation *to* which the details are to be copied in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, select the reservation.
3. In the Bookings pane, click Tools, and then click Copy Booking Details Wizard.

   The Copy Booking Details Wizard open. The first window in this Wizard, the Select Booking Details to Copy window, displays all the bookings for the selected reservation, regardless of date. By default, the Copy From Reservation No. field displays the reservation number for the selected reservation.

   A message opens indicating that the changes were made successfully.

8. Click OK to close the message and return to the Navigator.

Deleting Booking Detail Items for Multiple Bookings

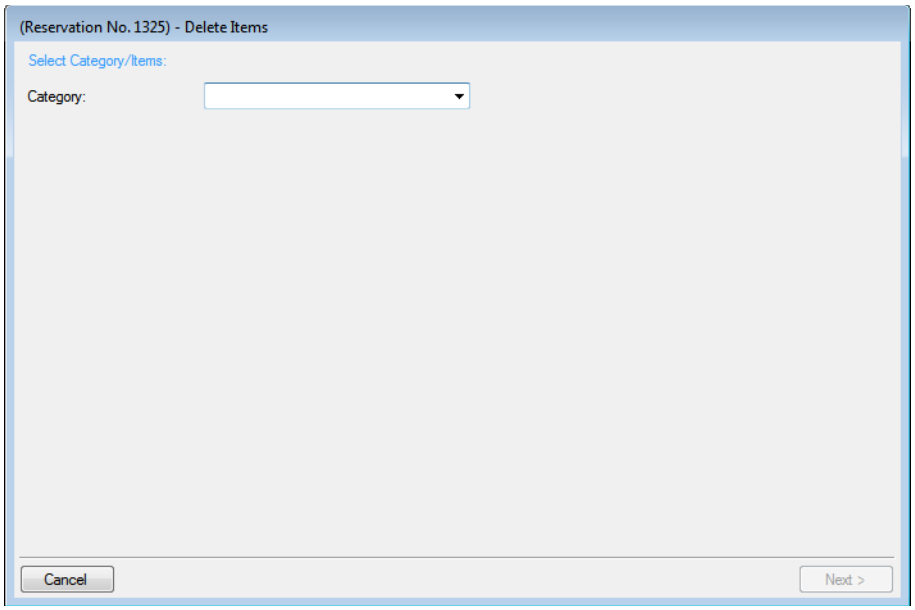
If you add booking detail items to bookings for a reservation in error, or a booking item is no longer valid for one or more bookings, and the item has not been invoiced, you can use the Delete Item Wizard to delete the item. You can delete each item on an individual basis, or you can delete all the items for a booking detail in a single step.

To delete booking detail items for individual bookings

1. Open the reservation for which you are deleting booking detail items in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation.
3. In the Bookings pane, click Tools, and then click Delete Item Wizard.

   The Delete Item Wizard opens. The first window that opens is the Select Categories window.

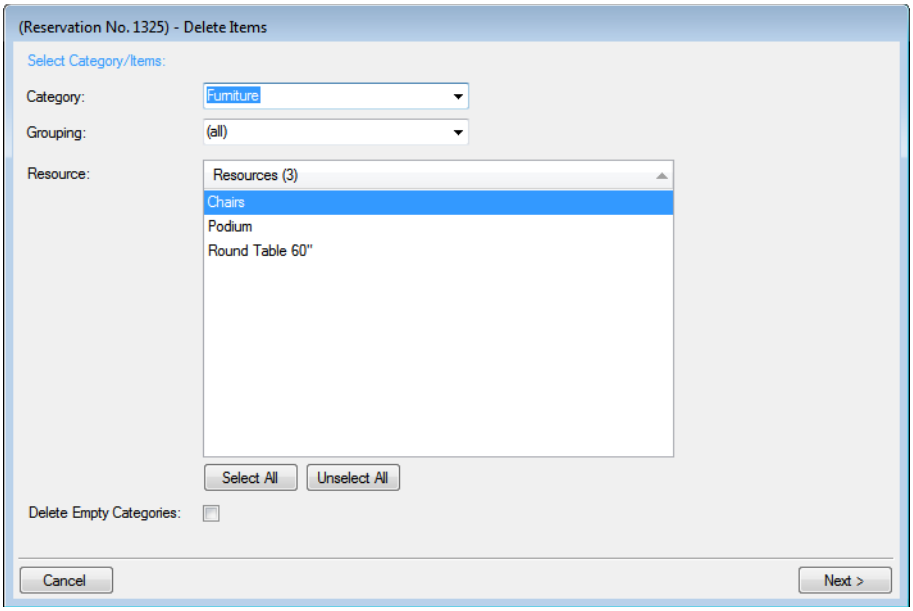
Figure 3-68: Delete Item Wizard, Select Categories window



4. Select the category (booking detail) from which you are deleting the items, and then click Next.

   The Select Categories/Items window opens.

Figure 3-69: Delete Item Wizard, Select Categories/Items window



5. Optionally, do one or both of the following:

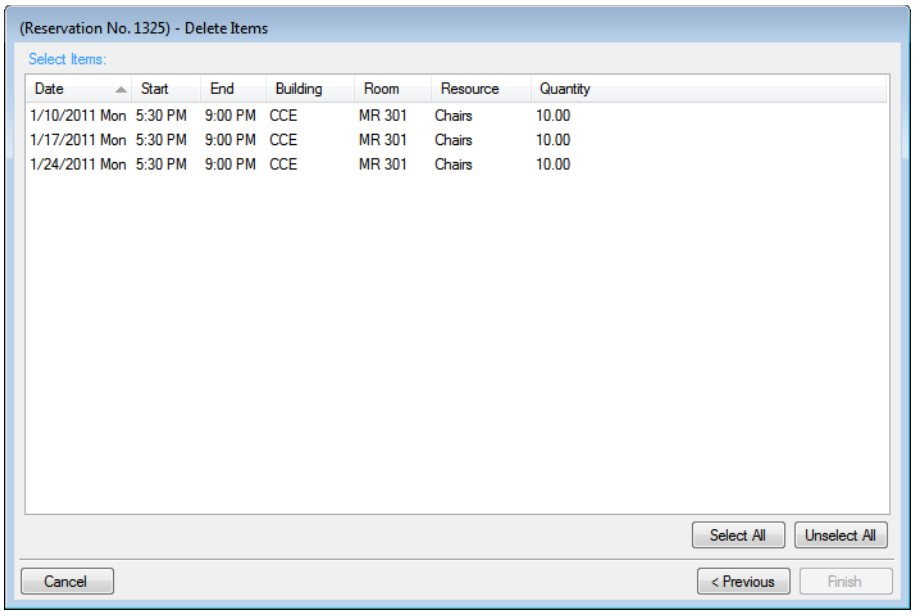
   - Select a specific grouping to limit the display to only those items in the grouping.
   - Select Delete Empty Categories if you want to delete those categories (booking details) for which no resource items have been selected.

6. On the Resources list, select the resource item, or CTRL-click to select multiple resource items that are to be deleted.

7. Click Next.

   The Select Bookings window opens. This page lists all the bookings for the selected reservation with a date greater than or equal to the current day's date that have the resource items that were selected for deletion. See Figure 3-70 on page 155.

Figure 3-70: Delete Item Wizard, Select Bookings window



8. CTRL-click to select the bookings from which the resource items are to be deleted, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.

9. Click OK to close the message and return to the Navigator.

Deleting Booking Details from Multiple Bookings

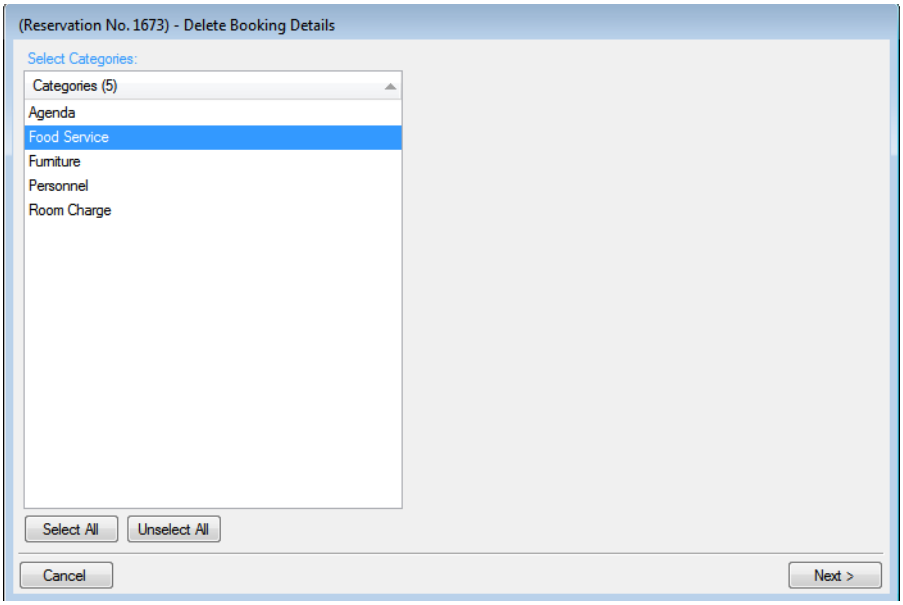
You use the Delete Booking Details Wizard to delete one or more booking details that do *not* have invoiced items from multiple bookings in a single step. When you delete a booking detail from a booking, any items that have been added for the detail are also deleted.

To delete booking details from multiple bookings

1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation.
3. In the Bookings pane, click Tools, and then click Delete Booking Details Wizard.

   The Delete Booking Details Wizard opens. The first window in this Wizard, the Select Categories window, displays all the categories *that are already in use* for any of the bookings in the reservation.

Figure 3-71: Delete Booking Details Wizard, Select Categories window

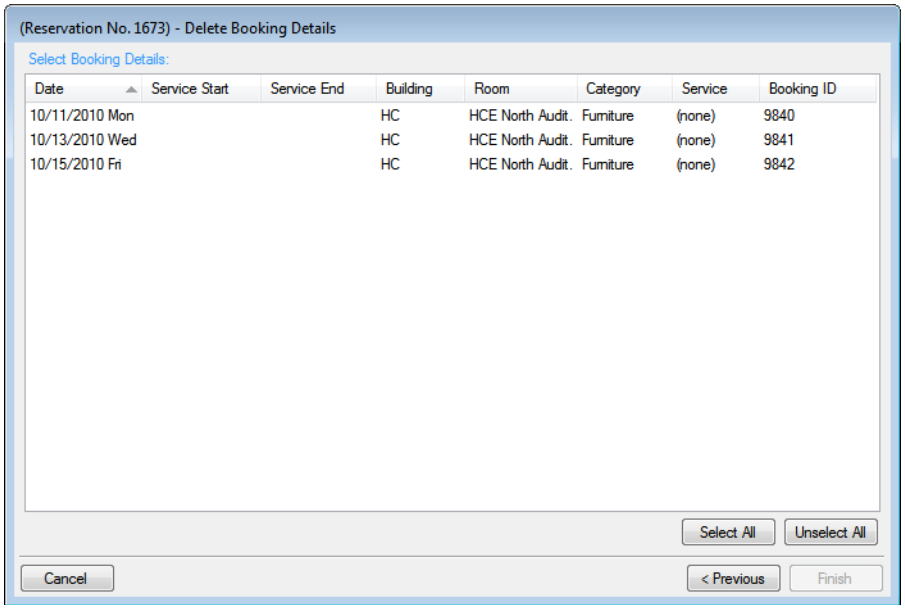


4. Select the category that is to be deleted from the bookings (CTRL-click to select multiple categories), or click Select All to select all categories for deletion.

5. Click Next.

   The Select Booking Details window opens. This page lists all the bookings for the selected reservation with a date greater than or equal to the current day's date that have the categories (booking details) that were selected for deletion and that do not contain any invoiced items.

Figure 3-72: Delete Booking Details Wizard, Select Booking Details window



6. CTRL-click to select the bookings from which the details are to be deleted, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens indicating that the changes were made successfully.

7. Click OK to close the message and return to the Navigator.

Working with Comments and Reminders in the Navigator

A *comment* is a text entry that explains or clarifies a reservation, a booking, a group, or a booking detail that is a service order. A *reminder* is a comment that has a due date associated with it. You can select from a pre-configured list of comment types and reminder types, or you can create a user-specified comment type or reminder type if none of the pre-configured types meets your working needs. You can add comments/reminders directly to a reservation, booking, or service order in the Navigator. You can also edit a comment/reminder, delete a comment/reminder, and view the history for a comment/reminder.

A reminder that you add to a reservation, booking, group, or booking details is called an attached reminder. To work with unattached reminders, see "Reminders Tab" in "Overview of the EMS Dashboard and Dashboard Options" on page 209.

To work with a comment or reminder in the Navigator

The following procedures are written from the perspective of working with a single comment. By analogy, you can follow these procedures to work with a single attached reminder. To add multiple comments and/or reminders to a reservation in a single step, see "Adding Multiple Comments and Reminders to a Reservation" on page 162.

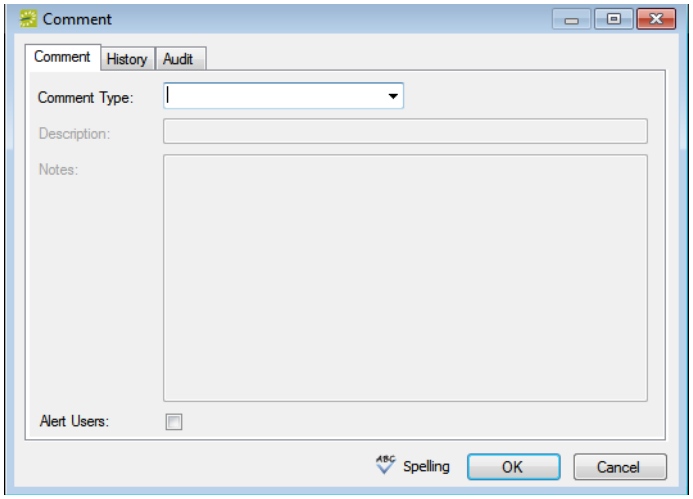
1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, select the reservation, booking, or service order, and then in the right pane of the Navigator, open the Comments tab.
3. Continue to one of the following:
   - "To add a comment" on page 159.
   - "To edit a comment" on page 160.
   - "To delete a comment" on page 160.
   - "To the view history for a comment" on page 161.

To add a comment

1. Click New.

   The Comment dialog box opens.

Figure 3-73: Comment dialog box



2. On the Comment Type dropdown list, select the type of comment that you are adding; otherwise, if none of the pre-configured comment types meets your working needs, select (user-specified comment), and then in the Description field, enter a description for the comment type.
3. In the Notes field, enter the comment.
4. Optionally, do one or both of the following:
   - To alert any EMS user that opens this reservation that this comment has been added to the reservation, select Alert Users.
   - Click Spelling to spell check the comment before you add it to the reservation, booking, or booking detail.
5. Click OK.

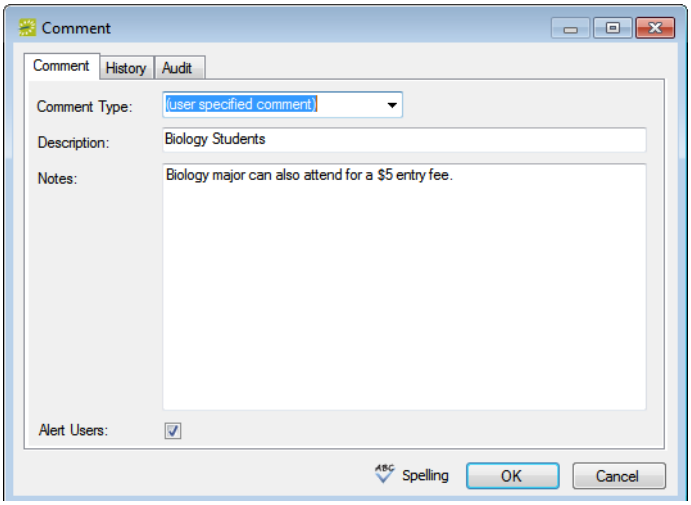
   The Comment dialog box closes. The comment is added to the reservation, booking, or service order. The Comments tab remains open.

To edit a comment

1. Select that comment that is to be edited, and then click Edit.

   The Comment dialog box opens. The comment is displayed in the Notes field.

Figure 3-74: Comment dialog box with comment



2. Modify the comment as needed, including its type, description, and/or its Alert User status.
3. Optionally, click Spelling to spell check the comment before you save the modified comment.
4. Click OK.

   The Comment dialog box closes. The modified comment is saved for the reservation, booking, or service order. The Comments tab remains open.

To delete a comment

1. Select the comment that is being deleted and then click Delete.

   A message opens asking you if it is OK to delete the selected comment.

2. Click Yes.

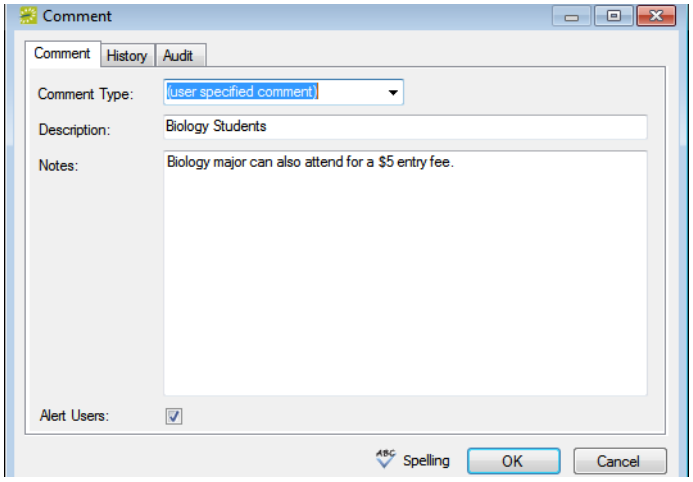
   The selected comment is deleted from the reservation, booking, or service order. The Comments tab remains open.

To the view history for a comment

1. Select the comment for which you viewing the history, and then click Edit.

   The Comment dialog box opens. The comment is displayed in the Notes field.

Figure 3-75: Comment dialog box with comment

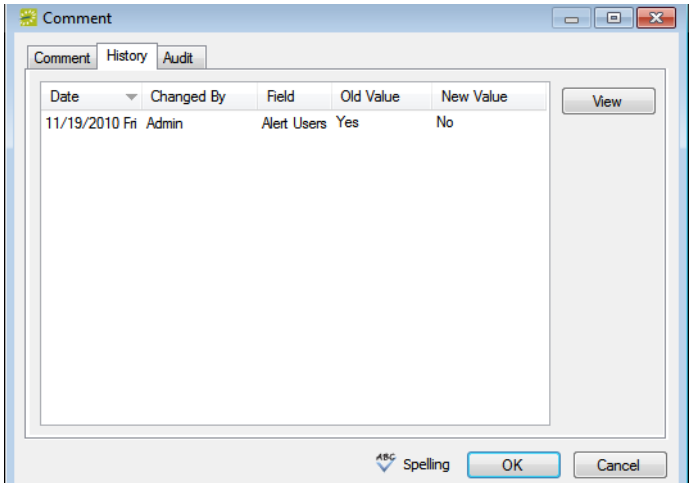


2. Open the History tab.

   The tab displays the following information for each change that was made to the comment—the date of the change, the login ID for the user who made the change, and the old and new values for the comment.

You can use the scroll feature at the bottom of the dialog box to view all the history for a selected change, or you can click a change, and then click View.

Figure 3-76: Comment dialog box, History tab



3. Click OK.

   The Comment dialog box closes. The Comments tab remains open.

Adding Multiple Comments and Reminders to a Reservation

When you add a comment or a reminder to a reservation from the Comments tab or Reminders tab, respectively, then you can add only a single comment or reminder at a time. To add multiple comments or reminders to a reservation in a single step, you must use an option on the context menu for reservations in the Navigator.

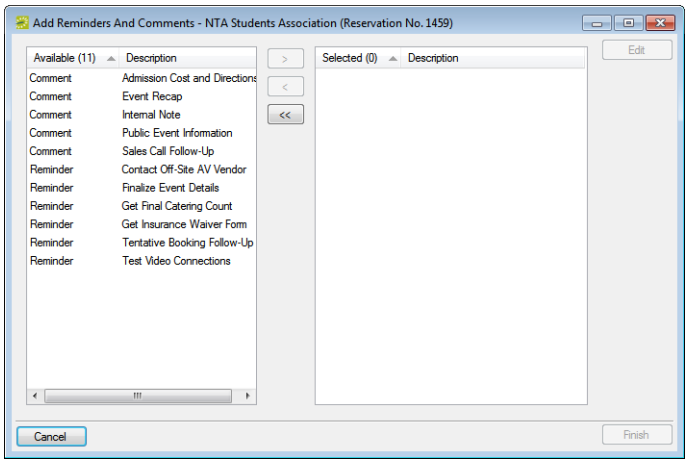
When you add multiple reminders and comments to a reservation, your only option is to select from a pre-configured list of comment types and reminder types. To add a user-specified comment type or reminder type, you must add each comment or reminder individually. See "Working with Comments and Reminders in the Navigator" on page 158.

To add multiple comments and reminders to a reservation

1. Open the reservation to which you are adding multiple comments and/or reminders in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, right-click the reservation, and on the context menu that opens, click Add Reminders and Comments.

   The Add Reminders and Comments window opens. This window lists all the available pre-configured reminder and comment types in the Available list.

Figure 3-77: Add Reminders and Comments window



3. In the Available list, select the comment/reminder type, or CTRL-click to select multiple comment/reminder types that are to be added to the reservation, and then click the Move (>) button to move the selected comment/reminder types to the Selected list.
4. To enter the text for the selected comment/reminder types, select a comment/reminder type in the Selected list, and then click Edit.

   A Notes dialog box opens in which you can enter the text for the selected comment/reminder type.
5. After you have entered the text for a selected comment/reminder type, click OK to close the Notes dialog box and return to the Add Reminders and Comments window.
6. Repeat Step 4 and Step 5 for each selected comment/reminder type.
7. Click Finish.

   A message opens indicating that the comment/reminder types were added successfully.
8. Click OK to close the message and return to the Navigator.

Working with User Defined Fields in the Navigator

The User Defined Fields tab displays the additional fields that store custom data for a reservation or a booking detail that is a service order. Your EMS Administrator configures the types of fields that are available as well as the allowed values for these fields. You can add new fields to a reservation or booking detail, edit the value for a field, and delete fields. You can also view the history for a field.

To work with user-defined fields in the Navigator

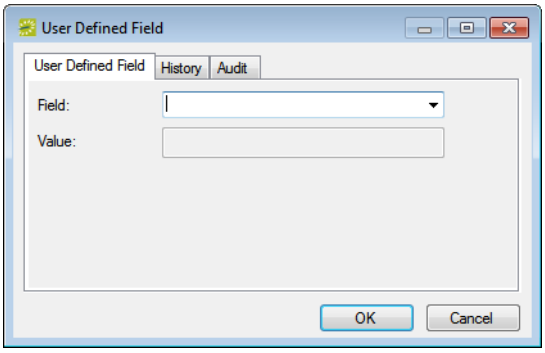
1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation or booking detail (remember, the booking detail must be a service order), and then in the right pane of the Navigator, open the User Defined Fields tab.
3. Continue to one of the following:
   - “To add a user-defined field” on page 165.
   - “To edit a user-defined field” on page 165.
   - “To delete a user-defined field” on page 166.
   - “To the view history for a user-defined field” on page 166.

To add a user-defined field

1. Click New.

   The User Defined Field dialog box opens.

Figure 3-78: User Defined Field dialog box



2. On the Field dropdown list, select the type of field that you are adding.
3. On the Value dropdown list, select an allowed value for the field.
4. Click OK.

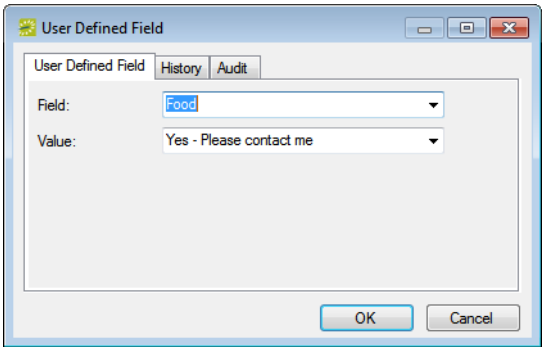
   The User Defined Field dialog box closes. The field is added to the reservation and the User Defined Fields tab remains open.

To edit a user-defined field

1. Select that user defined field that is to be edited, and then click Edit.

   The User Defined Field dialog box opens. The field type and field value are displayed in the dialog box.

Figure 3-79: User Defined Field dialog box with field type and value



2. Modify the field type, field value, or both as needed.
3. Click OK.

   The User Defined Field dialog box closes. The modified field is saved for the reservation and the User Defined Fields tab remains open.

To delete a user-defined field

1. Select the user-defined field that is being deleted and then click Delete.

   A message opens asking you if it is OK to delete the selected field.

2. Click Yes.

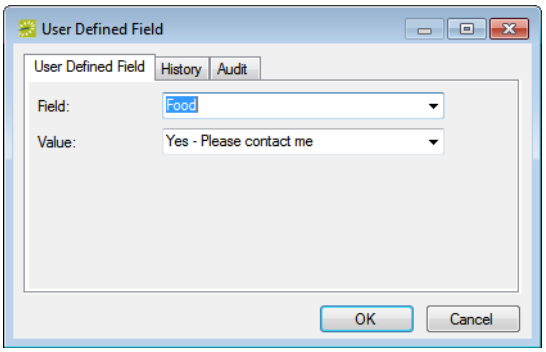
   The selected field is deleted. The User Defined Fields tab remains open.

To the view history for a user-defined field

1. Select the user-defined field for which you viewing the history, and then click Edit.

   The User Defined Field dialog box opens. The field type and field value are displayed in the dialog box.

Figure 3-80: User Defined Field dialog box with field type and value

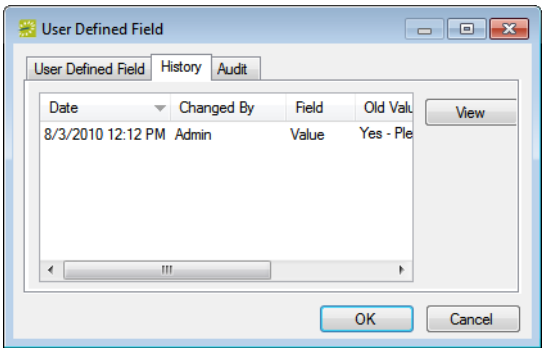


2. Open the History tab.

   The tab displays the following information for each change that was made to the field—the date of the change, the login ID for the user who made the change, and the old and new values for the field.

You can use the scroll feature at the bottom of the dialog box to view all the history for a selected change, or you can click a change, and then click View.

Figure 3-81: User Defined Field dialog box, History tab



3. Click OK.

   The User Defined Field dialog box closes. The User Defined Fields tab remains open.

Working with Attachments in the Navigator

The term *attachment* is used to describe any file that you can add to or store on a reservation or booking. (Unlike a drawing, which is simply referenced, an attachment is actually stored in the EMS database with the reservation or booking record.) You can also delete an attachment from a booking, and view and edit an attachment.

To work with attachments in the Navigator

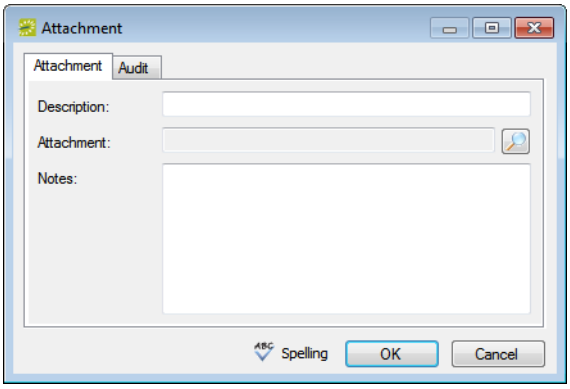
1. Open the reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the left pane of the Navigator, select the reservation or expand the folder structure for the reservation until the appropriate booking folder is visible, and then select the booking folder.
3. In the right pane of the Navigator, open the Attachments tab.
4. Continue to one of the following:
   - “To add an attachment to a reservation or booking” on page 169.
   - “To delete an attachment from a reservation or booking” on page 170.
   - “To edit an attachment for a reservation or booking” on page 170.
   - “To view an attachment for a reservation or booking” on page 171.

To add an attachment to a reservation or booking

1. Click New.

   The Attachment dialog box opens.

Figure 3-82: Attachment dialog box



2. In the Description field, enter a description for the attachment.

If you leave this field blank, then the Description field is populated with the name of the file after you add it to the booking.

3. Click the Search icon .

   The Find Attachment dialog box opens.

4. Scroll to and select the file (attachment) that is to be added to the reservation or booking, and then click Open.

5. Optionally, do one or both of the following:

   - The name of the attached file is used by default for the file description, and you can edit this if needed.
   - Click Spelling to spell check the description before you attach the drawing to the booking.

6. Click OK.

   The Attachment dialog box closes. The attachment is added to the booking. The Attachments tab remains open.

To delete an attachment from a reservation or booking

1. Select the drawing or CTRL-click to select multiple attachments that are to be deleted from the reservation or booking.
2. Click Delete.

   A message opens asking you if it is OK to delete the selected attachments.
3. Click Yes.

   The selected attachments are deleted from the reservation or booking. The Attachments tab remains open.

To edit an attachment for a reservation or booking

1. Select the attachment, and then click Edit.

   The Attachment dialog box opens. The name/description of the attachment is displayed in the Description field. Any notes that have been entered for the attachment are displayed in the Notes field.
2. Do one of the following:
   - Edit the description as needed.
   - Click the Search icon to open the Find Attachment dialog box and scroll to and select a different attachment.
   - Edit the notes as needed.
3. Optionally, click Spelling to spell check the description before you attach the drawing to the booking.
4. Click OK.

   The Attachment dialog box closes. The Attachments tab remains open.

To view an attachment for a reservation or booking

Your computer must have the appropriate application installed to view attachments of a specific type. For example, to open an .docx that is attached to a booking, Microsoft Word must be installed on your computer.

1. Select the attachment that is to be opened.
2. Click Open.

   The file opens in the appropriate application.
3. Close the application after viewing the attachment, or if the application allows it, edit the attachment as needed, and then save the attachment.

   The next time you open the attachment in the Navigator, you can see the changes that you made.

Working with Drawings in the Navigator

The term *drawing* is used to describe a file (text-based or image file) that is stored on your organization's network that you can reference in a booking. Typically, a drawing is a setup diagram of the booking room. You can also detach a drawing from a booking, and view and edit a drawing.

To work with drawings in the Navigator

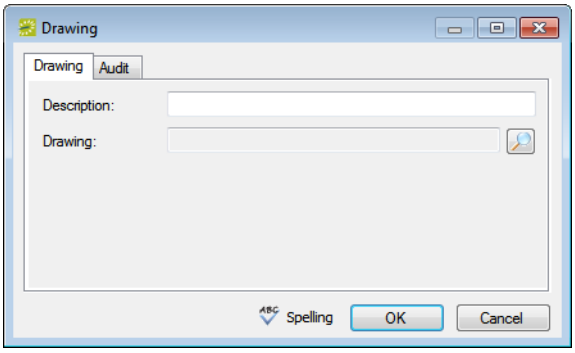
1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, expand the folder structure for the reservation until the appropriate booking folder is visible, and then select the booking.
3. In the right pane of the Navigator, open the Drawings tab.
4. Continue to one of the following:
   - "To attach a drawing to a booking" on page 173.
   - "To edit a drawing for a booking" on page 174.
   - "To detach a drawing from a booking" on page 173.
   - "To view a drawing for a booking" on page 174.

To attach a drawing to a booking

1. Click New > Attach.

   The Drawing dialog box opens.

Figure 3-83: Drawing dialog box



2. In the Description field, enter a description for the drawing.

If you leave this field blank, then the Description field is populated with the name of the file after you attach it to the booking.

3. Click the Search icon .

   The Find Drawing dialog box opens.

4. Scroll to and select the file (drawing) that is to be attached to the booking, and then click Open.

5. Optionally, do one or both of the following:

   - The name of the attached file is used by default for the file description, and you can edit this if needed.
   - Click Spelling to spell check the description before you attach the drawing to the booking.

6. Click OK.

   The Drawing dialog box closes. The drawing is attached to the booking. The Drawings tab remains open.

To detach a drawing from a booking

1. Select the drawing or CTRL-click to select multiple drawings that are to be detached from the booking.

2. Click Detach.

   A message opens asking you if it is OK to detach the selected drawings.

3. Click Yes.

   The selected drawings are detached from the booking. The Drawings tab remains open.

To edit a drawing for a booking

1. Select the drawing, and then click Edit.

   The Drawing dialog box opens. The name/description of the drawing is displayed in the Description field.

2. Do one of the following:

   - Edit the description as needed.
   - Click the Search icon to open the Find Drawing dialog box and scroll to and select a different drawing.

3. Optionally, click Spelling to spell check the description before you attach the drawing to the booking.
4. Click OK.

   The Drawing dialog box closes. The Drawing tab remains open.

To view a drawing for a booking

Your computer must have the appropriate application installed to view drawings of a specific type. For example, to open an .vsd file that is attached to a booking, Microsoft Viso must be installed on your computer.

1. Select the drawing that is to be opened.
2. Click Open.

   The file opens in the appropriate application.

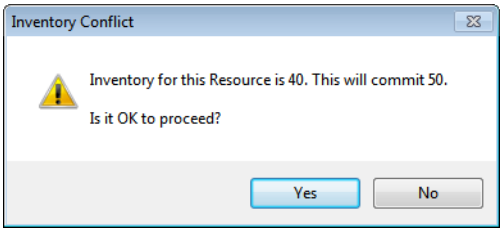
3. Close the application after viewing the drawing, or if the application allows it, edit the drawing as needed, and then save the drawing.

   The next time you open the drawing in the Navigator, you can see the changes that you made.

Running the Resource Utility Conflicts Tool

Resource conflicts can occur if bookings for the same date and time require the same resource, and insufficient quantities of the resource to accommodate all the bookings. When you reserve any resource for which the inventory is maintained (for example, equipment, personnel, and so on), EMS checks the available quantity and *automatically* notifies you in an Inventory Conflict message if there is insufficient quantities of the selected resource to accommodate your event.

Figure 3-84: Inventory Conflict message



You have the option of dismissing this message and over-committing the resource; however, although you are aware that the resource has been over-committed, other users will not necessarily be aware of this fact. If you need to confirm that an over-commitment of resources does not exist *for a single reservation*, then you can manually run the Resource Inventory Conflicts tool from the Navigator to generate an onscreen report that lists the resources that are in conflict by booking for the reservation.

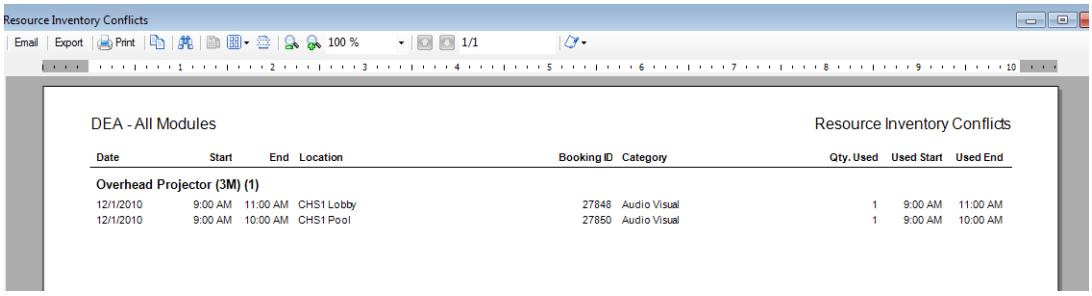
To confirm that an over-commitment of resources does not exist across multiple reservations, run any of the various resource usage reports that are available. See "Statistics reports" in "Generating an EMS Report" on page 277.

To run the Resource Utility Conflicts tool

1. Open the reservation in the Navigator. See "Opening a reservation directly in the Navigator" on page 71.
2. In the Bookings pane, click Tools, and then click Resource Inventory Conflicts.

   The Resource Inventory Conflicts report opens onscreen. The report lists the resources that are in conflict by booking. See Figure 3-85 on page 176.
3. Optionally, edit the booking details for the involved bookings to resolve the conflict.

Figure 3-85: Resource Inventory Conflicts report



The onscreen preview of the Resource Inventory Conflict report contains options for printing a hard copy of the report, for emailing the report, and so on.

Chapter 4
Search Tools

EMS has a variety of options available to you for searching for reservations, bookings, service orders, resources, and queries. These options include the Browser, the Web Reservation tool, the Calendar, the Navigator, a Group, the Web Request tool, the Resource Calendar, and the Service Order Management browser.

This chapter covers the following topics:

- "Searching with the Browser or with the Web Reservation Tool" on page 179.
- "Searching with the Calendar" on page 187.
- "Searching for Reservations by Group" on page 195.
- "Searching with the Resource Calendar" on page 197.
- "Searching with the Service Order Management Browser" on page 203.

Remember, a fast way to view and edit bookings is through the Reservation Book. See "Viewing and Editing Reservations in the Reservation Book" on page 52.

For information about searching with the Navigator, see Chapter 3, "The Navigator," on page 69. For information about searching with the Web Request tool, see Chapter 5, "EMS Dashboard," on page 207.

Searching with the Browser or with the Web Reservation Tool

You can use the Browser to search for reservations, bookings, service orders, resources, web reservations, and queries. The results are displayed in a list view. When you carry out a search in the Browser, you can carry out a *basic search* or an *advanced search.* A *basic search* is based on the basic information that you specify for a reservation when you first create it, such as the starting date, the end date, the group for which the event was scheduled, the group contact name, and so on. An *advanced search* is a field level search that is carried out at the booking level, the booking detail level, the booking detail item level, the reservation level, the service order level, or any combination of these. For example, in an advanced search, you can specify criteria as granular as who added a specific booking detail item.

A web reservation is any reservation that a user has submitted through VEMS. The Web Reservation searching tool is identical to the Browser searching tool with one exception—when the Browser opens for the first time, the Browse for function is set to Reservations whereas the Web Reservation tool is set to Web Reservations. As a result, although this section is written from the perspective of using the Browser, all the information can be applied when using the Web Reservation searching tool. To open the Web Reservation searching took, click the Web Reservations icon

on the toolbar.

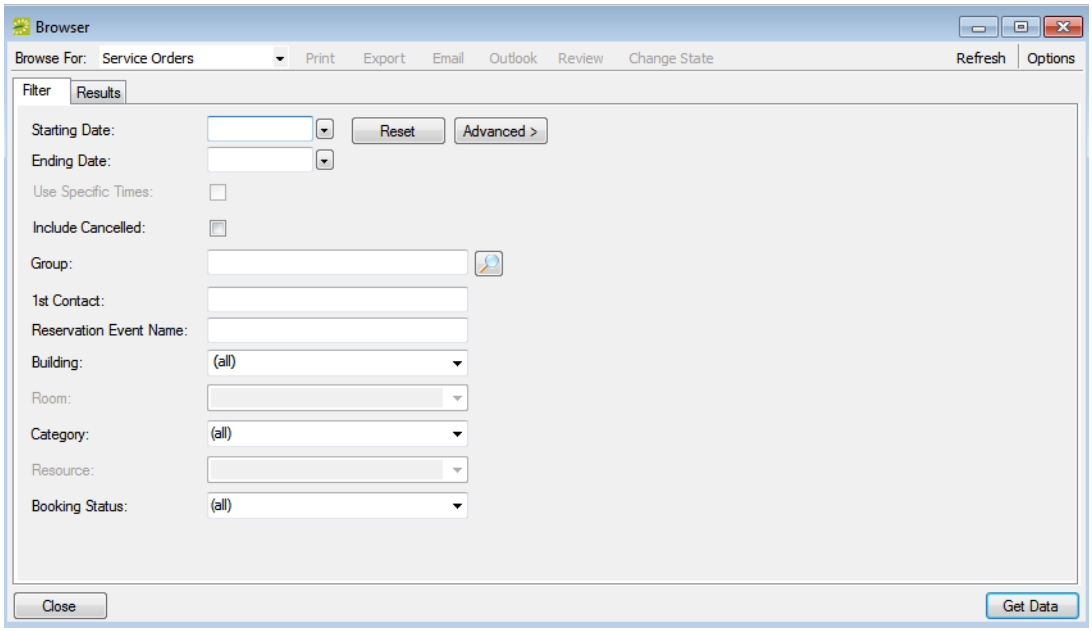
To carry out a search in the Browser

1. On the toolbar, click the Browser icon

.

   The *first* time that the Browser window opens, the Filter tab is set by default to a basic search; otherwise, the Filter tab is set to the search type (Basic or Advanced) that you last carried out. See Figure 4-1 on page 180.

Figure 4-1: Browser window, Basic search options



2. Click the Basic/Advanced toggle to select the type of search that is to be carried out, and then continue to one of the following:
   - "To carry out a basic search in the Browser."
   - "To carry out an advanced search in the Browser" on page 183.

To carry out a basic search in the Browser

1. On the Browse For dropdown list, select the item for which to search.
2. Enter the search criteria.

Field	Description
• Starting Time • Ending Time	Both are optional.
Use Specific Times	Available only if the Starting Date is the same as the Ending Date.
Include Cancelled	By default, search results are not set to show canceled reservations. Select this option to search for canceled reservations as well.
Group	If the pre-defined list of groups is too extensive to scroll, then click the Search icon to open the Groups window and search for a specific group. See "Searching for Reservations by Group" on page 195.
• 1st Contact • Reservation Event Name	Enter a search string by which to filter your search. The search is not case-sensitive, but it is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if you enter "ed" as the search string, results can include **Ed**, **Ed**ward, **Ed**die, and so on, but not Ted or Fred.

Field	Description
Building	Select a specific building, area, or view.
Room	• If you select a specific building, then (all) rooms in the building are selected by default. You can select a specific room in the building. • If you select a view, then Room is left blank; however, you can select a specific room to search.
Category	The default value is set to (all). You can leave this value as is, or you can select a specific category (booking detail).
Resource	Available only if you select a category that is a resource. The default value is set to (all). You can leave this value as is, or you can select a specific resource item.
Booking Status	The default value is set to (all). You can leave this value as is, or you can select a specific booking status.

3. Optionally, click Options and edit the default values for one or more additional search options—Date/Time Filter, Number of Records to Return, Specific Room Filters, and Show Service Order Items.
4. Click Get Data or Refresh.

   The search results are displayed on the Results tab.

5. Optionally, do one or more of the following:
   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.

- To group results by a specific column, drag the column header as indicated on the Results tab.
- To open an event in the Navigator, double-click the event entry on the Results tab.
- Click Print to print the search results.
- In the Reservation view, select a search result entry, and then click Email to open a pre-addressed SMTP email to the group that is associated with the selected reservation. Complete and send the email as you would normally. See "Sending Email from EMS" on page 360.
- Click Export to export the search results to a Microsoft Excel spreadsheet.
- Click Outlook to download the search results to your personal calendar.

Your EMS administrator must set a system parameter to enable this function. If this function is not available, contact your EMS administrator for assistance.

- In the Service Orders view, to mark a service order as Reviewed, select the service order, or CTRL-click to select multiple service orders, and then click Review > Mark as Reviewed. Conversely, to mark a service order as Unreviewed, click Review > Mark as Unreviewed.
- In the Service Orders view, to change the state of a service order in a booking, select the appropriate booking in the Results list, and then click Change State. A Change State dialog box opens. The dialog box lists all the available states for the service order. Select the new state for the service order on the State dropdown list.

For more information about reviewing service orders and selecting states, see "Searching with the Service Order Management Browser" on page 203.

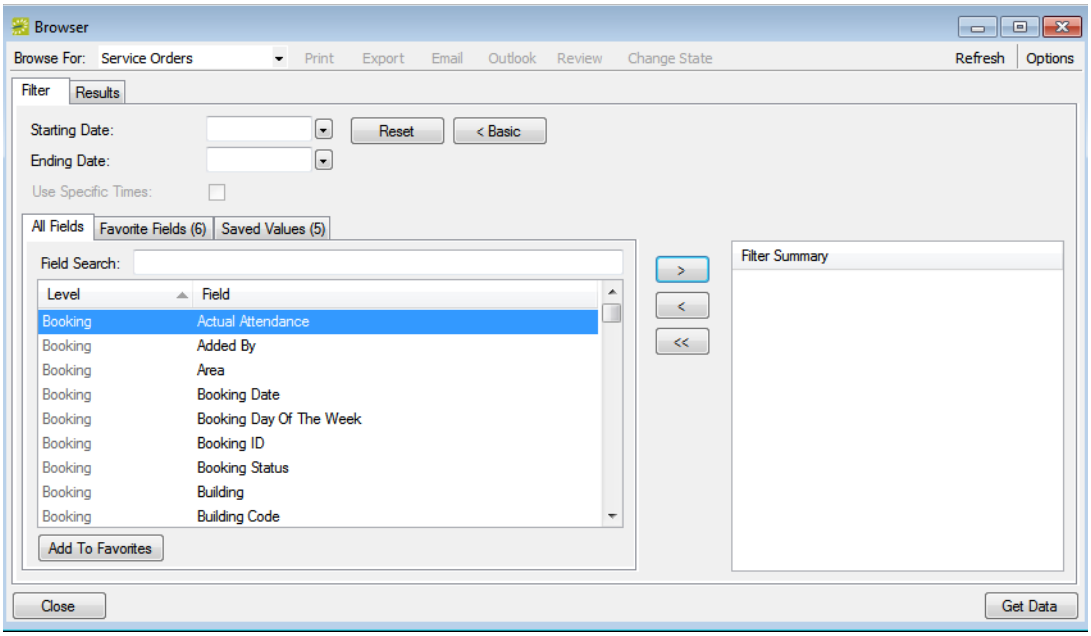
- In the Browse for field, select a different item for which to search. The Results tab is refreshed with the search results based on the item that you selected *and* the search criteria on the Filter tab.
- Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
- Click Refresh to requery the database based on the current search criteria.

6. Click Close.

   Any changes that you made to the search results columns (position, width, and so on) remain in effect for any other searches that you carry out. To reset the columns to their default values, see "Resetting Column Settings" on page 353.

To carry out an advanced search in the Browser

Figure 4-3: Browser window, Advanced search options



1. On the Browse For dropdown list, select the item for which to search.
2. Optionally, enter a Starting Date, an Ending Date, or both.
3. Optionally, if the Starting Date and the Ending Date are the same, select Use Specific Times and enter specific time periods to search.

Use Specific Times is available only if the Starting Date is the same as the Ending Date.

4. For each field level option by which to carry out the search:

   - Select the field level option, and then click the Move button (>).

---

*To filter the list of available fields, in the Field Search field, enter a search string. Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "add," search results can include **Add**ed by, Date **Add**ed, and Group **Add**ress Line 1.*

A Filter dialog box opens.

Figure 4-4: Example of a Filter dialog box

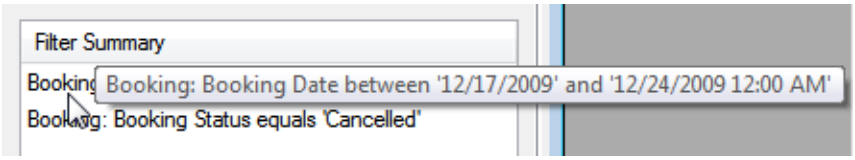
   - In the Filter dialog box, enter a value or define the limits for the option, and then click OK.

     The option is moved to the Filter Summary list.

If you have specific fields and/or values by which you always want to carry out a search, then you do not have to filter the list of fields on the All Fields tab every time you carry out a search. Instead, you can select each of these fields on the All Fields tab, and then click Add to Favorites to add the field to the Favorite Fields tab. Also, after you enter a value or define the limits for a field, you can click Save Value on the Filter dialog box. The next time that you carry out a search, you can simply open the Favorite Fields tab or the Saved Values tab to carry out a search based on your customized list of search fields.

To view a selected field option in its entirety in the Filter Summary list, rest the mouse pointer on the entry. A tooltip showing the complete field option information opens.

Figure 4-5: Viewing a selected field option in the Filter Summary list



5. Optionally, click Options and edit the default values for one or more additional search options—Date/Time Filter, Number of Records to Return, and Specific Room Filters.

6. Click Get Data or Refresh.

   The search results are displayed on the Results tab.

   - In the Reservation view, select a search result entry, and then click Email to open a pre-addressed SMTP email to the group that is associated with the selected reservation. Complete and send the email as you would normally. See “Sending Email from EMS” on page 360.

- Click Outlook to download the search results to your personal calendar.

Your EMS administrator must set a system parameter to enable this function. If this function is not available, contact your EMS administrator for assistance.

- In the Service Orders view, to mark a service order as Reviewed, select the service order, or CTRL-click to select multiple service orders, and then click Review > Mark as Reviewed. Conversely, to mark a service order as Unreviewed, click Review > Mark as Unreviewed.
- In the Service Orders view, to change the state of a service order in a booking, select the appropriate booking in the Results list, and then click Change State. A Change State dialog box opens. The dialog box lists all the available states for the service order. Select the new state for the service order on the State dropdown list.

For more information about reviewing service orders and selecting states, see "Searching with the Service Order Management Browser" on page 203.

- In the Browse for field, select a different item for which to search. The Results tab is refreshed with the search results based on the item that you selected *and* the search criteria on the Filter tab.
- Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
- Click Refresh to requery the database based on the current search criteria.

8. Click Close.

   Any changes that you made to the search results columns (position, width, and so on) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see "Resetting Column Settings" on page 353.

Searching with the Calendar

You use the Calendar to search for reservations, bookings, and service orders in your EMS database. The results are displayed in a calendar view. When you carry out a search in the Calendar, you can carry out a *basic search* or an *advanced search*. A *basic search* is based on the basic information that you specify for a reservation when you first create it, such as the starting time, the end time, the group for which the event was scheduled, the group contact name, and so on. An *advanced search* is a field level search that is carried out at the booking level, the booking detail level, the booking detail item level, the reservation level, or any combination of these. For example, in an advanced search, you can specify criteria as granular as who added a specific booking detail item.

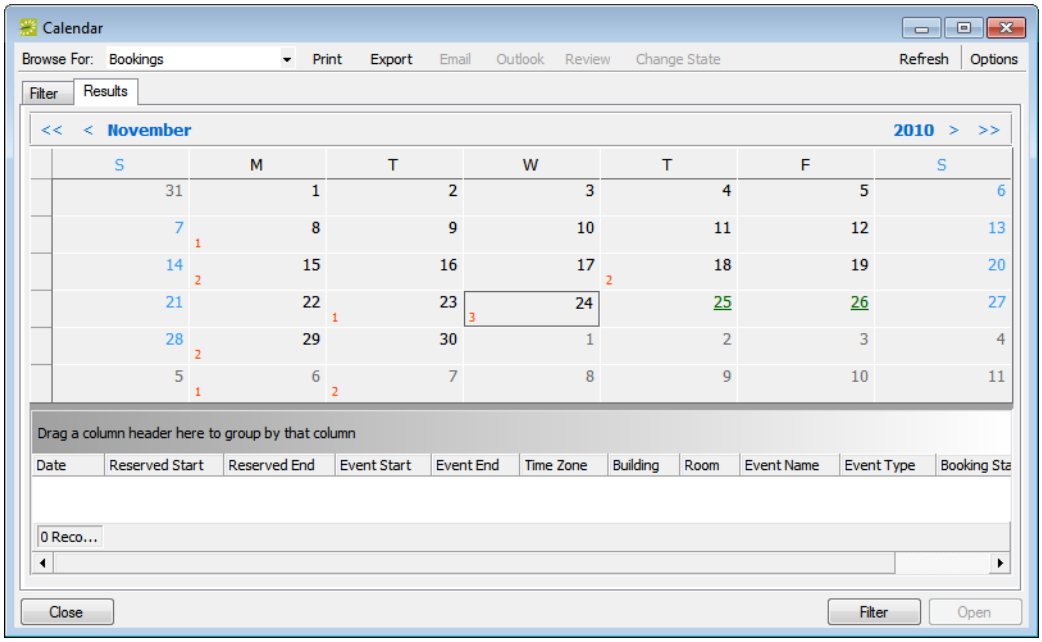
To carry out a search in the Calendar

1. On the toolbar, click the Calendar icon

.

   The Calendar window opens. By default, the *first* time that the Calendar window opens, the Results tab is the active tab and it is set to the current month and year. If you never modify the Get Data when Calendar Opens option (under Options), then the Results tab is always the active tab when the Calendar window opens; otherwise, the Filter tab is the active tab.

Figure 4-7: Calendar window, Results tab



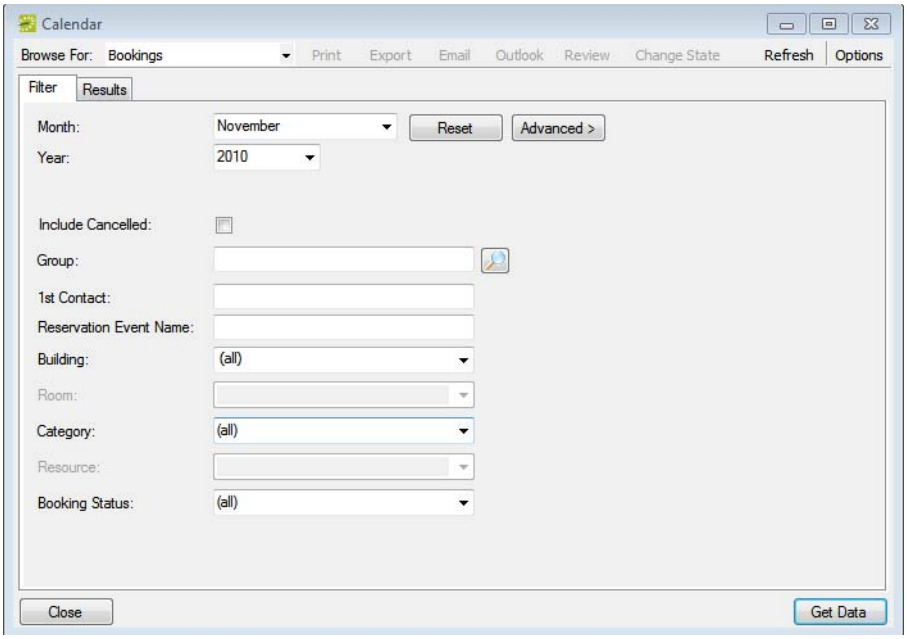
2. If needed, click Filter to open the Filter tab.

The first time that the Filter tab opens, it is set by default to a basic search; otherwise, the Filter tab displays the search type (Basic or Advanced) that you last carried out.

3. Click the Basic/Advanced toggle to select the type of search that you want to carry out and then continue to one of the following:
   - "To carry out a basic search in the Calendar."
   - "To carry out an advanced search in the Calendar" on page 191.

To carry out a basic search in the Calendar

Figure 4-8: Calendar window, Filter tab with Basic search options



1. Enter the search criteria.

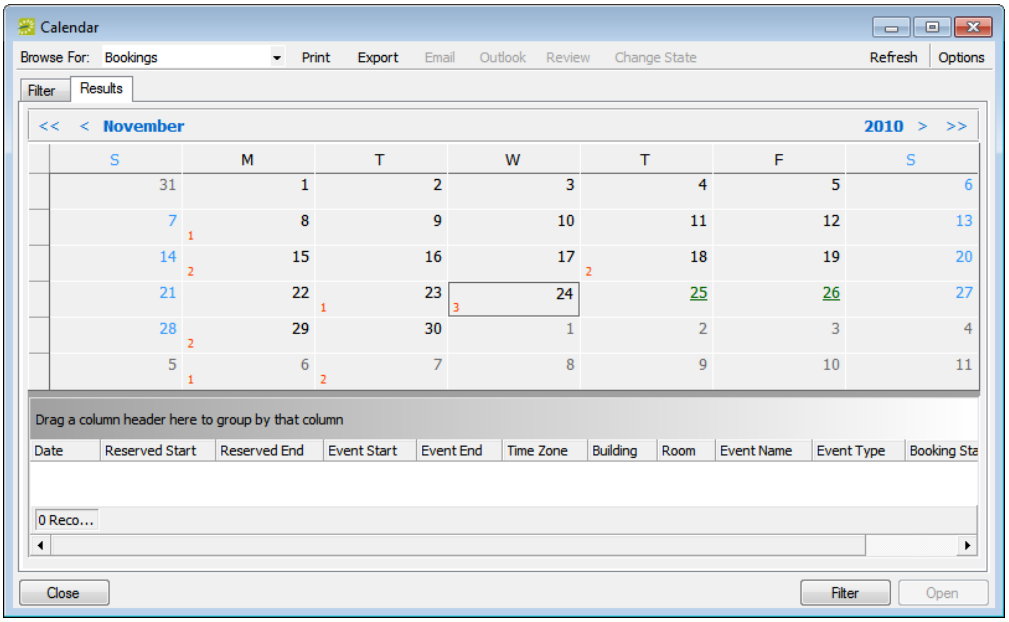
Field	Description
Month Year	The default value is the current month and year, but you can change one or both of these values if needed.
Include Cancelled	By default, search results are not set to show canceled bookings. Select this option if you want to search for canceled bookings as well.
Group	If the pre-defined list of groups is too extensive to scroll, then click the Search icon to open the Groups window and search for a specific group. See "Searching for Reservations by Group" on page 195.

Field	Description
• 1st Contact • Reservation Event Name	Enter a search string by which to filter your search. The search is not case-sensitive, but it is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if you enter “ed” as the search string, results can include **Ed**, **Ed**ward, **Ed**die, and so on, but not Ted or Fred.
Building	Select a specific building, or select a building view.
Room	• If you select a specific building, then (all) rooms in the building are selected by default. You can select a specific room in the building. • If you select a view, then Room is left blank; however, you can select a specific room to search.
Category	The default value is set to (all). You can leave this value as is, or you can select a specific category (booking detail).
Resource	Available only if you select a category that is a resource. The default value is set to (all). You can leave this value as is, or you can select a specific resource item.
Booking Status	The default value is set to (all). You can leave this value as is, or you can select a specific booking status.

2. Optionally, click Options and edit the default values for one or more additional search options—Date/Time Filter, Number of Records to Return, Get Data when Calendar Opens, and Specific Room Filters.
3. Click Get Data or Refresh.

   The search results are displayed on the Results tab in a calendar view. The number of bookings that meet the search criteria is indicated in red on the dates on which the events occur.

Figure 4-9: Calendar window, Results tab



4. Optionally, do one or more of the following:

   - To view a list of bookings for a date, click the date on the calendar. The information for the bookings appears in the lower pane of the Results tab.

Searching for Reservations by Group

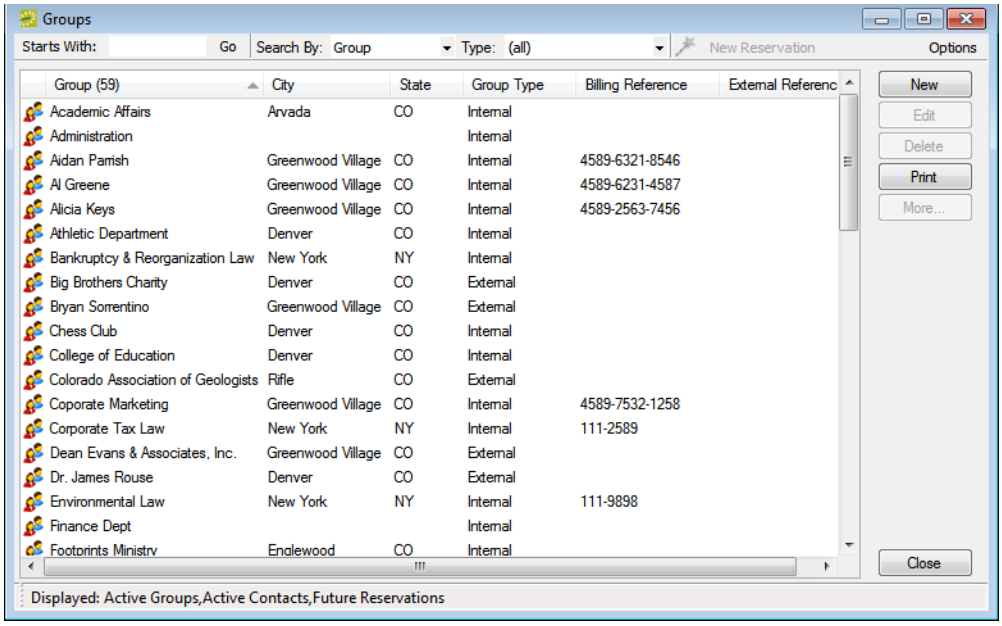
A *group* is an entity for which reservations are made at your facilities. You can use the Group search feature to search for reservations that have been made for a group in your EMS database.

To search for reservations by group

1. If have clicked the Search icon next to the Group field on a window, (such as the Calendar), then the Groups window is already open; otherwise, on the toolbar, click the Groups icon .

   The Groups window opens.

Figure 4-15: Groups window



2. For your search criteria, do one or more of the following:

   - In the Starts With field, enter the string by which to filter your search, and then click Go.

The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching.

   - On the Search by dropdown list, select the option by which to search—the Group or the Contact for the group.
   - On the Type dropdown list, leave the default value set to (all), or select the type of the group or contact by which to filter the search.
   - Click Options to open the Group Options dialog box and then modify any or all of the information that is displayed in the dialog box, and then click OK to close the dialog box and return to the Groups window.

Figure 4-16: Group Options dialog box

   The Groups window is updated with the results that meet your search criteria.

3. In the Groups window, select a group or contact.

   The Groups window is refreshed with five tabs at the bottom of the window. One of these tabs is a Reservations tab.

4. Open the Reservations tab.

   A list of all reservations for the selected group is displayed on the tab.

5. Double-click a reservation to open the reservation in the Navigator.

Searching with the Resource Calendar

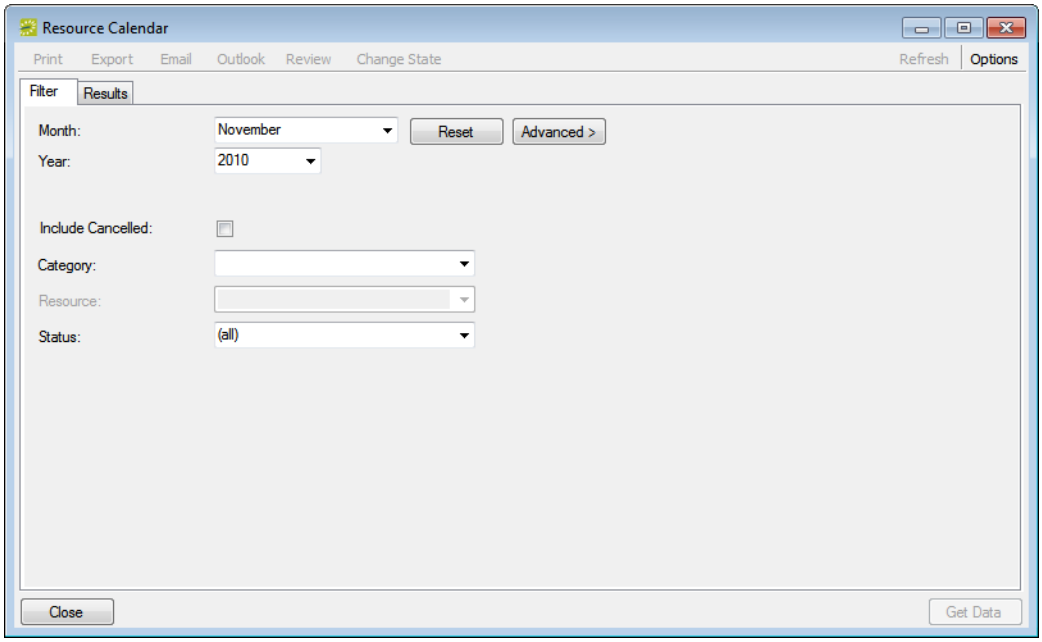
You use the Resource Calendar to search for a particular resource and determine how much of the resource (that is, how many individual items) is needed for a specific day or month in a specific year. For example, how many slices of key lime pie are needed in November, 2010? You can use the results of the search to assist you in managing the counts of the resources that your organization must ensure are available for scheduled events. When you carry out a search in the Resource Calendar, you can carry out a *basic search* or an *advanced search*. A *basic search* is based on the basic information that you specify for a resource item when you first create it, such as its category and status. An *advanced search* is a field level search that is carried out the booking level, the booking detail level, the booking detail item level, the reservation level, the service order level, or any combination of these. For example, in an advanced search, you can specify criteria as granular the date that the service order reminder was added. You can open a resource item that has been returned in the search results in the Navigator, and edit the item if needed.

To carry out a search in the Resource Calendar

1. On the menu bar, click Reservations > Reservations > Resource Calendar.

   The *first* time that the Resource Calendar opens, the Filter tab is set by default to a basic search; otherwise, the Filter tab is set to the search type (Basic or Advanced) that you last carried out.

Figure 4-17: Resource Calendar, Basic search



2. Click the Basic/Advanced toggle to select the type of search that is to be carried out, and then continue to one of the following:
   - "To carry out a basic search in the Resource Calendar."
   - "To carry out an advanced search in the Resource Calendar" on page 200.

To carry out a basic search in the Resource Calendar

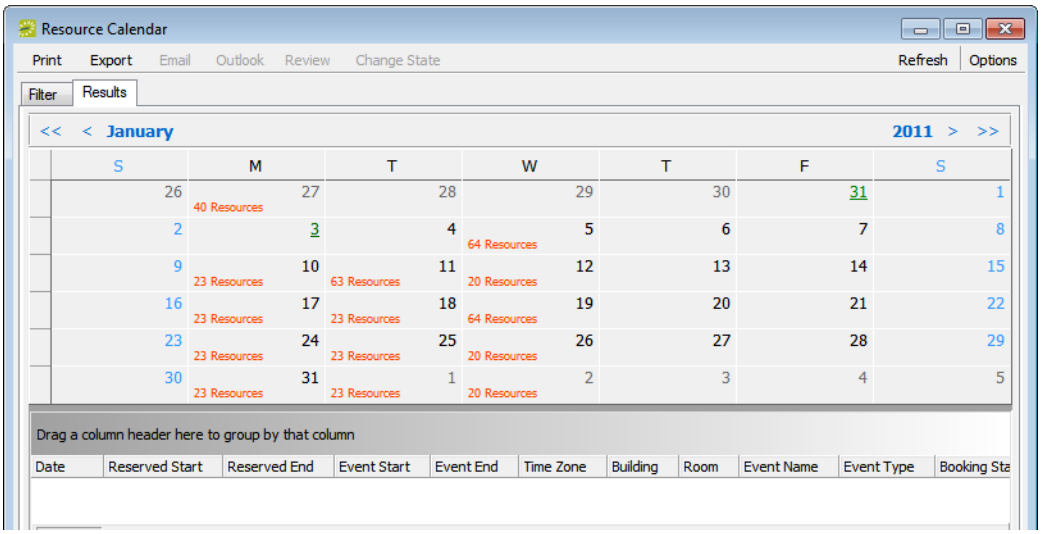
1. Leave the Month and Year set to the default values (current month and year), or optionally, enter different values as needed.
2. Enter the search criteria.

Field	Description
Include Cancelled	By default, search results are not set to show resource items for canceled reservations. Select this option to search for resource items in canceled reservations as well.
Category	Select a specific category (booking detail).
Resource	Available only if you select a category that is a resource. Select a specific resource item.
Status	The default value is set to (all). You can leave this value as is, or you can select a specific booking status.

3. Optionally, click Options and edit the default values for one or more additional search options—Date/Time Filter, Number of Records to Return, and Specific Room Filters.
4. Click Get Data or Refresh.

   The search results are displayed on the Results tab in a calendar view. The *total* number of resources in *all* bookings that meet the search criteria is indicated in red on the dates on which the events occur.

Figure 4-18: Resource Calendar window, Results tab



5. Optionally, do one or more of the following:

   - To view a list of bookings for a date, click the date on the calendar. The information for the bookings appears in the lower pane of the Results tab.

Figure 4-19: Resource Calendar window, Results tab with list of events for selected dates

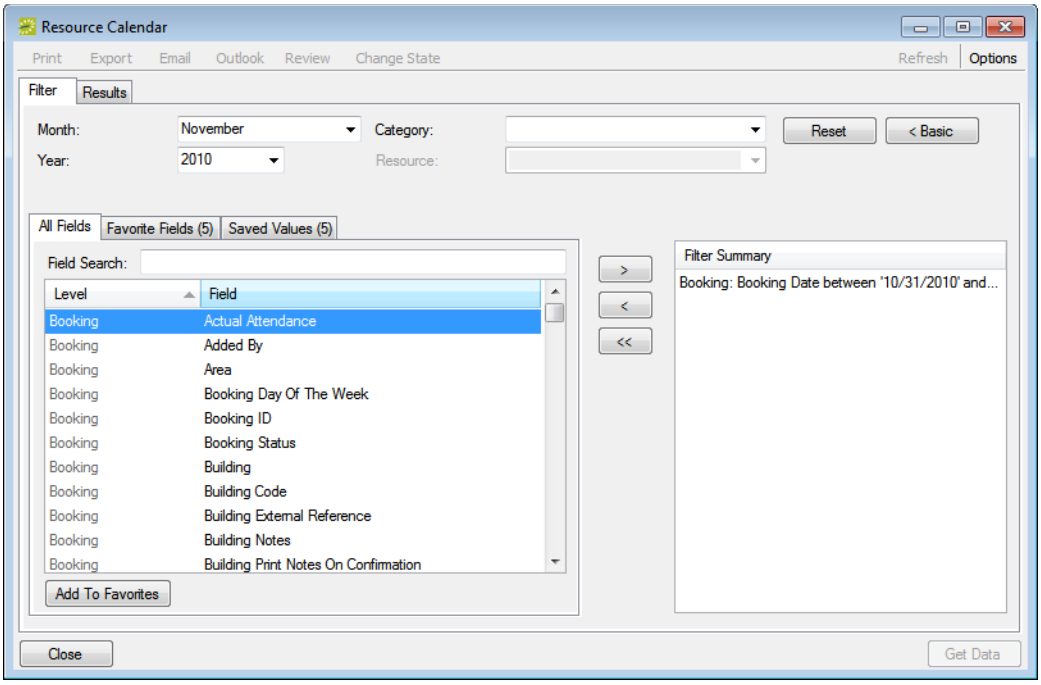
   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To open an event in the Navigator and edit the resource item as needed, double-click the event entry on the Results tab.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
   - Click Refresh to requery the database based on the current search criteria.

6. Click Close.

   Any changes that you made to the search results columns (position and width) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see “Resetting Column Settings” on page 353.

To carry out an advanced search in the Resource Calendar

Figure 4-20: Resource Calendar, Advanced search



1. Leave the Month and Year set to the default values (current month and year), or optionally, enter different values as needed.
2. For each field level option by which to carry out the search:
   - Select the field level option, and then click the Move button (>).
   - When prompted, enter a value or define the limits for the option, and then click OK.

   The option is moved to the Filter Summary list.

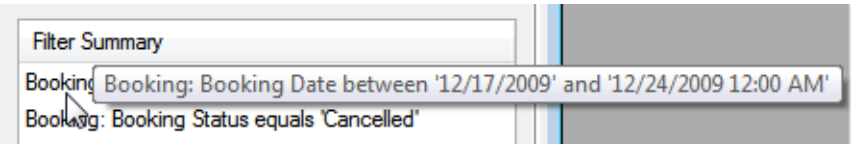
---

*To filter the list of available fields, in the Field Search field, enter a search string. Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "add," search results can include **Add**ed by, Date **Add**ed, and Group **Add**ress Line 1.*

If you have specific fields and/or values by which you always want to carry out a search, then you do not have to filter the list of fields on the All Fields every time you carry out a search. Instead, you can select each of these fields on the All Fields tab, and then click Add to Favorites to add the field to the Favorite Fields tab or after you enter a value or define the limits for a field, you can click Save Value on the Filter dialog box. The next time that you carry out a search, you can simply open the Favorite Fields tab or the Saved Values tab to open your customized list of search fields.

To view a selected field option in its entirety in the Filter Summary list, rest the mouse pointer on the entry. A tooltip showing the complete field option information opens.

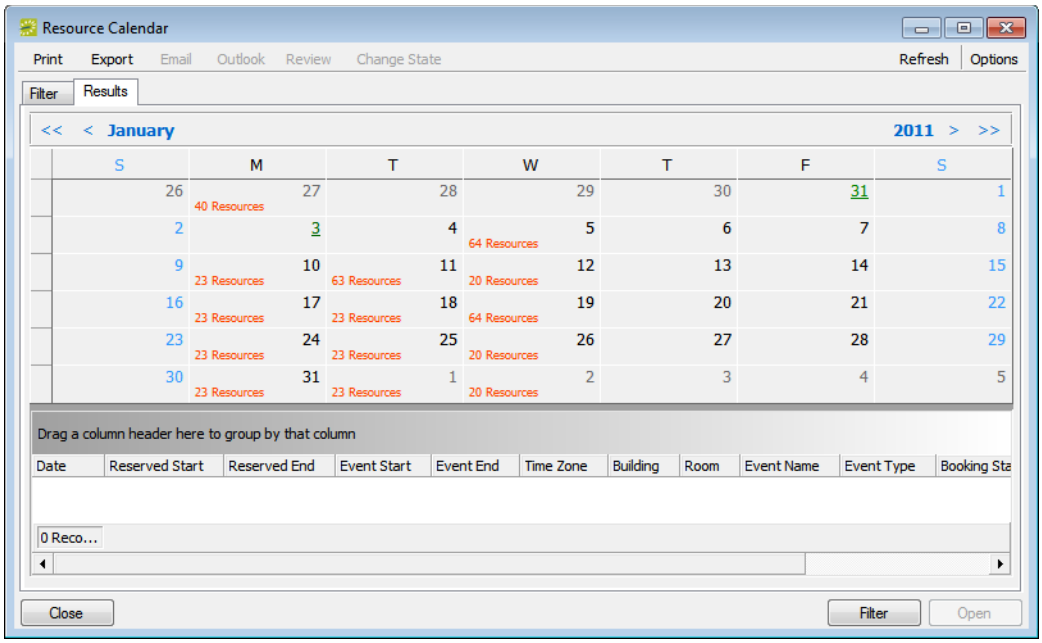
Figure 4-21: Viewing a selected field option in the Filter Summary list



3. Click Get Data or Refresh.

   The search results are displayed on the Results tab in a calendar view. The *total* number of resources in *all* bookings that meet the search criteria is indicated in red on the dates on which the events occur.

Figure 4-22: Resource Calendar window, Results tab



4. Optionally, do one or more of the following:

   - To view a list of bookings for a date, click the date on the calendar. The information for the bookings appears in the lower pane of the Results tab.

Figure 4-23: Resource Calendar window, Results tab with list of events for selected dates

   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To open an event in the Navigator and edit the resource item as needed, double-click the event entry on the Results tab.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
   - Click Refresh to requery the database based on the current search criteria.

5. Click Close.

   Any changes that you made to the search results columns (position and width) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see “Resetting Column Settings” on page 353.

Searching with the Service Order Management Browser

You use the Service Order Management browser to search for and view the resources with and without service orders for all bookings on a particular day as well as the current state of the resources and their Reviewed status. After viewing resources, if applicable, you can change the state for a resource. You can review a resource, or you can mark a resource as unreviewed. You can also open a resource in the Navigator, and edit it if necessary.

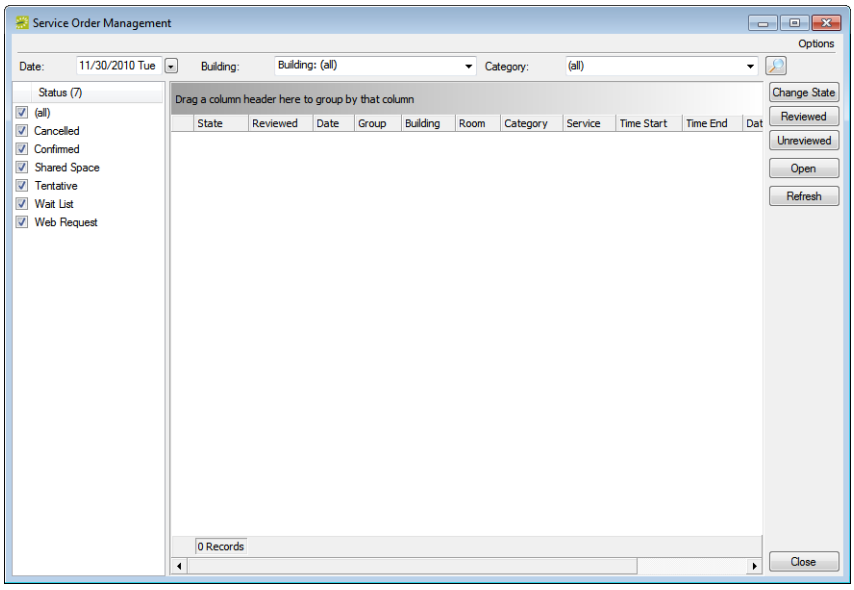
A category state, is a process phase, or state, that describes the movement of a resource in the category through your organization's processes, for example, "Unassigned," "Assigned," "Out for Delivery," "In Prep," and so on. Your EMS administrator configures the states that are specific to your organization. Contact your EMS administrator for assistance with states.

To search with the Service Order Management browser

1. On the menu bar, click Reservations > Reservations > Manage Services.

   The Service Order Management window opens. When this window first opens, the display is static and you must manually refresh it. If you want to set options for automatically refreshing the window's display, go to Step 2; otherwise, go to Step 4.

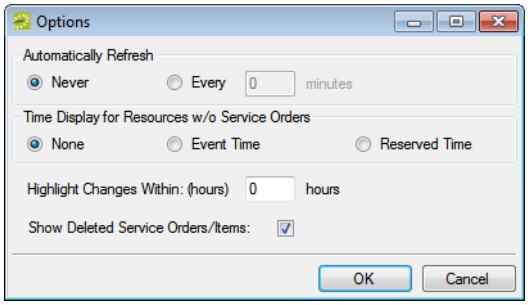
Figure 4-24: Service Order Management window



2. Click Options.

   The Options dialog box opens.

Figure 4-25: Options dialog box



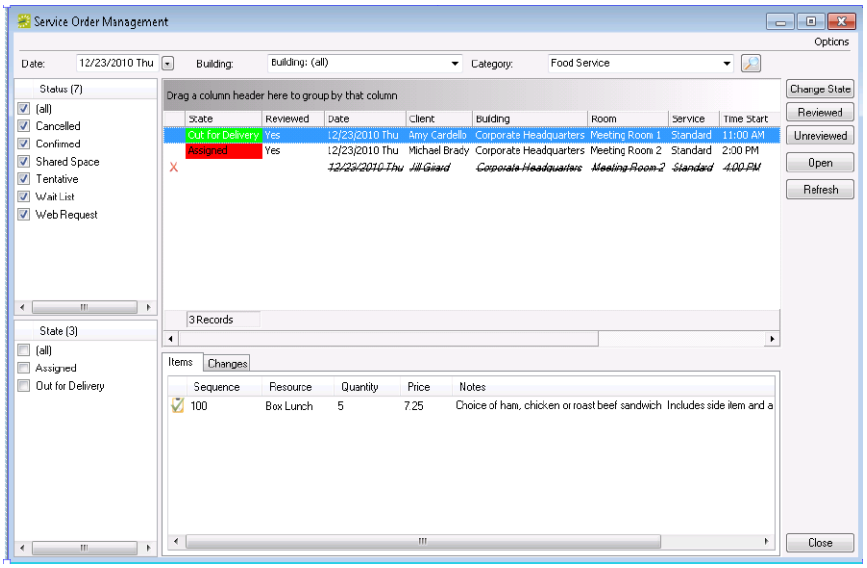
3. Modify the display options as needed for the Manage Services window, and then click OK to apply these changes.
4. To filter the search results, do one or more of the following:
   - Leave the Date set to the default value (the current day's date), or select a different date.
   - On the Building dropdown list, leave the value set to the default value (all buildings), or select specific building, area or view.
   - On the Category dropdown list, select the category by which to search.
   - In the Status pane, select one or more specific booking statuses, or select (all) statuses.
5. Click Refresh.

   A list of all bookings that meet your search criteria is displayed in the upper pane of the window.

   - If states are assigned to any of the resources in a booking, then the name of the state and if applicable, its color, is displayed in the State column for the booking. If a resource for a booking is of the type to which states can be assigned, but none has been assigned, then (none) is displayed in the State column for the booking.
   - If a resource has been reviewed for a booking, then "Yes" is displayed in the Reviewed column for the booking.
   - If your Options are set to show deleted service orders/items, then an "x" appears next to the booking for which the orders/items were deleted and a single line through the booking is displayed.

   See Figure 4-26 on page 205.

Figure 4-26: Service Order Management window with results



6. Optionally, do one or more of the following:

   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - To group results by a specific column, drag the column header as indicated above the list of search results.
   - To view the resources (individual items) for a booking, select the booking. The resources are displayed on the Items tab in the lower pane of the window.
   - To open an event in the Navigator and edit the resource item as needed, double-click the event entry on the Results tab. See Chapter 3, “The Navigator,” on page 69.

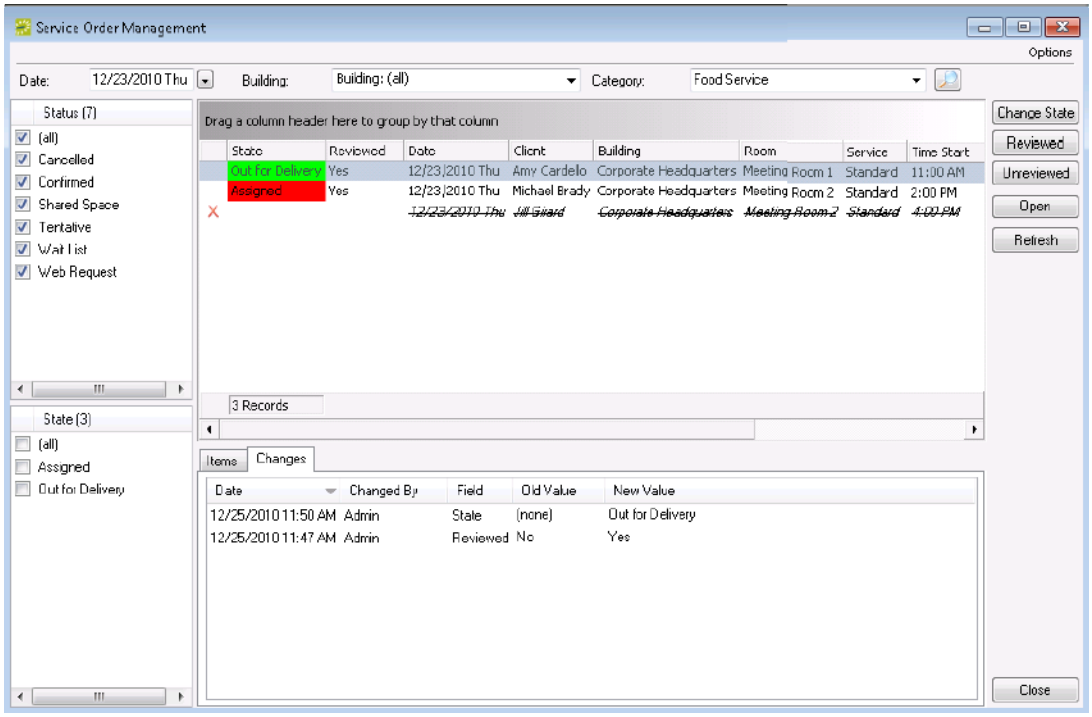
If you edit any information for a resource (quantity, notes, and so on) or the service order (service order time, estimated count, or so on) for a booking, then a Changed icon is displayed next to the booking.

Figure 4-27: Booking with Changed icon

   - To change the state of the resources for a booking, select the booking, and then click Change State. A Change State dialog box opens. The dialog box lists all the available states for the resource. Select the new state for the resource on the State dropdown list.

- To mark a resource for a booking as reviewed, select the booking, and then click Reviewed. A message opens asking you if you are sure that you want to mark the resource as reviewed. Click Yes to close the message. “Yes” is displayed in the Reviewed column for the booking.
- To reverse the Reviewed status for a resource in a booking, select the appropriate booking, and then click Unreviewed. A message opens asking you if you are sure that you want to mark the selected resource as unreviewed. Click Yes to close the message. “Yes” is cleared from the Reviewed column for the booking.
- To view the changes made to the resources for a booking, select the booking, and then open the Changes tab in the lower pane of the window.

Figure 4-28: Viewing changes to a resource



- Make any necessary changes to the search criteria and then click Refresh to repeat the search based on the new search criteria.

7. Click Close.

   Any changes that you made to the search results columns (position and width) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see “Resetting Column Settings” on page 353.

Chapter 5
EMS Dashboard

The Dashboard is a window that centralizes critical information about reservations in a single location. The information that is displayed on this window, including notifications, reminders, web reservations and so on, provides you with the necessary input to manage your work in the EMS application.

This chapter covers the following topics:

- "Overview of the EMS Dashboard and Dashboard Options" on page 209.
- "Notifications Tab" on page 212.
- "Reminders Tab" on page 214.
- "Web Reservations Tab" on page 219.
- "Web Requests Tab" on page 220.
- "Wait List Tab" on page 224.
- "Reconfirm Dates Tab" on page 225.
- "Building Hours Exceptions Tab" on page 226.
- "Analytics Tab" on page 227.
- "At A Glance Tab" on page 230.

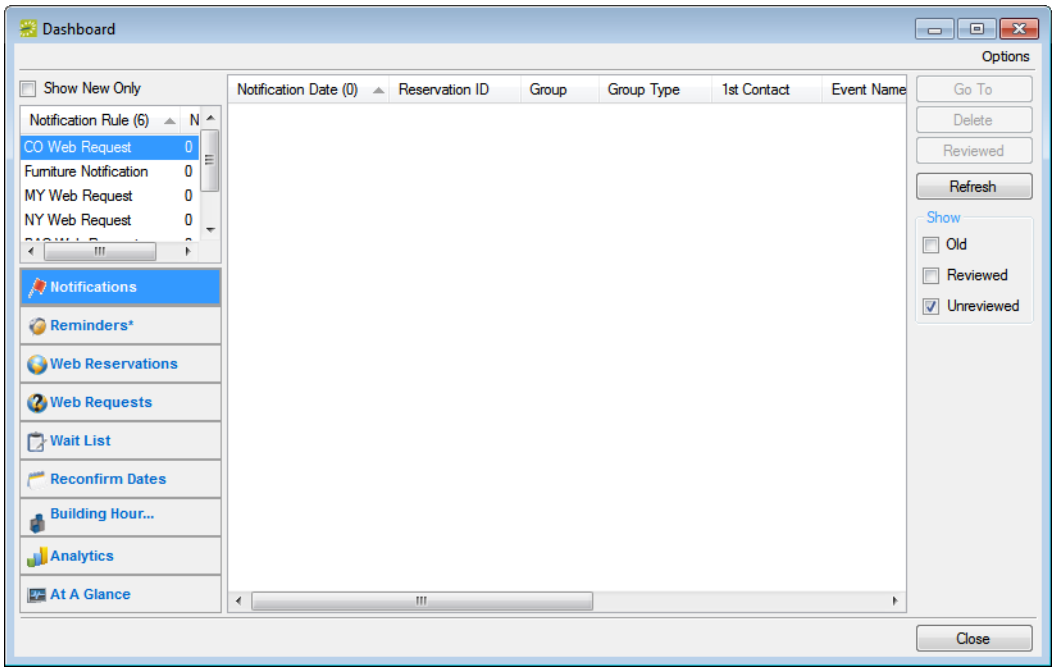
Chapter 5
EMS Dashboard

Overview of the EMS Dashboard and Dashboard Options

The Dashboard is a window that centralizes critical information about reservations in a single location. The information that is displayed on this window provides you with the necessary input to manage your work in the EMS application. By default, when the window first opens, it has nine tabs—Notifications, Reminders, Web Reservations, Web Requests, Wait List, Reconfirm Dates, Building Hours Exceptions, Analytics, and At A Glance. If any tab on the window has at least one record displayed on it, then, by default, when you log into the EMS application, the Dashboard window opens and the Dashboard icon on the main toolbar flashes briefly. Also, an asterisk (*) appears to the right of the tab name.

You can change the default behavior of the Dashboard in the Dashboard Options dialog box. See "Dashboard options" on page 210. You can also click the Dashboard icon at any time to open the Dashboard window.

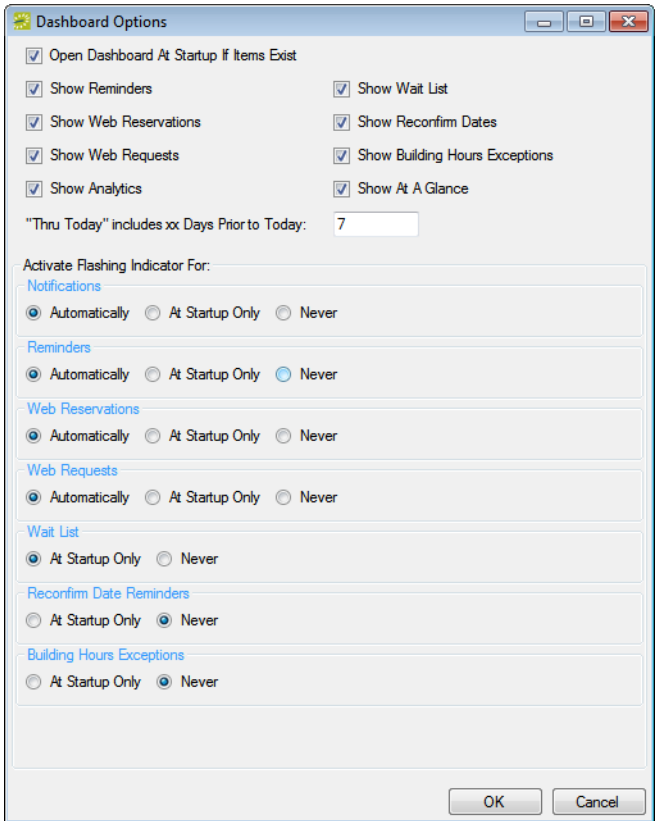
Figure 5-1: Dashboard window



Dashboard options

The appearance and functioning of your Dashboard window are determined by the values that you set for the Dashboard options. To view and if needed, modify these values, in the upper right corner of the Dashboard window, click Options to open the Dashboard Options dialog box.

Figure 5-2: Dashboard options dialog box



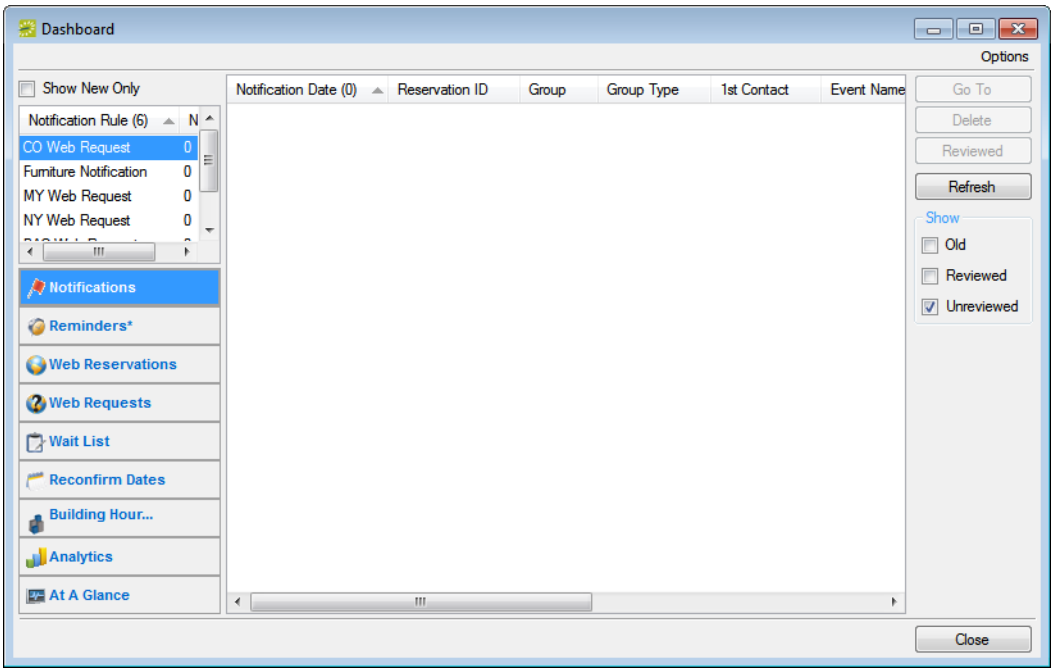
Option	Description
Open Dashboard At Startup If Items Exist	Selected by default. The Dashboard window opens automatically after you log into EMS if any tab displays at least one item.
• Show Reminders • Show Web Reservations • Show Web Requests • Show Analytics • Show Wait List • Show Reconfirm Dates • Show Building Hours Exceptions • Show At A Glance	Selected by default. Indicates the tabs that are to be displayed on the Dashboard window.
“Thru Today” includes xx Days Prior to Today	Indicates how far into the past that reminders are to be displayed in the “Thru Today” view. The default value is seven.

Option	Description
Activate Flashing Indicator For: • Notifications • Reminders • Web Reservations • Web Requests	Set on a per tab basis. Indicates when the Dashboard button on the toolbar is to flash if at least one item is displayed on any tab. Values are: • Automatically—Immediately when there is at least one record that is displayed on the indicated tab, even when you are working in EMS. • At Startup Only • Never
Activate Flashing Indicator For: • Wait List • Reconfirm Date Reminders • Building Hours Exceptions	Set on a per tab basis. Indicates when the Dashboard button on the toolbar is to flash if tasks on the tab require your attention. Values are: • At Startup Only • Never

Notifications Tab

Your EMS administrator can configure notification rules to alert you or groups of which you are a member when additions or modifications have been carried out in the EMS database such as the creation or modification of a booking, the creation or modification of a service order, the creation of a new web account, and so on.

Figure 5-3: Dashboard window, Notifications tab



When the Notifications tab first opens, all the notification rules that include you are listed in the Notification Rule pane (upper left pane) of the tab. Next to each rule, the number of *new* notifications (notifications with the current day's date) is displayed. The tab is interactive. You can:

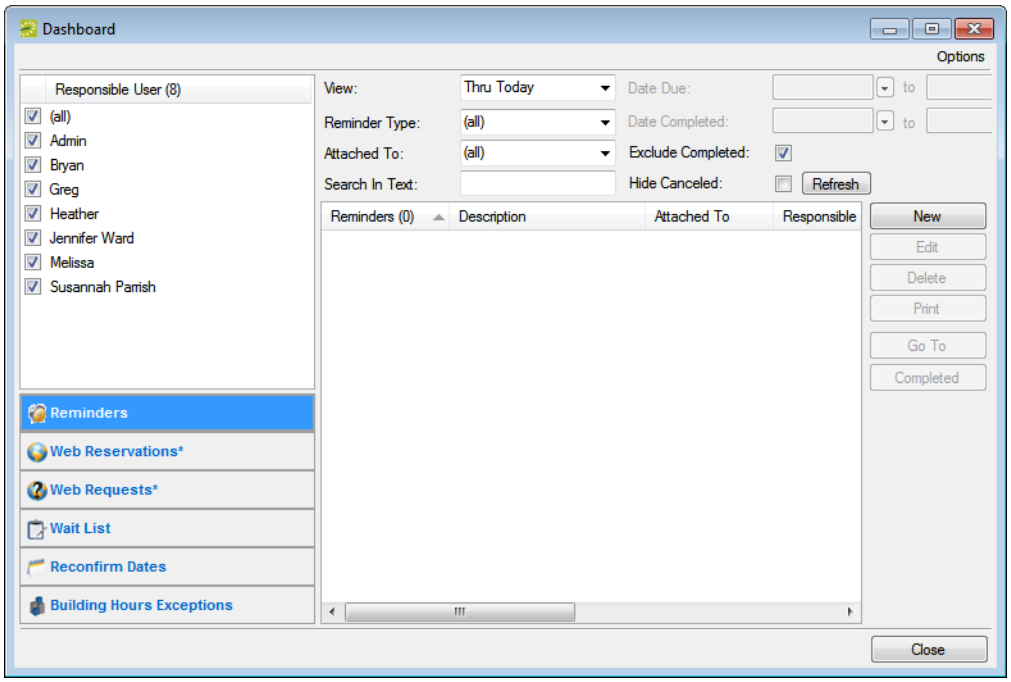
- Select a rule to view all unreviewed notifications for future bookings.
- Select a rule, and under Show, select Reviewed to view all reviewed notifications for future bookings.
- Select a rule, and under Show, select Old to view all notifications for past bookings.
- Select a notification to view detailed information about the notification (such as new bookings, the changes made to a booking, and the users who were notified of the changes) in a pane at the bottom of the window.
- Select Show New Only to show only new notifications (notifications with the current day's date) for the notification rules.
- Select a notification, and then click Reviewed to mark a notification as "Reviewed."

- Select a notification and then click Go To to open the item to which the notification refers.
  - If the notification is attached to a reservation, booking, or booking detail, then the reservation opens in the Navigator, and the appropriate folder (Reservation, Booking, or Booking Detail) is automatically selected.
  - If the notification is attached to a group, then the Group window opens, with the group information displayed in the window.
- Click Refresh to check for notifications that have been issued since you opened the Dashboard.

Reminders Tab

A *comment* is a text entry that explains or clarifies a reservation, booking, group, or service order. A *reminder* is a comment that has a due date associated with it. The Reminders tab displays all the reminders for which you are the responsible user and that, by default, have a due date through the current day's date.

Figure 5-4: Dashboard window, Reminders tab



The tab is interactive. You can:

- View a list of reminders for other responsible users and/or set the criteria for which reminders that you want to view. See "To change the Reminders tab view" on page 215.
- Create an unattached reminder. "To create an unattached reminder" on page 216.
- Edit a reminder. "To edit a reminder" on page 217.
- Delete a reminder. "To delete a reminder" on page 217.
- Print a reminder. "To print a reminder" on page 218.
- Go to the item to which a reminder is attached. See "To go to the item to which a reminder is attached" on page 218.
- Complete a reminder. See "To complete a reminder" on page 218.

To change the Reminders tab view

By default, when the Dashboard window first opens, the Reminders tab displays all the reminders for which you are the responsible user and that, by default, have a due date through the current day's date. You can do one or more of the following to change this view:

- To view the reminders for which other user's are responsible, simply select the user or users in the Responsible User pane.
- To view only a specific group of reminders for which you or others are the responsible users, change the viewing criteria.

Option	Description
View	View reminders that have the indicated due date. The default value is Thru Today. If a value from the pre-configured list does not meet your needs, then select (user specified) and in the Date Due fields, enter at least a Starting due date. The Ending due date is optional.
Reminder Type	The default value is (all).
Attached To	The default value is (all). To view reminders that are not attached to any item (reservation, booking, group, or service order), select (none). See "To create an unattached reminder" on page 216.
Search in Text	Enter the string by which to search for specific reminders. (The search is carried out on the Notes field for the reminder.) The search is not-case sensitive and the search string can be found anywhere in the Notes. For example, "cat" returns reminders that have "**cat**ering" or "Mary's **cat**ering" in the Notes field.
Date Completed	Available only if Exclude Complete is not checked.
Exclude Completed	Selected by default. Clear this option to display completed reminders in the Reminders list. To display completed reminders that meet the other viewing criteria, regardless of their completion dates, leave the Date Completed fields blank; otherwise, to view completed reminders that were completed by a specific date, you can enter a Starting date or a date range in the Date Completed fields.
Hide Cancelled	Not selected by default. Select this option to display canceled reminders in the Reminders list.

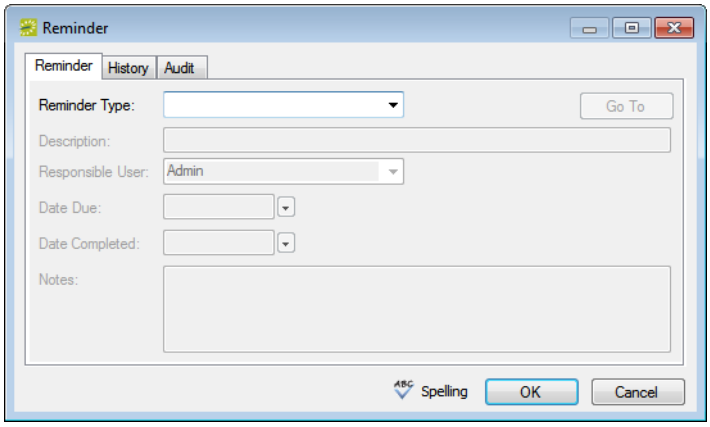
To create an unattached reminder

When you create reminder on the Navigator, the reminder is attached to a specific reservation, booking, or booking detail. Similarly, when you create a reminder on the Groups window, the reminder is attached to a specific group. If needed, however, you can create a reminder that addresses just your general business needs and is not attached to any specific item. For example, you can create a reminder about "preparing for your organization's yearly safety inspection." Any reminder that you create from the Reminders tab on the Dashboard window is an *unattached* reminder.

1. Click New.

   The Reminder dialog box opens.

Figure 5-5: Reminder dialog box



2. Do one of the following:

   - Select a Reminder Type.
   - If none of the pre-configured Reminder Types meets your working needs, then select (user-specified), and in the Description field, enter a description for the reminder type.

   The Responsible User field is populated with your User ID and the Date Due field is populated with the current day's date.

3. Optionally, change the value for the Responsible User, the Date Due, or both.
4. If you are completing the reminder today, select a Date Completed; otherwise, leave this field blank. (This field is populated automatically when you or another user completes the reminder. See "To complete a reminder" on page 218.)
5. Optionally, do one or both of the following:

   - In the Notes field, enter any further explanation or information about the reminder.
   - Click Spelling to spell check the reminder before you save it.

6. Click OK.

   The Reminder dialog box closes. The newly created reminder is not attached to an item. It might or might not be displayed in the Reminders list depending on the values that you have set for filtering the display.

To edit a reminder

1. On the Reminders list, select the reminder that is to be edited, and then click Edit.

   The Reminder dialog box opens. The dialog box is populated with the current information the reminder.

2. Modify the reminder as needed.
3. Optionally, click Spelling to spell check the reminder before you save the modified reminder.
4. Click OK.

   The Reminder dialog box closes. If the reminder is attached to an item such as a reservation, then the reminder remains attached; otherwise, it is saved as an unattached reminder.

To delete a reminder

You can delete any reminder (attached or unattached) regardless of its due date and regardless if it is completed.

1. On the Reminders list, select the reminder that is to be deleted, and then click Delete.

   A message opens asking you if it is OK to delete the reminder.

2. Click Yes.

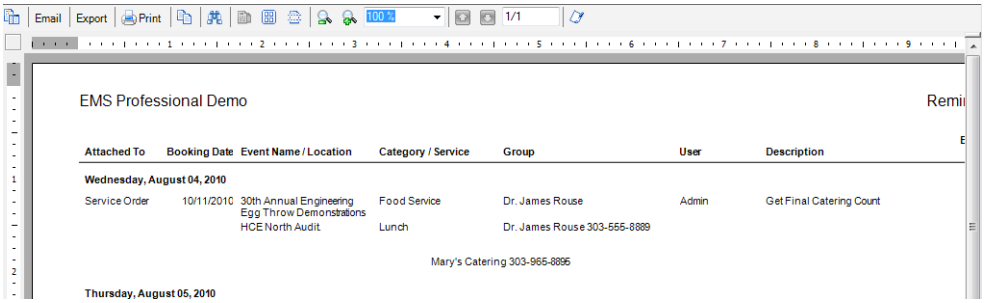
   The message closes and the reminder is deleted.

To print a reminder

1. On the Reminders list, select the reminder that is to be printed, and then click Print.

   An onscreen preview of the reminder opens. The preview window contains options for printing a hard copy of the reminder, for emailing the reminder, and so on.

Figure 5-6: Onscreen preview for a printed reminder



2. Select the option or options that best fit your working needs.

To go to the item to which a reminder is attached

On the Reminders list, select a reminder, and then click Go To.

The Attached To column for the reminder must state anything other than "Unattached."

- If the reminder is attached to a reservation, booking, or booking detail, then the reservation opens in the Navigator, and the appropriate folder (Reservation, Booking, or Booking Detail) is automatically selected.
- If the reminder is attached to a group, then the Group window opens, with the group information displayed in the window.

To complete a reminder

1. On the Reminders list, select the reminder, or CTRL-click to select the multiple reminders that are to be completed.
2. Click Completed.

   A message opens asking you if it is OK to set the selected reminders as completed.

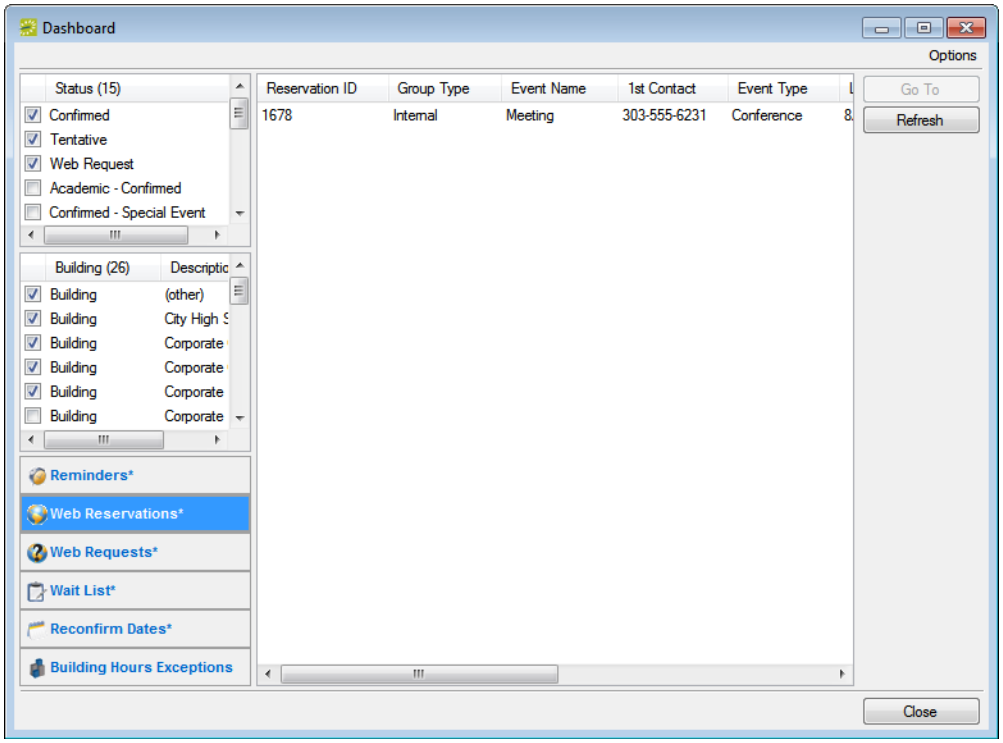
3. Click Yes.

   The message closes. The reminders are completed with a date equal to the current day's date. The reminders might or might not be displayed in the Reminders list depending on the values that you have set for filtering the display.

Web Reservations Tab

The Web Reservation tab displays any reservation that was submitted through VEMS for web process templates that are set to Self Serve mode.

Figure 5-7: Web Reservations tab



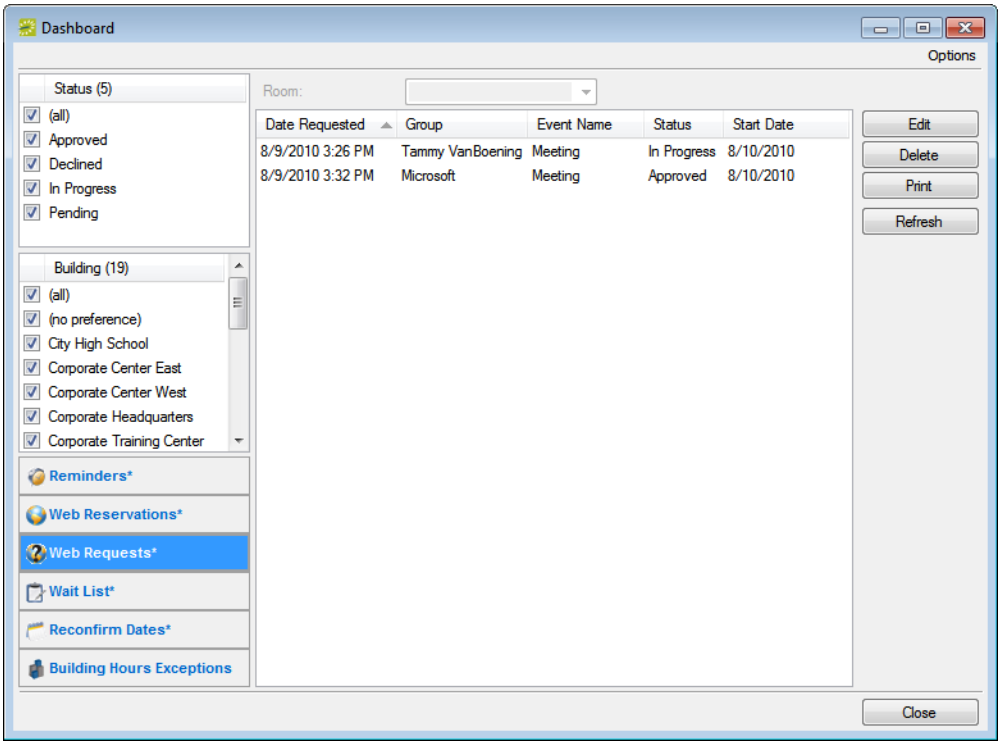
The tab is interactive. You can:

- Select options (Status and Building/Area/View) on the left pane of the tab to filter the reservations that are displayed on the tab. After you select or modify the filtering options, click Refresh.
- Select the reservation in the Reservations list, and then click Go To open the reservation in the Navigator.

Web Requests Tab

The Web Requests tab displays any reservation that was submitted through VEMS for web process templates that are set to Request mode. A request that has not yet been processed has a status of Pending.

Figure 5-8: Dashboard window, Web Requests tab



The tab is interactive. You can:

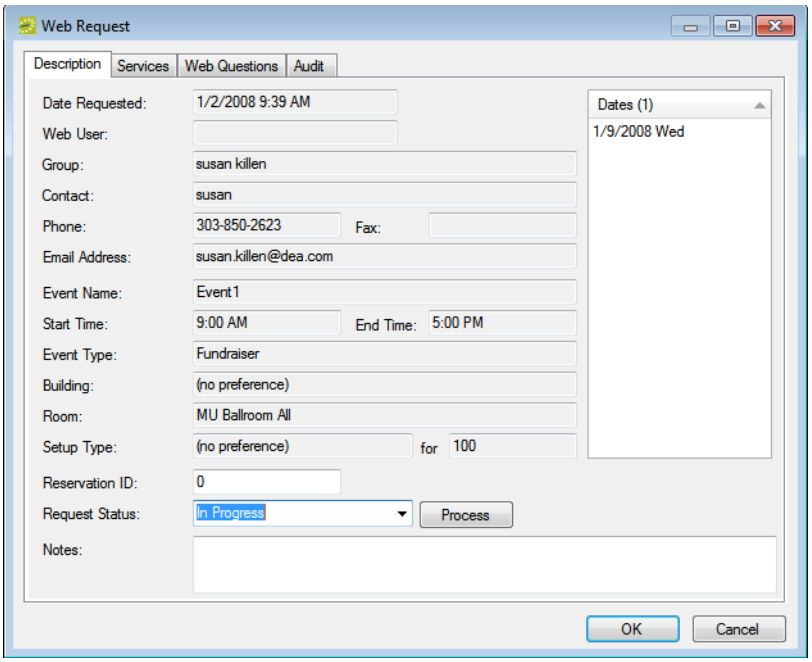
- Select options (Status and Building) on the left pane of the tab to filter the web requests that are displayed on the tab. After you select or modify the filtering options, click Refresh.
- Edit a web request, including processing it. See “To edit a web request” on page 221.
- Delete a web request. See “To delete a web request” on page 222.
- Print a web request. See “To print a web request” on page 223.

To edit a web request

1. Select the web request that is to be edited, and then click Edit.

   The Web Request dialog box opens. All of the information that was submitted for the request through VEMS is displayed in the dialog box. The dialog box always has a Description tab, a Web Questions tab, and an Audit tab. If the request included resources or setup notes, it also has a Services tab.

Figure 5-9: Web Request dialog box



2. Do one of the following:

   - Edit the request as necessary without processing it and then click OK. When editing the request without processing it, optionally, you can do one or more of the following:

     - If you have questions about the request or want to confirm some information (for example, “Will alcohol be served at the event?”) before you process the request, you can enter these questions or comments in the Notes field on the Description tab. A web user can see these notes when viewing the request in VEMS and you can wait for a response before deciding whether to process the request.

     - In addition, to indicate that you are reviewing the request before you process it, you can set the status of the request to In Progress on the Description tab. A web user can see this status when viewing the request in VEMS.

     - If the request required questions to be answered on the web, open the Web Questions tab to see the questions and the user’s answers.

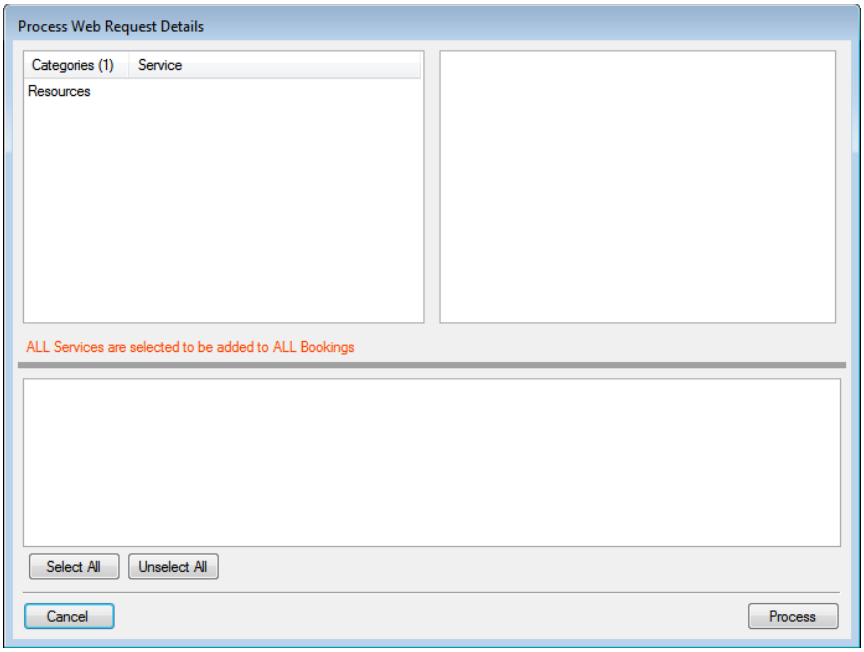
- If the request includes resources, open the Services tab to see what the request includes. To view the details for each category, double-click a category to display its associated details in the right pane.

- To process the request and create a true reservation for the request in your EMS database, on the Description tab, click Process.

  The reservation opens in the Reservation Wizard. Continue to "Making a Reservation Using the Reservation Wizard" on page 37.

After you create a true reservation using the wizard and the reservation includes a request for services, the Process Web Request Details window opens. (See Figure 5-10 below.) You can process the services immediately using the options on this window, or to process the services at a later date, click Cancel to close the window. You can then open the reservation on the Web Requests tab, and on the Services tab, click Process.

Figure 5-10: Process Web Request Details window



To delete a web request

1. Select the web request that is to be deleted, (CTRL-click to select multiple requests), and then click Delete.

   A message opens asking you if it is OK to delete the selected web requests.

2. Click Yes.

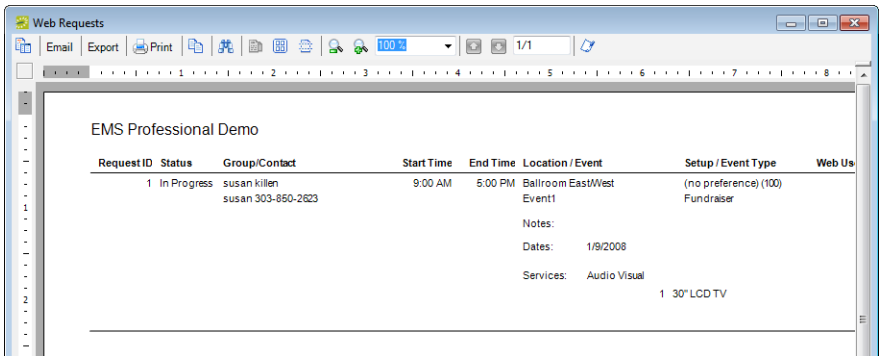
   The message closes. The selected web requests are deleted.

To print a web request

1. Select the web request that is to be printed, (CTRL-click to select multiple requests), and then click Print.

   An onscreen preview of the selected requests opens. A variety of options are available from this preview, including the options to print a hard copy of the requests, to export the requests to a .pdf, and to email the requests.

Figure 5-11: Print preview for a web request

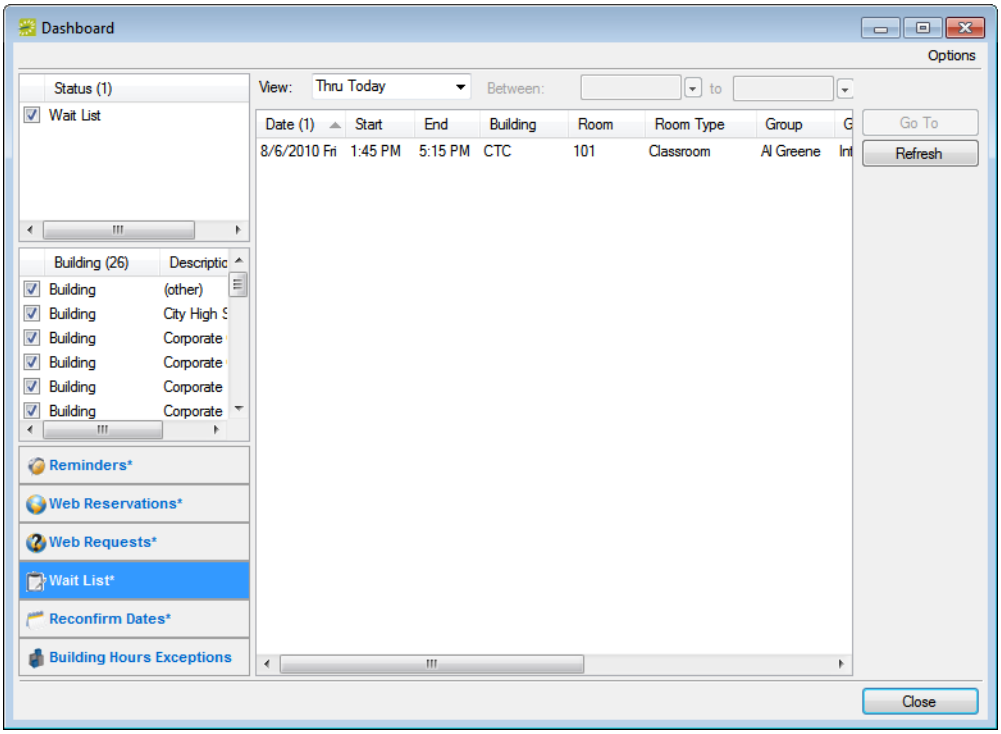


2. Select the option or options that best fit your working needs.

Wait List Tab

The Wait List tab provides you a way of monitoring wait-listed reservations. It also provides an indicator when the requested room becomes available.

Figure 5-12: Wait List tab



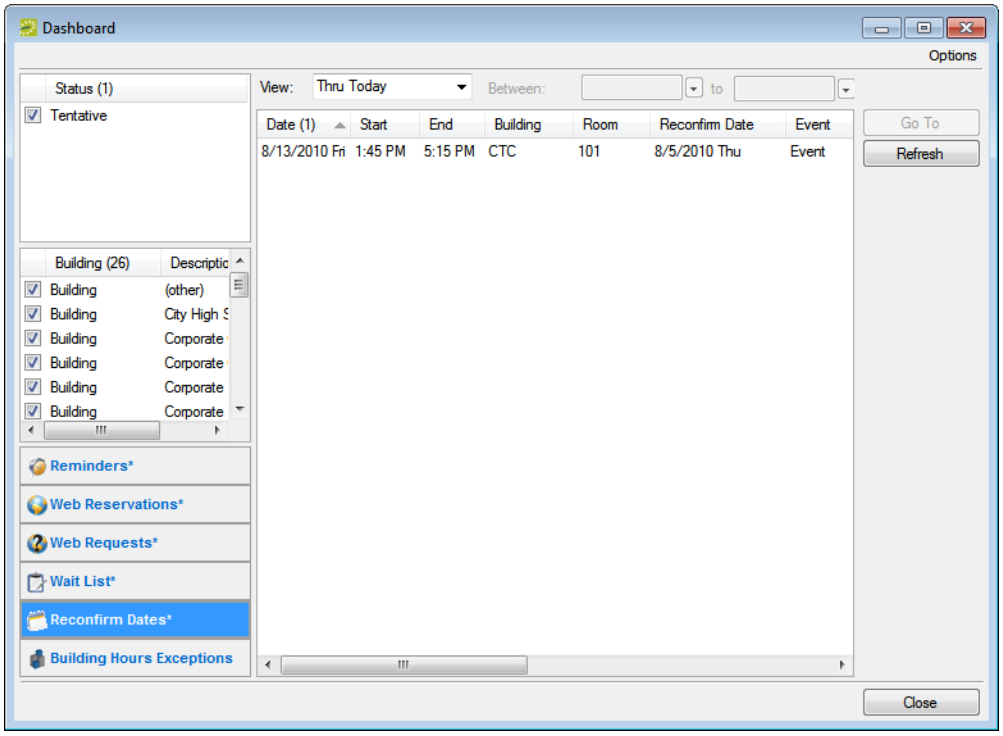
The tab is interactive. You can:

- Select options (Status and Building/Area/View) on the left pane of the tab to filter the reservations that are displayed on the tab. You can also select a different view on the View dropdown list. (The default value is Thru Today. To filter the reservations based on a specific time range, on the View dropdown list, select (user-specified), and then enter at least a starting date in the available date fields. An ending date is optional.) After you select or modify the filtering options, click Refresh.
- Select the reservation in the Reservations list, and then click Go To open the reservation in the Navigator.

Reconfirm Dates Tab

The Reconfirm Dates tab displays reservations that have been booked in a status that requires the Reconfirm Date option (for example, a Tentative or Hold status). You use this tab as a reminder to reconfirm such reservations.

Figure 5-13: Reconfirm Dates tab



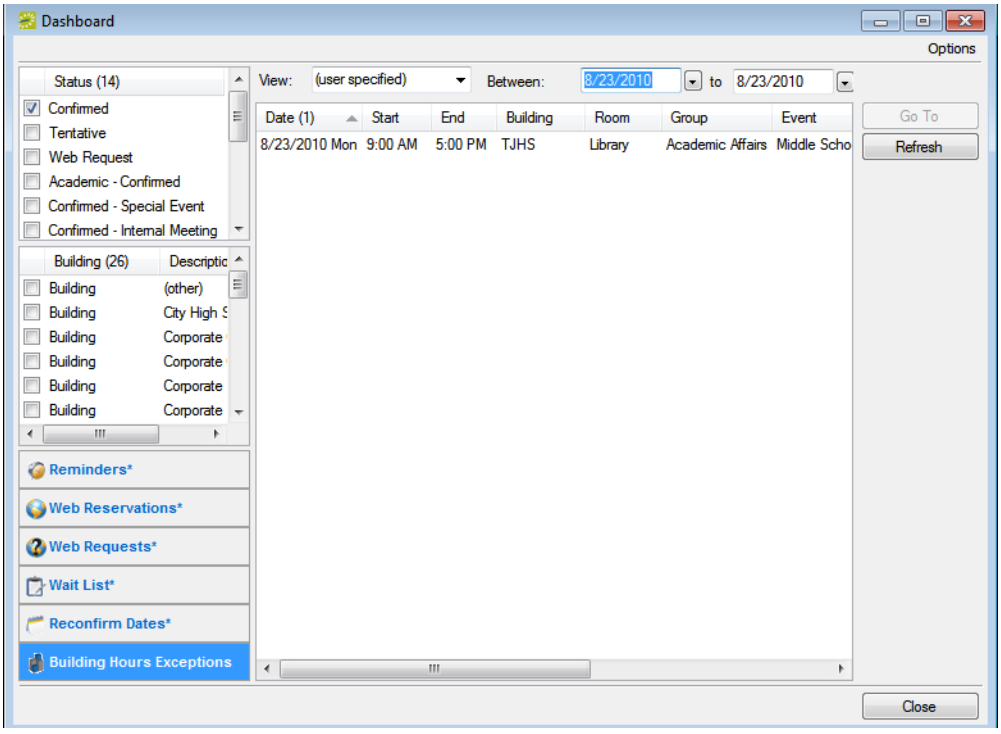
The tab is interactive. You can:

- Select options (Status and Building/Area/View) on the left pane of the tab to filter the reservations that are displayed on the tab. You can also select a different view on the View dropdown list. (The default value is Thru Today. To filter the reservations based on a specific time range, on the View dropdown list, select (user-specified), and then enter at least a starting date in the available date fields. An ending date is optional.) After you select or modify the filtering options, click Refresh.
- Select the reservation in the Reservations list, and then click Go To open the reservation in the Navigator.

Building Hours Exceptions Tab

The Building Hours Exceptions tab displays reservations that occur outside configured building hours.

Figure 5-14: Building Hours Exceptions tab



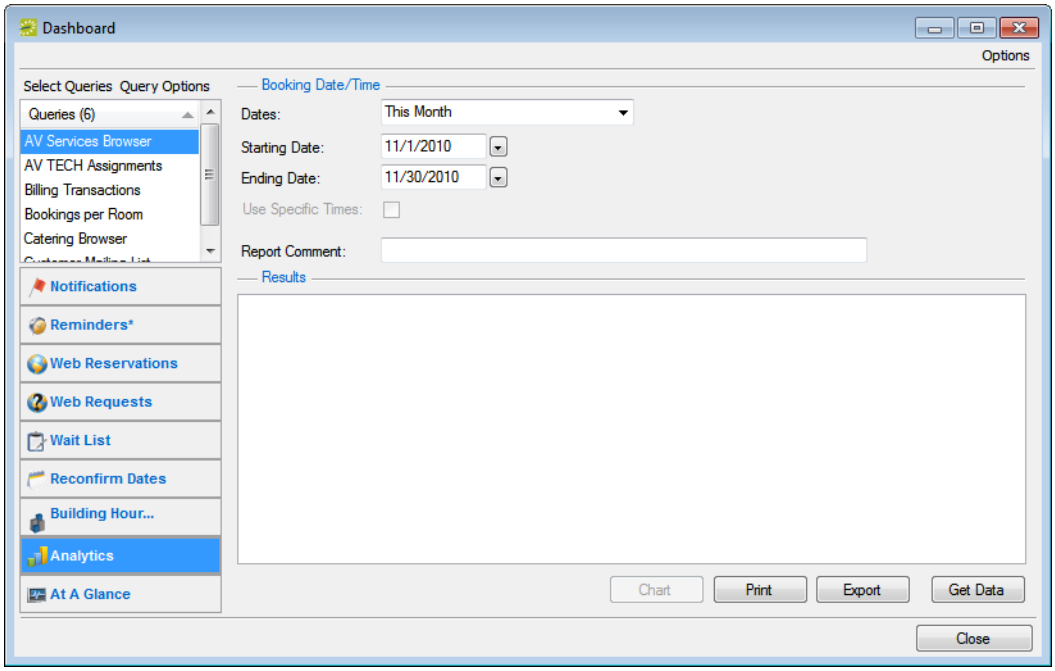
The tab is interactive. You can:

- Select options (Status and Building/Area/View) on the left pane of the tab to filter the reservations that are displayed on the tab. You can also select a different view on the View dropdown list. (The default value is Thru Today. To filter the wait-listed reservations based on a specific time range, on the View dropdown list, select (user-specified), and then enter at least a starting date in the available date fields. An ending date is optional.) After you select or modify the filtering options, click Refresh.
- Select the reservation in the Reservations list, and then click Go To open the reservation in the Navigator.

Analytics Tab

The Analytics tab provides quick access for queries that have been defined using the Query builder and for which you have been defined as a user. You can run these queries from the Analytics tab.

Figure 5-15: Dashboard window, Analytics tab



To run a query from the Analytics tab, do the following:

1. In the upper left corner of the Analytics tab, click Select Queries.

   The Queries dialog box opens. This dialog box lists the queries that have been defined using the Query builder and to which you have access.

2. Select the queries that you want to run, and then click OK.

   The Queries dialog box closes. The selected queries are displayed in the Queries pane (upper left) on the Analytics tab.

3. In the Queries pane, select the query that you want to run, and then select the date for which the data in your EMS database is to be queried.

Option	Description
Custom	The starting date is set to the first day of the month and the ending date is set to the last day of the month but you can modify one or both of these dates. **Note:** For some queries, if you select Custom, a Use Specific Times option becomes available. If you enter the same date for the starting date and ending date, you can select Use Specific Times, and then enter a starting time and ending time to query the data for in specific time range on the same day.
Last Month	The starting date is set to the first day of the previous month and the ending date is set to the last day of the previous month.
Last Quarter This Quarter This Quarter To Date	Quarters are based on a calendar year: • First quarter is 1/1 through 3/31. • Second quarter is 4/1 through 6/30. • Third quarter is 7/1 through 9/30. • Fourth quarter is 10/1 through 12/31. For example, if the current day's date is 11/22/2010, and you select Last Quarter, then the starting date is set to 7/1/2010 and the ending date is set to 9/30/2010.
Last Year	The starting date is set to 1/1 of the previous year, and the ending date is set to 12/31 of the previous year.
This month	The starting date is set to the first day of the current month and the ending date is set to the last day of the current month.
This Year	The starting date is set to 1/1 of the current year, and the ending date is set to 12/31 of the current year.
This Year to Date	The starting date is set to 1/1 of the current year, and the ending date is set to the current day's date.

4. Optionally, in the Report Comment field, enter a description or explanation of the query.
5. Click Get Data.

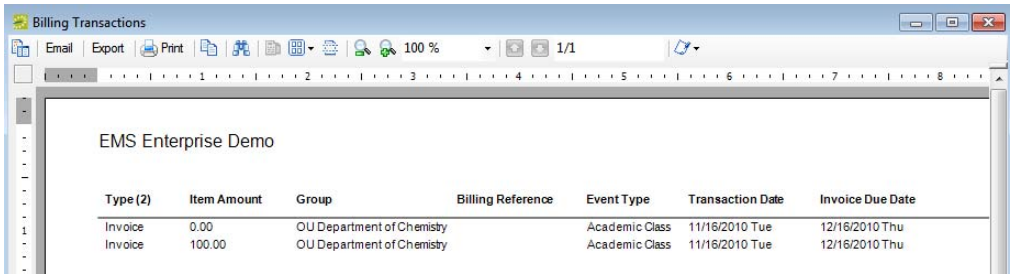
   If the query returns data, then the results are displayed in the Results pane on the Analytics tab.
6. Optionally, do one or more of the following:

   • To export the query results to an Excel spreadsheet or to an XML file, click Export, and then select the appropriate file type. A dialog box opens in which you can specify the file name (the default file name is the name of the query, but you can always modify this), and the location to which to save the file.

The file type for an Excel spreadsheet is .xl or .xls and you cannot change this. The file type for an XML file is .xml and you cannot change this.

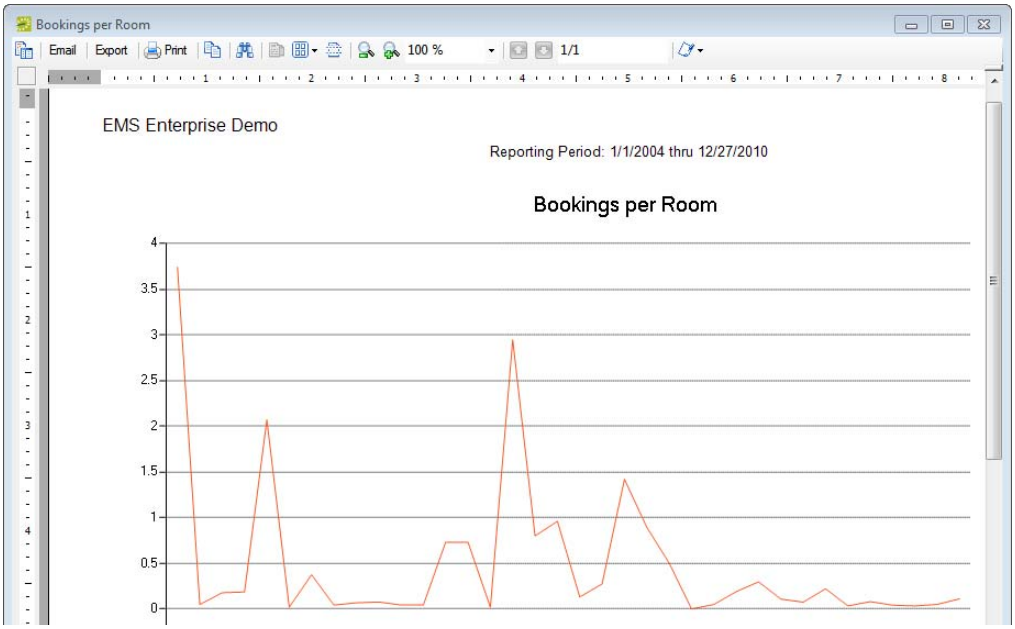
- To generate an onscreen preview of the printed query results, click Print. The preview window contains options for printing a hard copy of the query results, for emailing the results, and so on. Select the option or options that best fit your working needs.

Figure 5-16: Onscreen preview of a query results



- If the query has been defined with a Chart, the Chart option is enabled. Click Chart to generate an onscreen preview of the charted data. The preview window contains options for printing a hard copy of the chart, for emailing the chart, and so on. Select the option or options that best fit your working needs.

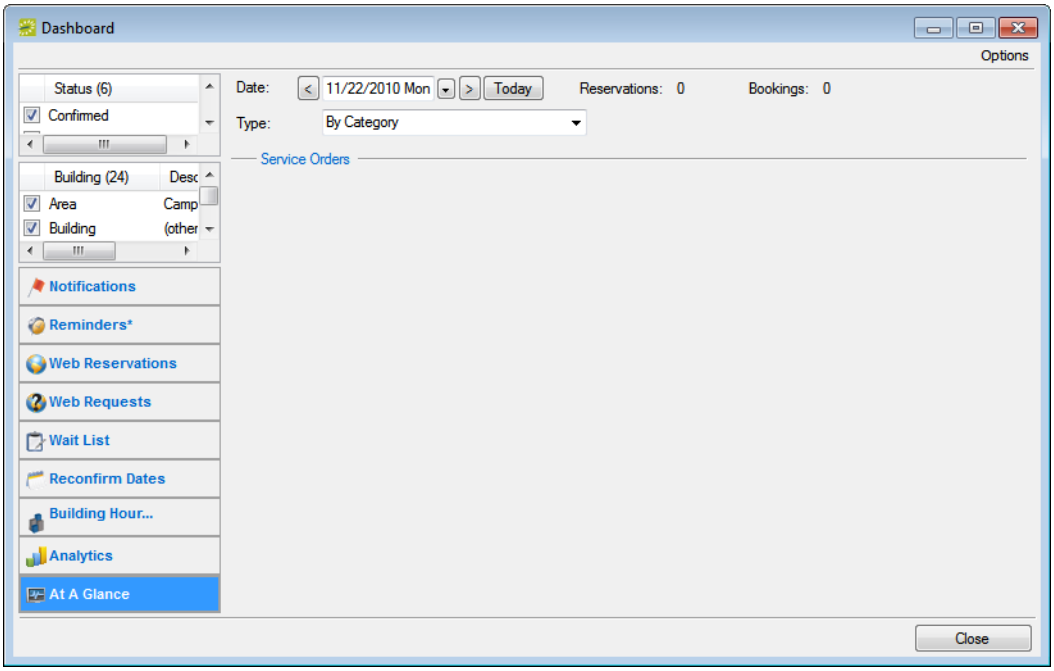
Figure 5-17: Onscreen preview of query results that are charted/graphed



At A Glance Tab

The At A Glance tab provides quick access to high-level booking statistics for events at your organization or facility. You can select to show booking statistics by category, by event type, by group type, by reservation source, by room type, or by status.

Figure 5-18: At A Glance tab



By default, when the tab first opens, the date is set to the current day's date, and category is the selected display type. To view booking statistics for your facility on a given date, do the following:

1. Select options (Status and Building) on the left pane of the tab to filter the results that are displayed on the tab.
2. Change the date and/or the display type as needed to view the bookings statistics for a selected date.

Chapter 6
Groups and Contacts

A *group* is an entity for which reservations are made at your facilities. A group can be as granular as a single person, or it can represent an entire organization or department of people (for example, an Academic Affairs group). A *contact* is a person who serves as the coordinator or focal point for a group. You can add new groups and contacts in your EMS database, edit information for existing groups and contacts, send emails to groups and contacts, delete a group or a contact, and print and export information for groups.

This chapter covers the following topics:

- "Overview of the Groups window" on page 233.
- "Adding, Editing, and Deleting Groups" on page 236.
- "Adding Comments and Reminders to a Group" on page 244.
- "Adding Attachments to a Group" on page 246.
- "Adding User Defined Fields to a Group" on page 247.
- "Working with Reservations for a Group" on page 248.
- "Emailing a Group" on page 250.
- "Printing and Exporting Group Information" on page 251.
- "Managing Contacts" on page 253.
- "Additional Configuration of Groups and Contacts" on page 257.

Overview of the Groups window

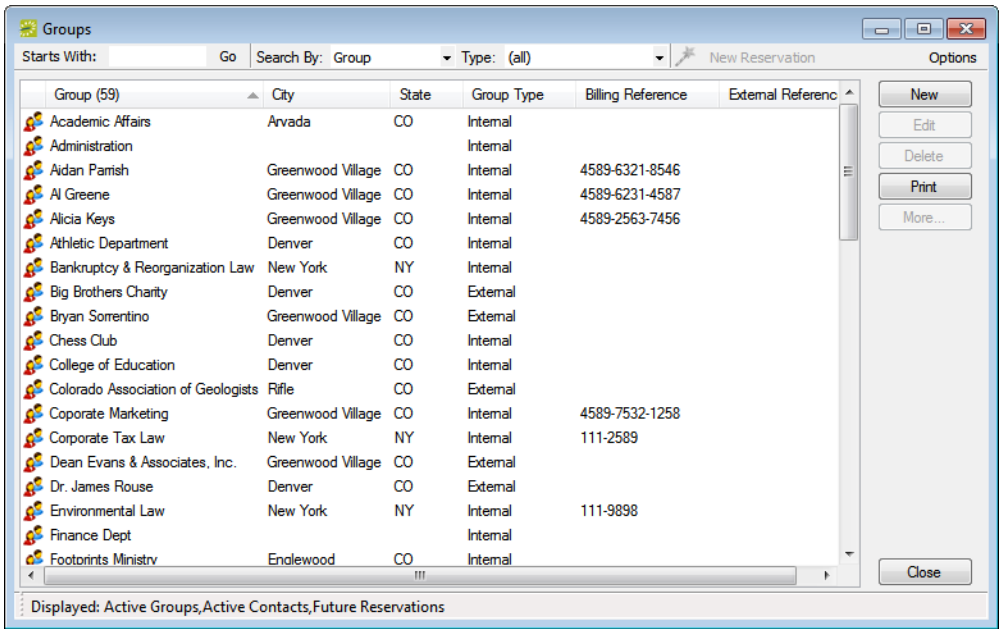
You carry out all the needed configuration of groups and contacts in your EMS database from the Groups window. To open the Groups window, you can do one of the following:

- On the main menu, or on the menu bar, click Reservations > Reservations > Groups.
- On the toolbar, click the Groups icon

.

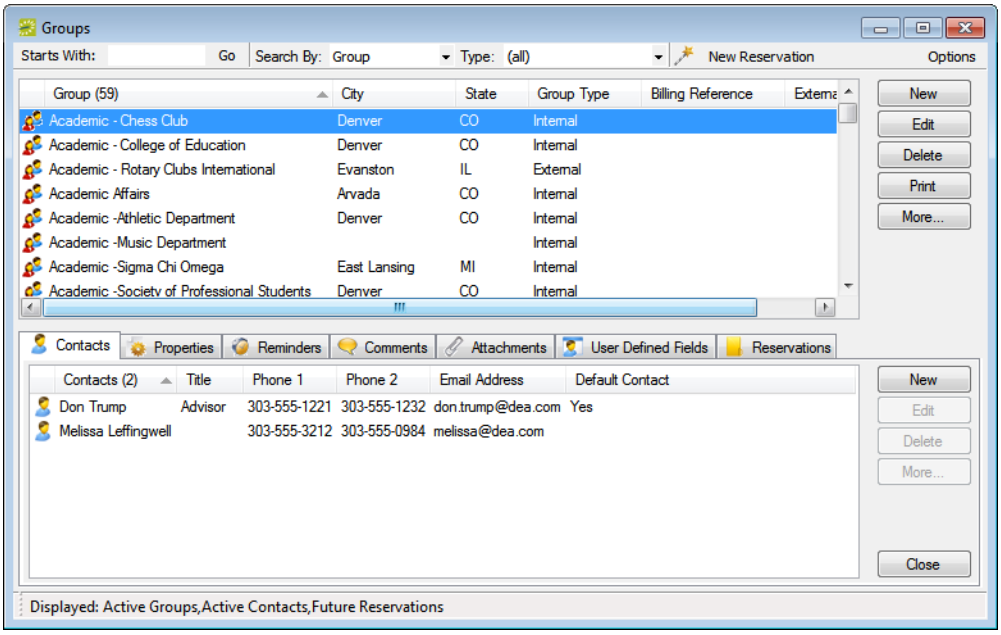
Click Go to display a list of all active reservations for all active groups of all types in your EMS database as well as all the active contacts for the groups. You can always change the display in the Groups window, and if the list of groups is exhaustive, and you want to filter the list, you can always search for groups from this window.

Figure 6-1: Groups window



When you select a group in the Groups window, seven tabs—Contacts, Properties, Reminders, Comments, Attachments, User Defined Fields, and Reservations—appear on the lower part of the Groups window. The Contacts tab is always the active tab when you select a group.

Figure 6-2: Group windows with additional tabs



Each tab serves a distinct purpose for a group:

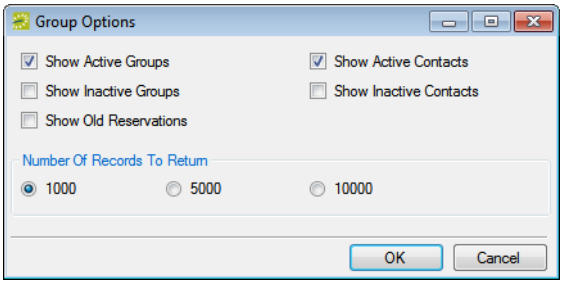
- You can add, edit, and delete contacts for a group on the Contact tab. You can also set the default contact for the group from this tab.
- You can view the properties for a group (name, address, group type, billing references, payment types, and so on) for group on the Properties tab. You can also set the default contact for the group from this tab.
- You can add, edit, and delete reminders for the group on the Reminders tab.
- You can add, edit, and delete comments for the group on the Comments tab.
- You can add, edit, and delete user defined fields for the group on the User Defined fields tab.
- You can add and delete attachments (files) for the group on the Attachments tab.
- You can manage reservations for the group on the Reservations tab, including creating new reservations, viewing and editing existing reservations in the Navigator, and reassigning existing reservations to another group.

To change the display in the Groups window

Do one or more of the following:

- On the Type dropdown list (at the top of the Groups window), select a different Group type to display.
- In the upper right hand corner of the Groups window, click Options to open the Group Options dialog box, and select the settings as appropriate.

Figure 6-3: Group Options dialog box



To search for a group in the Groups window

To search for groups in the Groups window, do one or more of the following:

- In the Starts With field, enter a search string, and then click Go.

The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching

- On the Search By dropdown list, select the option by which to search—Contact or Group.
- On the Type dropdown list, select the group type by which to search.

  The Groups window is updated with the results that meet your search criteria.

Adding, Editing, and Deleting Groups

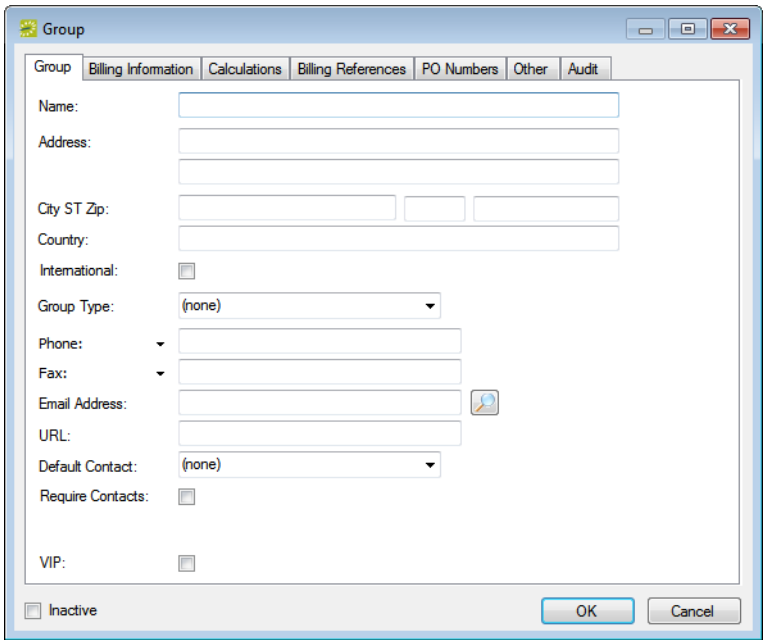
A *group* is an entity for which reservations are made at your facilities. A group can be as granular as a single person, or it can represent an entire organization or department of people (for example, an Academic Affairs group). You can add new groups, edit the information for existing groups, and delete groups. Before you add a new group, you can first search for the group to confirm that the group has not already been added.

To add a new group

1. Open the Groups window.
2. Click New.

   The Group dialog box opens. The Group tab is the active tab.

Figure 6-4: Group dialog box, Group tab



3. Enter the information for the new group. See:
   - “Group tab” on page 237.
   - “Billing Information tab” on page 238.
   - “Calculations tab” on page 239.
   - “Billing References tab” on page 240.
   - “PO Numbers tab” on page 241.
   - “Other tab” on page 242.

4. Click OK.

   The Group dialog box closes. You return to the Groups window. The newly configured group is automatically selected in the window.

At the time that you are configuring a group, you can also create a web user for the group, create a contact from the group, and assign the group to a web user. See "Additional Configuration of Groups and Contacts" on page 257.

Group tab

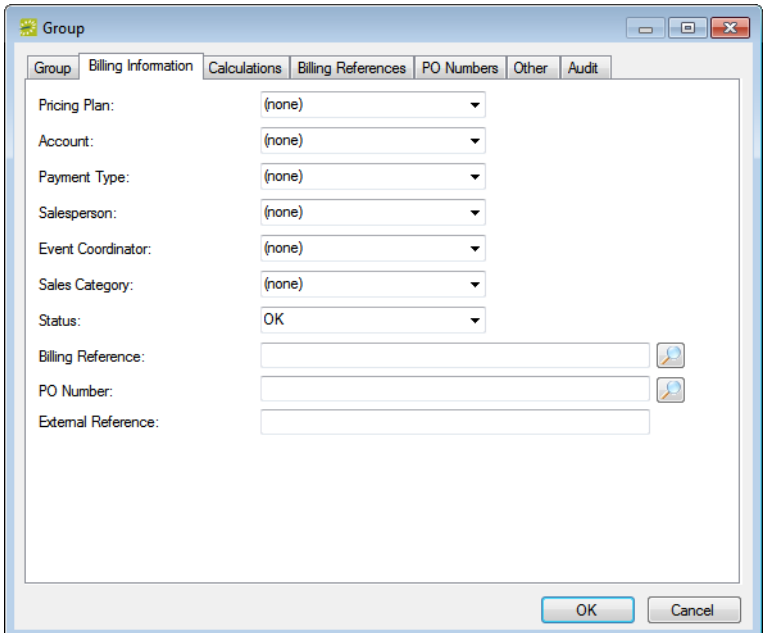
The only required information is the name of the group on the Group tab. All other information is optional and can be added at later dates when needed, including adding a group contact. See "Managing Contacts" on page 253.

Field	Description
Name	The name of the group. **Note:** The name can be a maximum of 30 characters, including spaces.
Address City ST Country Zip	The street or mailing address for the group.
International	Select this option to drop the State and Zip fields for an international group.
Phone Fax	The phone number and fax number for the group. **Note:** The Phone and Fax fields have a dropdown list available on which you can select a different value (Phone, Fax, Mobile, or Other) for the field label, or you can enter a user-defined value. To enter a user-defined value, double-click the current field label to select it, and then enter the user-defined value over the selected label.
Email Address	The email address for the group. **Note:** If your computer is connected to a network, click the Search icon to open a Global Address Lookup dialog box and search for the email address.
URL	The URL for the group's website. **Note:** Web users can link to this group's web site on VEMS.
Default Contact	Populated with the name of the default contact for the group *after* you have defined a default contact for the group.
Require Contacts	Select this option if the group is to *always require* a contact when a reservation is being made for the group.
VIP	Select this option if the group is to be designated as a VIP group.
Inactive	Leave this option blank to add the group as an active group. Select this option to inactivate the group.
Notes	Any other comments or statements that are applicable for the group.

Billing Information tab

1. Open the Billing Information tab and set the default billing information for the group.

Figure 6-5: Group dialog box, Billing Information tab



All the values that you select on this tab are the default values that are applied when a new reservation is made for the group. A user can change these values.

Option	Description
Pricing Plan Account Payment Type Salesperson Event Coordinator Sales Category	If the values that you want to assign as the default values the group are not available for any of these options, contact your EMS Administrator.
Status	The status is a way to indicate the standing or ranking of the group. for example, in your organization, the OK status could indicate that the group is current in payments due. If a group status is set to Warning, then a warning message opens when you make a reservation for the group. It does not, however, prevent a reservation from being made for the group. If a group status is set to Bad, then reservations cannot be made for the group.

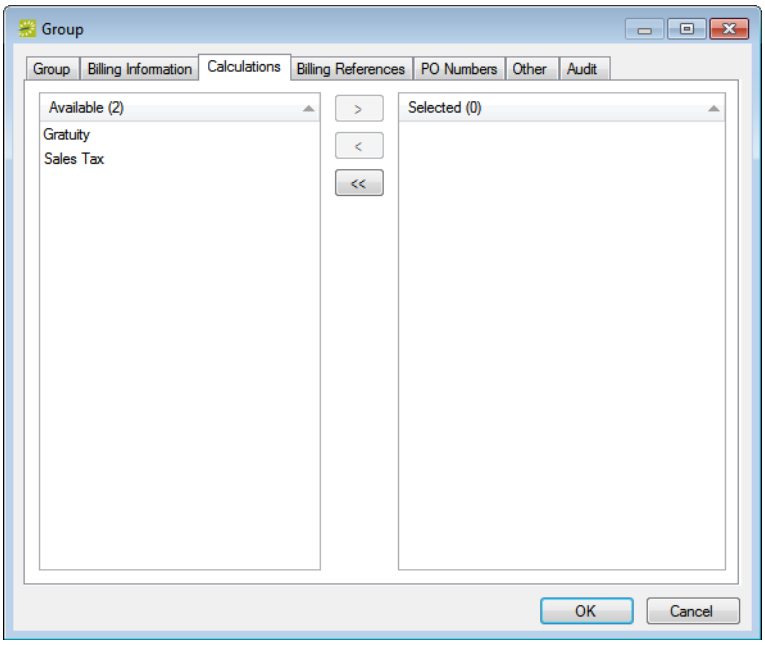
Option	Description
Billing Reference	You can manually enter data into the field, or you can click the Search icon to open a master list of billing references and select a billing reference. **Note:** To define a list of eligible billing references that are specific to the group, enter the values on the Billing References tab. See "Billing References tab" on page 240.
PO Number	You can manually enter data into the field, or you can click the Search icon to open a master list of PO Numbers and select a PO number. **Note:** To define a list of eligible PO numbers that are specific to the group, enter the values on the PO Numbers tab. See "PO Numbers tab" on page 241.
External Reference	Links the group to an outside program or website, if needed.

2. Continue with any other optional configuration for the group as needed; otherwise, click OK to close the Group dialog box and return to the Groups window. The newly configured group is automatically selected in the window.

Calculations tab

1. Open the Calculations tab and on the Available list, select the additional calculation or CTRL-click to select multiple calculations that are to always apply to this group, and then click the Move button (>) to move the selected calculations to the Selected list.

Figure 6-6: Group dialog box, Calculations tab



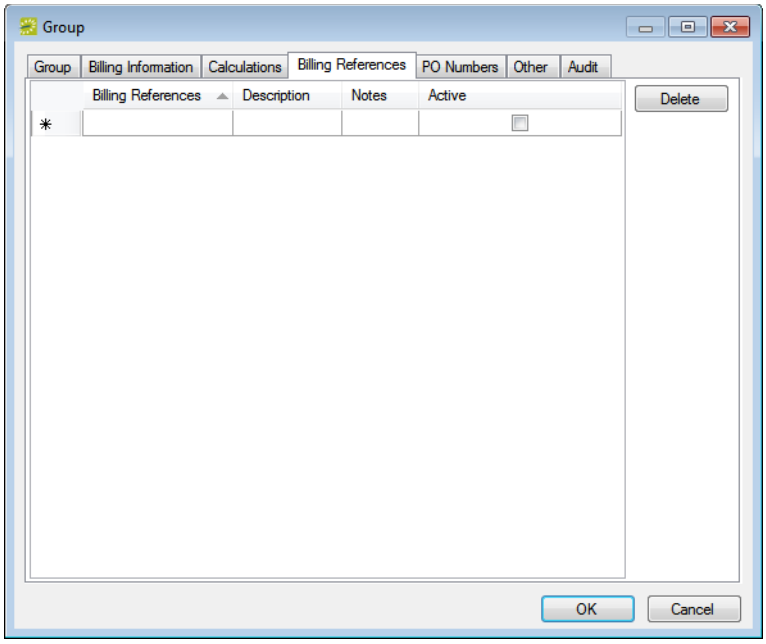
2. Continue with any other optional configuration for the group as needed; otherwise, click OK to close the Group dialog box and return to the Groups window. The newly configured group is automatically selected in the window.

Billing References tab

You use this tab to define a list of eligible billing references that are specific to the group.

1. Open the Billing References tab and enter any billing references that are associated with the group.

Figure 6-7: Group dialog box, Billing References tab



Option	Description
Billing Reference	The billing reference that is associated with the group.
Description	A description about the billing reference.
Notes	Any other comments or statements that are applicable for the billing reference.
Active	Select this option if this billing reference is to be available when a reservation is made for the group.

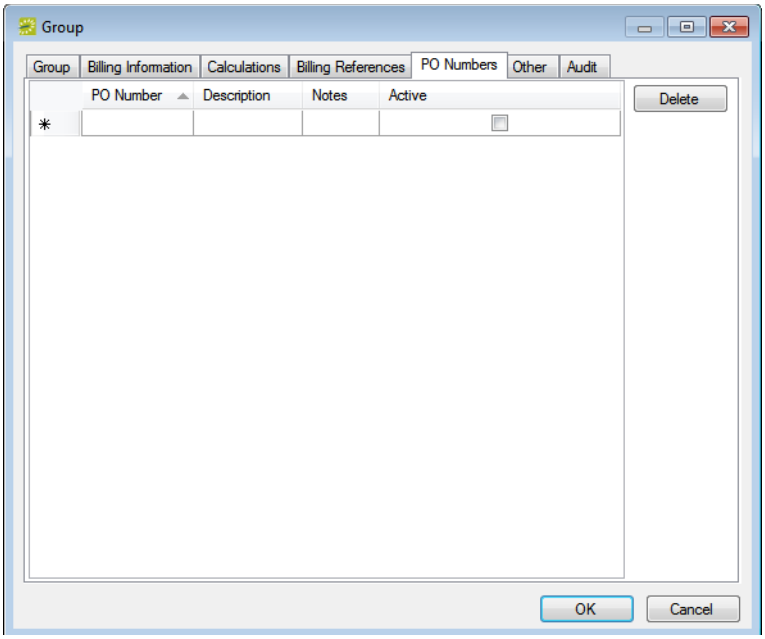
2. Continue with any other optional configuration for the group as needed; otherwise, click OK to close the Group dialog box and return to the Groups window. The newly configured group is automatically selected in the window.

PO Numbers tab

You use this tab to define a list of eligible PO numbers that are specific to the group.

1. Open the PO Numbers tab and enter any PO numbers that are associated with the group.

Figure 6-8: Group dialog box, PO Numbers tab



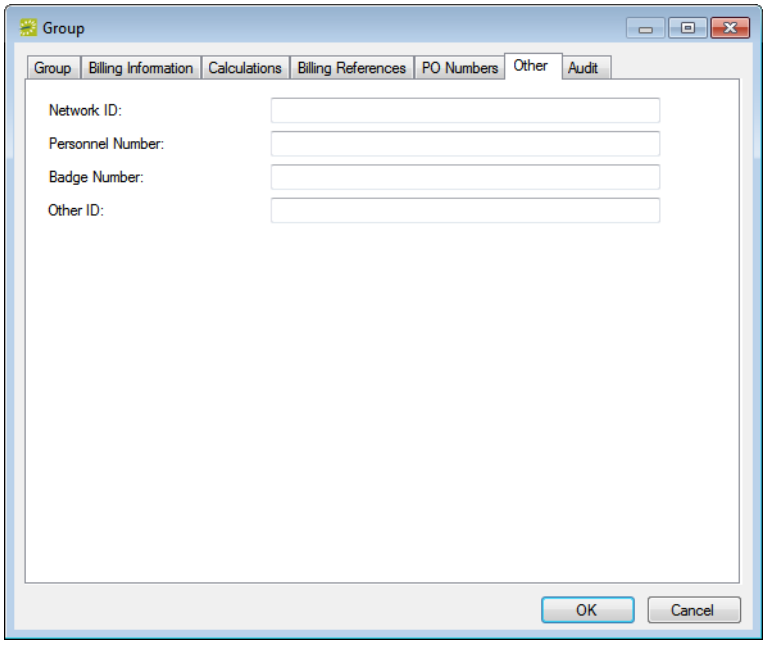
Option	Description
PO Number	The PO number that is associated with the group.
Description	A description about the PO number.
Notes	Any other comments or statements that are applicable for the PO number.
Active	Select this option if this PO number is to be available when a reservation is made for the group.

2. Continue with any other optional configuration for the group as needed; otherwise, click OK to close the Group dialog box and return to the Groups window. The newly configured group is automatically selected in the window.

Other tab

1. Open the Other tab and enter any other identifying information as needed for the group.

Figure 6-9: Group dialog box, Other tab



Option	Description
Network ID	The Windows login for the group.
Personnel Number	Organization number for the group.
Badge Number	Badge number for the group.
Other ID	Any secondary ID for the group.

2. Continue with any other optional configuration for the group as needed; otherwise, click OK to close the Group dialog box and return to the Groups window. The newly configured group is automatically selected in the window.

To edit the information for a group

1. Open the Groups window.
2. Select the group for which you are editing the information.
3. Click Edit.

   The Group dialog box opens, populated with the current information for the group.
4. Edit the information as needed for the group.

The only required information is the name of the group. All other information is optional and can be added or edited at later dates when needed.

5. Click OK.

   The Group dialog box closes. The edited group is saved.

At the time that you are editing a group, if you have the appropriate security, you can also create a web user for the group, create a contact from the group, and you can assign the group to a web user. See *"Additional Configuration of Groups and Contacts" on page 257.*

To delete a group

You can delete a group only if there are no reservations that reference the group; however, if necessary, you can inactivate the group.

1. Open the Groups window.
2. Select the group that is being deleted, and then click Delete.

   If there any reservations reference the selected group, an error message opens indicating this and the group is not deleted; otherwise, a message opens asking you if it is OK to delete the selected group.
3. Click Yes.

   The message closes, and the group is deleted.

Adding Comments and Reminders to a Group

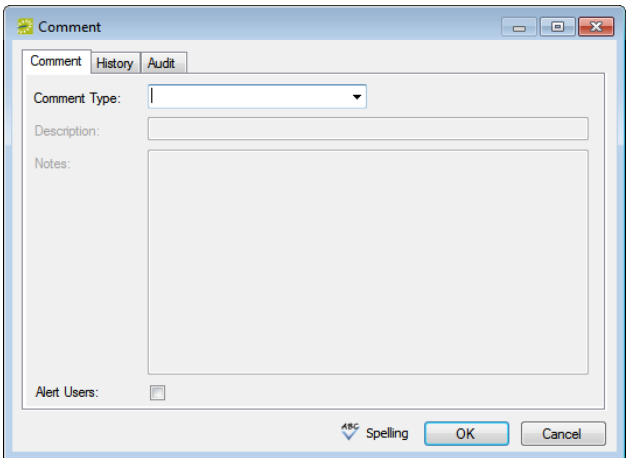
A *comment* is a text entry that explains or clarifies a group. A *reminder* is a comment with a due date. You can add comment and reminders directly to a group in the Groups window. When you add a comment/reminder you can select from a pre-configured list of comment/reminder types, or you can create a user-specified comment/reminder type if none of the pre-configured types meets your working needs.

To add a comment to a group

1. Open the Groups window.
2. Select the group to which you are adding the comment.
3. Open the Comments tab, and then click New.

   The Comment dialog box opens.

Figure 6-10: Comment dialog box



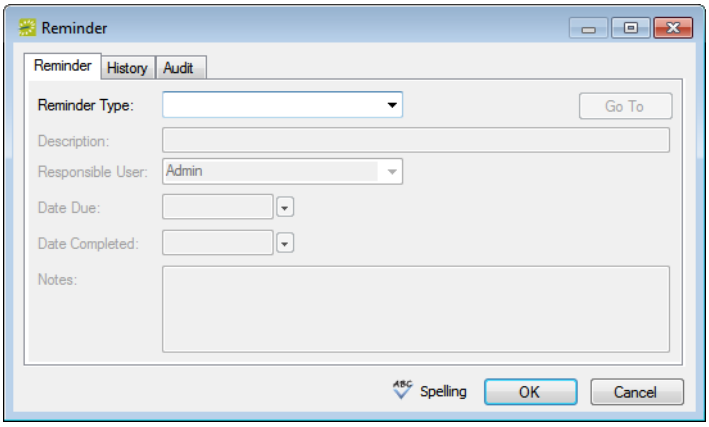
4. On the Comment Type dropdown list, select the type of comment that you are adding; otherwise, if none of the pre-configured comment types meets your working needs, select (user-specified comment), and then in the Description field, enter a description for the comment type.
5. In the Notes field, enter the comment.
6. Optionally, do one or both of the following:
   - To alert any EMS user that opens this group that this comment has been added to the group, select Alert Users.
   - Click Spelling to spell check the comment before you add it to the reservation, booking, or booking detail.
7. Click OK.

To add a reminder to a group

1. Open the Groups window.
2. Select the group to which you are adding the reminder.
3. Open the Reminders tab, and then click New.

   The Reminder dialog box opens.

Figure 6-11: Reminder dialog box



4. Do one of the following:
   - Select a Reminder Type.
   - If none of the pre-configured Reminder Types meets your working needs, then select (user-specified), and in the Description field, enter a description for the reminder type.

   The Responsible User field is populated with the your User ID and the Date Due field is populated with the current day's date.
5. Optionally, change the value for the Responsible User, the Date Due, or both.
6. If you are completing the reminder today, select a Date Completed; otherwise, leave this field blank. (This field is populated automatically when you or another user completes the reminder. See "To complete a reminder" on page 218.)
7. Optionally, do one or both of the following:
   - In the Notes field, enter any further explanation or information about the reminder.
   - Click Spelling to spell check the reminder before you save it.
8. Click OK.

Adding Attachments to a Group

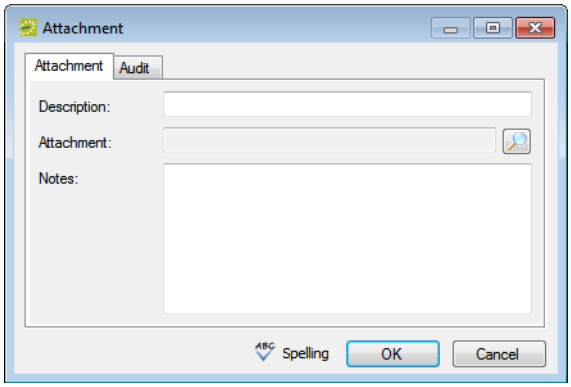
The term *attachment* is used to describe any file that you can add to or store on a group. An attachment is actually stored in the EMS database with the group record.

To add an attachment to a group

1. Open the Groups window.
2. Select the group to which you are adding the attachment.
3. Open the Attachments tab, and then click New.

   The Attachment dialog box opens.

Figure 6-12: Attachment dialog box



4. In the Description field, enter a description for the attachment.

If you leave this field blank, then the Description field is populated with the name of the file after you add it to the booking.

5. Click the Search icon .

   The Find Attachment dialog box opens.
6. Scroll to and select the file (attachment) that is to be added to the reservation or booking, and then click Open.
7. Optionally, do one or both of the following:
   - The name of the attached file is used by default for the file description, and you can edit this if needed.
   - Click Spelling to spell check the description before you attach the drawing to the booking.
8. Click OK.

Adding User Defined Fields to a Group

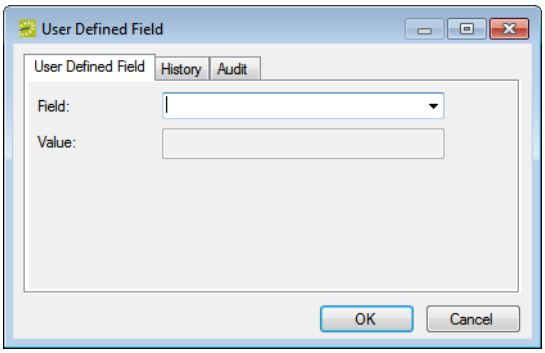
User defined fields are custom fields that store additional information or data for a group. Your EMS Administrator configures the types of fields that are available as well as the allowed values for the fields. When you add a user defined field to a group, you must specify a value for the field.

To add user defined fields to a group

1. Open the Groups window.
2. Select the group to which you are adding the user defined fields.
3. Open the User Defined Fields tab, and then click New.

   The User Defined Field dialog box opens.

Figure 6-13: User Defined Field dialog box



4. On the Field dropdown list, select the user defined field that you are adding to the group.
5. In the Value field, enter the value for the user defined field.
6. Click OK.

Working with Reservations for a Group

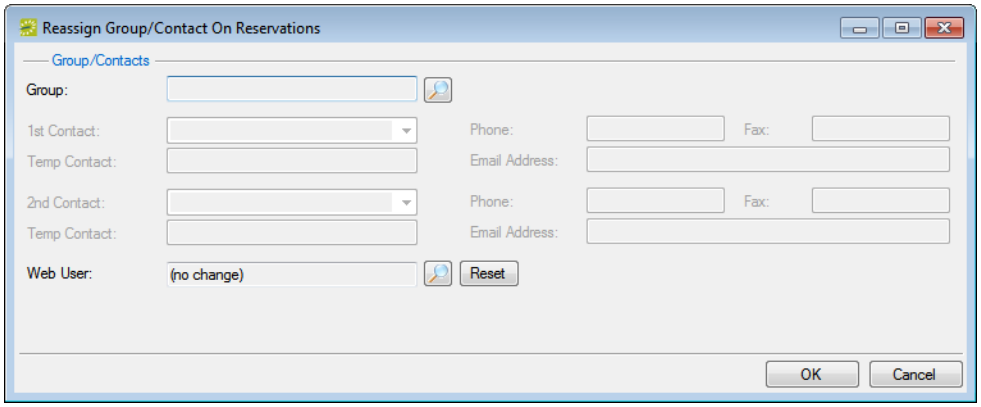
You can create a new reservation for a group from the Groups window, you can open and view any existing reservations for the group in the Navigator, and you can reassign a reservation for a group, which means that you assign a reservation for a group to another group.

To work with reservations for a group

1. Open the Groups window.
2. Select the appropriate group.
3. Open the Reservations tab.

   All future reservations for the group are displayed on the tab.
4. Do one of the following:
   - To create a new reservation group, click New to open the Reservation Wizard. See "Making a Reservation Using the Reservation Wizard" on page 37.
   - To view and edit an existing reservation for the group, select the reservation, and then click Open to open the reservation in the Navigator. See Chapter 3, "The Navigator," on page 69.
   - To reassign a reservation, select the reservation, and then click Reassign to open the Reassign Group/Contact on Reservation dialog box. Continue to Step 5.

Figure 6-14: Reassign Group/Contact on Reservation dialog box



5. Enter the information for the group to which the reservation is being assigned.

Option	Description
Group	Click the Search icon to open the Groups window and select the group to which the reservation is being reassigned. **Note:** To search for the group in the Groups window, see "To search for a group in the Groups window" on page 235.
1st Contact 2nd Contact	The contact for the group to which the reservation is being reassigned. **Note:** If none of the pre-configured contacts is appropriate, then select (temporary contact) and in the Temp Contact field, enter the name of the temporary contact.
Phone Fax Email Address	The phone, fax, and email address for the contacts for the group to which the reservation is being reassigned. If you selected from the list of the pre-configured contacts, then some or all of this information might be automatically populated, but you can still edit the values. If you selected a (temporary contact), then you must enter the information.
Web User	The web user for the group. Initially, this field is set to (no change) which means that the web user for the group to which the reservation was reassigned is to remain as is; however, if needed, you can click the Search icon to open the Web Users dialog box and select a different web user. • You can search by User Name or Email Address. • To search a list of all available web users, leave the Search field in the Web Users dialog box blank, and then click Display. • To search for a specific web user, enter a search string in the Search field, and then click Display. **Note:** The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if searching by Email Address, a search string of "bb" returns **bb**osworth@dea.com but not dbobbett@dea.com. **Note:** To return this field to the (no change) value at any time, click Reset.

6. Click OK.

Emailing a Group

If your organization uses Microsoft Outlook, you can continue to use your respective email system within EMS to send emails to EMS groups; otherwise, to email a group from within EMS using the SMTP option, your user account must have an email address and the group must have an email address defined for it.

See your EMS administrator or internal IT staff for information on how to enable SMTP email.

To email a group

1. Optionally, to confirm that an email address has been set up for the group, select the group, and then click Edit.

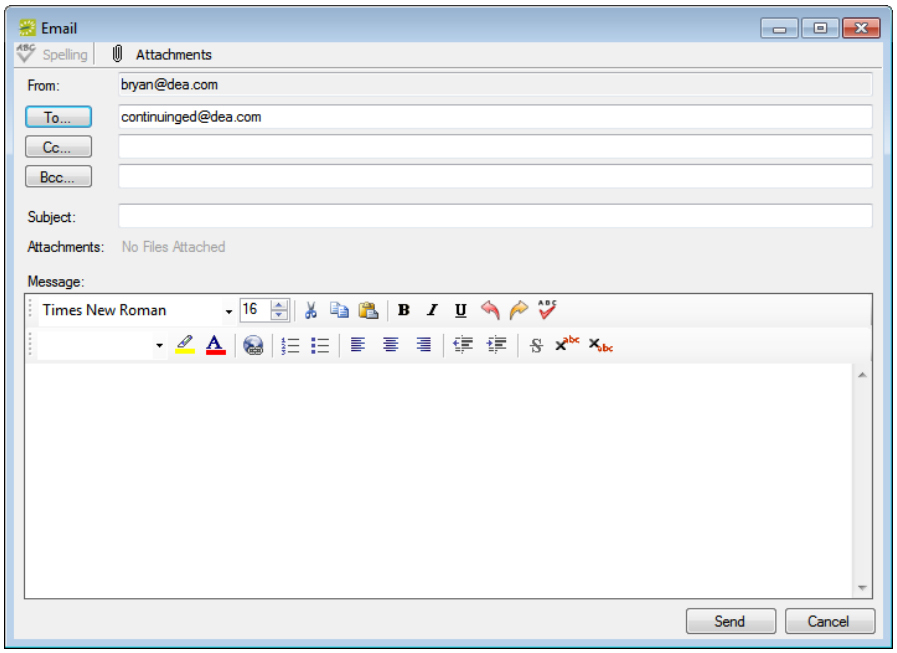
   The <Group> dialog box opens populated with the current information for the group.

2. If the group has an email address, click OK to close the Group dialog box and continue to Step 3; otherwise, in the Email Address field, add the group's email, and then click OK to close the <Group> dialog box and continue to Step 3.

3. On the Groups window, click More, and then click Email.

   A pre-addressed SMTP email opens. The To field is populated with the email address that is defined for the group, but you can edit this value if needed.

Figure 6-15: SMTP Email window

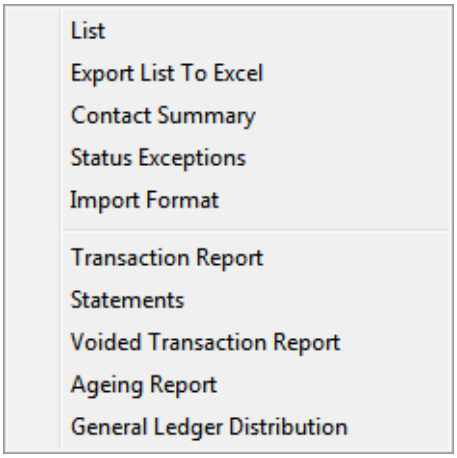


4. Complete and send the email as you would normally.

Printing and Exporting Group Information

The Print button next to the Group window opens a list with a variety of options for printing information for the groups that are displayed in the Groups window.

Figure 6-16: Group print options



For some options, after you request to print group information, an onscreen preview of the printed information opens. A variety of options are available from this preview, including the options to print the information, to export the information to a .pdf, and to email the printed information.

Figure 6-17: Example of an onscreen preview of printed group information

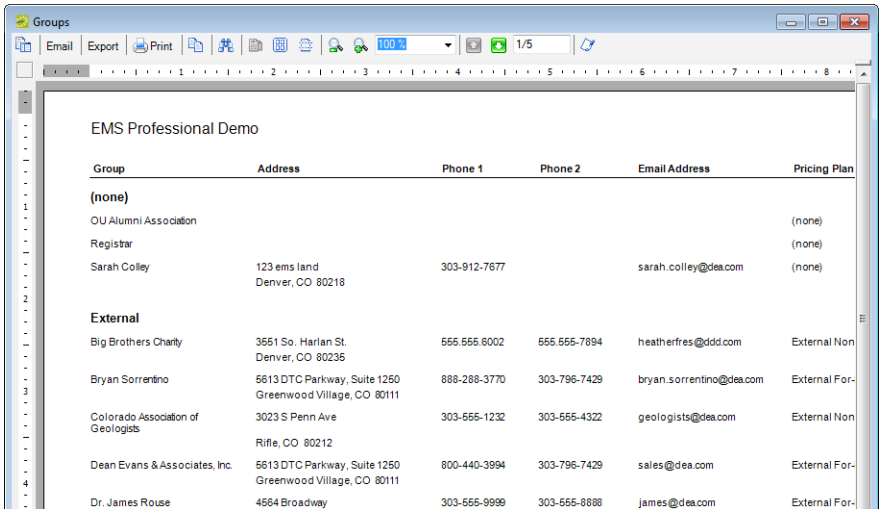


Table 6-1: Group Print options

Option	Description
List	Prints a list of all groups (group name, address, phone number, email address, pricing plan, and status).

Table 6-1: Group Print options (continued)

Option	Description
Export List to Excel	Prints a list of all groups (group name, address, phone number, email address, pricing plan, and status, billing reference, salesperson, event coordinator, sales category, and external references) to an Excel spreadsheet.
Contact Summary	Prints a list of all the contacts (group name, group phone number, contact name, and contact phone number).
Status Exceptions	Prints a list of groups that have any status other than OK.
Import Format	Opens an onscreen preview of the required format for the tab-delimited file that is to be used when importing groups.
Transaction Report	See “Generating an EMS Billing Report” on page 343.
Statements	See “Generating an EMS Billing Report” on page 343.
Voided Transaction Report	See “Generating an EMS Billing Report” on page 343.
Ageing Report	See “Generating an EMS Billing Report” on page 343.
General Ledger Distribution	See “Generating an EMS Billing Report” on page 343.

Managing Contacts

A *contact* is a person who serves as the coordinator or focal point for a group. Managing contacts in EMS consists of adding new contacts for a group, editing the information for existing contacts, deleting a contact, and sending emails to contacts.

To manage contacts

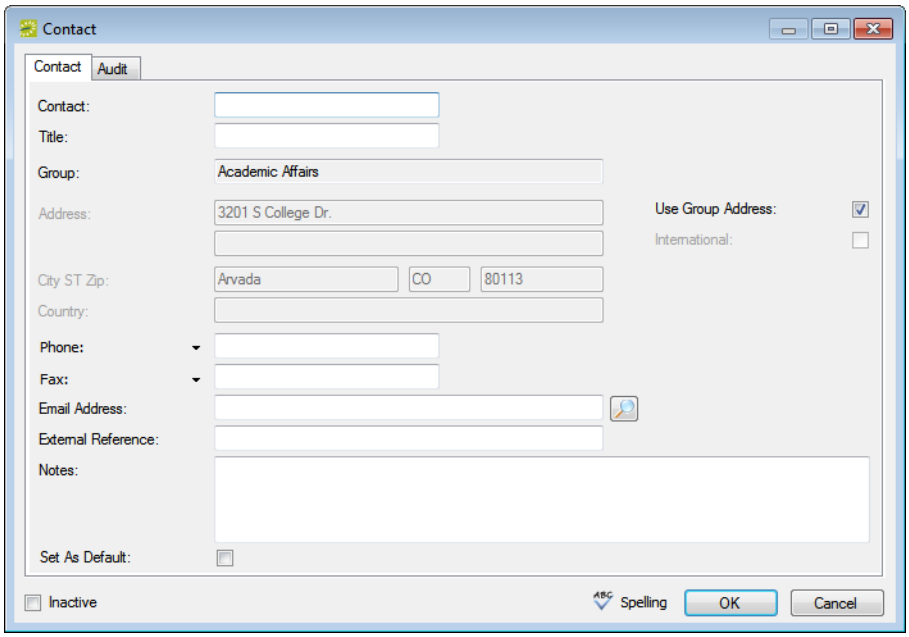
1. Open the Groups window.
2. Select the group for which a contact is to be added, edited, deleted, or emailed.
3. Continue to one of the following:
   - "To add a contact" below.
   - "To edit a contact" on page 255.
   - "To delete a contact" on page 255.
   - "To send emails to a contact" on page 256.

To add a contact

1. On the Contacts tab, click New.

   The Contact dialog box opens.

Figure 6-18: Contact dialog box



2. Enter the information for the new contact.

Field	Description
Contact	The name of the contact. **Note:** The name can be a maximum of 30 characters, including spaces.
Title	The title (Mr., Ms., Dr., and so on) of the contact.
Group	Populated with the name of the group that you selected in Step 2 of "To manage contacts." You cannot change this value.
Address	Populated by default with the address of the group that you selected in Step 2 of "To manage contacts." If the contact address is not the same as the group address, then clear Use Group Address and enter the appropriate values in the Address fields.
International	Select this option to drop the State and Zip fields for an international group.
Phone Fax	The phone number and fax number for the group. **Note:** The Phone and Fax fields have a dropdown list available on which you can select a different value (Phone, Fax, Mobile, or Other) for the field label, or you can enter a user-defined value. To enter a user-defined value, double-click the current field label to select it, and then enter the user-defined value over the selected label.
Email Address	The email address for the contact. **Note:** If your computer is connected to a network, click the Search icon to open a global address lookup dialog box and search for the email address.
External Reference	Links the contact to an outside program if needed.
Notes	Any other comments or statements that are applicable for the contact.
Set as Default	Select this option if the contact is to be the default contact for the selected group. **Note:** If a default contact has been defined for a group, then when you specify the event information for a reservation, the Contact field is automatically populated with the name of the default contact. See "To specify the event information" on page 48. **Note:** You can always specify a contact as the default contact for a selected group at a later date. To do so, select the group on the Groups window, then on the Contacts tab, select the contact that is to be the default contact, click More > Set Default, and then click Yes at the prompt to set the selected user as the default contact.
Inactive	Leave this option blank to add the contact as an active contact. Select this option to inactivate the contact.

3. Optionally, click Spelling to spell check the contact information before you add the contact to the group.

4. Click OK.

   The Contact dialog box closes. The contact is added to the group.

At the time that you are creating a contact, you can also create a web user for the contact. See "Additional Configuration of Groups and Contacts" on page 257.

To edit a contact

1. Select the contact that is being edited, and then click Edit.

   The Contact dialog box opens populated with the information for the selected contact.

2. Edit the information as needed for the contact.

3. Optionally, click Spelling to spell check the contact information before you save the edited information.

4. Click OK.

   The Contact dialog box closes. The edited contact is saved.

At the time that you are editing a contact, you can also create a web user for the contact. See "Additional Configuration of Groups and Contacts" on page 257.

To delete a contact

You can delete a contact only if there are no reservations that reference the contact; however, if necessary, you can inactivate the contact.

1. Select the contact that is being deleted, and then click Delete.

   If there any reservations reference the selected contact, an error message opens indicating this and the contact is not deleted; otherwise, a message opens asking you if it is OK to delete the selected contact.

2. Click Yes.

   The message closes, and the contact is deleted.

To send emails to a contact

If your organization uses Microsoft Outlook, you can continue to use your respective email system within EMS to send emails to EMS group contacts; otherwise, to email a contact from within EMS using the SMTP option, your user account must have an email address and the contact must have an email address defined for it.

See your EMS administrator or internal IT staff for information on how to enable SMTP email.

1. Optionally, to confirm that an email address has been set up for the contact, select the contact, and then click Edit.

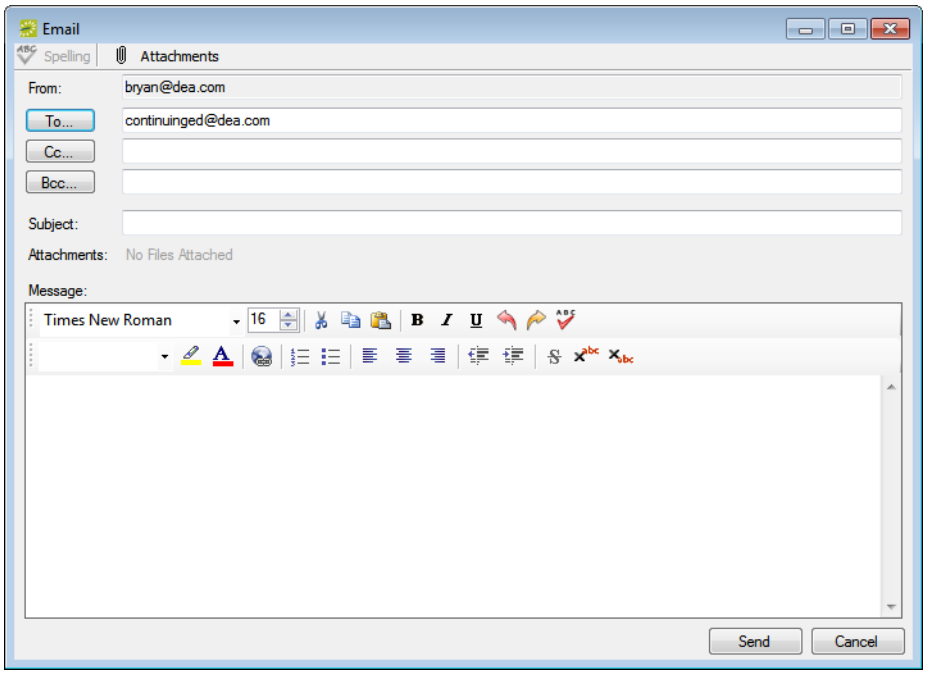
   The Contact dialog box opens populated with the current information for the contact.

2. If the contact has an email address, click OK to close the Contact dialog box and continue to Step 3; otherwise, in the Email Address field, add the contact's email, and then click OK to close the Contact dialog box and continue to Step 3.

3. On the Contact window, click More, and then click Email.

   A pre-addressed SMTP email opens. The To field is populated with the email address that is defined for the contact, but you can edit this value if needed.

Figure 6-19: SMTP Email window



4. Complete and send the email as you would normally.

Additional Configuration of Groups and Contacts

At the time that you are configuring a group, you can also create a web user for the group, create a contact from the group, and assign the group to a web user.

To carry out additional configuration of groups and contacts

1. Open the Groups window.
2. Select the group or contact for which you carrying out additional configuration, click More, and then continue to one of the following:
   - "To create a web user for a group or contact" below.
   - "To create a contact from a group" on page 261.
   - "To assign a group to a web user" on page 263.

To create a web user for a group or contact

A *web user* is a registered user who can submit requests for reservations in VEMS. When you add a new group in your EMS database, you decide the "level" of the group that you are adding. For a group that is added at the personnel/employee level, you might also need to create a web user for the group. This user can then create and view reservations on behalf of a group or groups in VEMS. For example, by setting up an administrative assistant who works for XYZ Corporation as a web user, this user can create reservations for XYZ Corporation in VEMS. When you create a web user, you can also specify one or more delegates for the web user. A *delegate* is a web user who can create and view reservations on behalf of another web user.

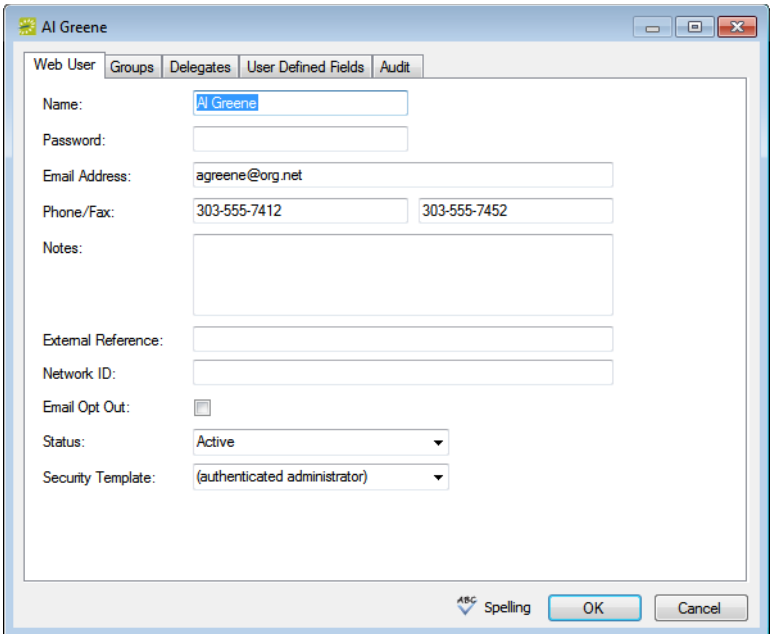
This following procedure addresses the creation of a web user at the time that you are creating a group or contact in EMS. Configuration of web users as part of the overall configuration of your VEMS module is discussed in the EMS Setup Guide. You can create only one web user for a group or contact.

1. Click Create Web User.

   The dialog box for creating the web user opens. The Web User tab is the open tab.

The User Defined Fields tab displays the questions that a web user was required to answer when the user requested to create an account through VEMS and is not relevant to the procedure detailed here.

Figure 6-20: Dialog box for creating a web user, Web User tab



2. Enter the information for the web user.

Ideally, you should enter all the necessary information for your web user before you save the web user; however, at any time if you need to access your web user, on the menu bar, click Configuration > Web > Web Users.

Field	Description
Name	Automatically populated after you select the user (group or contact) from the Groups window.
Password	The password that user must enter to log in to VEMS.
Email address	If this information has been entered in the Groups window for the user (group or contact), then this field is automatically populated after you select the group or contact from the Groups window. If the field is blank, you must enter the full email address for the user. (The user must enter this address to log in to VEMS.)
Phone/Fax	Optional fields. If this information has been entered in the Groups window for the user (group or contact), then these fields are automatically populated after you select the user from the Groups window. If the fields are blank, you can enter values if needed.
Notes	Optional field.
External Reference	Optional field. Links the web user to an outside program if needed.
Network ID	The web user's network ID.
Email Opt Out	Select this option if the web user is not to receive automatic emails (such as reservation summary emails) from VEMS. The user can still receive manually sent emails.

Field	Description
Status	Required field. Select the status for the user: • Active—The web user can log in to VEMS. • Pending—The web user cannot log in to VEMS and are informed that he/she must check back at a later time. • Inactive—The user cannot log in to VEMS and are instructed to contact the EMS administrator.
Security Template	Required field. This determines the user's access to the system—the menu items that the user can see and the information that the user can view when 'rolling-over' an event in VEMS.

3. Open the Process Templates tab and on the Available list, select the web process template or CTRL-click to select multiple templates to which this user is to be assigned, and then click the Move button (>) to move the selected templates to the Selected list.

A web process template defines the functions that are available to each type of web user in VEMS when the user is submitting a request for a reservation or actually booking an event.

4. Open the Groups tab and do one of the following to specify the groups on whose behalf the web user can view and make reservations in VEMS.
   - By default, the web user is selected as a group. You can leave this group in the Selected list, or you can select the group and click the Remove button (<).
   - Leave the Find field blank, leave the Group type set to the default of (all) or select a specific group type, and then click Display to open a list of *all* currently active groups with the indicated group type in the Available list. Select the group (CTRL-click to select multiple groups), and then click the Move button (>) to move the selected groups to the Selected list.
   - In the Find field, enter the string by which to filter your search for currently active groups, and then click Display. Select the group (CTRL-click to select multiple groups), and then click the Move button (>) to move the selected groups to the Selected list.

The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, a search string of "dea" returns ***Dea****n Phillips, but not Evans, Dean.*

5. Open the Delegates tab, and on the Search by dropdown list, do one of the following to specify the delegates for the web user:
   - Leave the Find field blank, and then click Display to open a list of *all* currently available web users. Select the user (CTRL-click to select multiple users), and then click the Move button (>) to move the selected users to the Selected list.
   - On the Search By dropdown list, select the option by which to search (Email Address or User Name), and in the Find field, enter the string by which to filter your search, and then click Display. Select the user (CTRL-click to select multiple users), and then click the Move button (>) to move the selected users to the Selected list.

*The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if searching by Email Address, a search string of "bb" returns **bb**osworth@dea.com but not dbobbett@dea.com.*

6. Click OK.

   The dialog box for creating a web user closes and a message opens indicating that the web user was created successfully.

7. Click OK to close the message and return to the Groups window.

To create a contact from a group

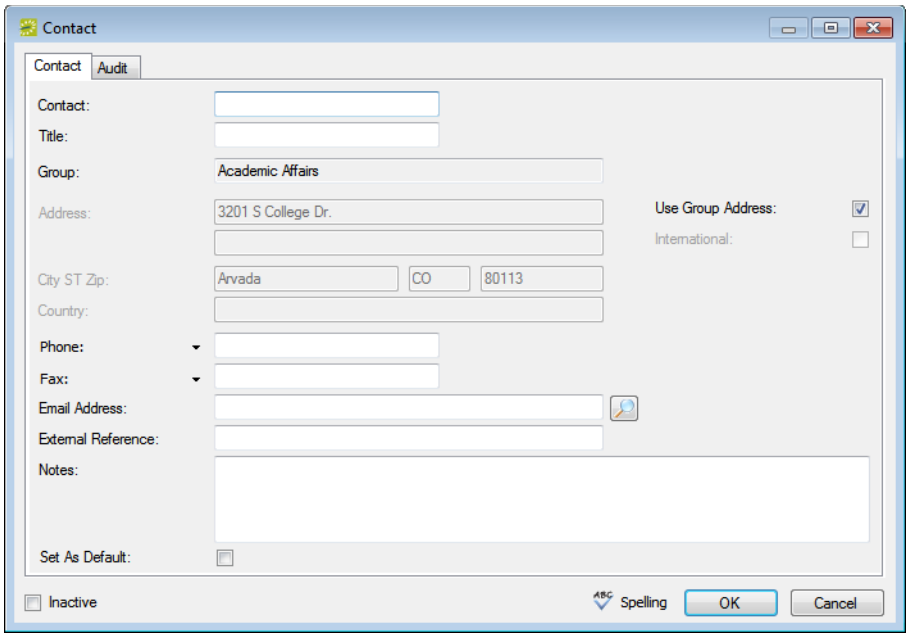
1. Click Create Contact for Group.

   A second Groups window opens.

2. Select the user that is to be the contact for the group, and then click Select.

   The Contact dialog box opens. The previously selected group is displayed in the Group field and you cannot edit this value. The remainder of the fields display the information for the selected user (Contact Name, Address, Phone, and so on.)

Figure 6-21: Contact dialog box



3. If needed, modify the information for the contact.

Field	Description
Contact	The name of the contact. **Note:** The name can be a maximum of 30 characters, including spaces.
Title	The title (Mr., Ms., Dr., and so on) of the contact.
Group	Populated with the name of the group that you selected on the Groups window. You cannot change this value.
Address	Populated with the address of the contact. If the contact address is the same as the group address, then select Use Group Address to populated the address fields with the group address.
International	Not applicable if Use Group Address is selected. Select this option to drop the State and Zip fields from the address for an international contact.

Field	Description
Phone Fax	The phone number and fax number for the group. **Note:** The Phone and Fax fields have a dropdown list available on which you can select a different value (Phone, Fax, Mobile, or Other) for the field label, or you can enter a user-defined value. To enter a user-defined value, double-click the current field label to select it, and then enter the user-defined value over the selected label.
Email Address	The email address for the contact. **Note:** If your computer is connected to a network, click the Search icon to open a Global Address Lookup dialog box and search for the email address.
External Reference	Links the contact to an outside program if needed.
Notes	Any other information that is pertinent for the contact.
Set as Default	Select this option if the contact is to be the default contact for the selected group. **Note:** If a default contact has previously been defined for a group, then if you select this option, this contact becomes the new default contact for the group. **Note:** You can always specify a contact as the default contact for a selected group at a later date. To do so, select the group on the Groups window, then on the Contacts tab, select the contact that is to be the default contact, click More > Set Default, and then click Yes at the prompt to set the selected user as the default contact.
Inactive	Leave this option blank to add the contact as an active contact. Select this option to add the contact as an inactive contact.

4. Click OK.

   The Contact dialog box closes. You return to the Groups window. The group for which you created the contact is automatically selected in the window.

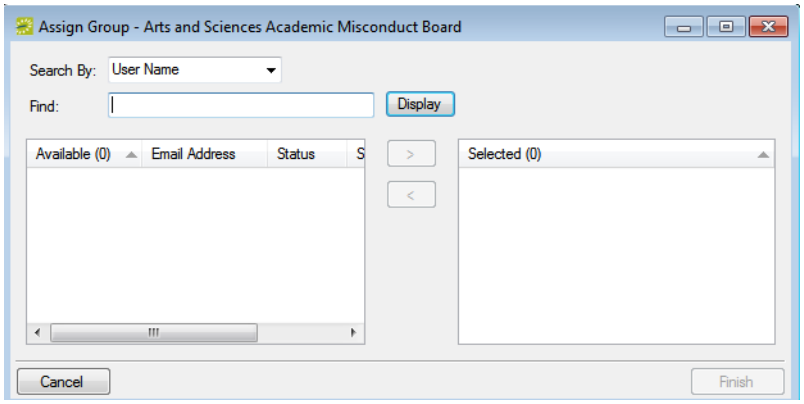
To assign a group to a web user

Remember, when you add a new group in your EMS database, you decide the "level" of the group that you are adding. For a group that is added at the departmental/organizational level with eligible students, staff and so on listed as contacts, you might also need to assign the group to a web user. This user can then create and view reservations on behalf of the group in VEMS. You can assign a group to one or more web users.

1. Click Assign to Web Users.

   The Assign Group dialog box opens.

Figure 6-22: Assign Group dialog box



2. Do one of the following to select the users that are being assigned to the group:

   - Leave the Find field blank, and then click Display to open a list of *all* currently active groups that have been designated as web users. Select the group (CTRL-click to select multiple groups), and then click the Move button (>) to move the selected groups to the Selected list.
   - In the Search By dropdown list, select the option by which to search (Email Address or User Name) and then in the Find field, enter the string by which to filter your search, and then click Display. Select the group (CTRL-click to select multiple groups), and then click the Move button (>) to move the selected groups to the Selected list.

---

*The string is not case-sensitive, but your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if searching by Email Address, a search string of "bb" returns **bb**osworth@dea.com but not dbobbett@dea.com.*

3. Click Finish.

   A message opens indicating that the group was assigned successfully.

4. Click OK to close the message and return to the Groups window.

Chapter 7
Confirmations

In EMS, a *confirmation* is a document that details the critical information for a reservation—the date, the time, the location, the scheduled resources, and so on. You send a confirmation to the group who is sponsoring or hosting the event as verification that the reservation has been correctly setup—the time and location are correct, all the necessary resources have been scheduled, and so on. You can also use the confirmation to inform the group of any outstanding issues related to the reservation (such as a balance due) and to provide other information that is not necessarily reservation-specific such as your organization's cancellation policies, your organization's alcohol policies, and so on. You can generate a confirmation for all the bookings in a reservation, or just for a selected booking in a reservation.

This chapter covers the following topics:

- "Specifying your Confirmation Settings" on page 266.
- "Generating a Single Confirmation at a Time" on page 269.

Remember, a fast way to view reservations is through the Reservation Book. See "Viewing and Editing Reservations in the Reservation Book" on page 52.

This chapter details the generation of a single confirmation at a time. To generate confirmations for multiple reservations in a single step, see "Generating Multiple Confirmations" on page 364.

Specifying your Confirmation Settings

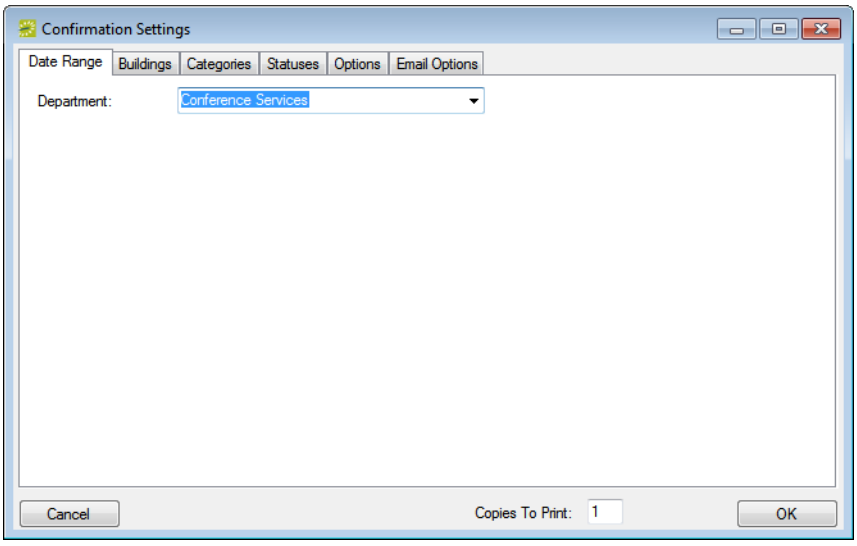
The Confirmation Settings dialog box provides a variety of options that you can specify for manual and automatic generation of a confirmation for a reservation or a booking. You can specify your confirmation settings one time and use these settings for all confirmations that you generate, or you can change the settings on as needed basis and tailor them for each confirmation that you generate.

To specify your confirmation settings

1. Open a reservation in the Navigator. (See "Opening a reservation in the Navigator" on page 71.)
2. In the upper right hand corner of the Navigator, click Settings > Confirmation Settings.

   The Confirmation Settings dialog box opens.

Figure 7-1: Confirmation Settings dialog box



3. Specify the settings for your system's confirmations.

Table 7-1: Options on the Confirmation Settings dialog box

Field	Description
Date Range tab—The department name that appears at the top of a printed confirmation.	
Buildings tab—Select the specific buildings that are to be included in the confirmation.	
Categories tab—Select the specific booking details that are to be included in the confirmation.	
Statuses tab—Select the specific statuses that are to be included in the confirmation.	

Table 7-1: Options on the Confirmation Settings dialog box (continued)

Field	Description
Options tab—Format settings for a printed confirmation.	
Confirmation Title	Appears bold and centered at the top of the confirmation.
Header Message Footer Message	Pre-configured blocks of text that appear in the header and footer of the confirmation. **Note:** Your EMS administrator configures these values. Contact your administrator if you need assistance with adding or modifying a value.
Paper Size	The size of the paper on which the confirmation is printed. Values are Letter, Legal, and A4.
Print Comments	Include the reservation's comments in the printed confirmation.
Print Reminders	Include the reservations reminders in the printed confirmation.
Print Cancel Reasons	Include reasons for cancellation in the printed confirmation.
Print User Defined Fields	Include user-defined fields and their values in the printed confirmation.
Print Room Phone	Include the phone number for the room in which the event is being held in the printed confirmation.
Print Building Notes	Include any notes about the building in the printed confirmation.
Print Billing Reference Allocation	Include the billing reference numbers for the event as well as the percentage of charges that is allocated to each number in the printed confirmation.
Suppress Reserved Time	Hide the reserved time for the booking and show only the event time.
Suppress Location	Hide the location for the reservation in the printed confirmation.
Suppress Pricing	Do not show the reservation's room charges or resource charges in the printed confirmation.
Suppress Logo	Do no show your organization's logo in the printed confirmation.
Suppress Item Notes	Do not show notes for any booking items in the printed confirmation.
Suppress Item Special Instructions	Do not show special instructions for any booking items in the printed confirmation.
Print PO Number Allocation	Include the PO numbers for the event as well as the percentage of charges that is allocated to each number in the printed confirmation.
Limit Bookings to Those With Details in Selected Categories	Show only those bookings in the printed confirmation that contain details for the categories that are selected on the Categories tab.
Email Options tab—Format settings for the body of an emailed confirmation.	
Header Message Footer Message	Pre-configured blocks of text that appear in the body of the emailed confirmation. **Note:** Your EMS administrator configures these values. Contact your administrator if you need assistance with adding or modifying a value.

Table 7-1: Options on the Confirmation Settings dialog box (continued)

Field	Description
Email Format	• None—Opens a blank email form. • Detail—The confirmation appears in its entirety in the email body. • Mobile Friendly—The confirmation appears in a condensed version that is viewable on a mobile device. • Summary—Only the booking information appears in the email body.
Attached Detailed Confirmation	The entire confirmation is provided as an attachment to the email.
Attach .ics file	An .ics file is a file that a recipient can save to create an entry in his/her personal calendar. Select this option to attach an .ics file to the email.
Email To Email CC	Select the users associated with the reservation who should receive the email confirmation.
Copies to Print	The number of copies of the confirmation that are automatically printed if you print the confirmation. (Not applicable if you email a confirmation.)

4. You can now generate a confirmation (manually or automatically) based on the settings that you have specified. See "Generating a Single Confirmation at a Time" on page 269.

Generating a Single Confirmation at a Time

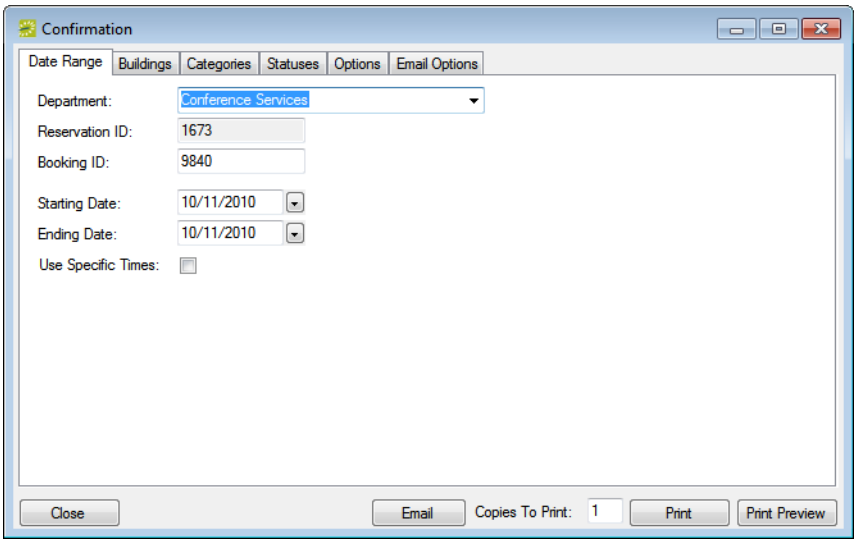
You can generate a confirmation for all the bookings in a reservation, or just for a selected booking in a reservation. In the *default* implementation of EMS, when you request to generate a confirmation for a reservation or a booking, the Confirmation dialog box opens. The Confirmation dialog box has the same tabs as the Confirmation Settings dialog box. (Remember, the values that you specified on the Confirmation Settings dialog box determine the information that is included in a confirmation. See "Specifying your Confirmation Settings" on page 266.) It also contains options for generating a print preview of the confirmation and for *manually* printing or emailing the confirmation. If you want to automatically generate a printed or emailed confirmation according to your confirmation settings, then you must modify the Confirmation setting on the General tab of the Navigator Options dialog box.

To manually generate a confirmation

1. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
2. In the left pane of the Navigator, do one of the following:
   - Select the reservation for which you are generating the confirmation.
   - Select the reservation for which you are generating the confirmation, and then in the Bookings (lower right) pane, select the booking for which you are generating the confirmation.
3. Do one of the following:
   - If you are generating a confirmation for a reservation, then open the Reservation Summary tab or Properties tab in the upper right pane of the Navigator, and then click Confirmation.
   - If you are generating a confirmation for a selected booking, then open the Booking Summary tab in the upper right pane of the Navigator, and then click Confirmation.

   The Confirmation dialog box opens. The dialog box has the same tabs as the Confirmation Settings dialog box with one exception, the Date Range tab. (Additional options are available on the Date Range tab which you can use to limit the confirmation to specific bookings and/or specific booking times.) See Figure 7-2 on page 270.

Figure 7-2: Confirmation dialog box, Date Range tab

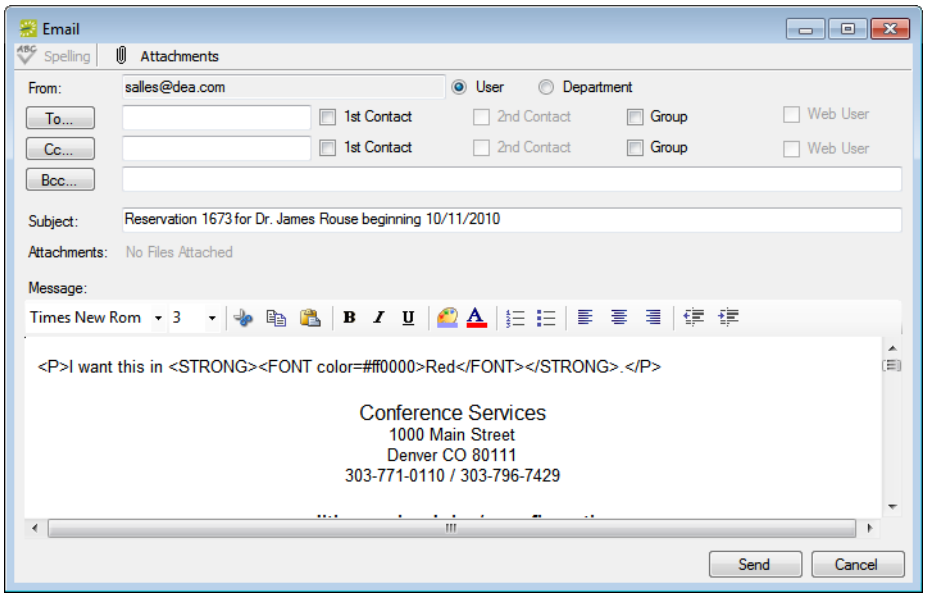


4. Optionally, review the selections on this dialog box, and make any needed modifications.
5. Do one of the following:
   - To manually generate an emailed confirmation, click Email.

     See "Sending Email from EMS" on page 360.

If you are using SMTP email, then Figure 7-3 is an example of the SMTP email window that opens.

Figure 7-3: SMTP email window for a confirmation



- To manually generate a printed confirmation, modify the number of copies to print as needed in the Copies to Print field (the default value is 1), and then click Print.

  A Print dialog box opens in which you can specify information such as the printer to use, the page range. and so on. Click Print in this dialog box to manually generate the printed confirmation.

Before you print the confirmation, you can click Print Preview to open an onscreen preview of the printed confirmation. A variety of options are available from this preview, including the options to email the confirmation, to export the confirmation to a .pdf, and to print the confirmation.

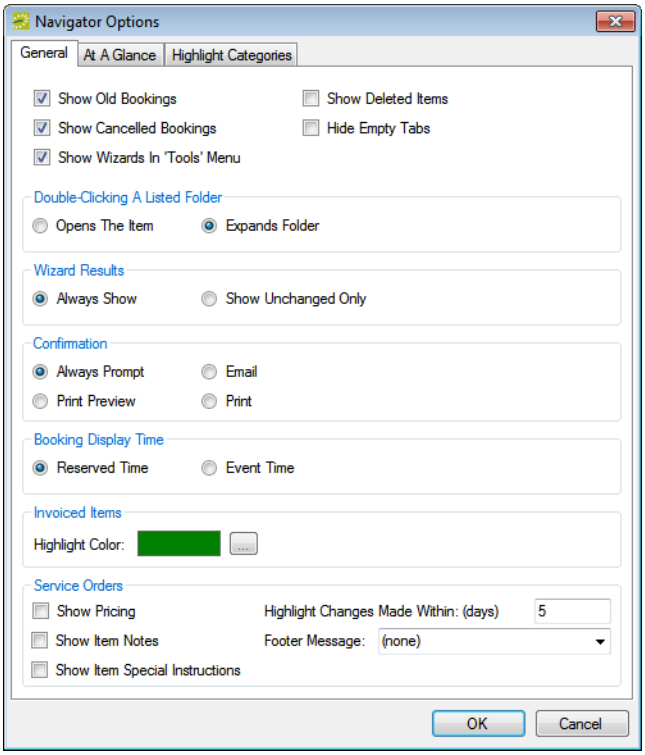
To automatically generate a confirmation

If you want to always automatically generate a printed or emailed confirmation based on your confirmation settings, then you must modify the Confirmation setting on the General tab of the Navigator Options dialog box.

1. Open any reservation in the Navigator. See:
   - “Viewing and Editing Reservations in the Reservation Book” on page 52.
   - “Opening a reservation directly in the Navigator” on page 71.
   - “Opening a reservation through a group” on page 72.
   - Chapter 4, “Search Tools,” on page 177.
2. In the upper corner of the Navigator window, click Settings > Options.

   The Navigator Options dialog box opens. The General tab is the active tab. See Figure 7-4 on page 272.

Figure 7-4: Navigator Options dialog box, General tab



3. Under Confirmation select one of the following:

   - Print—To always automatically generate a printed confirmation based on your confirmation settings.
   - Email—To always automatically generate an emailed confirmation based on your confirmation settings.

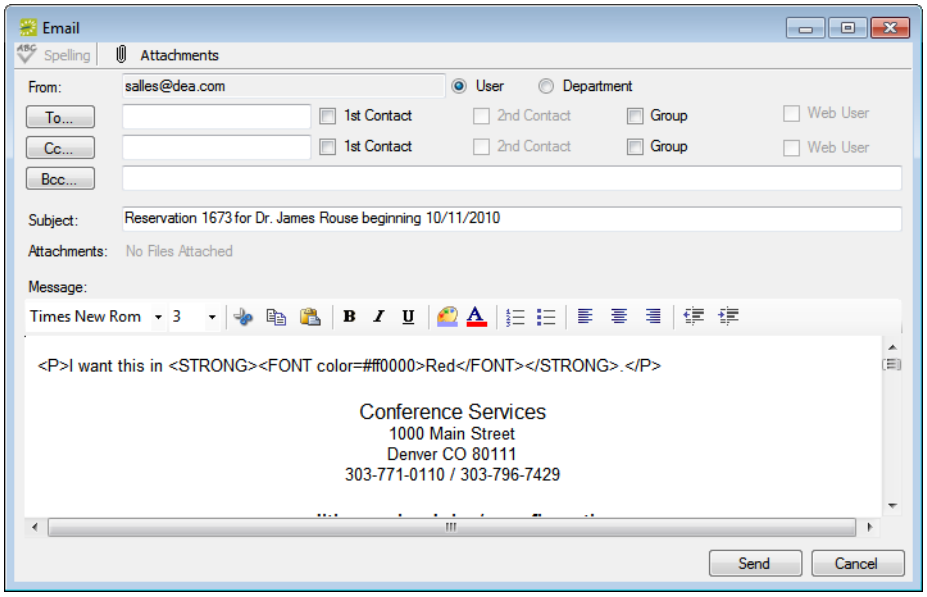
4. Click OK to close the dialog box and return to the Navigator.

   The next time you select any reservation or booking in the Navigator and click Confirmation, the following happens:

   - If your Navigator Options are set to Print, then a Print dialog box opens in which you can specify information such as the printer to use, the page range. and so on. Click Print in this dialog box to generate a printed confirmation that is based on your confirmation settings.
   - If your Navigator Options are set to Email, then see "Sending Email from EMS" on page 360.

If you are using SMTP email, then Figure 7-5 on page 273 is an example of the SMTP email window that opens.

Figure 7-5: SMTP email window for a confirmation



Chapter 7
Confirmations

Chapter 8
Reports and Queries

EMS contains six different categories of general reports to assist you in monitoring and maintaining your organization's reservation records and associated transactions. The application also contains a Query Builder function which you can use to define custom criteria for searching for information in your organization's EMS database.

This chapter covers the following topics:

- "Generating an EMS Report" on page 277.
- "Working with a Query" on page 301.

Reports that are specific for the Billing function in EMS are detailed in Chapter 9, "Billing," on page 313.

Chapter 8
Reports and Queries

Generating an EMS Report

All EMS reports are available under the Reports option on the menu bar. For any EMS report, you can specify the parameters, options, and format for the report, or you can generate the report according to *memorized* settings. (For detailed information about a memorized report, see "Memorized report" on page 278.) Not all reports require the same parameters, nor do they all have the same options available. In addition, you can generate different reports in different formats.

For brevity and ease, the parameters that are available for each report are not detailed in this section.

To generate a report

1. On the menu bar, click Reports to open the Reports menu, and then click the option for the report that you are generating. For example, to generate the Event Schedule report, click Reports > Daily > Event Schedule.
2. On the Setup dropdown list, do one of the following:
   - To generate the report according to the filter settings that you want (parameters, options, and so on), leave user-specified selected, then go to Step 3.
   - To run the report with filter settings that have been saved, or *memorized*, select the memorized report, and then go to Step 5.

For detailed information about memorized reports, see "Memorized report" on page 278.

3. On the Options list, select the Date/Time filter by which to generate the report.
4. Specify the report parameters, options, and format. See:
   - "Daily reports" on page 284.
   - "Sales reports" on page 289.
   - "Statistics reports" on page 291.
   - "Other reports" on page 293.
   - "Exceptions reports" on page 295.
   - "Hoteling reports (EMS Workplace only)" on page 298.

5. Optionally, do one or both of the following:
   - Click Print Preview.

     A preview of the report opens onscreen.
   - To print a hard copy of the report, specify the number of copies that are to be printed, and then click Print.
6. Click Close.

   Unless you change the filter settings, all subsequent reports are generated and printed according to the parameters and options that you have specified and in the format that you specified. If you want to save certain settings so that you do not have to adjust the filter settings every time you run the report, you can memorize the report. (See "Memorized report" below.)

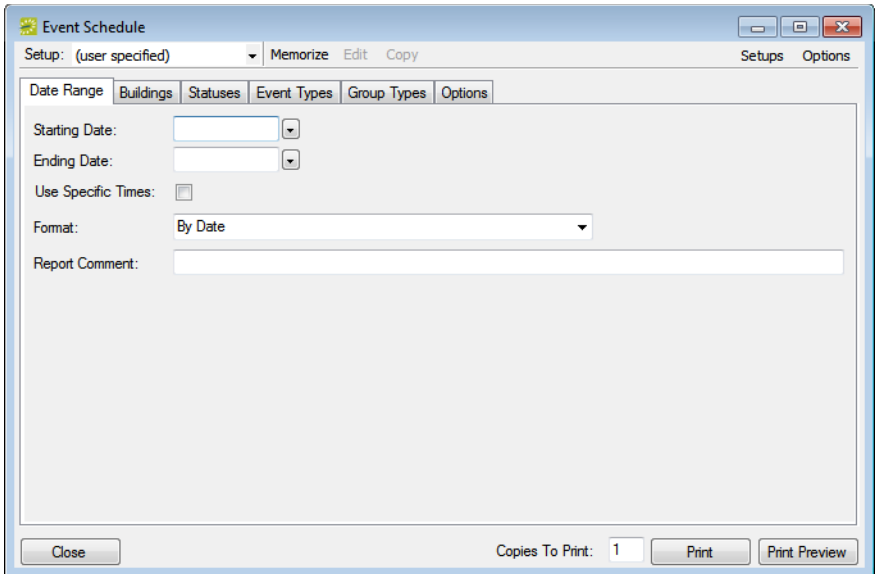
Memorized report

A *memorized* report is a report for which the filter settings have been saved, or memorized, so that you do not have to adjust the filter settings every time you run the report. You can create a memorized report "from scratch," or you can copy an existing memorized report, and edit the filter settings as needed to create a new memorized report. If you are the owner of a memorized report, you can also edit the name of an existing memorized report and you can delete a memorized report.

To create a memorized report "from scratch"

1. On the menu bar, click Reports to open the Reports menu, and then click the option for the report that you are memorizing. For example, to memorize the Event Schedule report, click Reports > Daily > Event Schedule to open the Event Schedule dialog box.

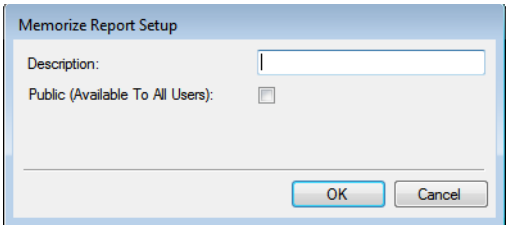
Figure 8-1: Event Schedule report dialog box



2. On the <Report> dialog box, click Options, and then select the Date/Time filter by which to generate the report.
3. Specify the report parameters, options, and format.
4. On the <Report> dialog box, click Memorize.

   The Memorize Report Setup dialog box opens.

Figure 8-2: Memorize Report Setup dialog box



5. In the Description field, enter a name or description for the report.

The description or name can be a maximum of 30 characters, including spaces.

6. If you are an administrative user, and the report is to be available to all users, then select Public (Available to All Users); otherwise, if the report is to be available only to you (the owner), then leave this option blank.

If you are not an administrative user, then only your EMS administrator can make your memorized reports available to all users. Contact your EMS administrator for assistance.

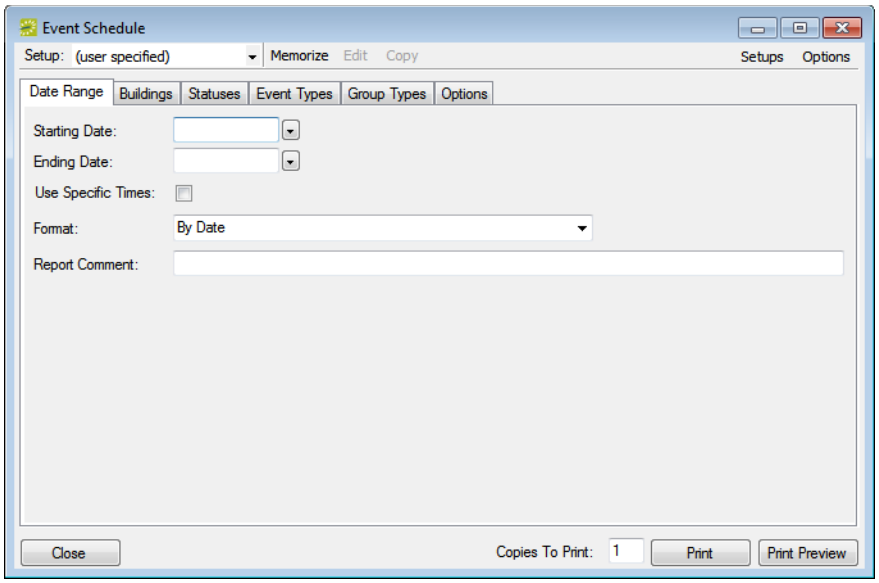
7. Click OK.

   The Memorize Report Setup dialog box closes. You return to the <Report> dialog box. The memorized report is now an option on the Setup dropdown list.

To create a memorized report by copying

1. On the menu bar, click Reports to open the Reports menu, and then click the option for the report that you are memorizing. For example, to memorize the Event Schedule report, click Reports > Daily > Event Schedule to open the Event Schedule dialog box.

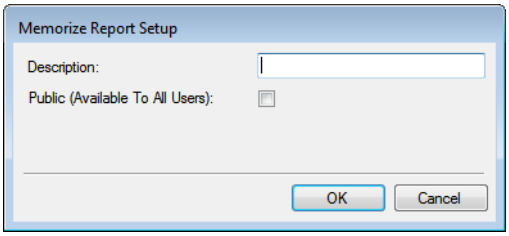
Figure 8-3: Event Schedule report dialog box



2. On the Setup dropdown list, select the memorized report from which you are copying the filter settings, and then click Copy.

   The Memorize Report Setup dialog box opens.

Figure 8-4: Memorize Report Setup dialog box



3. In the Description field, enter a name or description for the new memorized report.

The description or name can be a maximum of 30 characters, including spaces.

4. If you are an administrative user, and the report is to be available to all users, then select Public (Available to All Users); otherwise, if the report is to be available only to you (the owner), then leave this option blank.

If you are not an administrative user, then only your EMS administrator can make your memorized reports available to all users. Contact your EMS administrator for assistance.

5. Click OK.

   The Memorize Report Setup dialog box closes. You return to the <Report> dialog box. The filter settings are populated with the settings for the memorized report.

6. Click Edit, and then edit the filter settings for the report as needed.

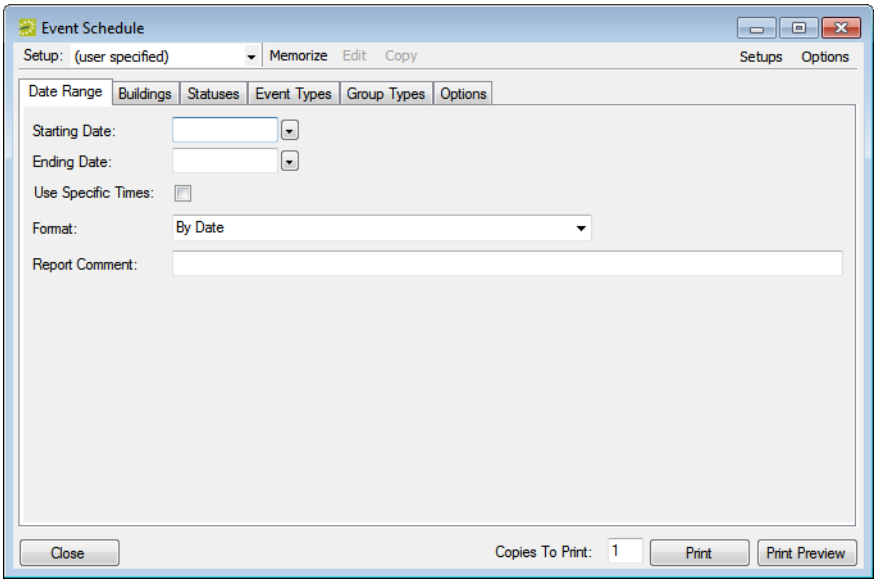
7. Click Memorize.

   The memorized report is now an option on the Setup dropdown list.

To edit or delete a memorized report

1. On the menu bar, click Reports to open the Reports menu, and then click the option for the memorized report that you are editing. For example, to edit a memorized Event Schedule report, click Reports > Daily > Event Schedule to open the Event Schedule dialog box.

Figure 8-5: Event Schedule report dialog box

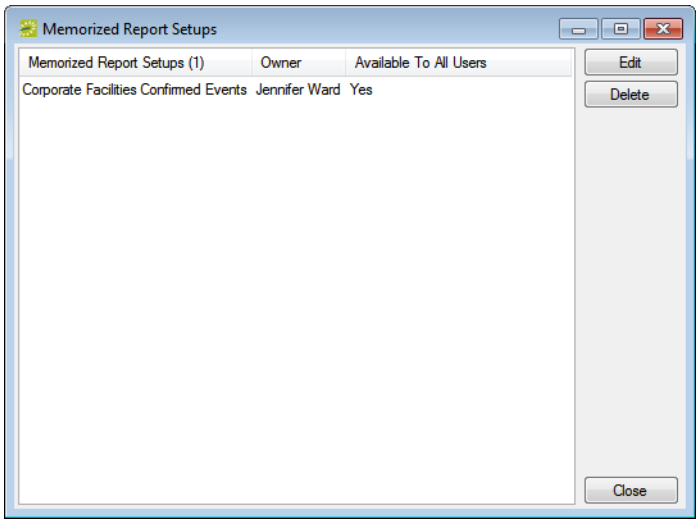


2. On the <Report> Setup dialog box, click Setups.

   The Memorized Report Setups dialog box opens. This dialog box lists all the memorized report setups for which you are the owner and therefore, can edit the name and/or delete the report.

Administrative users can edit and delete all memorized reports in the system. See Managing Memorized Reports in the EMS Setup Guide.

Figure 8-6: Memorized Report Setups dialog box



3. Select a memorized report setup, and then do one of the following:

   - To delete the report, click Delete, and then click Yes in the message that asks you if you are sure that you want to delete the selected report.
   - To edit the name of the report, click Edit to open the Memorize Report Name dialog box, and edit the name of the report in the Description field.

The description or name can be a maximum of 30 characters, including spaces.

Daily reports

Report	Description	Options
Event Schedule	A summary of the events that are scheduled at your facility, sorted by date and event start time. The report shows event start and end time, group name, event name, and location. You typically print and post the Event Schedule in a lobby or entry way to help visitors find their events.	• Use Page Breaks - If the report is run across multiple days, then each day starts on a new page. • Show Bookings on Start Date Only—If a booking is scheduled overnight, then only the start date of the booking is displayed in the report. For example, a booking exists for 3P Thursday through 10A Friday. If this option is selected, then the booking is displayed only for Thursday in the report. • Show Holidays—Displays any holidays that are configured in the EMS database on the report. • Show Building Hours—Displays building hours on the report. • VIP Events Only—Only the events that are marked as a “VIP” are displayed in the report. • Use Calendar Styles: Events are displayed in the font/color of the Calendar Style that is associated with each event.
Event Calendar	A chronological list of scheduled events in a wall calendar format.	• Use Calendar Styles—Events are displayed in the font/color of the Calendar Style that is associated with each event. • Weekly Calendar—One week per page is displayed in the report. • Show Adjacent Calendar Days—Works in conjunction with the Weekly Calendar option to display events that occur on Saturday and Sunday in the report. • Grey Out Adjacent Calendar Days—Works in conjunction with The “Show Adjacent Calendar Days” option to display events that occur on adjacent days in gray instead of in black. • Hide Holidays—By default, holidays are displayed on the Daily Calendar Report. Select this option to hide holidays in the report. • By Room—Displays events one room at a time in a calendar view.

Report	Description	Options
Room Cards	A list of events that is designed to be posted outside a room or event space. The report notes the date, event time, and location for events, as well as the group sponsoring each event. The report can be a single list of all events that are scheduled for the room on a particular date, or it can be a single page per event.	• Show Bookings on Start Date Only—If a booking is scheduled overnight, then only the start date of the booking is displayed in the report. For example, a booking exists for 3P Thursday through 10A Friday. If this option is selected, then the booking is displayed only for Thursday in the report. • Print Blank Room Cards—Prints a room card for a space that does not have any events scheduled. • Print Logo—Prints the facility logo on each room card. You can specify the logo location on the right or left side of the room card. • Sort Room Cards By Book Sequence—If Book Sequencing is being used on Room Configuration, then a facility can print room cards in the Book Sequence order. • Print Combo Room Components—Prints an individual room card for each component of a combo room.
Activity Schedule	A list of bookings in all rooms in a building, or just in a specific room in the building. The report, which shows event start and end times, event name, group name and room, can be generated for a range of dates. The report can generated in one of two formats—by Date or by Building.	• Use Page Breaks—A new page is generated for each date or for each building. • Show Bookings on Start Date Only—If a booking is scheduled overnight, then only the start date of the booking is displayed in the report. For example, a booking exists for 3P Thursday through 10A Friday. If this option is selected, then the booking is displayed only for Thursday in the report.

Report	Description	Options
Setup Worksheet	An internal report that setup crews, custodial, or operations personnel use to ensure that each room is arranged properly for each event. The report displays detailed information about each booking, including setup type, setup notes, required resources, user defined fields, special instructions and resource item notes.	• Use Page Breaks—If this report is run across multiple days, then each day starts on a new page. • Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report. • Limit Bookings To Those With Details In Selected Categories—Only bookings with a booking detail from the specified categories are displayed in the report. • Show Bookings on Start Date Only—If a booking is scheduled overnight, then only the start date of the booking is displayed in the report. For example, a booking exists for 3P Thursday through 10A Friday. If this option is selected, then the booking is displayed only for Thursday in the report. • Keep Detail Together—If an event has booking details, the details are kept together on one page instead of being split across two pages. • Show Holidays—Holidays are displayed in the report. • Show Building Hours—Building hours that are associated with each building are displayed in the report. • Show Item Notes—Any notes that have been entered for a booking detail item are displayed in the report. • Show Item Special Instructions—Any special instructions that have entered in VEMS for a booking detail item are displayed in the report. • Show User Defined Fields—Any user defined fields and their answers for a reservation are displayed in the report. • Show Booking Changes Only—Bookings that have been edited within the specified number of days are displayed in the report.

Report	Description	Options
Service Order Schedule	Lists the service orders that are scheduled for a date or date range. Produced by category.	• Use Page Breaks—If this report is run across multiple days, then each day starts on a new page. • Show Details—Booking item details that associated with each event are displayed in the report. • Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report • Show Pricing—Any pricing that is associated with an item is displayed in the report. • Show Item Notes—Any notes that have been entered for a booking detail item are displayed in the report. • Show Item Special Instructions—Any special instructions that have entered in VEMS for a booking detail item are displayed in the report.
Service Orders	Separate pages for each service order in a date range. The report provides information on the event and the items or services needed. Produced by category.	• Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report. • Footer Message—Used to specify the Footer message that is displayed on each page of the report. • Show Item Notes—Any notes that have been entered for a booking detail item are displayed in the report. • Show Item Special Instructions—Any special instructions that have entered in VEMS for a booking detail item are displayed in the report.

Report	Description	Options
Banquet Event Orders	Separate pages for each booking that occurs on a date or within a date range that has the “Primary Category” specified. Service orders, resource information, notes, and information for resource with order type categories are included in the report.	• Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report. • Show Pricing—Any pricing that is associated with an item is displayed in the report. • Limit Bookings To Those With Details In Selected Categories—Only bookings with a booking detail from the specified categories are displayed in the report. • Show Item Notes—Any notes that have been entered for a booking detail item are displayed in the report. • Show Item Special Instructions—Any special instructions that have entered in VEMS for a booking detail item are displayed in the report. • Show Service User Defined Fields—Any user defined questions and their answers for any listed category are displayed in the report.
Resource Schedule	Lists by category and date, how many of each resource item is needed, as well as the event time, event name, location, and group.	• Use Page Breaks—If this report is run across multiple days, then each day starts on a new page. • Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report. • Show Overbooked Resources Only—Only those bookings where the selected resource exceeds the number available in inventory at that time are displayed in the report.

Sales reports

Report	Description	Options
Sales by Group Type	Lists the sales for each group type for a date or date range.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Sales by Group	Lists the sales for each group, divided by group type, for a date or date range.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Sales by Category	Lists the revenue generated by each resource category for a date or date range.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Sales by Resources	Lists the sales for each resource item for a date or date range.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Sales by Reservation	Lists the reservations that have bookings for a specified date or date range and shows the charges, by category, for the reservation. Also gives a grand total for all reservations. If a reservation also has bookings that fall outside the specified date or date range, these figures are not included in the report.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.

Report	Description	Options
Sales by Billing Reference	Lists the total sales for a date or date range, based on the billing reference number on the reservations that have bookings in the specified range. Sales that are associated with reservations that have no billing reference number are not included in the report.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Sales by Booking	Lists the sales for a particular date or for each date in a date range, broken down by booking. This report displays the following information—Start/End Times, Group, Event Name, Location, Billing Reference#, PO Number, Payment Type, Status, Reservation ID, Booking ID, and Sales amount.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Status Changes by Reservation	Lists the sales that are associated with a reservation where the reservation or booking status was changed.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.
Status Changes by Booking	Lists the sales that are associated with bookings where the bookings status was changed.	• Display Amount—Select from Net Sales, Gross Sales or Discount • Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Amounts—Group Types with zero sales/discounts are displayed in the report.

Statistics reports

All Statistical reports, except Hourly Room Utilization and Hourly Resource Inventory Utilization, provide an “Analyze” feature to view data. Click Analyze to open a Browser window that displays the queried data. You can group the information by column, and you can also export the raw data to an Excel file. You can also click Details to provide more detailed information about the queried data.

Report	Description	Options
Room Statistics	Lists all rooms by building and for each room, indicates the following information—the number of bookings for the date range selected, the reserved hours, the event hours, the estimated attendance (i.e., setup count), and the actual attendance.	• Include Report Criteria—The filter settings for the report are displayed in the report.
Room Utilization	Lists the number of bookings, hours used, hours available, percent utilization, and hours vacant for rooms, by building, for the date range specified.	• Day Selection—Specify which day(s) of the week to include in the report • Group By Utilization Category—Groups rooms by utilization (low, high, unused). • Include Cost—Tthe cost for vacancies is displayed in the report. • Include Unused—Include rooms that contain no bookings in the report. • Cap Utilization at 100%?—Percent utilization cannot exceed 100%. • Low Utilization—Specify what percentage equals “Low” utilization. • High Utilization—Specify what percentage equals “High” utilization. • Availability Based On—Select to base availability on one of the following - Building Hours, Hours per Day, or Specific Hours. • Include Report Criteria—The filter settings for the report are displayed in the report.
Hourly Room Utilization	Displays room utilization broken down by hours in the day, by percentage utilized.	• Day Selection—Specify which day(s) of the week to include in the report • Display Chart—Includes a chart on the final page of the report that summarizes the reported data.

Report	Description	Options
Hourly Resource Inventory Utilization	Displays resources, and the number of items used on an hourly basis for a specified date range.	• Day Selection—Specify which day(s) of the week to include in the report • Display Chart—Includes a chart on the final page of the report that summarizes the reported data.
Group Statistics	Displays Number of Bookings, Reserved Hours, Event Hours, Estimated Attendance, and Actual Attendance by Group Type for a given date or date range. The format can be set to “Detail” to provide statistics for each specific group.	• Include Report Criteria—The filter settings for the report are displayed in the report.
Event Type Analysis	Provides information by event type on the following—the number of reservations, the number of bookings, the percentage of total reserved hours, the percentage of total event hours, the percentage of total estimated attendance, the percentage of total attendance, the actual attendance, and the percentage of total.	• Include Report Criteria—The filter settings for the report are displayed in the report. • Display Chart—Includes a chart on the final page of the report that summarizes the reported data.
Reservation Source Analysis	Displays the number of reservations, the number of bookings with percentage, reserved hours with percentage, event hours with percentage, estimated attendance with percentage, and actual attendance with percentage by reservation source.	• Include Report Criteria—The filter settings for the report are displayed in the report. • Display Chart—Includes a chart on the final page of the report that summarizes the reported data.
Resource Statistics	Lists the quantity and the hours used, by category and by resource item.	• Include Report Criteria—The filter settings for the report are displayed in the report. • Show Zero Quantities—Includes all resources even if the resource is not used during the date range specified.
Room Availability	Provides a count of room availability by room type for a given date range.	N/A
Setup Count Analysis	Lists the total number of bookings by setup count.	N/A

Report	Description	Options
Seat Occupancy	Displays the capacity for each room, the number of bookings for the date range, the seats available for the bookings, the total estimated attendance based on setup count on each booking, the average estimated attendance, and the estimated percentage of seats filled for the specified date range.Figures are also provided for total actual attendance, average actual attendance, and actual percentage of seats filled.	• Include Report Criteria—The filter settings for the report are displayed in the report.

Other reports

Report	Description	Options
Cancellation Report	Lists the bookings that have a status that was changed to “Cancelled” on the date or dates specified, or lists the bookings on the date or dates specified that have a status type of “Cancelled.” The report also lists the date that the booking status was changed, the date the bookings were to have taken place, and the location of the event, the name of the person who canceled the booking, the reason for the cancellation, and the booking ID. You can run the report in one of two formats—by Booking Date (the date that the bookings were to occur) or by Cancel Date (the date that the bookings were canceled).	N/A

Report	Description	Options
Cancellation Summary	Summarizes, by reservation, all charges for bookings on a date or in a date range. The report shows the first and last bookings canceled within the reservation, the Group, the reservation number, the group contact, the event name, the event type, the total charges, and the reason for cancellation of the most recently canceled booking. Reservations that do not have charges associated with the bookings are not displayed on this report. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range.	N/A
Reservation Summary	A summary of reservations that occurred within a specific data range. The report also lists complete reservation information (reservation number, event name, group, contact person, and so on) and booking dates. User defined fields can also be printed in this report. You can select Use Specific times and then enter range of times to limit the report to reservations that occurred within this specified time range.	N/A

Exceptions reports

Report	Description	Options
Undefined Setups	Lists the bookings on the selected date or date range for which no setup count has been entered. The report lists the following information for the bookings—the event name, time and location, contact name and phone number, booking status, and ID number. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter information about the report, or a name or description for the report in the Report Comment field.	• Show Bookings on Start Date Only—If a booking is scheduled overnight, then only the start date of the booking is displayed in the report. For example, a booking exists for 3P Thursday through 10A Friday. If this option is selected, then the booking is displayed only for Thursday in the report.
Status Reminder Report	Lists the bookings that have a status with a reconfirm date that falls within the selected date range. You typically use the information in this report to review tentative bookings. The report can be run in one of two formats—by Status Date (the date that the event was put in a “Tentative” status) or by Booking Date (the actual date of the event). You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter a report name or description or any pertinent information about the report in the Comment field.	N/A

Report	Description	Options
Wait List Report	Lists all the bookings with a Wait status for the time period that you have requested. Detects situations where a booking has been canceled and there are one or more bookings with a Wait status that can now be changed to Confirmed, and indicates if the room is available. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range.	N/A
Booking Conflict Analysis	Reviews information on all bookings for a date or date range and lists any conflicts **Note:** EMS does not allow double-bookings, but they might exist because conversion of data from systems that do allow them, or the result of users failing to restart EMS after encountering error messages.	N/A
Building Hours Exceptions	Lists events for a date or date range that fall outside of the configured building hours. Either event time or reserved time is checked based on the “Validate Building Hours on Event Time” parameter. The report also shows the start and end times, group, event name, location, reservation number, and booking number. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter information about the report, or a name or description for the report in the Report Comment field.	N/A

Report	Description	Options
Inactive Room With Bookings	Lists the bookings for a specified date or date range that are scheduled in inactive rooms. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter information about the report, or a name or description for the report in the Report Comment field. You can click View to open the booking for viewing and editing, changing the status of the booking and/or emailing the group.	N/A
Inactive Groups With Reservations	Lists the reservations for a specified date or date range that are scheduled for inactive groups. You can click View to go to the reservation for viewing and editing, including changing the status of the reservation and/or its bookings.	N/A
Invalid Service Orders	Lists the service orders that have a start time and/or end time that fall outside the reserved time for the room. Lists the category, date, reserved and event start and end times, location, group, reservation number, booking number, service order number and a description of the invalid order. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter information about the report, or a name or description for the report in the Report Comment field. **Note:** Service orders that fall outside the reserved time are considered invalid even if the Validate Service Order Times Against Booking parameter is set to “No.”)	N/A

Report	Description	Options
Invalid Billing References	Lists the bookings for a particular date or date range that are in reservations that have invalid billing reference numbers. You can select Use Specific times and then enter range of times to limit the report to bookings that occurred within this specified time range. You can enter information about the report, or a name or description for the report in the Report Comment field. **Note:** A billing reference number is considered invalid if it has not been defined in the Billing Reference Configuration area but the Validate Billing Reference parameter is set to “Valid Only.”	N/A
Inactive Web Process Templates		N/A

Hoteling reports (EMS Workplace only)

Report	Description	Options
Room Occupancy Summary	Displays, by building and room type, the number and percentage of rooms occupied.	N/A
No Show	Lists the bookings for which the reservation holder did not check in. **Note:** A customer can be checked in via the EMS Kiosk, the EMS desktop client, or VEMS.	N/A
Early Checkout	Lists the bookings for which the reservation holder checked out before the end of the reserved time. **Note:** A customer can be checked out via the EMS Kiosk, the EMS desktop client, or VEMS.	N/A

Report	Description	Options
Visitor	Lists events for groups that have cities on their group record, other than what is specified in the Exclude Locations field. If multiple locations are to be listed, they should be entered with a comma between them (for example, Denver, Houston, Tampa, and so on).	N/A
Booking Notice Statistics	Lists the total bookings for a date or date range, divided into three “Amount of Notice” categories, where the Amount of Notice is the time between when the booking was scheduled and the date/ time for which it was scheduled. The report can be generated in one of two formats— “standard” or by room type.	N/A
Transition	Tracks the occupants of hoteling spaces during a specified date range. Lists by floor and room where the occupant was last, what room the occupant is moving to, and who was in the space the previous day. Typically this report is run for a two day range and the days of the week must be checked. This report can be used by personnel who are responsible for preparing hoteling spaces for each occupant.	• Show Details—Prints the categories that are associated with the bookings. • Highlight Changes Made Within:(days)—Changes that have been made within the specified number of days are highlighted in the report.
Arrivals and Departures	Lists the departures and arrivals for a particular room by building and floor. The report shows the time of the departure if the customer is a departure and the time of the arrival if the customer is an arrival. Typically, this report is run for a two day timespan listing the departure date first and the arrival date second.	N/A
Groups With Multiple Bookings	Lists groups that have multiple bookings for the date or date range specified. The information is organized by date, and lists the start and end times, the room, the room type, and the booking status for each booking.	N/A

Report	Description	Options
Check In Statistics	Lists the percentage of customers who have checked in by building, building-room type, or room type. **Note:** A customer can be checked in via the EMS Kiosk, the EMS desktop client, or VEMS.	N/A

Working with a Query

A *query* is the primary mechanism for retrieving information from a database. A query consists of questions that are presented to the database in a predefined format. A Query Builder function is available from the Reports menu. You can use this function to create queries for retrieving information from your EMS database. When you create a query, you can name and save the query so that you can run the query at any time that you choose. You can create a query from "scratch," or you can create a query by copying an existing query and modifying the copied query as needed. You can also edit a query, delete a query, and view and print a query.

To create a query

1. On the menu bar, click Reports.

   The Reports menu opens.

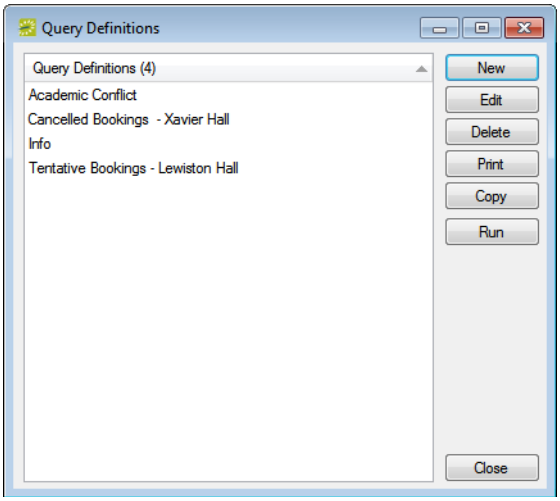
2. On the Reports menu, click Queries.

   The Queries menu opens. This menu always contains the Query Builder option. It also contains options for any queries that have been previously defined in your EMS database.

3. Click Query Builder.

   The Query Definitions dialog box opens. The dialog box displays all the queries that have been previously defined in your EMS database.

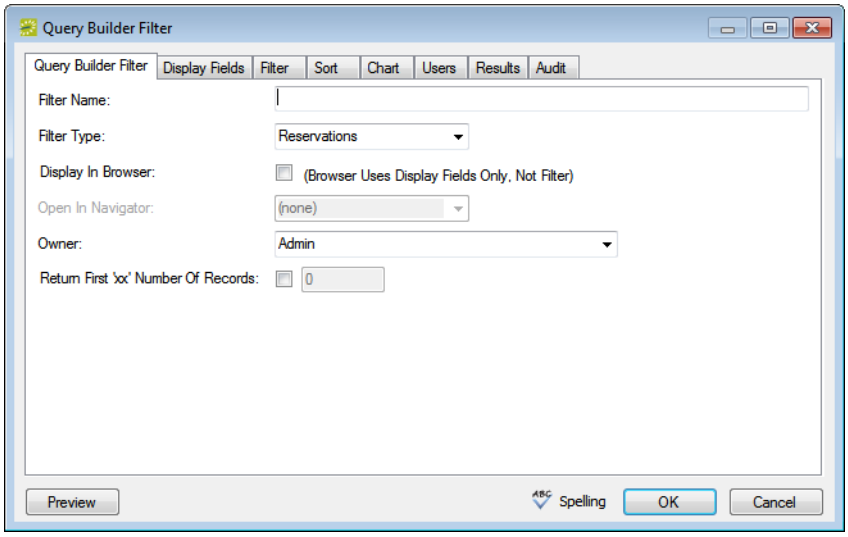
Figure 8-7: Query Definitions dialog box



4. Do one of the following:
   - To create a query from scratch, click New.
   - To create a query by modifying an existing query, select the query that is to be modified, and then click Copy.

   The Query Builder Filter dialog box opens. The Query Builder Filter tab is the active tab. You use the options on this dialog box to name and define the query.

Figure 8-8: Query Builder Filter dialog box, Query Builder Filter tab



5. Enter or modify the needed information for the query. See:
   - “Query Builder Filter tab” on page 303.
   - “Display Fields tab” on page 304.
   - “Filter tab” on page 305.
   - “Sort tab” on page 306.
   - “Chart tab” on page 307.
   - “Users tab” on page 308.
6. Do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Query Builder Filter tab

1. On the Query Builder Filter tab, name and define the query.

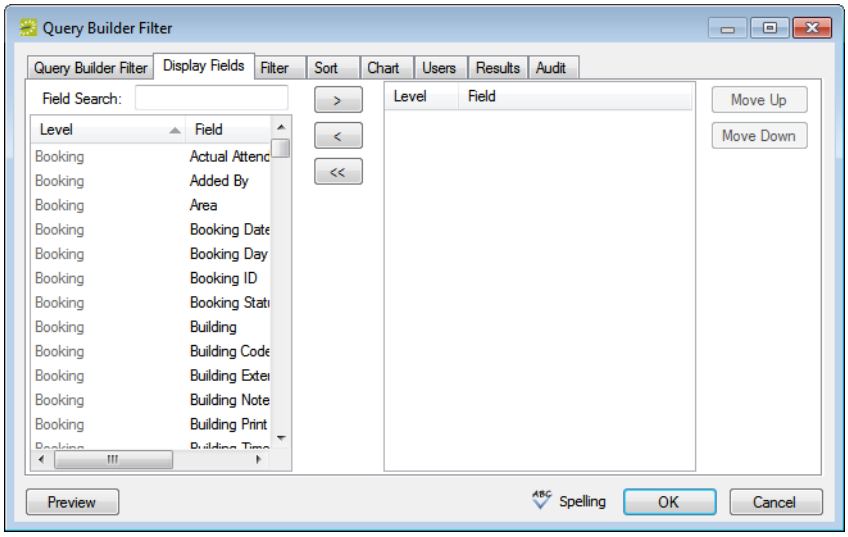
Option	Description
Filter Name	Name of the query filter. **Note:** The name can be a maximum of 30 characters, including spaces.
Filter Type	The type of information that the filter is to capture. The Filter Type affects the items that are available on the Display Fields tab and the Filter tab. A Filter Type of Group allows you to capture address information that can be exported and subsequently used by other programs to create mailing labels.
Display in Browser	Available only for a filter type of Billing or Reservations. Select this option if the query that you are creating is to be available in the Browser.
Open in Navigator	Available only if the Filter Type is Reservations and Display in Browser is selected. Indicate what the system should open in the Navigator when a user double-clicks on an item that is retrieved by the query.
Owner	Available only to administrative users.
Return First “xx” Number of Records	To limit the number of records that the query returns, select this option, and then enter the number of records in the field.

2. Continue with any other configuration for the query as needed, or do one of the following:

   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Display Fields tab

Figure 8-9: Query Builder Filter dialog box



1. Open the Display tab, and on the tab, do one of the following:
   - Select the fields (CTRL-click to select multiple field) that are to be displayed in the query results, and then click the Move button (>) to move the selected fields to the Selected list.
   - In the Find field, enter the string by which to filter your search for available fields. Select the field (CTRL-click to select multiple fields), and then click the Move button (>) to move the selected fields to the Selected list.

If you are copying an existing query, then when the Display tab opens, the Selected list is already populated with a list of fields. You can select one or more of these fields in the Selected list and then click the Remove button (<) to move these fields back to the Available list.

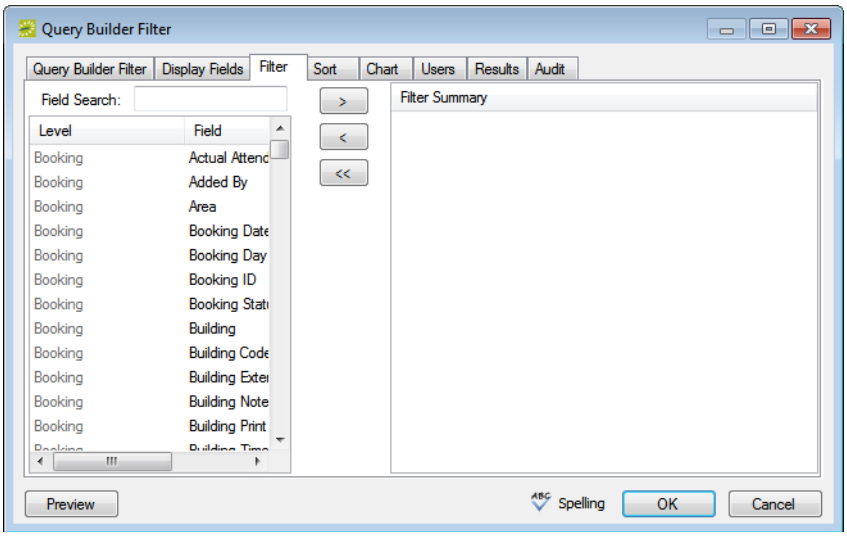
As you enter the search string, the Available Fields list is dynamically updated with a list of fields that meet the search criteria. Your search is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. The string is not case-sensitive.

2. The fields are displayed in the query results in the order in which they are listed in the Selected list. Optionally, to change the order of the fields, select a field and then click Move Up/Move Down as needed.

3. Continue with any other configuration for the query as needed, or do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Filter tab

Figure 8-10: Query Builder Filter dialog box, Filter tab



1. Open the Filter Fields tab, and then do one of the following:
   - For each field that is to define the query, select the field, and then click the Move button (>).
   - In the Find field, enter the string by which to filter your search for available fields. For each field that is to define the query, select the field, and then click the Move button (>).

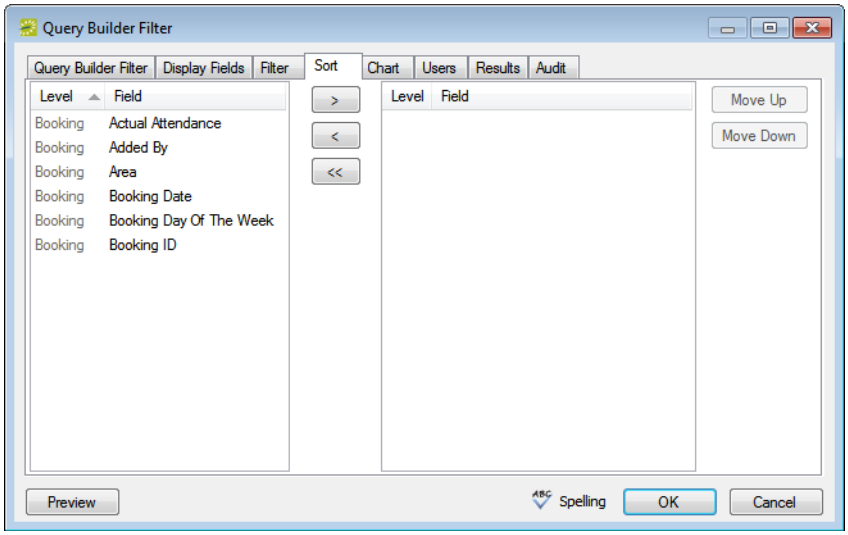
   For each field that you select, a dialog box opens in which you must specify the allowed values for the field. After you specify the values, and click OK, the dialog box closes, and the selected field is moved to the Filter Summary list.

If you are copying an existing query, then when the Filter Summary tab opens, the Filter Summary list is already populated. You can select one or more of the fields in the Filter Summary list and then click the Remove button (<) to move these fields back to the Available list. If you want to use the same Filter Summary fields in the "new" query, but with different values, you cannot change the values directly. You must move the appropriate fields back to the Available list, then select the fields again to change their values.

2. Continue with any other configuration for the query as needed, or do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Sort tab

Figure 8-11: Query Builder Filter dialog box, Sort tab

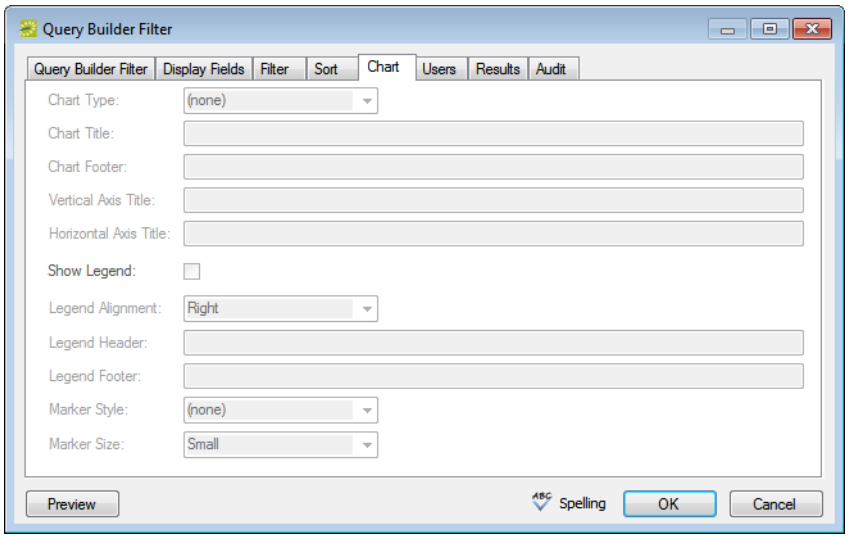


1. Open the Sort tab, select the field or CTRL-click to select the multiple fields by which the query results are to be sorted and then click the Move button (>).

2. Continue with any other configuration for the query as needed, or do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Chart tab

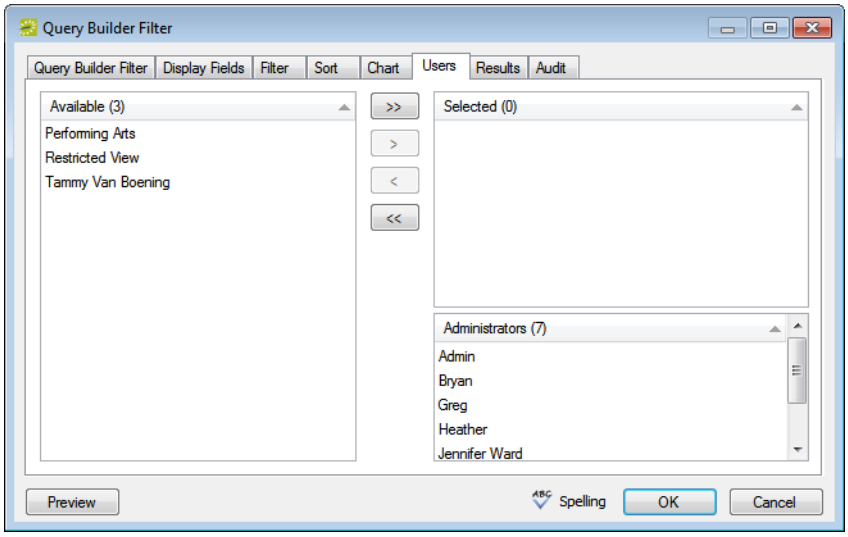
Figure 8-12: Query Builder Filter dialog box, Chart tab



1. Open the Chart tab, and specify the type of chart that is to be used to graph the query results.
2. Optionally, if you want to show a legend with the chart, select Show Legend, and then specify the legend information (alignment, header, footer, and marker style and size).
3. Continue with any other configuration for the query as needed, or do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

Users tab

Figure 8-13: Query Builder Filter dialog box, Users tab



1. Open the Users tab, and in the Available list, select the user, or CTRL-click to select the multiple users who can run this query, and then click the Move (>) button to move the selected users to the Selected list.

By default, all administrative users can run any query that any user creates. These users are listed in the Administrative list. You cannot remove any administrative users from this list.

2. Continue with any other configuration for the query as needed, or do one of the following:
   - Click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the named query. The named query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

To edit a query

1. On the menu bar, click Reports.

   The Reports menu opens.

2. On the Reports menu, click Queries > Query Builder.

   The Query Definitions dialog box opens. The dialog box displays by name, any queries that have been previously defined in your EMS application. See Figure 8-7 on page 301.

3. Select the query that is to be edited, and then click Edit.

   The Query Definitions dialog box opens. All of the tabs are populated with the information for the selected query.

4. Edit the query as necessary including one or more of the following:

   - Renaming the query.
   - Changing the fields that are to be displayed in the query results.
   - Changing the fields that define the query.

5. Do one of the following:

   - Click OK to close the Query Builder Filter dialog box and save the modified query. The modified query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.
   - Open the Results tab, and then click Preview to run the query immediately and view the results on the tab. You can then click OK to close the Query Builder Filter dialog box and save the modified query. The modified query is displayed on the Reports menu under the Queries option. You can run this query at any later date when needed.

To delete a query

1. On the menu bar, click Reports.

   The Reports menu opens.

2. On the Reports menu, click Queries > Query Builder.

   The Query Definitions dialog box opens. The dialog box displays any queries that have been previously defined in your EMS application. See Figure 8-7 on page 301.

3. Select the query that is to be deleted, and then click Delete.

   A message opens, asking you if it is OK to delete the selected query.

4. Click Yes.

   The message closes. The query is deleted.

To view and print a query

1. On the menu bar, click Reports.

   The Reports menu opens.

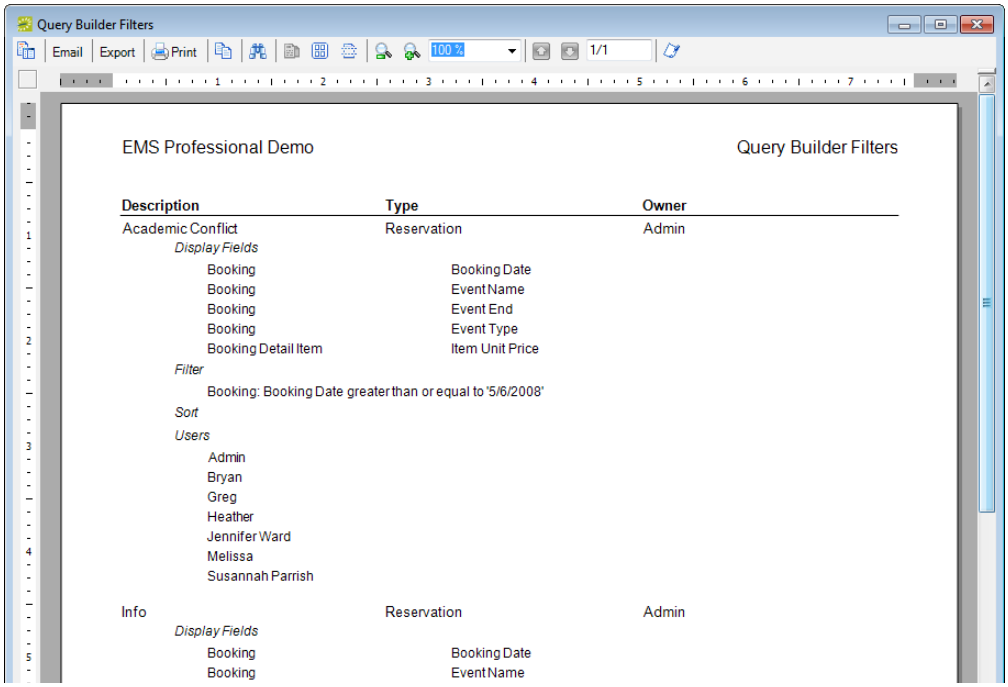
2. On the Reports menu, click Queries > Query Builder.

   The Query Definitions dialog box opens. The dialog box displays any queries that have been previously defined in your EMS application. See Figure 8-7 on page 301.

3. Select the query that is to be printed, and then click Print.

   An onscreen preview of the selected query opens. A variety of options are available from this preview, including the options to print a hard copy of the query, to email the query, and so on.

Figure 8-14: Print preview for a query



4. Select the option or options that best fit your working needs.

To run a query

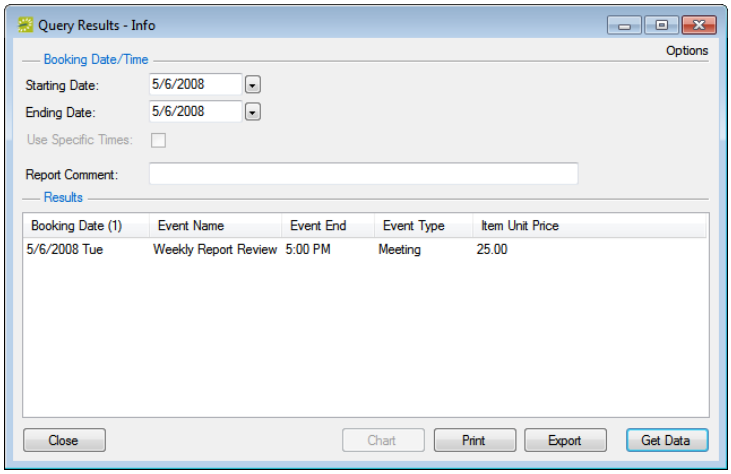
When you run a saved query, you can run the query from the Reports menu, or you can run the query from the Query Definitions dialog box.

1. On the menu bar, click Reports and on the Reports menu, click Queries, and then do one of the following:

   - Click the name of the query that you are running.
   - Click Queries > Query Builder and on the Query Definitions dialog box, select the query that you are running, and then click Run.

   The query is run and the results are displayed onscreen in the Query Results dialog box.

Figure 8-15: Query Results dialog box example



2. Optionally, on the Query Results dialog box, do one or more of the following, and then click Get Data to rerun the query according to the modified definition.

   - Select the date for which the data in your EMS database is to be queried.

Option	Description
Custom	The starting date is set to the first day of the month and the ending date is set to the last day of the month but you can modify one or both of these dates. **Note:** For some queries, if you select Custom, a Use Specific Times option becomes available. If you enter the same date for the starting date and ending date, you can select Use Specific Times, and then enter a starting time and ending time to query the data for in specific time range on the same day.
Last Month	The starting date is set to the first day of the previous month and the ending date is set to the last day of the previous month.

Option	Description
Last Quarter This Quarter This Quarter To Date	Quarters are based on a calendar year: • First quarter is 1/1 through 3/31. • Second quarter is 4/1 through 6/30. • Third quarter is 7/1 through 9/30. • Fourth quarter is 10/1 through 12/31. For example, if the current day's date is 11/22/2010, and you select Last Quarter, then the starting date is set to 7/1/2010 and the ending date is set to 9/30/2010.
Last Year	The starting date is set to 1/1 of the previous year, and the ending date is set to 12/31 of the previous year.
This month	The starting date is set to the first day of the current month and the ending date is set to the last day of the current month.
This Year	The starting date is set to 1/1 of the current year, and the ending date is set to 12/31 of the current year.
This Year to Date	The starting date is set to 1/1 of the current year, and the ending date is set to the current day's date.

- Change the Starting Date, Ending Date, or both.
- In the Report Comment field, enter a comment that will be printed on the query.
- Click Options and change the settings for specific room filter and/or the number of records to return.

After you have run the query to your satisfaction, you can then do one or both of the following:

- To print the query results, click Print. An onscreen preview of the query results opens. A variety of options are available from this preview, including the options to print a hard copy of the query results, to export the query results to a .pdf, and to email the query results. Select the option or options that best fit your working needs.
- To export the query results to an Excel spreadsheet, or to an XML file, click Export, and then click Excel or XML as appropriate.

Chapter 9
Billing

Accurate and timely billing is critical to ensuring a successful experience for organizations that schedule events at your facilities. EMS provides a variety of functions for working with invoices and transactions for reservations and bookings as well as reporting on this information.

This chapter covers the following topics:

- "Overview of Billing in EMS" on page 315.
- "Working with Invoices" on page 316.
- "Searching for Transactions" on page 329.
- "Working with Transactions" on page 335.
- "Generating an EMS Billing Report" on page 343.

Overview of Billing in EMS

In EMS, at a high-level, billing is a two-step process:

- The first step is to generate invoices. (See "Working with Invoices" on page 316.) You can generate invoices based on reservation number, date range, or both. For example, you could generate invoices for all bookings in Reservation 1829 that occurred last month. After you have generated the invoices, EMS tracks the amount due and the age of the invoices.

As part of this process, you can generate the Billing Worksheet report. (See "Generating an EMS Billing Report" on page 343.) You use this report to review the dollar amounts for the bookings for which you intend to create invoices. You can correct any discrepancies that you note in the report by editing the bookings or booking items in question

- The second step to is process received payments using the Payment Entry function. (See "Searching for Transactions" on page 329.) You can also use this function to enter deposits made against a reservation before invoicing or booking and to enter adjustments.

Financial transactions in EMS are batched by department. For example, if a user who is a member of the Scheduling department applies a deposit to a reservation, then the deposit is shown on a confirmation only if the user who applied the deposit or other users in the Scheduling department print the confirmation. If a user in another department, for example, the Catering department, prints the confirmation, then the deposit is not shown on the confirmation. Similarly, invoices that are generated by a department are printed on the Ageing report only if the report is generated for the same department. If you invoice a reservation or one of its bookings, any deposit that was previously made on the reservation is then applied and is no longer shown on the confirmation. If you invoice an event, the event is locked and cannot be edited. You can edit the event only after you void the invoice. You cannot void an invoice if payments have been made against it. You must first void the payments. You can use an adjustment with a negative dollar amount to clean up your financial records. For example, you generate an invoice for $102 for a group and the group returns a check for $100. If you do not want to ask the group for a $2.00 check, an adjustment of "$2.00-" balances your books.

Working with Invoices

You can generate an invoice in EMS based on a specific booking date or date range, a reservation number, or both. For example, you can generate invoices for all bookings from May 1 through May 14, for all bookings in reservation number 22, or for all bookings in reservation number 22 that occurred between May 1 and May 14. You can generate multiple invoices for the same booking, with each invoice showing the charges for a different category (such as room charges on one invoice, catering charges on another invoice, and so on). This might be necessary in situations in which you must produce multiple invoices for the same booking if the departments within your organization bill separately for the services they provide. You can also reprint an invoice and void an invoice.

You can work with invoices for a single reservation, or you can batch process multiple invoices. If you want to work with invoices for a single reservation, you do so through the Transactions tab in the Navigator. If you want to work with a batch of invoices, you do so through the EMS Billing menu: Billing > Invoices > Invoicing.

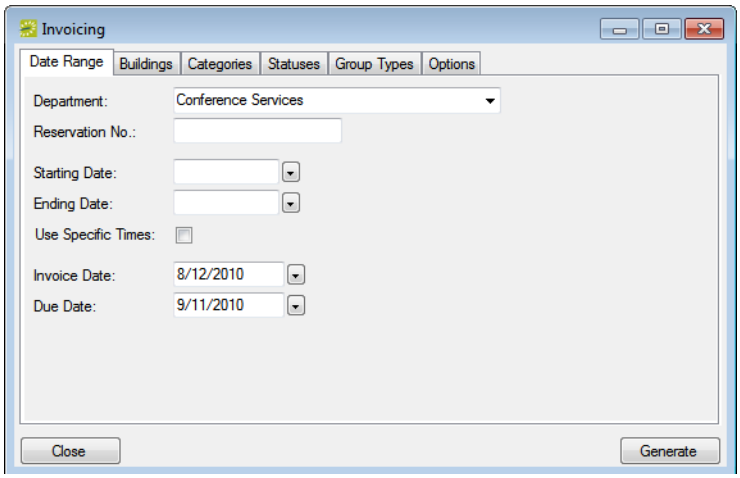
To generate an invoice

Before you generate an invoice, you should generate the Billing Worksheet report. See "Generating an EMS Billing Report" on page 343.

1. Do one of the following:
   - Open the reservation in the Navigator (see "Opening a reservation in the Navigator" on page 71), and on the Transactions tab, click New > Invoice.
   - On the menu bar, click Billing > Invoices > Invoicing.

   The Invoicing window opens.

Figure 9-1: Invoicing window



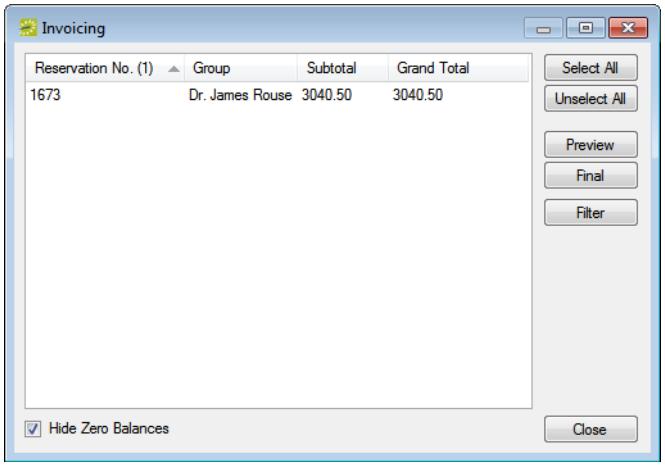
2. Enter the information for the invoice.

Field	Description
Date Range tab	
Department	Select the department that is creating the invoices. The department name and address will be printed at the top of the invoice. **Note:** This field is automatically populated if you have a default department assigned to your user account.
Reservation Number	Automatically populated if you are generating an invoice from the Transaction tab; otherwise, enter a reservation number.
Starting Date Ending Date	Automatically populated with the first (starting) booking date and the last (ending) booking date for the selected reservation when you are generating an invoice from the Transaction tab; otherwise, enter the date range of the bookings for which you are generating the invoice.
Use Specific Times	If only a specific time for the bookings is to be invoiced (for example, the bookings are from 8 am to 5 pm and you want to invoice the booking from only 8 am to noon), then click Use Specific Times, and then enter a specific time period.
Invoice Date	The default value is the current day's date. You can leave this value as is, or enter a different date.
Due Date	The system default value is 30 days from the current day's date. (Your EMS Administrator might have configured a different default value for this field.) You can leave in the field as is, or you can enter a different date.
Buildings tab/Categories tab/Statuses tab/Group Types tab	
Open the appropriate tab on the window and select the buildings, resource categories, booking statuses, and group types that are to be invoiced. This information is displayed on the invoice. **Note:** To select a building, category, and so on, select the item in the Available list (CTRL-click to select multiple items), and then click the Move button (>) to move the items to the Selected list.	
Options tab	
Header Message Footer Message	Select the header message and footer message that is to be printed on the invoice. By default, the header and footer messages are printed on every page of the invoice. To print the header only on the first page of the invoice, clear the Print Header on Each Page option.
Print Comments Print Reminders Print User Defined Fields Print Item Notes Print Zero Priced Items	Select the items that are to be printed on the invoice.
Suppress Reserved Time	Select this option if the reserved time is not to be printed on the invoice. (Instead, only the event time is printed on the invoice.)
Suppress Logo	Select this option if your department's/organization's logo is not to be printed on the invoice.

3. Click Generate.

   The generated invoices are displayed in the Invoicing window. By default, invoices with a zero balance are not shown.

Figure 9-2: Invoicing window with generated invoices

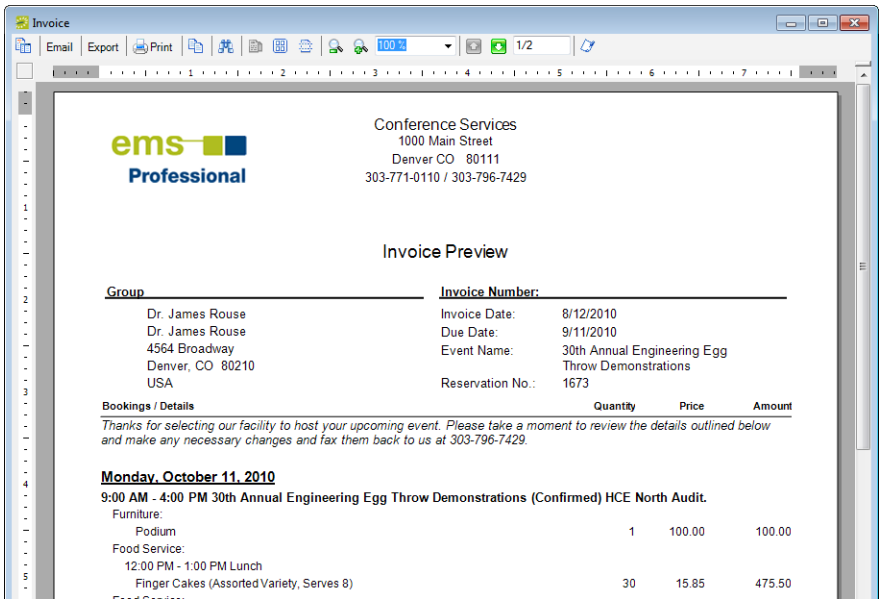


4. Optionally, you can do one or more of the following to work with the invoices that are displayed; otherwise, if you are satisfied with the invoices, you can go to Step 5 to post the invoice.

   - To show zero balance invoices in the window, clear the Hide Zero Balances option.
   - To preview an invoice, select the invoice (CTRL-click to select multiple invoices), and then click Preview.

     An onscreen preview of the selected invoices opens. The preview is titled “Invoice Preview” to distinguish the invoices from invoices that have been posted. The invoices also do not have invoice numbers, which are not issued until you post the invoices. The preview window contains options for printing a hard copy of the invoices, for emailing the invoices (see “Sending Email from EMS” on page 360), and so on. Select the option or options that best fit your working needs. See Figure 9-3 on page 319.
   - To change the criteria for the invoices, click Filter to return to the Invoicing window After change the criteria, you can generate the invoices again.

Figure 9-3: Onscreen preview of an in progress invoice



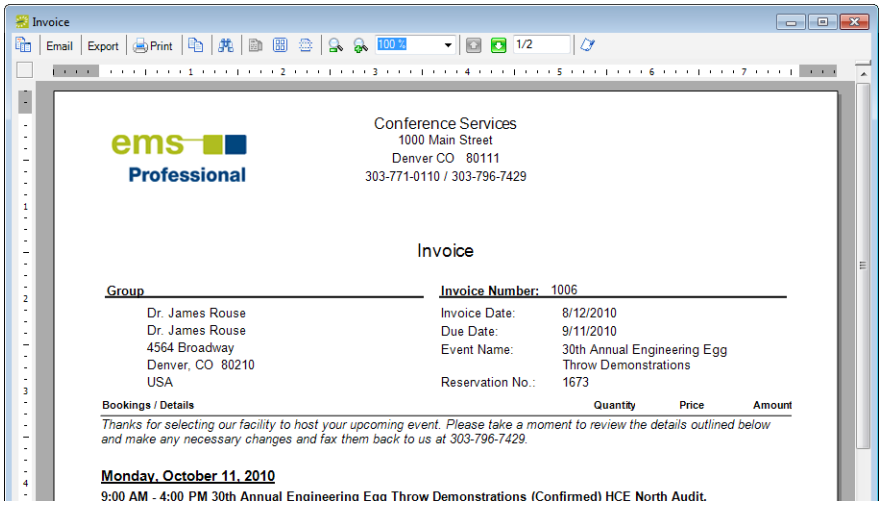
5. To post an invoice, select the invoice (CTRL-click to select multiple invoices), and then click Final.

   A message opens warning you that you are about to post and print (#) invoices, and asking you if want to continue.

6. Click Yes.

   The message closes and an onscreen preview of the *final* invoices opens. The preview is titled “Invoices” and each invoice has been issued an invoice number. The preview window contains options for printing a hard copy of the invoices, for emailing the invoices (see “Sending Email from EMS” on page 360), and so on. Select the option or options that best fit your working needs.

Figure 9-4: Onscreen preview of an invoice selected for reprinting



After you *generate* an invoice, the message “Items have been invoiced” is displayed in red text on the Reservation Summary tab in the Navigator. The message is also displayed on the <Booking Detail> Summary tab. The booking detail folder in which the invoiced items reside now has a green background in the Booking Details pane and the icon for each invoiced item also has a green background in the Items pane. After you *post* an invoice, the invoice is permanently saved, and you cannot edit it. You can make changes to the balance due for a reservation only by creating an adjustment or by voiding the invoice and regenerating it after you edit the booking information. (Because invoiced bookings are locked and cannot be edited, you must void the invoice before you can edit the bookings.)

To reprint an invoice

You can reprint both non-voided and voided invoices. You can reprint invoices *for only one department at a time*. Reprinting an invoice does not recalculate the invoice. The invoice is simply printed as it appeared when it was first generated. You can specify the invoices that are to be reprinted, or you can search for invoices that meet specific criteria, and then select specific invoices to reprint from the list of search results.

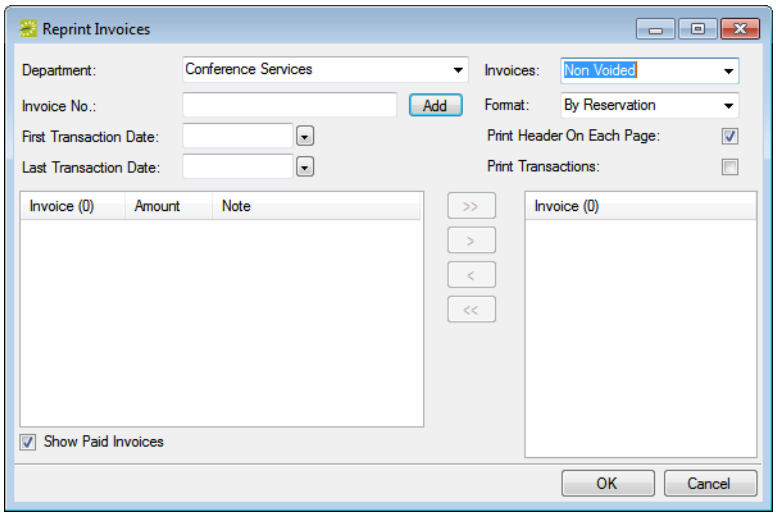
You can also reprint an invoice from the Transactions tab when a reservation is selected in the Navigator. See “Folder structure” in Chapter 3, “The Navigator,” on page 69.

To specify invoices for reprinting

1. On the menu bar, click Billing > Other > Reprint Invoices.

   The Reprint Invoices dialog box opens.

Figure 9-5: Reprint Invoices dialog box



2. In the Department field, select the department that generated the invoices.

3. In the Invoice No. field, enter the number of the invoice that is to be reprinted, and then click Add.

   The invoice is displayed (by number) in the lower right Invoice pane.

4. Repeat Step 3 until you have added all the invoices that are to be reprinted.

5. Leave the formatting criteria set to the default values, or optionally, modify it as needed.

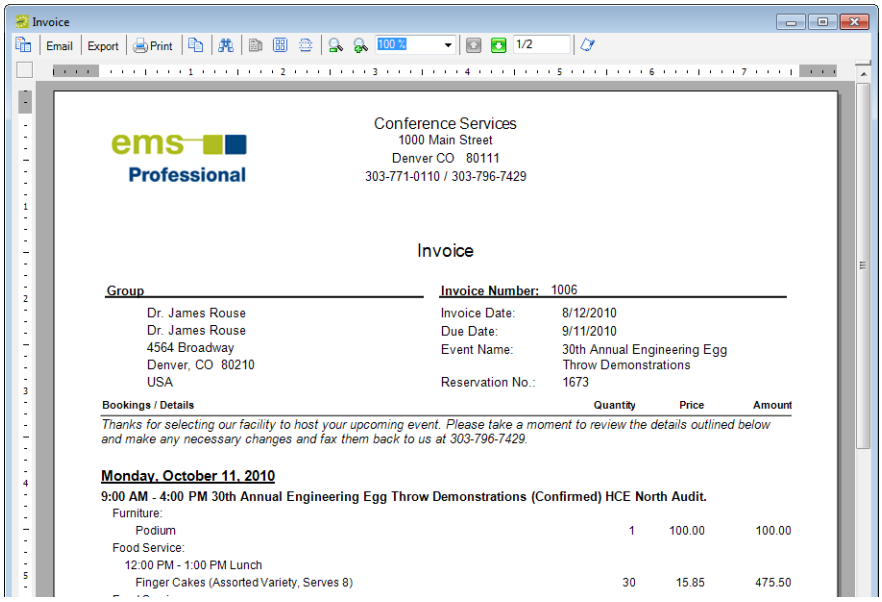
Table 9-1: Formatting options

Option	Description
Format	Select the sort order for the reprinted invoices. The default value is By Reservation.
Print Header on Each Page	Leave this option selected to print the invoice header on every page of the invoice.
Print Transactions	Select this option to include any associated transactions (deposits, payments, and so on) in the reprinted invoice.

6. Click OK.

   An onscreen preview of the invoices opens. The preview is titled "Invoices." The preview window contains options for printing a hard copy of the invoices, for exporting the invoices to a .pdf, emailing the invoice (see "Sending Email from EMS" on page 360) and so on. Select the option or options that best fits your working needs.

Figure 9-6: Onscreen preview of an invoice selected for reprinting

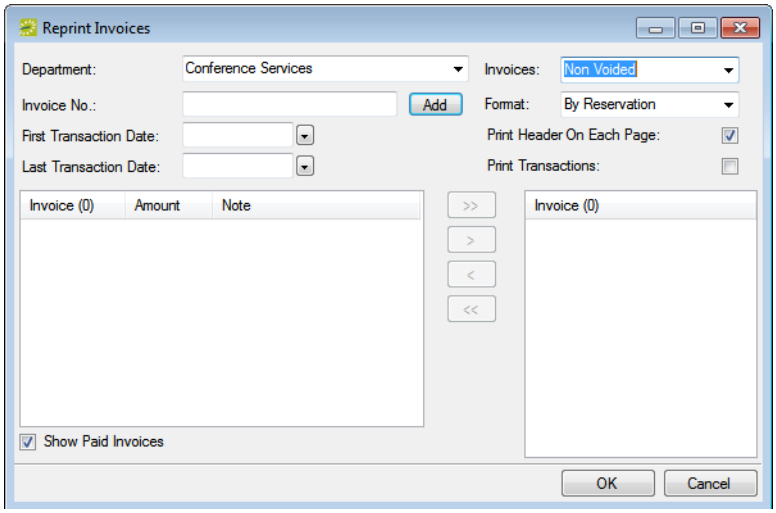


To search for invoices to reprint

1. On the menu bar, click Billing > Other > Reprint Invoices.

   The Reprint Invoices dialog box opens.

Figure 9-7: Reprint Invoices dialog box



2. Enter the criteria to search for the invoices that are to be reprinted.

As you enter the search criteria, the lower left Invoice pane is dynamically updated with the invoices that meet the criteria. The Note column in this pane indicates if payments have been made against the invoice.

Table 9-2: Search criteria

Field	Description
Department	The department that generated the invoice. You can search for invoices for reprinting as long as the invoices were generated by the same department.
Invoices	Select the type of invoice for which to search—Non Voided or Voided.
First Transaction Date Last Transaction Date	You must enter at least a First Transaction date. By default, the Last Transaction date is set to the same date. You can change the Last Transaction date if needed.
Show Paid Invoices	Leave this option selected to include paid invoices in the search.

3. Leave the formatting criteria set to the default values, or optionally, modify it as needed.

Table 9-3: Formatting options

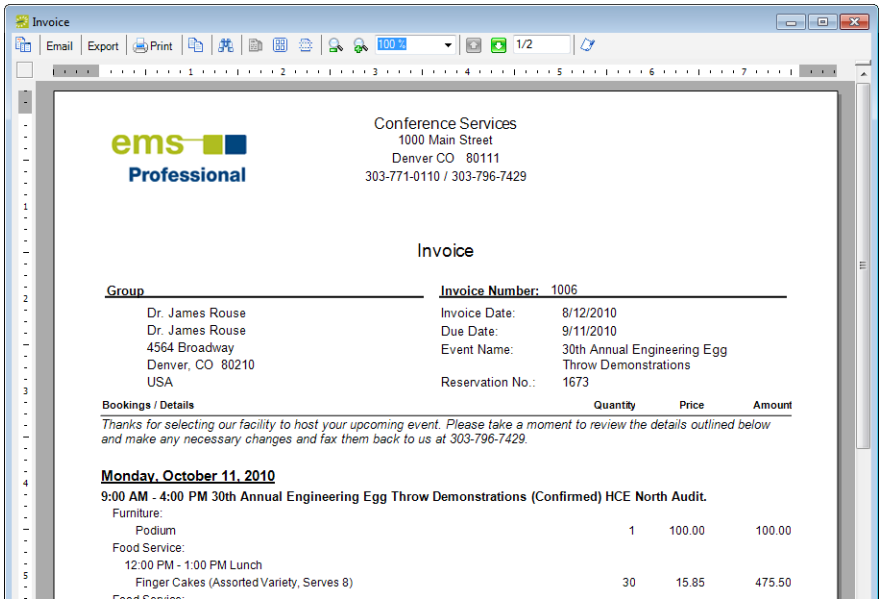
Option	Description
Format	Select the sort order for the reprinted invoices. The default value is By Reservation.
Print Header on Each Page	Select this option to print the invoice header on every page of the reprinted invoice.
Print Transactions	Select this option to include any associated transactions (deposits, payments, and so on) in the reprinted invoice.

4. Select the invoice that is to be reprinted in the lower left Invoice pane (CTRL-click to select multiple invoices), and then click the Move button (>) to move the selected invoices to the lower right Invoice pane.

5. Click OK.

   An onscreen preview of the invoices opens. The preview is titled "Invoices." The preview window contains options for printing a hard copy of the invoices, for exporting the invoices to a .pdf, emailing the invoice (see "Sending Email from EMS" on page 360), and so on. Select the option or options that best fits your working needs.

Figure 9-8: Onscreen preview of an invoice selected for reprinting



To void an invoice

You can void an invoice if the invoice has *not* been paid. If payments have been made against an invoice, you must first void the payments.You can void invoices *for only one department at a time*. When you void an invoice, the invoice is removed from the Ageing report and its associated bookings are unlocked. You can specify the invoices that are to be voided, or you can search for invoices that meet specific criteria, and then select specific invoices to void from the list of search results.

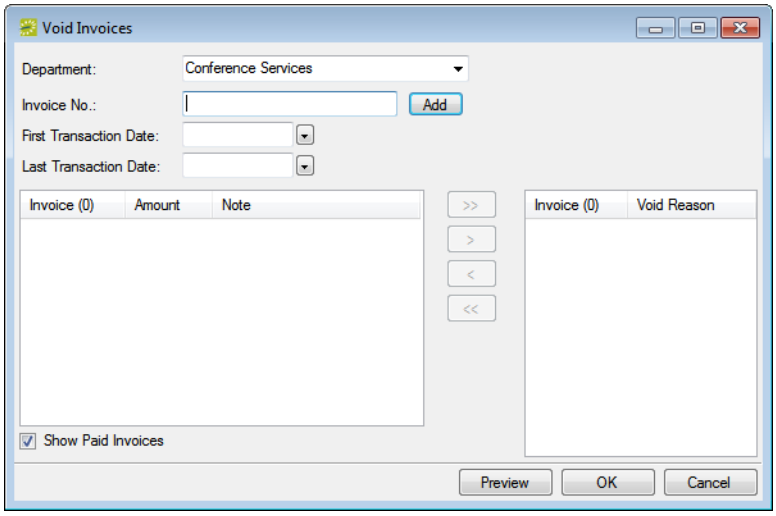
You can also void an invoice from the Transactions tab when a reservation is selected in the Navigator. See "Folder structure" in Chapter 3, "The Navigator," on page 69.

To specify invoices to void

1. On the menu bar, click Billing > Other > Void Invoices.

   The Void Invoices dialog box opens.

Figure 9-9: Void Invoices dialog box



2. In the Department field, select the department that generated the invoices.

3. In the Invoice No. field, enter the number of the invoice that is to be voided, and then click Add.

   Two results are possible:

   - If payments have *not* been applied to the invoice, then a Void Reason dialog box opens. Continue to Step 4.

Figure 9-10: Void Reason

   - If payments have been applied to the invoice, then an error message opens indicating that payments have been applied to the invoice and it cannot be voided. You must void the payments first before you can continue with voiding the invoice. See "To void a transaction" on page 341.

4. Enter a reason for voiding the invoice, and then click OK.

   The invoice is displayed (by number) in the lower right Invoice pane.

5. Repeat Step 3 and Step 4 until you have selected all the invoices from the same department that are to be voided.

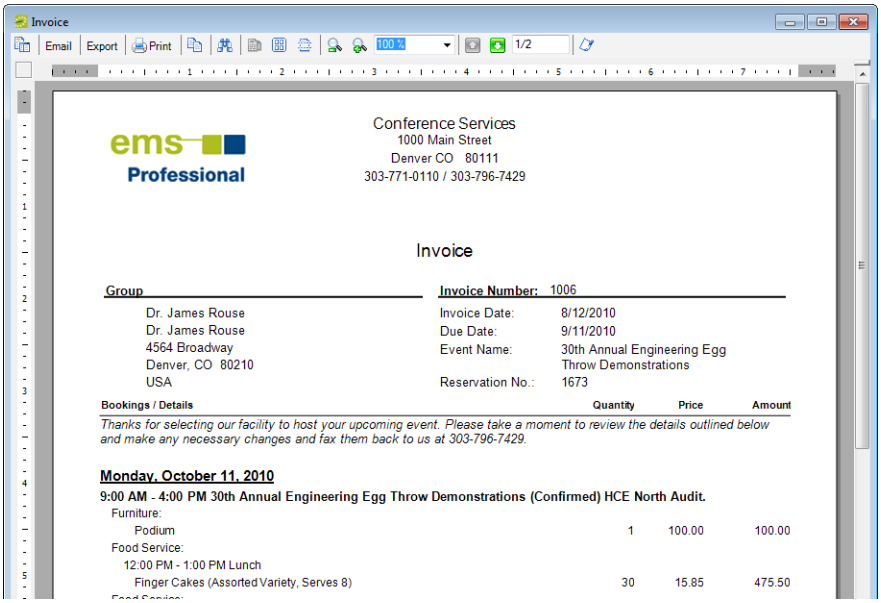
6. Do one of the following:

   - To review an invoice before you void it, go Step 7.
   - To void an invoice without reviewing it, go to Step 8.

7. Optionally, before you void a selected invoice, you can review it to ensure that it is indeed an invoice that you want to void. Select the invoice in the lower right Invoice pane (CTRL-click to select multiple invoices), and then click Preview.

   An onscreen preview of the selected invoices opens. The preview is titled "Invoices." The preview window contains options for printing a hard copy of the invoices, for exporting the invoices to a .pdf, and so on. (See Figure 9-11 on page 326.) Select the option or options that best fit your working needs. For example, before you void an invoice, you might want to email a copy of the invoice to a colleague to confirm that the invoice should be voided. (See "Sending Email from EMS" on page 360.)

Figure 9-11: Onscreen preview of an invoice selected for voiding



8. Select the invoice in the lower right Invoice pane (CTRL-click to select multiple invoices), and then click OK.

   A message opens asking you if you are sure that you want to void the selected invoices.

9. Click Yes.

   A message opens indicating that the invoices have been voided.

10. Click OK

    The message and the Void Invoices dialog box close. The Void column is set to Yes on the Transactions tab for each of the voided invoices in the Navigator.

To search for invoices to void

1. Enter the criteria to search for the invoices that are to be voided.

As you enter the search criteria, the lower left Invoice pane is dynamically updated with the invoices that meet the criteria. The Note column in this pane indicates if payments have been made against the invoice.

Table 9-4: Search criteria

Field	Description
Department	The department that generated the invoice. You can search for invoices for voiding as long as the invoices were generated for the same department. You cannot void invoices from different departments.
First Transaction Date Last Transaction Date	You must enter at least a First transaction date. The Last transaction date is optional.

Table 9-4: Search criteria

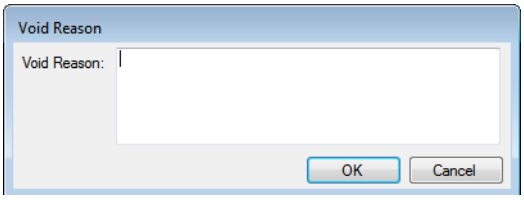
Field	Description
Show Paid Invoices	Leave this option selected to include paid invoices in the search. If you want to void an invoice against which payments have been made, then this reminder serves to prompt to you to first void the payments before you void the invoice. See "To void a transaction" on page 341.

2. Select the invoice that is to be voided in the lower left Invoice pane (CTRL-click to select multiple invoices), and then click the Move button (>).

Remember, you can select an invoice for voiding only if payments have not been applied to the invoice.

A Void Reason dialog box opens.

Figure 9-12: Void Reason



3. Enter a reason for voiding the invoice, and then click OK.

   The Void Reason dialog box closes. The invoices are displayed (by number) in the lower right Invoice pane.

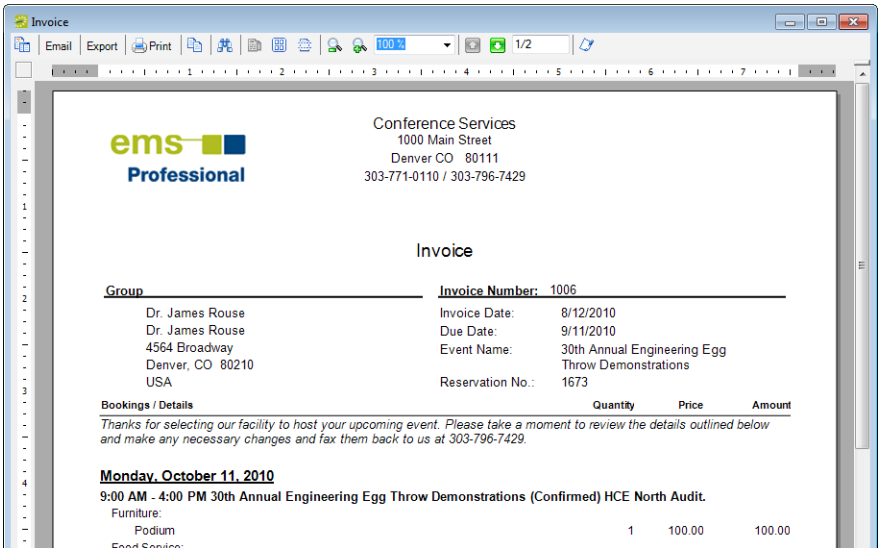
4. Do one of the following:

   - To review an invoice before you void it, go Step 5.
   - To void an invoice without reviewing it, go to Step 6.

5. Optionally, before you void a selected invoice, you can review it to ensure that it is indeed an invoice that you want to void. Select the invoice in the lower right Invoice pane (CTRL-click to select multiple invoices), and then click Preview.

   An onscreen preview of the selected invoices opens. The preview is titled "Invoices." The preview window contains options for printing a hard copy of the invoices, for exporting the invoices to a .pdf, and so on. (See Figure 9-13 on page 328.) Select the option or options that best fit your working needs. For example, before you void an invoice, you might want to email a copy of the invoice to a colleague to confirm that the invoice should be voided. See "Sending Email from EMS" on page 360.

Figure 9-13: Onscreen preview of an invoice selected for voiding



6. Select the invoice in the lower right Invoice pane (CTRL-click to select multiple invoices), and then click OK.

   A message opens asking you if you are sure that you want to void the selected invoices.

7. Click Yes.

   A message opens indicating that the invoices have been voided.

8. Click OK

   The message and the Void Invoices dialog box close. The Void column is set to Yes on the Transactions tab for each of the voided invoices in the Navigator.

Searching for Transactions

A *transaction* in EMS can be one of four types—a deposit (deposit and damage deposit), a payment, an adjustment, or a refund.

Transaction Type	Description
Deposit	A *deposit* is the dollar amount paid in advance of a meeting or event before invoicing occurs. • A *deposit* is added to a reservation. After you invoice the reservation, all outstanding deposits are applied to the invoice to reduce the balance due. • A *damage deposit* is used to a collect a deposit that is not applied to an invoice and therefore, does not reduce the balance due. Instead, if the customer does not damage the room, any reserved equipment, and so on, then you must return the damage deposit to the customer by voiding the damage deposit transaction.
Payment	A *payment* is the dollar amount that is applied to an invoice to reduce the balance due. A *pre-payment* is similar to a deposit and is applied to a reservation.
Adjustment	An *adjustment* is a modification that is made to the amount due on an existing invoice. For example, if you send out an invoice to a group for $202.00 and the group sends you a check for $200.00, you can make an adjustment of “$2.00-” to close out the invoice.
Refund	A *refund* is the return of funds that have been applied to an invoiced reservation.

You can use the Browse Transaction function to search for any of these transaction types. The results are displayed in a list view. When you carry out a search in the for a transaction, you can carry out a basic search or an advanced search. A basic search is based on the basic information that you specify for a transaction when you first create it, such as the group to which the transaction applies, the department that generated the transaction and so on. An advanced search is a field level search that is carried out the reservation level, the transaction level, or a combination of these. For example, in an advanced search, you can specify criteria as granular as the Bill To Contact at the reservation level.

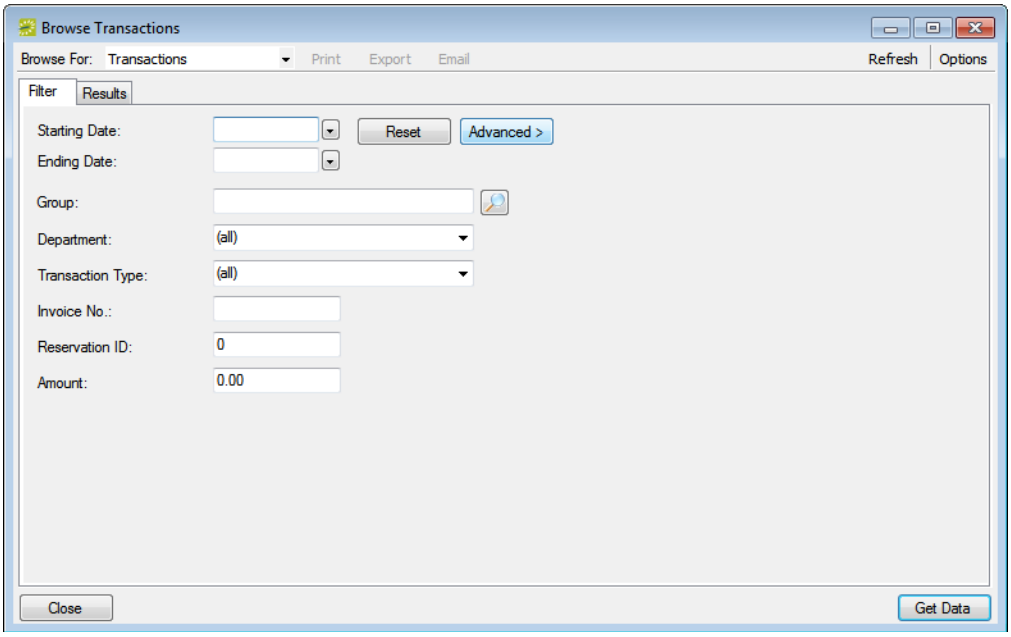
You can find all transactions for a reservation on the Transactions tab in the Navigator. See “Folder structure” in Chapter 3, “The Navigator,” on page 69.

To search for a transaction

1. On the menu bar, click Billing > Other > Browse Transactions.

   The Browse Transactions window opens. The *first* time that the Browse Transaction window opens, the Filter tab is set by default to a basic search; otherwise, the Filter tab is set to the search type (Basic or Advanced) that you last carried out.

Figure 9-14: Browse Transactions window, Basic search options



2. Click the Basic/Advanced toggle to select the type of search that is to be carried out, and then continue to one of the following:

   - "To carry out a basic transaction search."
   - "To carry out an advanced transaction search" on page 332.

To carry out a basic transaction search

1. Enter the search criteria.

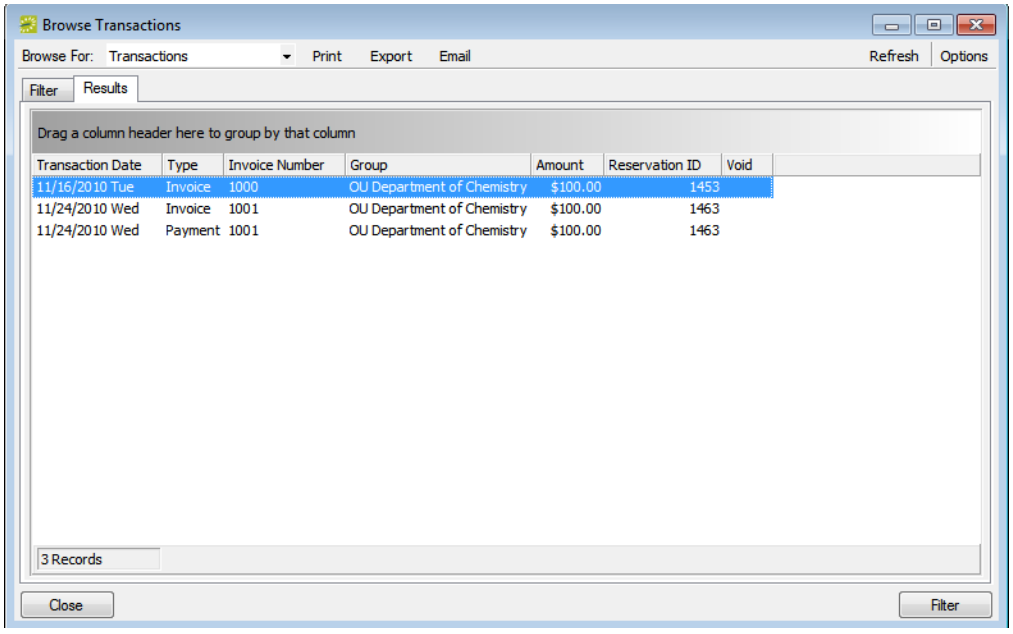
Field	Description
• Starting Time • Ending Time	The date range during which the transactions were carried out. Both are optional.
Group	Click the Search icon to open the Groups window and search for a for the group for which the transactions apply. See "To search for a group in the Groups window" on page 235.
Department	Leave the default value set to (all) or select a specific department that generated/issued the transaction.

Field	Description
Transaction Type	Leave the default value set to (all), or select a specific transaction type for which to search.
Invoice Number	If you are searching for a specific invoice or invoices, enter a search string. **Note:** The search is not case-sensitive, but it is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if you enter “10” as the search string, results can include invoice numbers 1000, 1017, and so on.
Reservation ID	Leave the default value set to 0 to search for a transaction regardless of reservation ID; otherwise, enter the exact value of the reservation ID.
Amount	Leave the default value set to 0.00 to search for transactions regardless of the transaction amount; otherwise, enter the exact amount of the transaction.

2. Optionally, click Options and edit the default value the Number of Records to Return search option.
3. Click Get Data or Refresh.

   The search results are displayed on the Results tab.

Figure 9-15: Browse Transactions window, Results tab

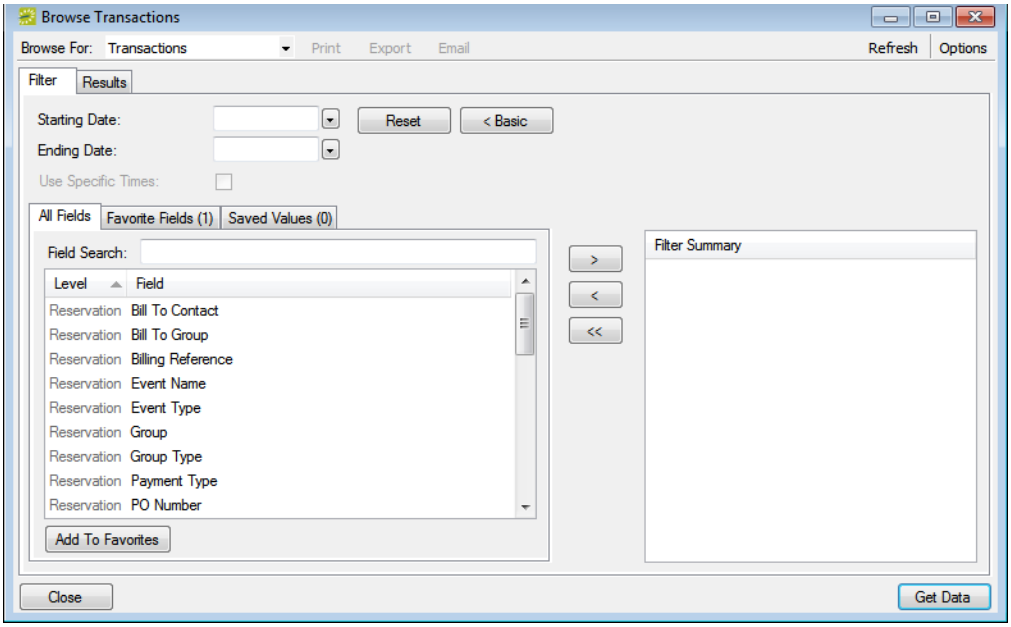


4. Optionally, do one or more of the following:
   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - Select a search result entry for an invoice, and then click Email to open a pre-addressed SMTP email to the group that is associated with the invoiced reservation. Complete and send the email as you would normally. (The invoice is sent as an attachment.) See “Sending Email from EMS” on page 360.
   - Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
   - Click Refresh to requery the database based on the current search criteria.
5. Click Close.

   Any changes that you made to the search results columns (position and width) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see “Resetting Column Settings” on page 353.

To carry out an advanced transaction search

Figure 9-16: Browse Transaction window, Advanced search options



1. Optionally, enter a Starting Date, an Ending Date, or both.
2. Optionally, if the Starting Date and the Ending Date are the same, select Use Specific Times and enter specific time periods to search.

Use Specific Times is available only if the Starting Date is the same as the Ending Date.

3. For each field level option by which to carry out the search:
   - Select the field level option, and then click the Move button (>).
   - When prompted, enter a value or define the limits for the option, and then click OK.

   The option is moved to the Filter Summary list.

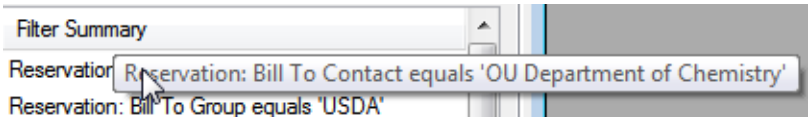
---

*To filter the list of available fields, in the Field Search field, enter a search string. Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "type," search results can include **Type**, Payment **Type**, and so on.*

If you have specific fields and/or values by which you always want to carry out a search, then you do not have to filter the list of fields on the All Fields every time you carry out a search. Instead, you can select each of these fields on the All Fields tab, and then click Add to Favorites to add the field to the Favorite Fields tab or after you enter a value or define the limits for a field, you can click Save Value on the Filter dialog box. The next time that you carry out a search, you can simply open the Favorite Fields tab or the Saved Values tab to open your customized list of search fields.

To view a selected field option in its entirety in the Filter Summary list, rest the mouse pointer on the entry. A tooltip showing the complete field option information opens.

Figure 9-17: Viewing a selected field option in the Filter Summary list

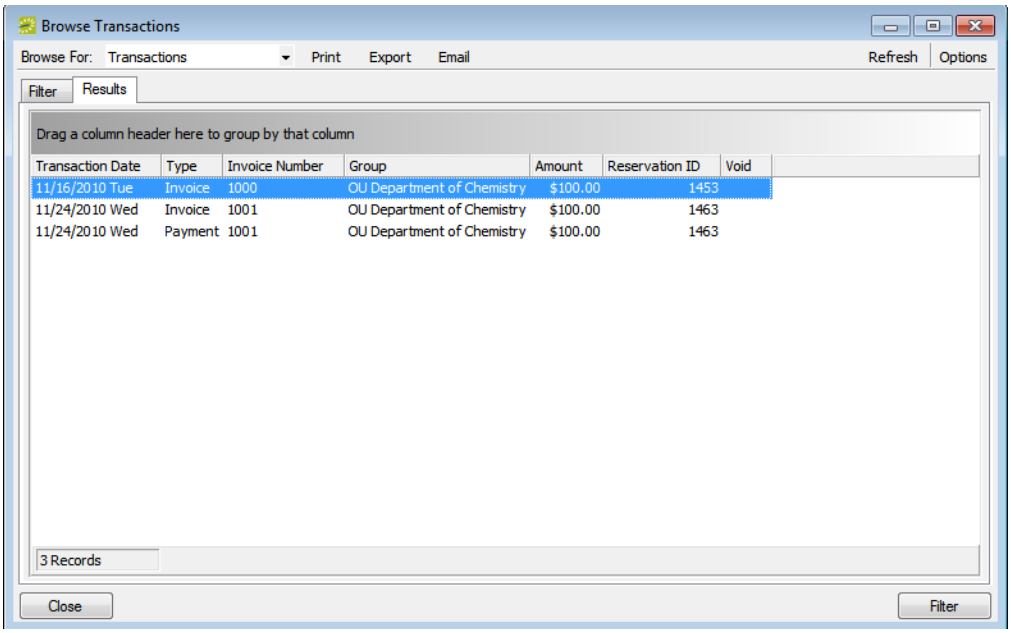


Filter Summary
Reservation
Reservation: Bill To Contact equals 'OU Department of Chemistry'
Reservation: Bill To Group equals 'USDA'

4. Optionally, click Options and edit the default values for one or more additional search options—Date/Time Filter, Number of Records to Return, and Specific Room Filters.
5. Optionally, click Options and edit the default value the Number of Records to Return search option.
6. Click Get Data or Refresh.

   The search results are displayed on the Results tab.

Figure 9-18: Browse Transactions window, Results tab



7. Optionally, do one or more of the following:

   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - Select a search result entry for an invoice, and then click Email to open a pre-addressed SMTP email to the group that is associated with the invoiced reservation. Complete and send the email as you would normally. (The invoice is sent as an attachment.) See “Sending Email from EMS” on page 360.
   - Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
   - Click Refresh to requery the database based on the current search criteria.

8. Click Close.

   Any changes that you made to the search results columns (position and width) remain in effect for any other searches that you carry out. If you want to reset the columns to their default values, see “Resetting Column Settings” on page 353.

Working with Transactions

Working with transactions in EMS consists of entering the transaction correctly, and if needed voiding a transaction. You can:

- Enter a deposit and void a deposit.
- Enter a payment and void a payment.
- Enter an adjustment and void an adjustment.
- Enter a refund and void a refund.

The steps for entering the different types of transactions are specific to the transaction. The steps for voiding a transaction are identical, regardless of the transaction type.

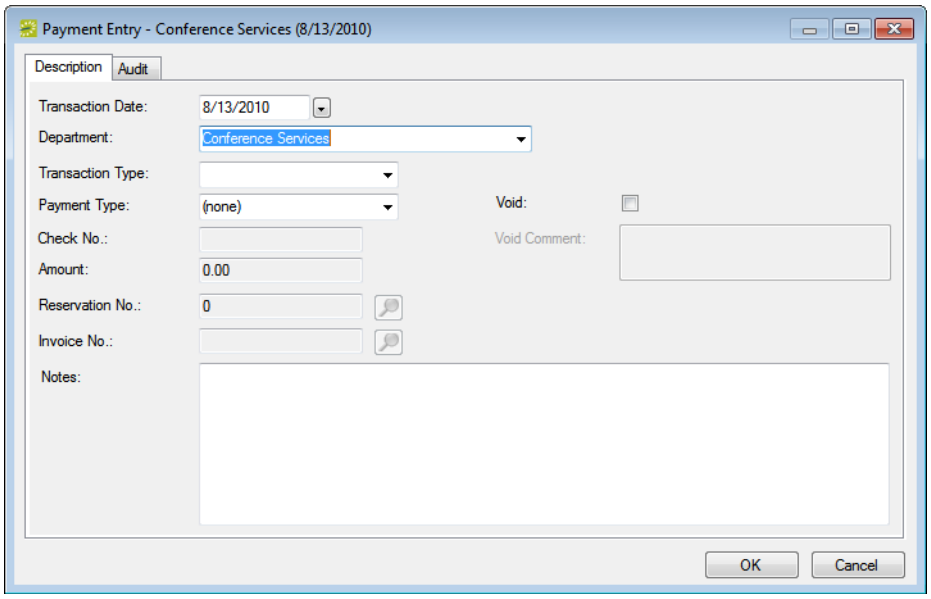
If needed, you can first search for a transaction to ensure that it has not already been carried out. See "Working with Transactions" on page 335.

To enter a deposit or damage deposit for a reservation

1. Do one of the following:
   - Open the reservation in the Navigator (see "Opening a reservation in the Navigator" on page 71), and on the Transactions tab, click New > Payment.
   - On the menu bar, click Billing > Payments > Payment Entry, and then on the Payment Entries window, click New.

   The Payment Entry dialog box opens.

Figure 9-19: Payment Entry dialog box



2. Enter the deposit information.

Field	Description
Transaction Date	The default value is the current day's date. You can modify this value if needed.
Department	Select the department.
Transaction Type	Select the transaction type—Damage Deposit, Deposit (Reservation), or Deposit (Bookings). • A Deposit (Reservation) is best suited for reservations, with one or more bookings, that are to be invoiced in their entirety upon completion of the event. • A Deposit (Bookings) is best suited for reservations with multiple bookings, for example, an event with multiple occurrences spanning several months, that is to be billed monthly. A Deposit (Bookings) allows you to spread the deposit across multiple months so that only a portion of the deposit is consumed and applied to the invoice that is generated monthly. In this scenario, a large deposit that is entered as Deposit (Reservation) would be consumed in its entirety by the first invoice that is generated.
Payment Type	Select the payment type.
Check No.	Enter a check number if you selected "Check" as the payment Type.
Amount	Enter the amount of the deposit.
Reservation No.	Automatically populated if you opened the Payment Entry dialog box from the Transaction tab in the Navigator; otherwise, enter a reservation number or click the Search icon to open the Reservations window and search for a reservation.
Invoice No.	N/A as deposits are applied before an invoice is generated. The invoicing process totals the charges for the specified date range, consumes any applied *reservation* deposits, and results in a net balance due for the invoice. The invoicing process does not consume any Damage deposits.
Notes	Optional. Enter any other comments or statements that explain or clarify the deposit.

3. Click OK.

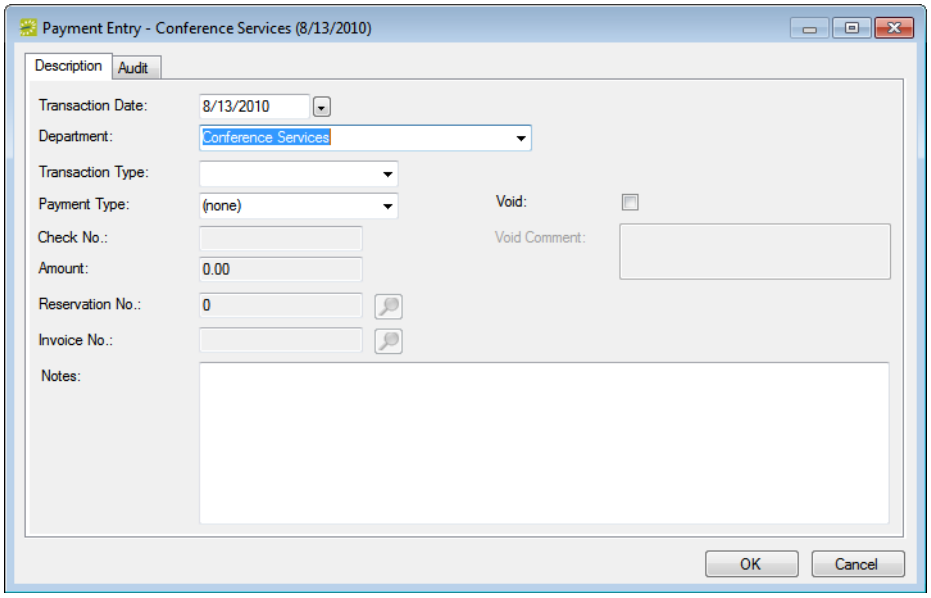
   The Payment Entry dialog box closes. The transaction information is displayed on the Transactions tab for the reservation.

To enter a payment or pre-payment

1. Do one of the following:
   - Open the reservation in the Navigator (see "Opening a reservation in the Navigator" on page 71), and on the Transactions tab, click New > Payment.
   - On the menu bar, click Billing > Payments > Payment Entry, and then on the Payment Entries window, click New.

   The Payment Entry dialog box opens.

Figure 9-20: Payment Entry dialog box



2. Enter the payment information.

Field	Description
Transaction Date	The default value is the current day's date. You can modify this value if needed.
Department	Select the department.
Transaction Type	Select the transaction type—Payment or Pre-payment. **Note:** Remember that pre-payments act just like deposits in that they are applied to a reservation and are applied to an invoice reducing the balance due. Payments are applied to an invoice.
Payment Type	Select the payment type.
Check No.	Enter a check number if you selected "Check" as the payment Type.
Amount	Enter the amount of the payment.

Field	Description
Reservation No.	• If you selected Payment as the Transaction Type, then this field is not available as payments are applied against invoices, not reservations. • If you selected Pre-payment as the transaction type, then the field is automatically populated if you opened the Payment Entry dialog box from the Transaction tab in the Navigator; otherwise, you must enter a reservation number or click the Search icon to open the Reservations window and search for a reservation.
Invoice No.	• If you selected Pre-payment as the Transaction Type, then this field is not available as pre-payments are applied before an invoice is generated. • If you selected Payment as the Transaction Type, then you must enter an invoice number in this field, or click the Search icon to open the Invoices window and search for an invoice.
Notes	Optional. Enter any other comments or statements that explain or clarify the payment.

3. Click OK.

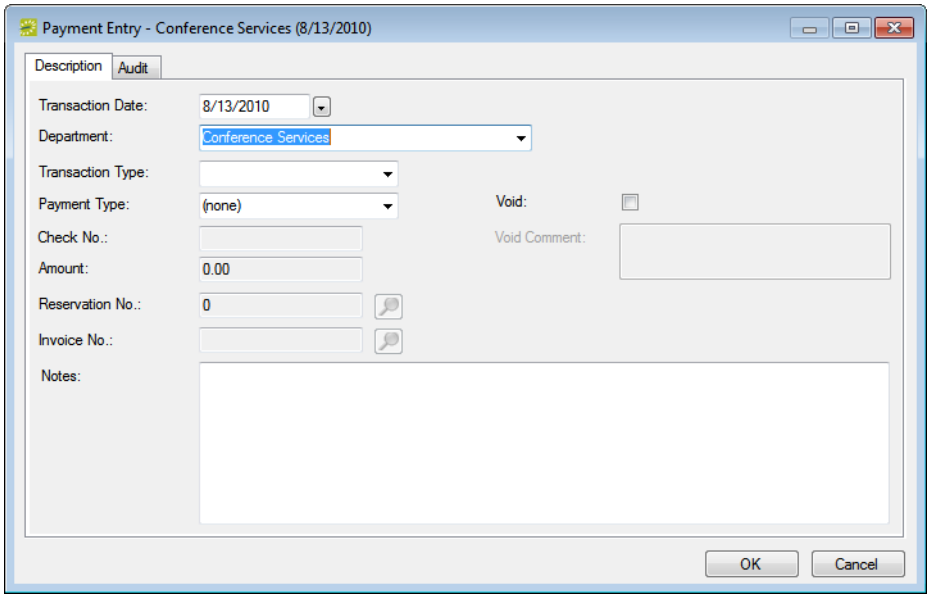
   The Payment Entry dialog box closes. The transaction information is displayed on the Transactions tab for the reservation.

To enter an adjustment for an invoice

1. Do one of the following:
   - Open the reservation in the Navigator (see “Opening a reservation in the Navigator” on page 71), and on the Transactions tab, click New > Payment.
   - On the menu bar, click Billing > Payments > Payment Entry, and then on the Payment Entries window, click New.

   The Payment Entry dialog box opens.

Figure 9-21: Payment Entry dialog box



2. Enter the adjustment information.

Field	Description
Transaction Date	The default value is the current day’s date. You can modify this value if needed.
Department	Select the department.
Transaction Type	Select the transaction type—Adjustment.
Payment Type	Select the payment type.
Check No.	Enter a check number if you selected “Check” for the payment type.
Amount	Enter the amount of the adjustment. To decrease the invoice by the indicated amount, enter a minus sign (-) before or after the amount.
Reservation No.	N/A as adjustments are applied to invoices.
Invoice No.	You must enter an invoice number or click the Search icon to open the Invoices window and search for an invoice

Field	Description
Notes	Optional. Enter any other comments or statements that explain or clarify the adjustment.

3. Click OK.

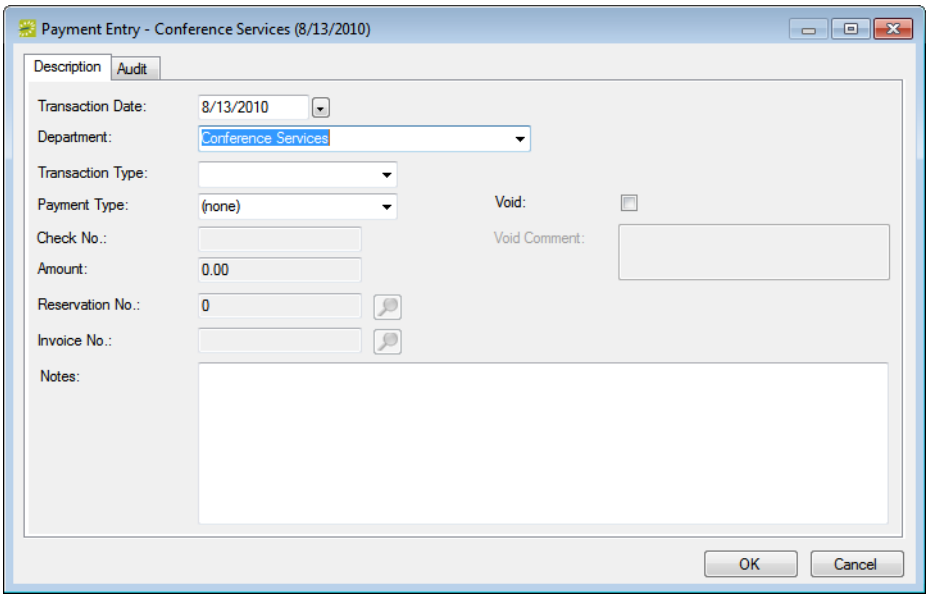
   The Payment Entry dialog box closes. The transaction information is displayed on the Transactions tab for the reservation.

To enter a refund

1. Do one of the following:
   - Open the reservation in the Navigator (see "Opening a reservation in the Navigator" on page 71), and on the Transactions tab, click New > Payment.
   - On the menu bar, click Billing > Payments > Payment Entry, and then on the Payment Entries window, click New.

   The Payment Entry dialog box opens.

Figure 9-22: Payment Entry dialog box



2. Enter the refund information.

Field	Description
Transaction Date	The default value is the current day's date. You can modify this value if needed.
Department	Select the department.
Transaction Type	Select the transaction type—Refund.

Field	Description
Payment Type	Select the payment type.
Check No.	Enter a check number if you selected “Check” as the payment type.
Amount	Enter the amount of the refund.
Reservation No.	N/A as refunds are applied to invoices.
Invoice No.	You must enter an invoice number or click the Search icon to open the Invoices window and search for an invoice
Notes	Optional. Enter any other comments or statements that explain or clarify the refund.

3. Click OK.

   The Payment Entry dialog box closes. The transaction information is displayed on the Transactions tab for the reservation.

To void a transaction

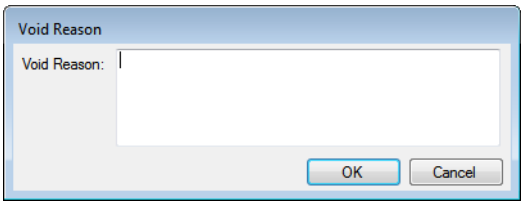
You can void a transaction for a reservation from the Transactions tab, or you can void a transaction from the Payment Entries window.

To void a transaction from the Transactions tab

1. Open the reservation in the Navigator. (See “Opening a reservation in the Navigator” on page 71.)
2. Open the Transactions tab, and on the Transactions tab, select the transaction that is to be voided (CTRL-click to select multiple transactions), and then click Void.

   A Void Reason dialog box opens.

Figure 9-23: Void Reason dialog box



3. Enter the reason for voiding the transactions, and then click OK.

   The Void Reason dialog box closes and a message opens indicating that the transaction has been voided.

4. Click OK.

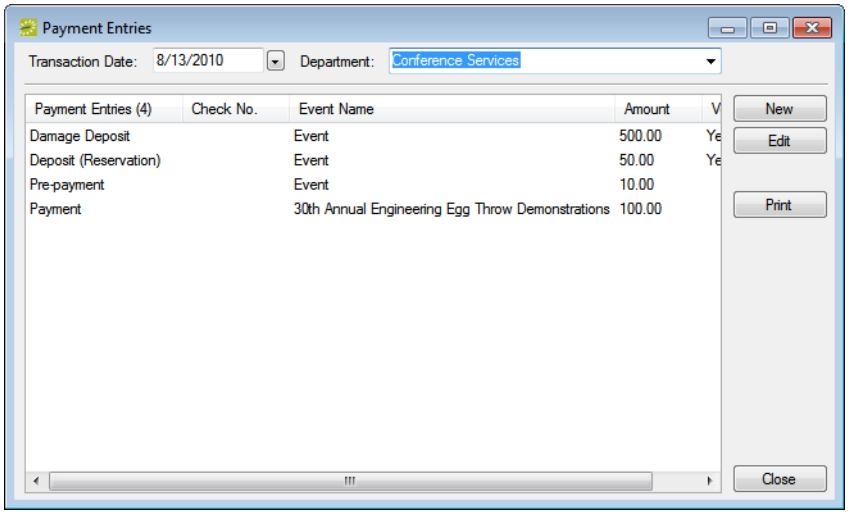
   The Void Transaction message closes. The Void column is set to Yes for each of the voided transactions in the Navigator.

To void a transaction from the Payment Entries window

1. On the menu bar, click Billing > Payments > Payment Entry.

   The Payment Entries window opens. This window lists all transactions (voided and non-voided) that were ever made in your EMS system for a selected department on a selected date.

Figure 9-24: Payment Entries window



2. Select the date (the default value is the current day's date) and the department for which you are voiding the transaction.

   The Payment Entries window is updated with the list of payments that meet the date and department criteria.

3. Select the transaction that is to be voided, and then click Edit.

   The Payment Entry dialog box opens. This window details specific information for the selected transaction. (See Figure 9-19 on page 335.)

4. Click Void, and, in the Void Comment field, enter a reason for voiding the transaction.

5. Click OK.

   The Payment Entry dialog box closes. You return to the Payment Entries window. The Void column is set to Yes for the voided transaction.

Generating an EMS Billing Report

All EMS Billing reports are available under the Billing option on the menu bar. For any EMS report, you can specify the parameters, options, and format for the report, or you can generate the report according to *memorized* settings. (For detailed information about a memorized report, see "Memorized report" on page 278.) Not all reports require the same parameters, nor do they all have the same options available. In addition, you can generate different reports in different formats.

For brevity and ease, the parameters that are available for each report are not detailed in this section. If you need assistance in generating a report, contact your EMS administrator for assistance.

To generate a report

1. On the menu bar, click Billing to open the Billing menu, and then on the Billing menu, click the option for the report that you are generating. For example, to generate the Billing Worksheet report, click Billing > Invoices > Billing Worksheet.
2. On the Setup dropdown list, do one of the following:
   - To generate the report according to the filter settings that you want (parameters, options, and so on), leave user-specified selected, then go to Step 3.
   - To run the report with filter settings that have been saved, or *memorized*, select the memorized report, and then go to Step 4.

For detailed information about memorized reports, see "Memorized report" on page 278.

3. Specify the report parameters, options, and format. See:
   - "Invoices reports" on page 345.
   - "Reports" on page 345.
4. Optionally, do one or both of the following:
   - Click Print Preview.

     A preview of the report opens onscreen.
   - To print a hard copy of the confirmation, specify the number of copies that are to be printed, and then click Print.

5. Click Close.

   Unless you change the setup, all subsequent reports will be generated and printed according to the parameters and options that you have specified and in the format that you specified. If you want to save certain settings so that you do not have to adjust the filter settings every time you run the report, you can memorize the report. (See “Memorized report” on page 278.)

Invoices reports

Report	Description	Options
Billing Worksheet	Provides information on how bookings are to be invoiced. The report can include bookings within a date range, bookings within a reservation, or bookings within a date range inside a reservation. The report breaks down the charges in the same way as an invoice. The report also provides options for printing heading/footer messages and the detail for zero-dollar items.	See "Options tab" in "To generate an invoice" on page 316.

Reports

Report	Description	Options
Ageing Report	A list of outstanding invoices. Current invoices are listed first, followed by past due invoices organized by age. Ageing Reports are based on department.	• Show Unapplied Deposits—Deposits that are applied to reservations that have not been invoiced are displayed on the report.
Statements	A list of outstanding invoices for a selected group. Current invoices are listed first, followed by past due invoices organized by age.	• Report Title—Can create a title that is displayed at the top of the statement. • Header Message—Select a message from the pre-configured messages that is displayed at the top of every page of the statement. • Include Transactions On Zero Balance Invoices Within [ ]days—Statements that have a zero balance within the specified number of days are displayed. • Show Billing Reference Number—The billing reference number is displayed under the invoice information. • Show Purchase Order Number—The purchase order number is displayed under the invoice information. • Use Current Employee Address - The *current* address of the group is displayed on the statement. (This address might or might not be the address for the group when the reservation was made.)

Report	Description	Options
Transaction Report	Shows all the billing transactions during a specified period if you generate the report in the By Transaction Type by Date format. Simply enter the date or date range and click Print. The report lists the group, event name, reservation ID, transaction date, transaction type, invoice number, check number, and amount. **Note:** If the report is generated in Standard format, deposits are not shown as transactions if they have been absorbed by the generation of an invoice. **Note:** You can also generate the Transaction Report from within a reservation to see only transactions for the selected event and you can generate the Transaction Report from the Print option on the Payment Entries window. Click Billing > Payments > Payment Entry, and then on the Payment Entries window, click Print.	N/A
Voided Transaction Report	Lists the payments, deposits, or adjustments that were voided on a specific date or within a date range. Lists the group, event name, reservation ID, transaction date and type, invoice number (if applicable), check number, and amount.	N/A
Invoice Detail Report	Provides detail for all invoices that were generated within a given date range.	N/A
General Ledger Distribution	Shows the totals for invoices that were generated within a given date range. Entries are broken down by account, invoice, rate plan, or invoice. You can also generate this report in a Summary format.	• Invoices With Payments Only—Only invoices where payment has been received are posted on the report. • Show Applied Deposits/Prepayments—Applied deposits and prepayments are posted on the report. (An applied deposit is a deposit on a reservation that has been invoiced.)

Chapter 10
User Settings

As an EMS user, you can manage many aspects of your account to better suit your working needs.

This chapter covers the following topics:

- “Setting User Preferences and Default Values” on page 349.
- “Changing your Password” on page 351.
- “Resetting Window Coordinates” on page 352.
- “Resetting Column Settings” on page 353.
- “Defining your Views” on page 354.

Setting User Preferences and Default Values

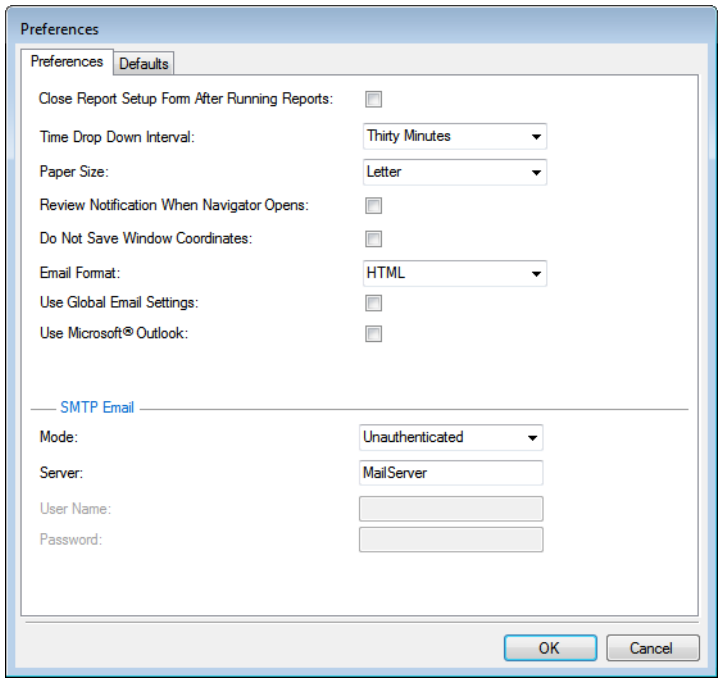
Preferences, like system parameters, are settings that affect the basic functioning of your EMS system. The difference is that system parameters are global settings that affect all users on the system, whereas preferences are applicable only to your user account. You can set the values for many preferences for your EMS instance to better suit your working needs. These preferences include whether a report window stays opens or closes automatically after you run a report, the time interval for Time dropdown fields, the format in which to send emails from your computer, as well as the default values for specific fields in the Reservation Wizard and other EMS client windows, and the application that is to open all drawings (.png, .jpg, .gif, and so on) that are attached to bookings in the Navigator.

To set user preferences and default values

1. On the menu bar, click Settings > Preferences.

   The Preferences dialog box opens. The Preferences tab is the active tab.

Figure 10-1: Preferences dialog box, Preferences tab



2. Modify your user preferences as needed.

Field	Description
Close Report Setup Form After Running Reports	Select this option if you want the window from which you generate a report to automatically close after you run the report. Do not select this option if you want the window to remain open.
Time Drop Down Interval	The time interval displayed on a Time dropdown list—i.e., if you select 30 minutes, then options on the dropdown list are displayed as 1:00 1:30, 2:00 and so on. All Time dropdown lists are 24 hour lists.
Paper Size	The size of the paper on which reports, confirmations, and invoices are printed.
Do Not Save Window Coordinates	All windows in EMS have default coordinates (a position) in EMS. If you move a window from its default position when working in EMS, but you want the window to open in its default position the next time the window opens, then select this option.
Email Format	The format in which your emails are sent—HTML or Plain Text
Use Global Email Settings	If you want to use the global email settings that your EMS administrator has defined, then select this option.
Use Microsoft Outlook	If this option is selected, then EMS uses Microsoft Outlook for your default email client. If this option is not selected, then EMS uses the SMTP Email settings specific to your account. (These settings are specified in the lower pane of the Preferences dialog box.)
SMTP Email	Contact your EMS administrator with assistance in specifying these values.

3. Open the Defaults tab, and set the default values for the indicated items.

Field	Description
Building	You can select all buildings, a specific building, or a specific view or area. The value that you select here automatically populates the Building dropdown list in the Reservation Wizard and other EMS client windows, for example, the Visitors window.
Status Event Type Event Name Event Time Reservation Source Time Zone	The values that you select here automatically populate the appropriate fields in the Reservation Wizard, and other EMS client windows. **Note:** The event name can be a maximum of 30 characters, including spaces.
Default Drawing Application	Click the Search icon to open the Find Drawing Application dialog box and select the program that is to open all drawings (.png, .jpg, .gif, and so on) that are attached to bookings in the Navigator.

4. Click OK to close the Preferences dialog box and apply your modified preferences and default values.

Changing your Password

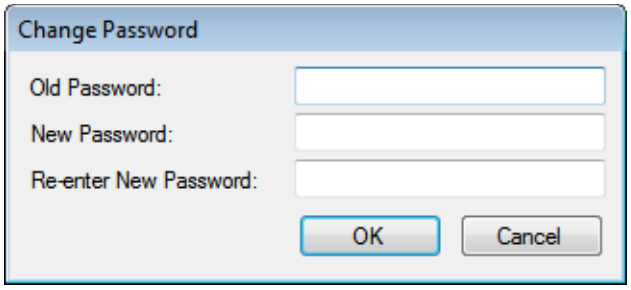
When your EMS administrator first sets up your user account, they define your password for you. You can change this password if you want.

To change your password

1. On the menu bar, click Settings > Change Password.

   The Change Password dialog box opens.

Figure 10-2: Change Password dialog box



2. Do the following:
   - In the Old Password field, enter your current EMS password.
   - In the New Password field, enter the new password.
   - In the Re-enter New Password field, enter your new password again, exactly as you entered it in the New Password field.
3. Click OK to close the Change Password dialog box.

   The next time that you log in to EMS, you must use your new password.

Resetting Window Coordinates

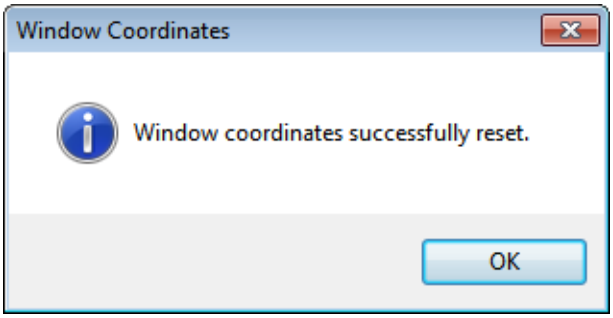
All windows in EMS have default coordinates (a size and position) in EMS. If you have moved one or more windows or resized one or more windows during an EMS session, and you want the windows to open in their default positions and sizes, you can reset the window coordinates to their default values.

To reset window coordinates

1. On the menu bar, click Settings > Reset Window Coordinates.

   The Window Coordinates dialog box opens.

Figure 10-3: Window Coordinates dialog box



2. Click OK.
3. If necessary, restart your EMS application.

Resetting Column Settings

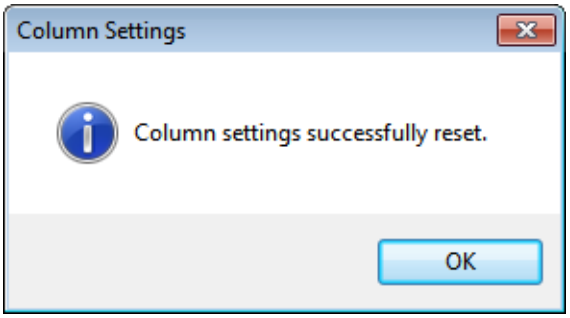
All columns in EMS have default values for their positions and widths in EMS. If you have changed the position, width, or both of one more columns during an EMS session, and you want the columns to open with their default values, you can reset the columns to their default values.

To reset column settings

1. On the menu bar, click Settings > Reset Column Settings.

   The Column Settings dialog box opens.

Figure 10-4: Column Settings dialog box



2. Click OK.
3. If necessary, restart your EMS application.

Defining your Views

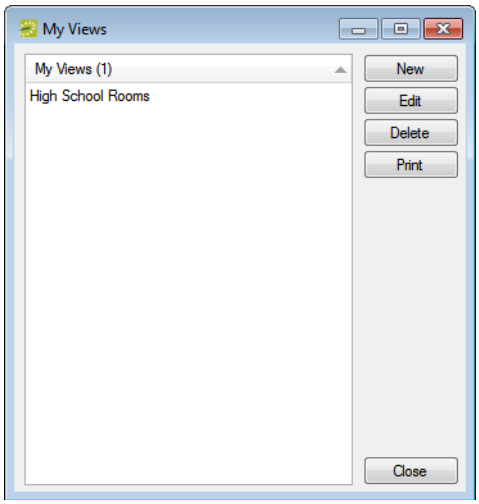
A *view* is simply a user-defined grouping of specific rooms. When searching for rooms in which to schedule events, you can select (all) buildings to search, a specific building, an area, or a view. If your job entails making multiple reservations for groups that always book events in specific rooms or locations, then to make your room search easier and more efficient, you can define the views that best meet your working needs. For example, if you are making multiple reservations for your school district's athletic teams, then you could define a view called School District 1 - Athletic, and this view would contain the following event locations—Baseball Field 1, Baseball Field 2, Gym 1, Gym 2, Pool, and so on.

To define your views.

1. On the menu bar, click Settings > My Views.

   The My Views window opens. This window lists all the views that *you* have defined.

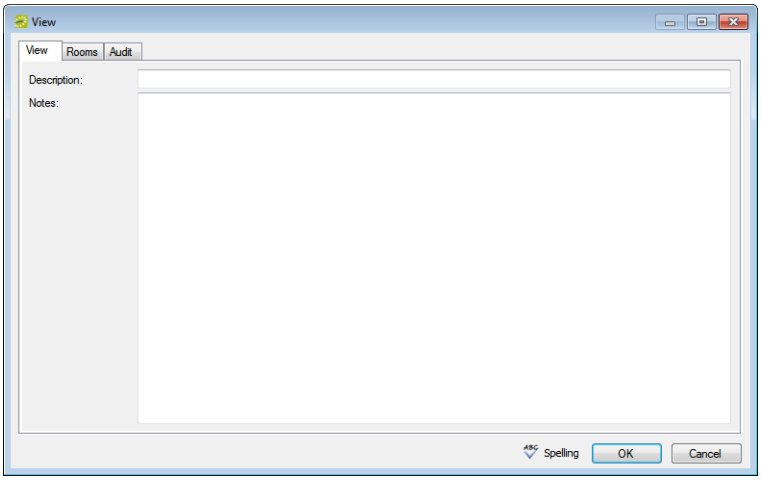
Figure 10-5: My Views window



2. Click New.

   The View dialog box opens. The View tab is the active tab. See Figure 10-6 on page 355.

Figure 10-6: View dialog box, View tab



3. In the Description field, enter a name or description for the view.

The name or description can be a maximum of 30 characters, including spaces.

---

4. Optionally, in the Notes field, enter any additional information that is pertinent for the view.
5. Open the Rooms tab, and do one or both of the following:
   - Select (all) buildings, a specific building, a view, or an area for which to search for rooms to include in the view.

The views that are available are not only all the views that you have defined for this EMS database, but also, all the views that other users have defined for this EMS database.

   - Leave the Room Type set to the default value of (all), or select a specific room type.

   As you select your search criteria, the list of rooms that meet the search criteria is dynamically updated.
6. In the Available list, select the room, or CTRL-click to select multiples rooms, that are to be included in the view, and then click the Move (>) button to move the available rooms to the Selected list.
7. Click OK.

   The View dialog box closes. You return to the My Views window with the newly defined view automatically selected.

Chapter 11
Other Reservation Functions

EMS contains several miscellaneous standalone functions to assist you in managing and maintaining reservations and bookings in your system as well as managing your general work requirements.

This chapter covers the following topics:

- “Recording Actual Attendance Numbers for Bookings” on page 359.
- “Sending Email from EMS” on page 360.
- “Viewing a History of Sent Emails” on page 363.
- “Generating Multiple Confirmations” on page 364.
- “Managing Attendees and Visitors” on page 367.

Recording Actual Attendance Numbers for Bookings

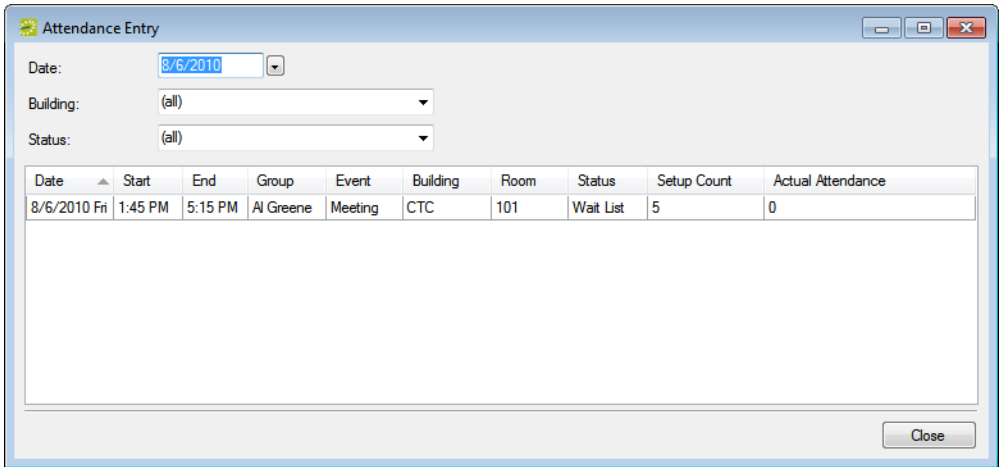
You use the Attendance Entry tool to view and record the actual attendance for *bookings*. (The tool does not address reservation-level attendance.) The actual attendance numbers that you enter do no replace the setup count (i.e., the estimated attendance) that you entered prior to an event. Reports that provide attendance information typically provide both the estimated attendance and the actual attendance.

To record actual attendance numbers for bookings

1. On the main menu, click Reservations > Other > Attendance Entry.

   The Attendance Entry window opens.

Figure 11-1: Attendance Entry window



2. In the Date field, select a date for which to record the booking attendance.

The date must occur on or before the current day's date.

3. Optionally, specify a building and/or a booking status to filter the list of booking results.
4. For each booking as needed, scroll to the Actual Attendance column, double-click in the column to select the currently displayed value, and then enter the actual attendance number in the column.
5. Click Close.

Sending Email from EMS

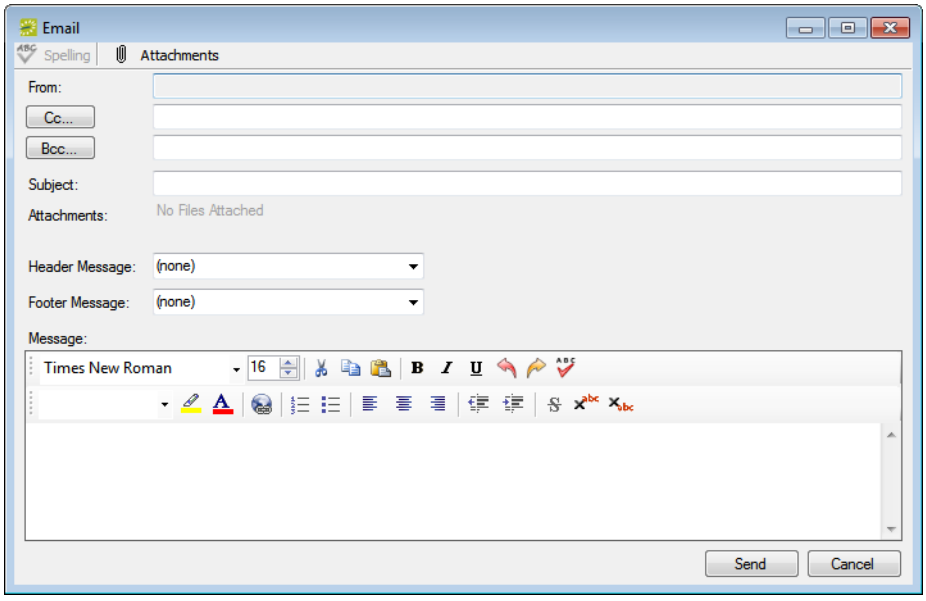
Multiple email options exist within EMS to email confirmations or invoices to groups or miscellaneous information to your EMS users. If your organization uses Microsoft Outlook, you can continue to use your respective email system within EMS to send confirmations and invoices or any other individual emails to EMS users or groups. To send bulk emails to groups within a browser (basic/advanced, transactions, calendar, and so on), however, you must use something called SMTP email. In addition, if your organization does not use Microsoft Outlook, SMTP email is used to send all email from EMS. EMS also provides an emailing function that you can use to send *generic* emails (emails that are not "tied" to a reservation confirmation, invoice, reminder, and so on) to any recipient of your choice.

To send a generic email, your user account must be configured with an email address and your user email preferences must also be configured. Contact your EMS administrator if you need assistance with this. See your EMS administrator or internal IT staff for information on how to enable SMTP email.

To send an email from within an EMS browser

1. Select a search result entry, and then click Email to open a pre-addressed SMTP email to the group that is associated with the selected reservation.

Figure 11-2: SMTP email from a browser



2. Enter the necessary information in the From, Subject, Message and other fields.

You can use the options on the Formatting toolbar to format the body of the email message.

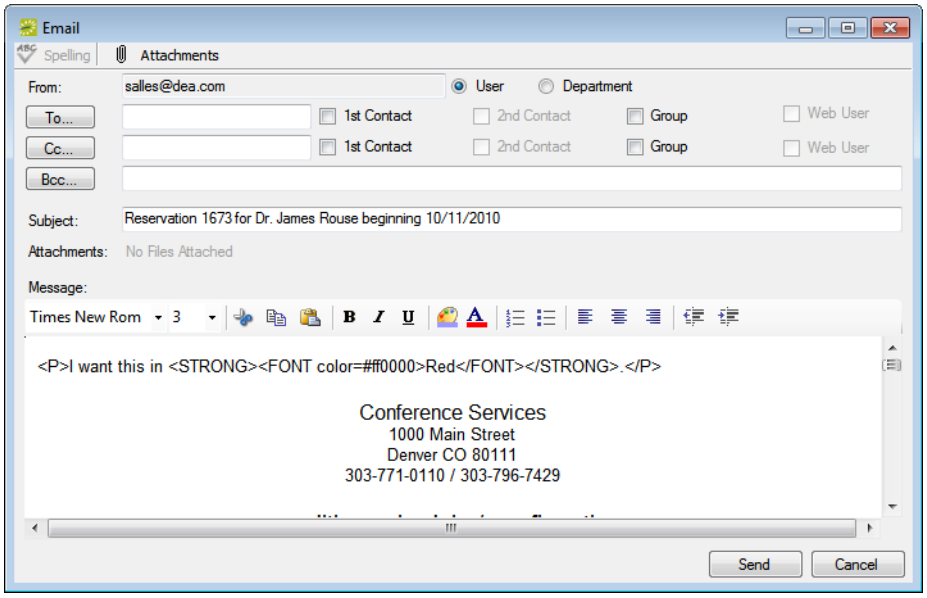
3. Optionally, to attach a file, click Attachments at the top of the window.
4. Click Send.

To send a confirmation or invoice using SMTP email

1. Click Email on the Confirmation dialog box or on the onscreen preview of the invoice.

   An Email window that displays the confirmation or invoice in the body opens.

Figure 11-3: SMTP email window for a confirmation



2. Select the recipients for the email, and if needed, attach any files to the email.
3. Click Send.

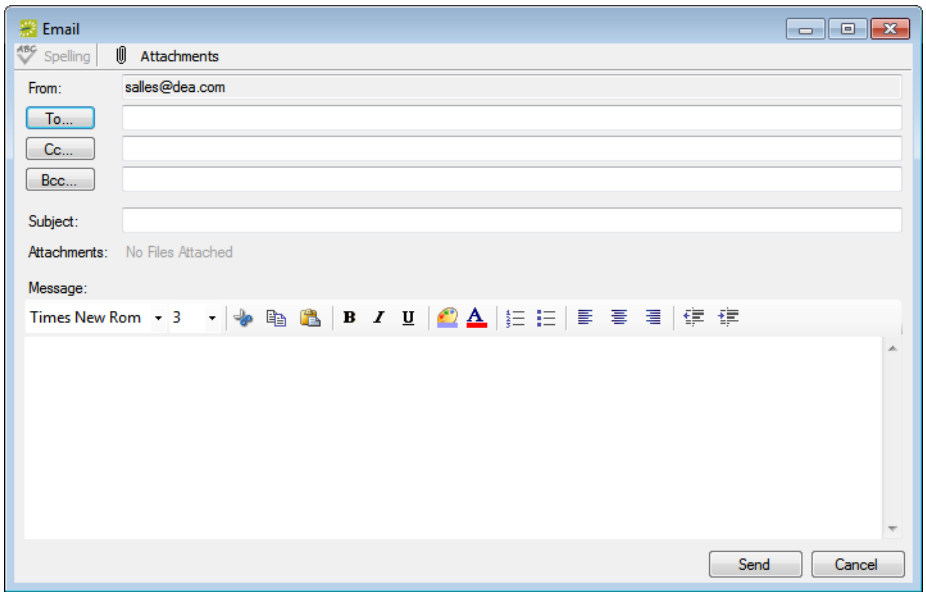
To send a generic email

1. On the toolbar, click the Email icon

.

   A generic email form opens. The From field is automatically populated with the email address specified for your user account.

Figure 11-4: Generic email form



2. Enter the necessary information in the To, Subject, Message, and other fields.

You can use the options on the Formatting toolbar to format the body of the email message.

3. Optionally, to attach a file, click Attachments at the top of the window.
4. Click Send.

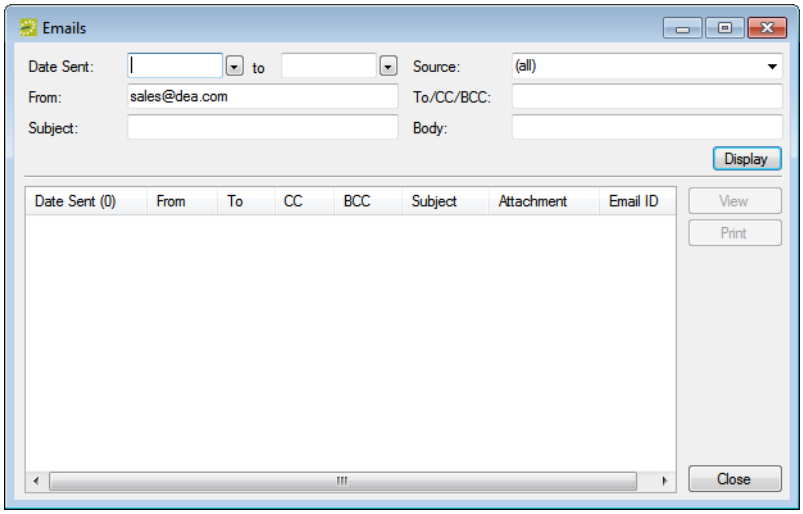
Viewing a History of Sent Emails

You can use the Email History function to review a list of all emails that have been sent from within your organization's EMS system via SMTP (not via Microsoft Outlook), including confirmation emails, report emails (which includes invoices, reminders, queries, web requests, and group and contact information), and generic emails. You can also view the contents of sent emails and print sent emails

To view a history of sent emails

1. On the main menu, click Reservations > Other > Email History.
2. The Emails window opens. The From field is automatically populated with the email address for your user account, but you can always change this value.

Figure 11-5: Emails window



3. Enter the search criteria for the emails, and then click Display.

The Report option collectively refers to invoices, reminders, queries, web requests, and group and contact information.

All of the emails that meet the search criteria are displayed in the bottom pane of the Emails window.

4. Optionally, do one or more of the following:
   - To view an email, select the mail in the search results list, and then click View.
   - To print the complete results list, click Print > List.
   - To print the contents of one or more emails in the results list, select the mail (CTRL-click to select multiple emails), and then click Print > Emails.

Generating Multiple Confirmations

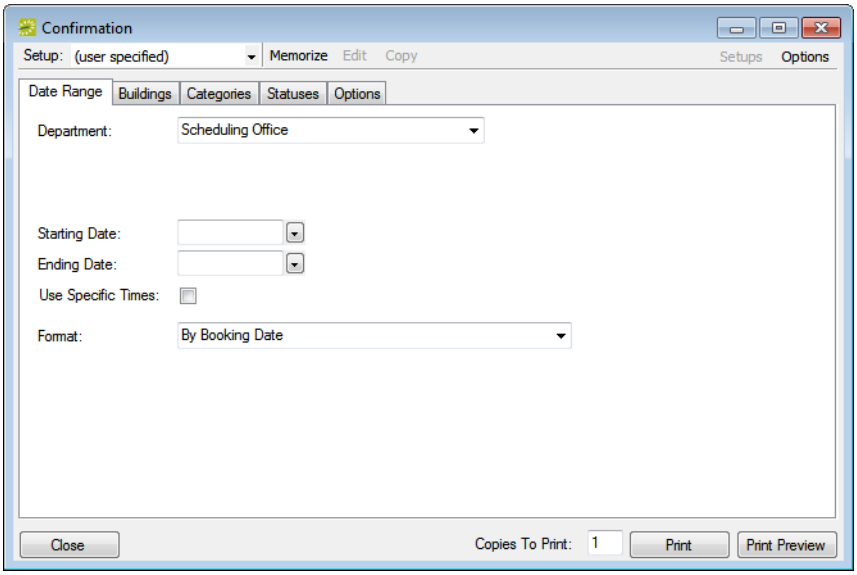
A *confirmation* is a document that details the critical information for a reservation—the date, the time, the location, the scheduled resources, and so on. Through the Navigator, you have the option of generating a single confirmation, either manually or automatically. (See Chapter 7, “Confirmations,” on page 265.) A miscellaneous reservation function is also available for manually generating multiple confirmations at the same time. When you generate multiple confirmations, all the confirmations are contained in a single file, but each confirmation begins at the top of a new page. All the confirmations are “sent” by the same office, all the confirmations use the same format (By Booking Date, By Date Added, or By Date Changed) and all the confirmations use the same print options (Confirmation Title, Header Message, and so on); however, each confirmation can contain unique information for the buildings, statuses, and/or categories that are detailed in the confirmation. Because multiple confirmations are for multiple recipients, you cannot mass email these confirmations. Instead, you can only print them, and then manually mail them. You can specify the settings for multiple confirmations “from scratch,” or you can copy an existing confirmation format, and modify it as needed.

To generate multiple confirmations

1. On the menu bar, click Reservations > Other > Confirmations.

   The Confirmation dialog box opens. The Date Range tab is the active tab.

Figure 11-6: Confirmation dialog box, Date Range tab



The remainder of this procedure describes how to specify confirmation settings “from scratch.” You can also specify confirmation settings by copying existing settings and modifying the settings. Select the existing settings that you want to copy on the Setup dropdown list, and then click Copy.

2. Specify the settings for your system's confirmations.

Table 11-1: Options on the Confirmation Settings dialog box

Field	Description
Date Range tab	
Department	The department name that appears at the top of a printed confirmation.
Starting Date Ending Date	The range of dates for which you are generating the confirmations.
Use Specific Times	Available only if the Starting Date is the same as the Ending Date. If this option is selected, then two fields are displayed on the Date Range tab in which you must specify the time range. After you specify the time range, click Options > Date/Time Filter, and indicate how the confirmation is to be limited—by bookings that start within the time range, or by bookings that occur within the time range.
Format	The format/organization of the confirmations—By Booking Date, By Date Added, or By Date Changed.
Buildings tab—Select the specific buildings that are to be included in the confirmation.	
Categories tab—Select the specific booking details that are to be included in the confirmation.	
Statuses tab—Select the specific statuses that are to be included in the confirmation.	
Options tab—Format settings for a printed confirmation.	
Confirmation Title	Appears bold and centered at the top of the confirmation.
Header Message Footer Message	Pre-configured blocks of text that appear in the header and footer of the confirmation. **Note:** Your EMS administrator configures these values. Contact your administrator if you need assistance with adding or modifying a value.
Paper Size	The size of the paper on which the confirmation is printed. Values are Letter, Legal, and A4.
Print Comments	Include the reservation's comments in the printed confirmation.
Print Reminders	Include the reservations reminders in the printed confirmation.
Print Cancel Reasons	Include reasons for cancellation in the printed confirmation.
Print User Defined Fields	Include user-defined fields and their values in the printed confirmation.
Print Room Phone	Include the phone number for the room in which the event is being held in the printed confirmation.
Print Building Notes	Include any notes about the building in the printed confirmation.
Print Billing Reference Allocation	Include the billing reference numbers for the event as well as the percentage of charges that is allocated to each number in the printed confirmation.
Suppress Reserved Time	Hide the reserved time for the booking and show only the event time.
Suppress Location	Hide the location for the reservation in the printed confirmation.
Suppress Pricing	Do not show the reservation's room charges or resource charges in the printed confirmation.

Table 11-1: Options on the Confirmation Settings dialog box (continued)

Field	Description
Suppress Logo	Do no show your organization's logo in the printed confirmation.
Suppress Item Notes	Do not show notes for any booking items in the printed confirmation.
Suppress Item Special Instructions	Do not show special instructions for any booking items in the printed confirmation.l
Print PO Number Allocation	Include the PO numbers for the event as well as the percentage of charges that is allocated to each number in the printed confirmation.
Limit Bookings to Those With Details in Selected Categories	Show only those bookings in the printed confirmation that contain details for the categories that are selected on the Categories tab.

3. Do one or more of the following:

   - Click Memorize to save the settings as a memorized report so that you do not have to specify the settings every time you generate multiple confirmations. If you save the confirmation settings as memorized report, you can make the report public (available to all users in your EMS database) or private (available only to you.)
   - Click Print Preview to open an onscreen preview of the printed confirmation. A variety of options are available from this preview, including the options to, to export the confirmation to a .pdf and to print the confirmation.

Monday, April 05, 2010
8:00 AM - 5:30 PM MSI Final Exam (Web Conflict) Lab MAC
Reserved: 7:00 AM - 6:30 PM

   - To manually print the confirmations, modify the number of copies to print as needed in the Copies to Print field (the default value is 1), and then click Print.

     A Print dialog box opens in which you can specify information such as the printer to use, the page range. and so on. Click Print in this dialog box to manually print the confirmations.

Managing Attendees and Visitors

EMS provides standard functionality for managing *registered* attendees and visitors, which are attendees and visitors who have been added as an attendee type category to a booking. You can search for registered attendees and visitors, and you can check in and check out registered attendees and visitors. The optional Visitor Management module provides functionality for managing unregistered attendees and visitors. If your organization has purchased and installed this module, you can also check in unregistered visitors to an event, check out unregistered visitors from an event, print badges for all attendees and visitors (registered and unregistered), and import a list of attendees using the Add Booking Details wizard in the Navigator.

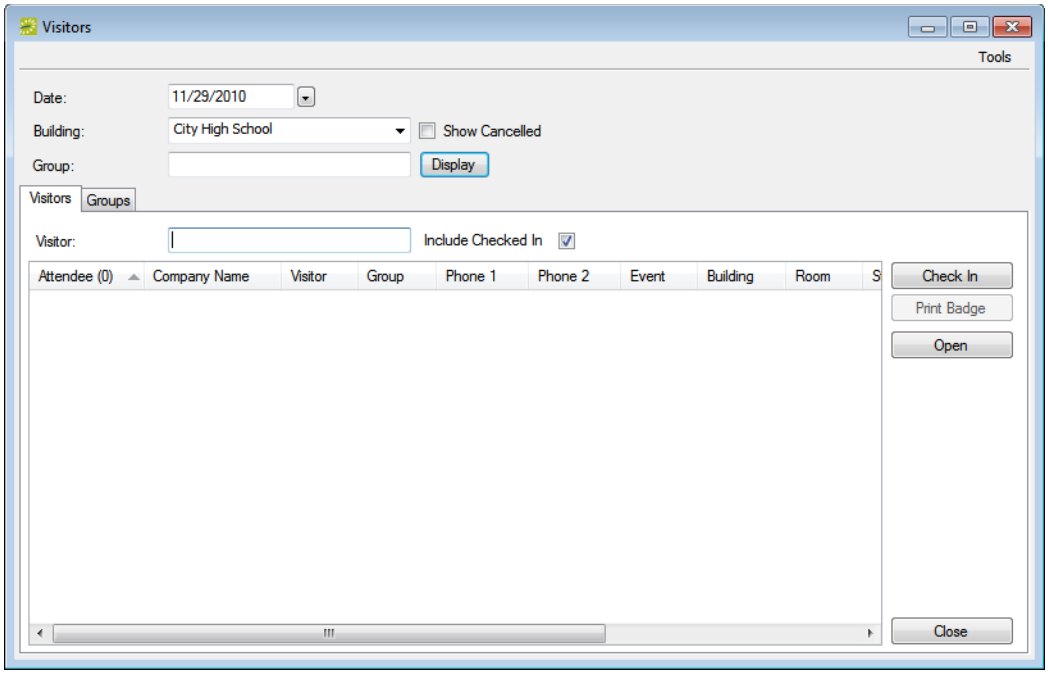
To manage registered attendees and visitors

1. On the menu bar, click Reservations > Other > Visitors.

   The Visitors window opens.

2. If needed, open the Visitors tab.

Figure 11-8: Visitors window, Visitors tab



3. Specify one or more of the following for your search criteria:
   - Date field—The default value is the current day's date.
   - Building—Select (all) buildings, a specific building, an area, or a view to search.
   - Show Cancelled—Select this option to search for registered attendees or visitors for canceled events.
   - Group—To search for registered attendees or visitors regardless of group type, leave this field blank; otherwise, to search based on a specific group, enter a search string in the field.
   - Visitor—To search for a specific attendee or visitor, enter a search string in the field.

*For either search field, your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "aca" search results can include **Aca**demic Affairs Office, Department of **Aca**demic Affairs, and so on.*

   - Include Checked In—Selected by default. Clear this option to search only for registered attendees and/or visitors who have not yet been checked in to their events.

4. Click Display.

   The list of registered attendees and/or visitors who meet the search criteria are displayed in the bottom pane of the Visitors window.

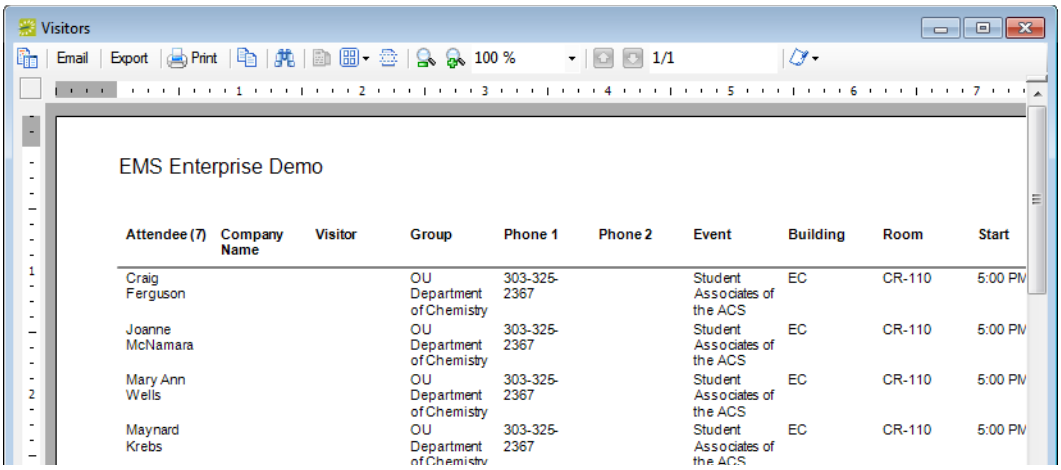
5. Optionally, select an attendee or visitor from the search results, and then do one or more of the following:
   - Click Open to open the reservation that contains the booking that the person is attending.
   - Click Check In to "check in" the attendee or visitor to the event. A date and timestamp is added to the attendee/visitor's record.
   - Click Check Out to "check out" the attendee or visitor from the event. A date and timestamp is added to the attendee/visitor's record.

Check Out is available only if the selected attendee/visitor has been checked into the event.

   - On the Tools menu, click Undo Check In to reverse the Checked In status for the attendee. (The Check In date and timestamp is removed from the attendee's/visitor's record and if needed, the attendee/visitor can be checked in again). Conversely, if an attendee or visitor has been checked out, click Undo Check Out to reverse the Checked Out status for the attendee/visitor.
   - On the Tools menu, click Export to export the list of attendees/visitors to a Microsoft Excel spreadsheet.

- On the Tools menu, click Print to generate an onscreen preview of the list of attendees/visitors. A variety of options are available from this preview, including the options to email the list, to export the list to a .pdf, and to list the confirmation.

Figure 11-9: Onscreen preview of a registered attendee/visitor list



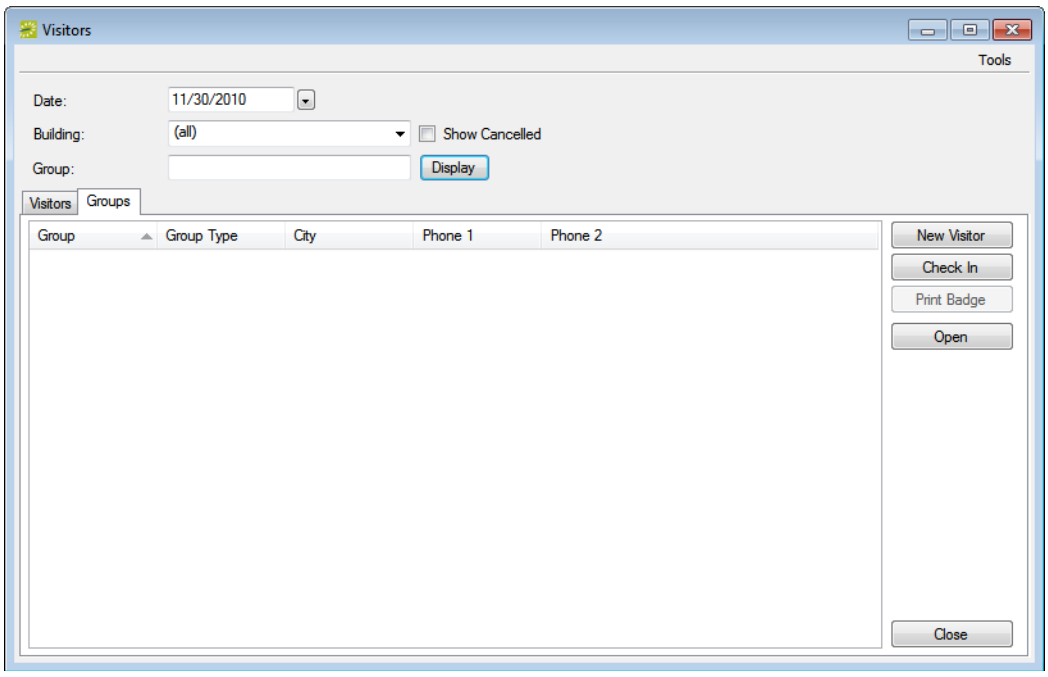
To check in/check out unregistered visitors for an event

1. On the menu bar, click Reservations > Other > Visitors.

   The Visitors window opens.

2. If needed, open the Groups tab

Figure 11-10: Visitors window, Groups tab



3. Specify one or more of the following for your search criteria:
   - Date field—The default value is the current day's date.
   - Building—Select (all) buildings, a specific building, an area, or a view to search.
   - Group—Enter some or all of the hosting group's name.

*Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "aca" search results can include **Aca**demic Affairs Office, Department of **Aca**demic Affairs, and so on.*

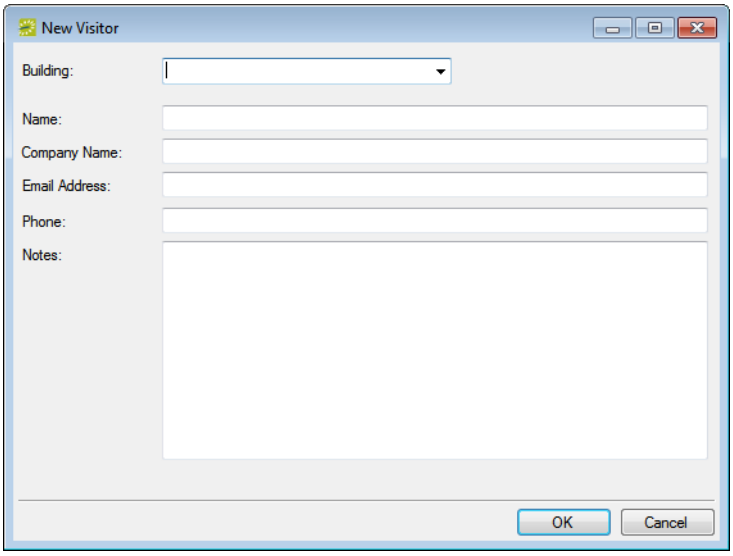
4. Click Display.

   The groups that meet your search criteria are displayed in the lower pane of the Visitors window.

5. Select the hosting group from the search results, and then click New Visitor.

   The New Visitor dialog box opens.

Figure 11-11: New Visitor dialog box



6. Enter the information for the new visitor, and then click OK.

   The Visitor dialog box closes. You return to the Visitors window with the group and newly configured visitor automatically selected.

All fields on this dialog box are required fields. The Building field should be automatically populated with the name of the building in which the event is scheduled; however, if you have set your preferences for buildings such that this building is not available to you, then the Building field cannot be populated with the correct value, and you cannot add the new visitor. (See "Setting User Preferences and Default Values" on page 349.

7. Repeat Step 5 and Step 6 as needed to add all the unregistered visitors to the event.

   "Unregistered Visitor" is displayed in the Event column for each unregistered visitor that is added to an event. The date and time that you add an unregistered visitor to an event is used as the Check In date and time for the visitor.

8. To check out an unregistered visitor, select the visitor, and then click Check Out.

To print visitor badges

1. On the menu bar, click Reservations > Other > Visitors.

   The Visitors window opens.

2. Locate the attendee as described in "To manage registered attendees and visitors" on page 367 or create the attendee record as described in "To check in/check out unregistered visitors for an event" on page 369.

3. Click Print Badge.

To import a list of attendees and visitors to an event

1. Create a tab-delimited file that contains the information (in the order listed) for the attendees/visitors that are being imported.

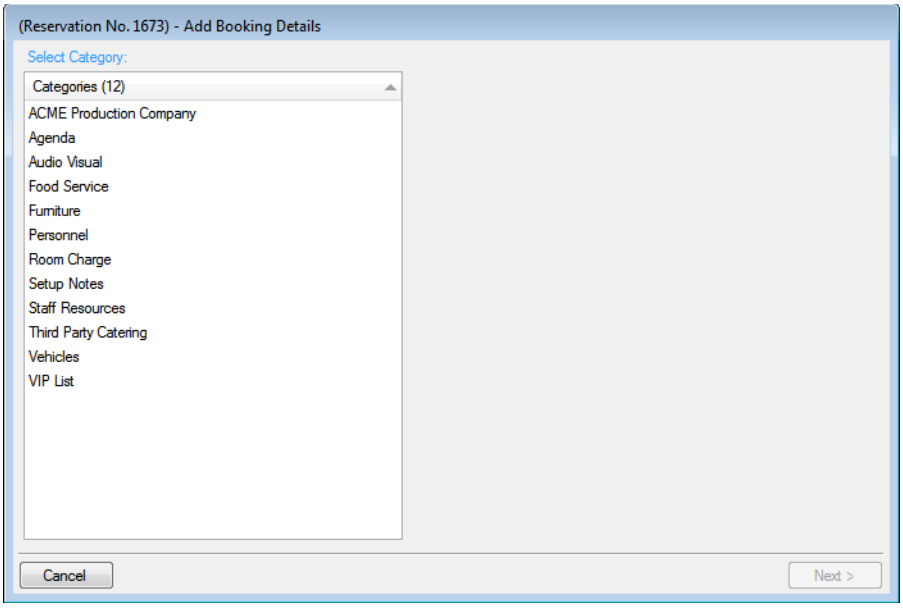
Field	Description	Required/Optional
Name	Text. 50 characters maximum.	Required
Company Name	Text. 50 characters maximum.	Optional
Email Address	Text. 255 characters maximum.	Optional
Phone	Text. 50 characters maximum.	Optional
Notes	Text. No maximum.	Optional
Visitor	True/False	

Each attendee/visitor must be a separate line entry. To see the required format for the tab-delimited file, on the Add Booking Details window, click Print Format.

2. Open the reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.
3. In the left pane of the Navigator, select the reservation for which the list of attendees/ visitors is being imported.
4. In the Bookings pane, click Tools, and then Click Add Booking Details Wizard.

   The Add Booking Details wizard opens.

Figure 11-12: Add Booking Details wizard



5. Select Attendees, and then click Next.

   The Add Booking Details wizard opens with a blank row for adding an attendee/visitor to the event.

Optionally, you can click Print Format to see the required format for the tab-delimited file,

6. Click Import.

   The Open File dialog box opens.

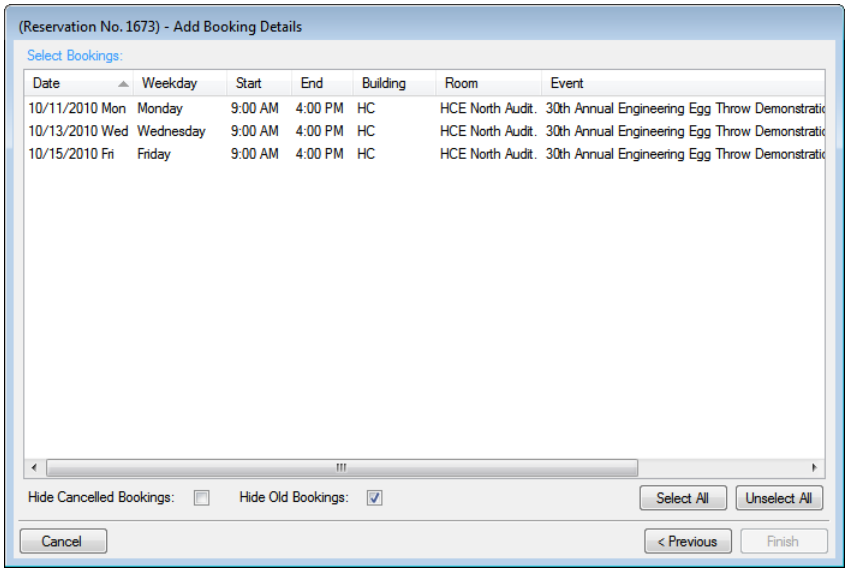
7. Browse to and select the attendee import file, and then click Open to import the file.

   The Add Booking Details wizard is updated with the imported attendee/visitor information. Each imported attendee/visitor is a separate line entry in the wizard.

8. Click Next.

   The Select Bookings window opens. This window displays all the bookings for the selected reservation with a date greater than or equal to the current day's date, *and* that do not already have the selected booking detail added.

Figure 11-13: Add Booking Details wizard, Select Bookings window



To show canceled bookings, clear Hide Cancelled Bookings. Conversely, to hide canceled bookings, select Hide Cancelled Bookings. To show all bookings regardless of date, clear Hide Old Bookings.

9. CTRL-click to select the bookings to which the details are being added, or click Select All to select all the displayed bookings in a single step, and then click Finish.

   A message opens asking you if you want to add more booking details.

10. Click No.

    A message opens indicating that the changes were made successfully.

11. Click OK to close the message and return to the Navigator.

    The booking detail (attendees) and its items (individual attendees/visitors) are displayed as folders under the Booking folder in the Navigator window.

Chapter 12
EMS Workplace

Organizations with a mobile workforce or flexible work arrangements often adopt a hoteling or hot-desking strategy—allotting workspace on an as-needed basis to accommodate more people in less space. EMS Workplace is a facility scheduling system for managing hoteling requirements, as well as the booking of meeting/event space and resources.

This chapter covers the following topics:

- "Managing Groups' Check In/Check Out Statuses" on page 377.
- "Configuring Hoteling Wizard Templates" on page 382.

Chapter 12
EMS Workplace

Managing Groups' Check In/Check Out Statuses

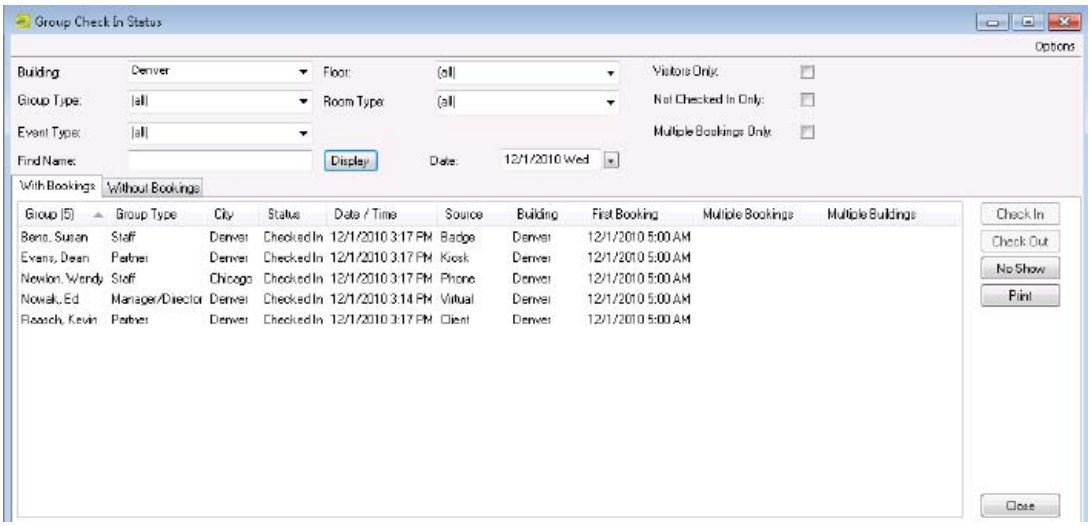
Employees (referred to as "groups" in this section) can check-in using a variety of active and passive EMS Workplace methods including Virtual EMS, the EMS Kiosk and your security badge system. You use the Group Check In Status tool to view the status of all employees, with or without bookings, that have checked into your building. In addition, options are available to check in/check out an individual and to manually "no show" employees that either have not checked-in or have checked into another building.

To manage groups' check in/check out statuses

1. On the menu bar, click Reservations > Hoteling > Check In Status.

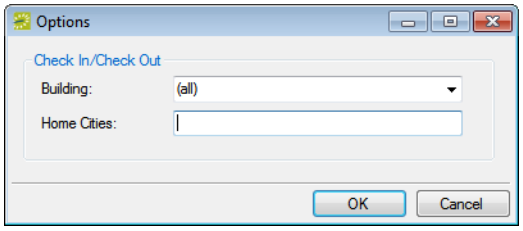
   The Group Check In Status window opens. If this is the *first* time that you have opened this window, then go to Step 2 to set the default values for your building and home city; otherwise, go to Step 3.

Figure 12-1: Group Check In Status window



2. In the upper right hand corner of the window, click Options to open the Options dialog box and select the default values for your home building and home cities.

Figure 12-2: Options dialog box



The home building is the building that selected groups are checked in to. You must separate multiple cities by commas, for example, Denver, Chicago, Atlanta. If Visitors Only is checked as one of the search options, then when you search for groups to verify their check in/check out status, the groups that have an address using any of these home cities are not returned in the search results. Only groups that do not have an address using any of these home cities and that meet all the search criteria are returned in the search results.

3. Specify the search criteria to search for the groups that are to be checked in to/checked out of a building.

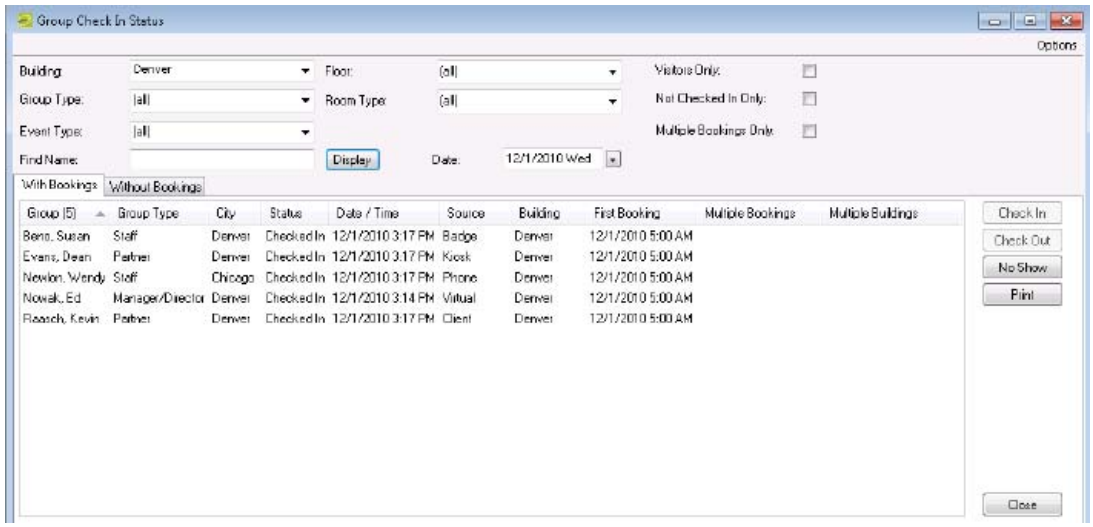
Option	Description
Building	The default value is (all), but you can select a specific building, an area, or a view.
Group Type	The default value is (all), but you can select a specific group type.
Event Type	The default value is (all), but you can select a specific event type.
Floor	The default value is (all), but you can select a specific floor.
Room Type	The default value is (all), but you can select a specific room type.
Visitors Only	Select this option only if you are searching for groups that do not have an address using any of the home cities that you have defined.
Not Checked In Only	Select this option to search only for groups that have not been checked into the building.
Multiple Bookings Only	Select this option to search only for those groups that have multiple bookings on the selected date.
Find Name	Optional field. Enter a search string by which to filter your search. The search is not case-sensitive, but it is limited to the exact order of characters in the string and the string must begin with the information for which you are searching. For example, if you enter “ed” as the search string, results can include **Ed**, **Ed**ward, **Ed**die, and so on, but not Ted or Fred.
Date	The default value is the current day’s date, but you can select a different value.

4. Click Display.

   All the groups that meet all the search criteria and that have a booking or bookings on the selected date are displayed on the With Bookings tab.

All the groups that meet all the search criteria but that do not have a booking or bookings on the selected date are displayed on the Without Bookings tab.

Figure 12-3: Group Check In Status window with results



5. Optionally, do one or more of the following:

   - To view all the bookings that a group has scheduled in the selected building, select the group on the With Bookings tab. The bookings are displayed on the <Building> Bookings tab.

Figure 12-4: Viewing bookings for a selected group

   - To check in a group, select the group, and then click Check In. “Checked In” is displayed in the Status column for the group on the With Bookings tab, the Date/ Time column are updated with the date and time that you clicked Check In, and “Client” is displayed in the Source column.

Remember, the group is checked in to the building that you set as your Home building, and the name of this building is displayed in the Building column.

- To check out a group, select the group, and then click Check Out. “Checked Out” is displayed in the Status column for the group on the With Bookings tab, the Date/ Time column are updated with the date and time that you clicked Check Out, and “Client” is displayed in the Source column.

If your EMS client is integrated with VEMS or EMS Kiosk, then employees can also be checked in/checked out through either of these applications as well, and the Source column indicates this accordingly.

- To end a booking for a group, select the group, and then select the booking on the on the <Building> Bookings tab and click End Now. Answer “Yes” at the prompt about ending the booking immediately.
- To open an event in the Navigator, select the event entry on the <Building> Bookings tab, and then click Go To.
- To manually “no show” a group of employees, continue to “To run the No Show wizard” on page 381.

To run the No Show wizard

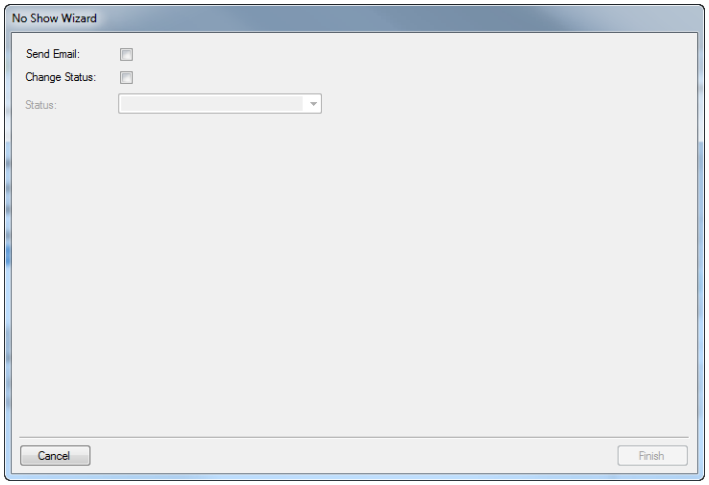
You use the No Show Wizard to email all groups that have not checked in to a specific building. It also provides options for changing the status of a group's bookings so that the group's workspace is released.

When you run the No Show wizard from the Group Check In Status window, you must manually create and send the email, and you must manually change the status. Both of these processes can be automated by creating a No Show Notification rule.Contact your EMS administrator for assistance.

1. Select the group on the With Bookings tab, and then click No Show.

   The No Show Wizard opens.

Figure 12-5: No Show Wizard



2. Do one or both of the following:

   - To send an email to the group, select Send Email to open an email form. Complete and send the email as normally would, and then click Finish.

You can include variables in the subject line as described in the Legend. For example, %2% is the code for the group name, so "Notification for %2%" would result in "Notification for Academic Affairs" being displayed in the subject line.

   - To change the status for the group's booking, select Change Status, and then on the Status dropdown list, select a new status, and then click Finish.

Configuring Hoteling Wizard Templates

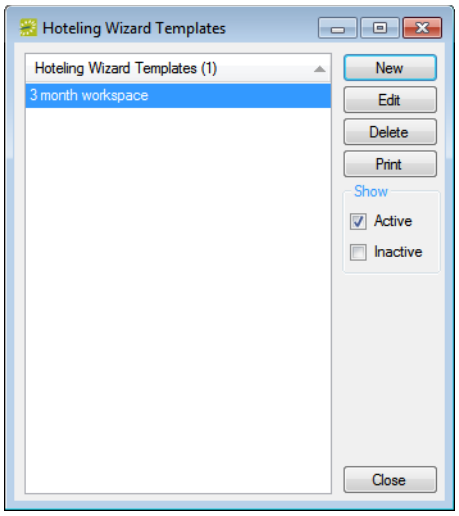
You configure *hoteling wizard templates* to streamline the reservation making process in the Reservation Wizard for common group reservation scenarios, for example, short term versus long term workspace reservations. You can specify various default settings on a hoteling wizard template including start/end times, search method (Standard or Best Fit), status, room type, event name and type, reservation source, and setup type. In addition, you can specify the number of days that should be automatically selected in the Reservation Wizard *after* you specify the start date for an event.

To configure a hoteling wizard template

1. On the menu bar, click Reservations > Hoteling > Hoteling Wizard Templates.

   The Hoteling Wizard Templates window opens. This window lists all the hoteling wizard templates that are currently configured in your EMS database and that have a status of Active.

Figure 12-6: Hoteling Wizard Templates window

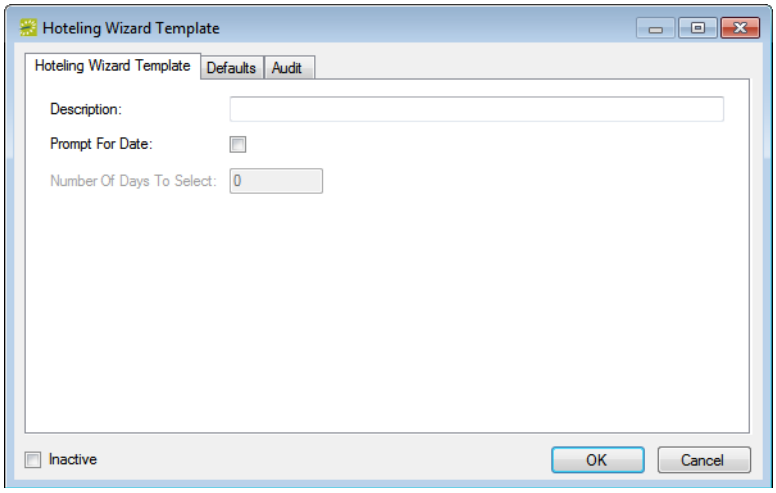


Optionally, to view all hoteling wizard templates in your EMS database, regardless of status, under Show, click Inactive.

2. Click New.

   The Hoteling Wizard Template dialog box opens. The Hoteling Wizard Template tab is the active tab.

Figure 12-7: Hoteling Wizard Template dialog box, Hoteling Wizard tab



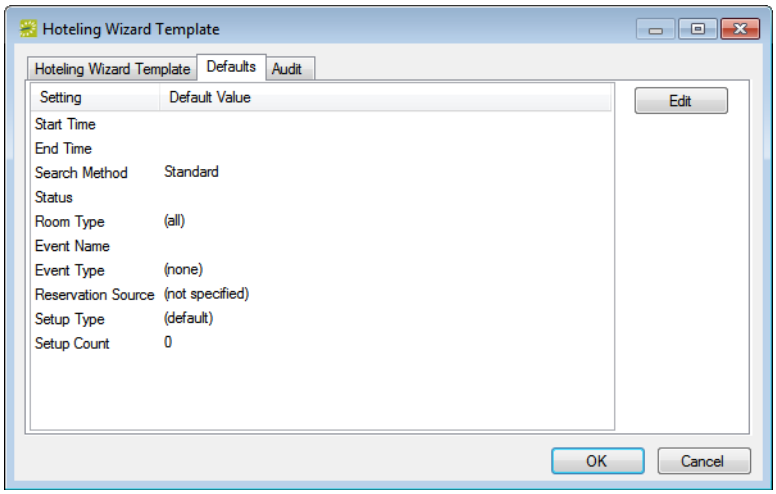
3. In the Description field, enter a description or name for the template.

The description or name can be a maximum of 30 characters, including spaces.

4. Optionally, select Prompt for Date if a reservationist/user is to be prompted with a start date for the reservation in the Reservation Wizard, and then in the Number of Days to Select field, enter the number of days that are to be automatically selected in the Reservation Wizard after the reservationist/user enters a start date for the event.

5. Open the Defaults tab, and do the following for each reservation variable for which you want to specify a default value:
   - Select the variable, and then click Edit to open a Set Default Value dialog box.
   - Enter the default value for the variable, and then click OK to close the Set Default Value dialog box and return to the Defaults tab.

Figure 12-8: Hoteling Wizard Template dialog box, Defaults tab



6. Click OK on the Hoteling Wizard Template dialog box.

   The Hoteling Wizard Template dialog box closes. You return to the Hoteling Wizard Templates window with the newly configured template automatically selected.

To make a reservation using your new Hoteling Wizard template, see "To make a group reservation from the Group Reservation window (EMS Workplace Only)" on page 66.

Chapter 13
Academic Planning (EMS Campus)

Academic Planning is an optional component of the EMS software that provides all the functionality that is necessary for Domain Schedulers to ensure that every class meets in a location and at a time that is acceptable to departments and professors. The system provides automatic room assignment within user-supplied parameters, integration with your SIS/ERP software, and efficient online collaboration tools. It also simplifies final exam scheduling and offers a selection of reports to streamline and analyze the room scheduling process. When added to the functionality that meeting and event staff already have access to, it provides a complete campus-wide space management package referred to as EMS Campus.

This chapter covers the following topics:

- "Overview of the Academic Scheduling Process" on page 386.
- "Importing an Academic Term" on page 389.
- "Defining and Editing Courses" on page 395.
- "Specifying Room Preferences" on page 423.
- "Assigning Room Preferences and Optimizing" on page 439.
- "Publishing a Term" on page 459.
- "Post-Publishing Phase" on page 471.
- "Using the Academic Tools" on page 505.
- "Generating Academic Reports" on page 523.

Overview of the Academic Scheduling Process

The academic scheduling configuration process is a multi-step process for enabling online communication between the Domain Scheduler and academic units, optimizing academic space use, and creating reservations in EMS Campus for academic courses. To use the full functionality of EMS Campus, it is important that you understand the academic scheduling specific terms that are used in EMS Campus and that you have a high-level understanding of the academic scheduling configuration process.

Academic scheduling specific terms used in EMS Campus

While meeting/event scheduling and academic scheduling have many features in common, EMS Campus uses terms that are specific to the academic scheduling configuration process.

Term	Definition
SIS	Generic acronym that is used in EMS Campus to represent a Student Information System. A system parameter controls the term “SIS,” and typically, your EMS administrator changes it to the system-specific term that your organization uses, for example, PeopleSoft, Banner, Colleague, and so on.
Academic Term	Defines a set of courses that is taught for a specific time period and is synchronized from the SIS.
Instructors	Instructors are imported from your SIS. Instructors determine who is teaching a course. They are also referred to as a “contact” after publishing.
Subject	Subjects are imported from your SIS. Subjects describe the topic of the course offered, for example, Math or English. Subjects are assigned to domains and academic units to designate who manages the courses that are taught within a subject.
Course Type	A course type is imported from your SIS. Course types categorize offerings, for example, a lecture or a lab. Course types are used for limiting the types of rooms in which a course can be taught and for reporting.
Domain	A level of organization within the institution that defines scheduling responsibility. The subjects defined within a domain determine the courses that are listed for the domain. The rooms that are defined within a domain determine all spaces that are potentially available for the courses. Functions such as synchronizing, optimizing, and running reports are carried out on a per domain basis. (A user who has this type of access is referred to as a Domain Scheduler.) The term “domain” is controlled by a parameter, and in many cases it is changed to “Campus” or “School” to better describe how course scheduling is divided.

Term	Definition
Academic Unit	A level of organization within the institution that defines responsibility for making schedule requests for a portion of a domain. The rooms that are defined within an academic unit give the unit the ability to require these spaces during optimization. The subjects that are defined within an academic unit determine the courses that are listed when filtering by the unit. Academic units are used when assigning permissions to Academic users and when filtering reports. The term “academic unit” is controlled by a parameter, and in many cases it is changed to “Department” or “Division” to better describe how course scheduling requests are divided.
Campus Web Client	The web-based interface that is typically used by academic units to review course schedule data and communicate changes to the domain scheduler. Any computer with a standard Internet browser can be used to access the Campus web client.
Course	Equivalent to a section in the SIS. The high level descriptor of a class, such as “CHEM 101 - Introduction to Chemistry I”, and other associated information such as instructor and estimated enrollment. After a course is published, it becomes the reservation-level information.
Course Date	A unique meeting pattern that is associated with a course, such as Tuesday/Thursday, 8:00 am to 9:20 am. Courses can have multiple course dates, such as when a class has both a lecture and a lab component that meet on different days of the week and at different times. After a course date is published, it becomes the booking-level information.
Cross-listed Courses	Courses are designated in the SIS as cross-listed for a variety of reasons; however, after such designation, there are implications in EMS. If two or more courses are cross-listed and have identical course date records (meeting patterns), then these two courses are linked and they are assigned the same room during optimization and final exam scheduling. They, in essence, share space by default.
Shared Space	If two courses that have identical course date records are to be scheduled in the same room at the same time, but they are not cross-listed in the SIS, then they can be designated as Shared Space in EMS. This designation links the courses so that they are assigned to the same room during optimization and final exam scheduling. This designation does not affect the SIS.

Academic scheduling configuration process

Before academic scheduling can be even be carried out, the following must be in place in your EMS database:

- Core data—building, rooms, instructors, course types, and subjects—must be synchronized with the SIS.
- Academic domains and academic units must be configured.
- Academic users must be configured with the correct security settings.
- Default values for academic parameters must be set.

See the EMS Setup Guide for detailed instructions about configuring and synchronizing this needed academic data.

Although the academic scheduling configuration process varies from one academic site to another, typically, the same two-phase process, the Academic Planning phase and the Post-Publishing phase, are carried out, and each process typically has the same high-level steps.

Academic Planning phase

The Academic Planning Phase is the first phase carried out in the academic scheduling process. This phase typically has the following high-level steps:

1. Importing an Academic Term. See “Importing an Academic Term” on page 389.
2. Defining and Editing Courses. See “Defining and Editing Courses” on page 395.
3. Settings Preferences. See “Specifying Room Preferences” on page 423.
4. Assigning rooms and optimizing. See “Assigning Room Preferences and Optimizing” on page 439.
5. Publishing terms in EMS. See “Publishing a Term” on page 459.

Post-Publishing phase

The Post-Publishing Phase is the second phase carried out in the academic scheduling process. This phase typically has the following high-level steps:

1. Reviewing reservations and resolving room assignments. See “Post-Publishing Phase” on page 471.
2. Creating a synchronization schedule. See “Post-Publishing Phase” on page 471.
3. Creating and publishing a final exam session. See “Post-Publishing Phase” on page 471.

This manual details how to carry out the academic scheduling process using the EMS Campus desktop client. For detailed information about carrying out the academic scheduling process using the EMS Campus Web Client, see the EMS Campus Web Client User’s Manual.

Importing an Academic Term

Section Contents

- Overview of Importing an Academic Term on page 391.
- Synchronizing an Academic Term on page 392.
- Synchronizing Courses on page 393.

Chapter 13
Academic Planning (EMS Campus)

Overview of Importing an Academic Term

The first step in the academic planning phase is to import a term. Importing an academic term consists of the following three steps:

1. A new term is created in the SIS, either by rolling forward a previous term, or by creating it from scratch. The term is then synchronized into EMS. See "Synchronizing an Academic Term" on page 392.
2. The Domain Scheduler synchronizes course data from the SIS into EMS Campus. See "Synchronizing Courses" on page 393.
3. Synchronized courses are reviewed before the term is made available to academic units. See "Using the Academic Tools" on page 505.

Synchronizing an Academic Term

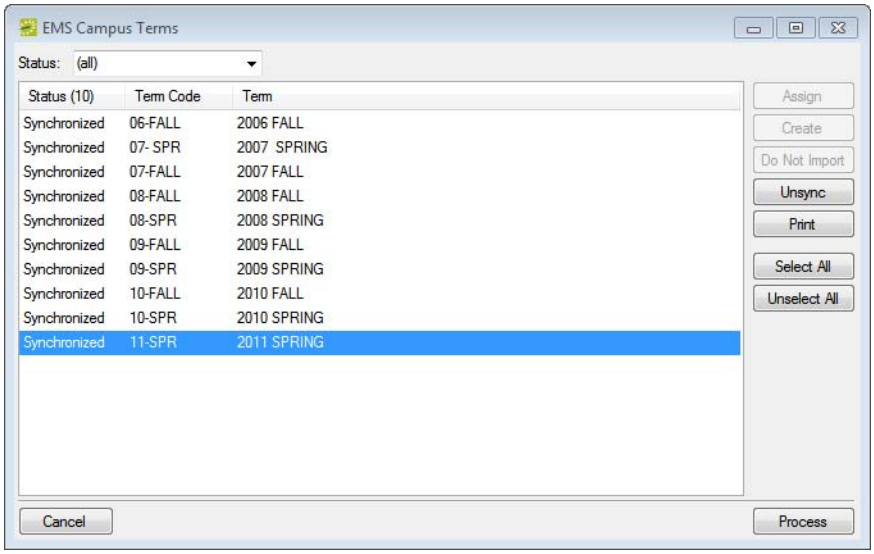
When you synchronize your SIS term data, all the SIS terms are flagged with a status of New. To create these terms in your EMS database, you select each term, click Create, and then Process.

To synchronize an academic term

1. On the menu bar, click Academic Planning > Configuration > Synchronize Terms.

   The EMS Campus Terms window opens.

Figure 13-1: EMS Campus Terms window



2. Select the SIS term that you are creating in your EMS database, (CTRL-click to select multiple terms) click Create, and then click Process.

If you do not want to create an SIS term in your EMS database, select the term, and then click Do Not Import.

   A message opens indicating that the terms were successfully processed.

3. Click OK to close the message and return to the EMS window.

   The status of the terms is set to Synchronized to indicate that the SIS data has been synchronized.

4. Click Cancel or Close (x) to close the window.

Synchronizing Courses

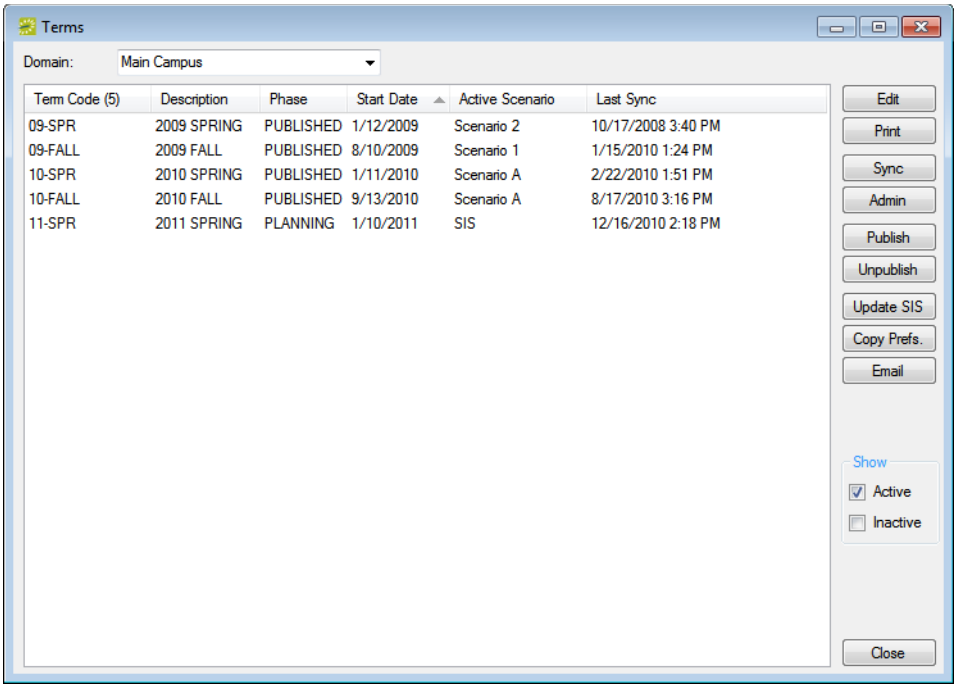
After you synchronize terms, the term record that is created in EMS is initially empty. You must then synchronize the courses.

To synchronize courses

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-2: Terms window



2. On the Domain dropdown list, select the domain for which you are synchronizing the term.
3. Select the term for which you are synchronizing the courses, and then click Sync.

   A Synchronizing Courses dialog box opens that shows the progress of the course synchronization. When the courses are synchronized, a dialog box opens with the message that the courses were synchronized.
4. Click OK to close the message and return to the Terms window.

After you synchronize the courses, you can review them in the Academic Browser. *See "Searching with the Academic Browser" on page 507.*

Chapter 13
Academic Planning (EMS Campus)

Defining and Editing Courses

Section Contents

- Overview of Defining and Editing Courses on page 397.
- Enabling/Disabling a Term for Define & Edit Mode on page 398.
- Reviewing and Modifying Courses on page 401.
- Working with Shared Space on page 413.

Chapter 13
Academic Planning (EMS Campus)

Overview of Defining and Editing Courses

After the Domain Scheduler has imported a term and synchronized the courses for the term, they have the option of selecting the mode for the term. Each mode is optional, but each mode provides mode-specific functionality so that the mode can be carried out. Organizations use the Define & Edit Mode to solicit information about new, changed, or canceled courses, or course dates for a term. Additionally, courses that share space can be indicated. After the academic units enter this information, the Domain Scheduler can run reports and based on the information in the reports, make the selected modifications in the SIS.

1. The Domain Scheduler enables Define & Edit Mode. See “Enabling/Disabling a Term for Define & Edit Mode” on page 398.
2. Academic units review the course schedule data, make change requests as appropriate for new, edited, and/or canceled courses, and mark those courses that share space. See “Reviewing and Modifying Courses” on page 401 and “Working with Shared Space” on page 413.
3. The Domain Scheduler generates and reviews the Course Change report, enters the needed modifications into the SIS, and resynchronizes the courses. See “Synchronizing Courses” on page 393.
4. The Domain Scheduler reviews and/or indicates the shared space settings. See “Working with Shared Space” on page 413.

Enabling/Disabling a Term for Define & Edit Mode

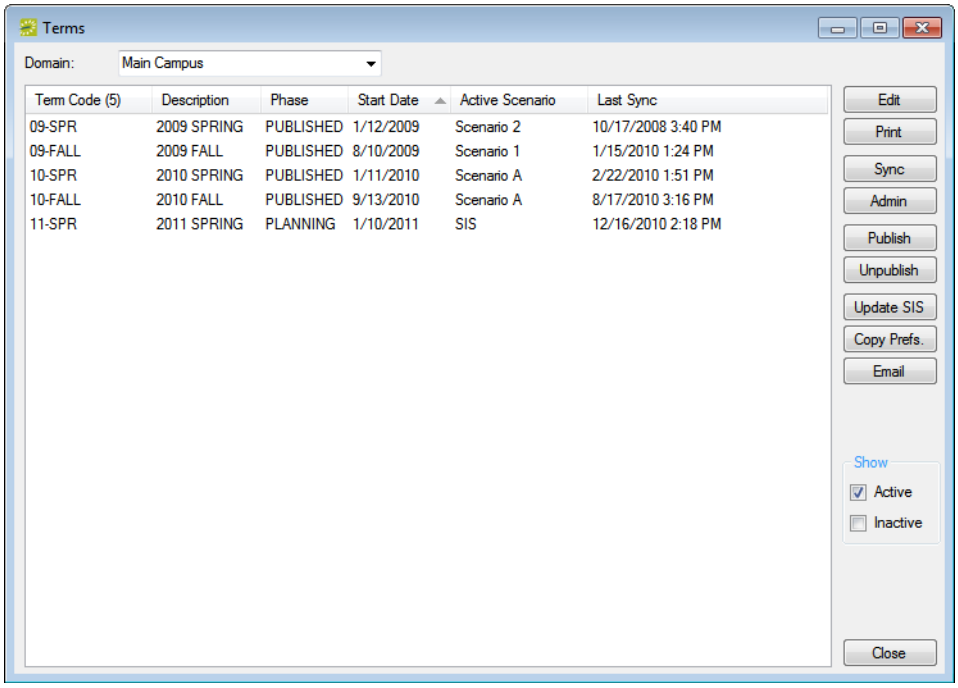
After the Domain Scheduler has imported a term and synchronized the courses for the term, they can set the mode to Define & Edit and make the term available to the academic units.

To enable/disable a term for Define and Edit mode

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-3: Terms window

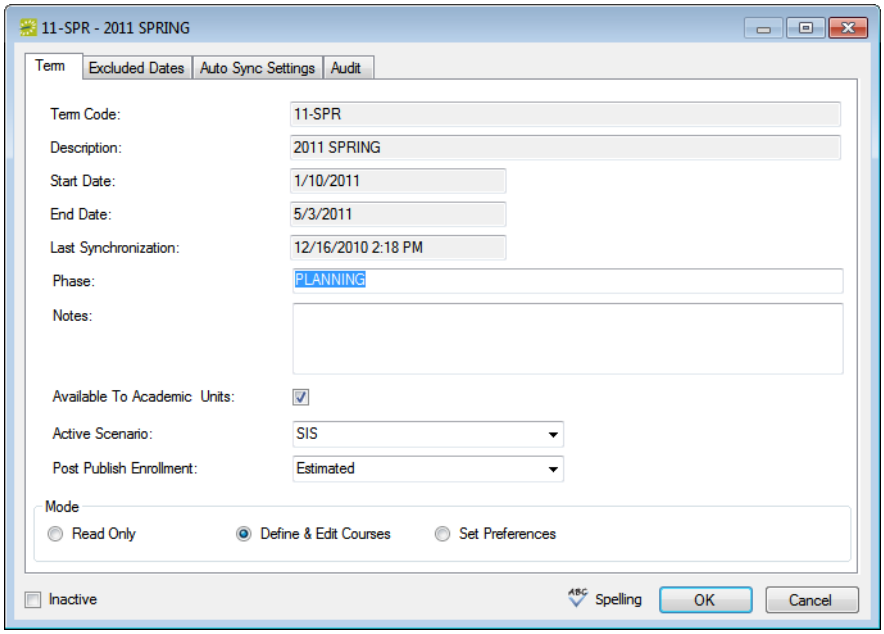


2. On the Domain dropdown list, select the correct domain.

3. Select the term for which you are setting Define & Edit mode, and then click Edit.

   The Term dialog box opens. The Term tab is the active tab.

Figure 13-4: Term dialog box



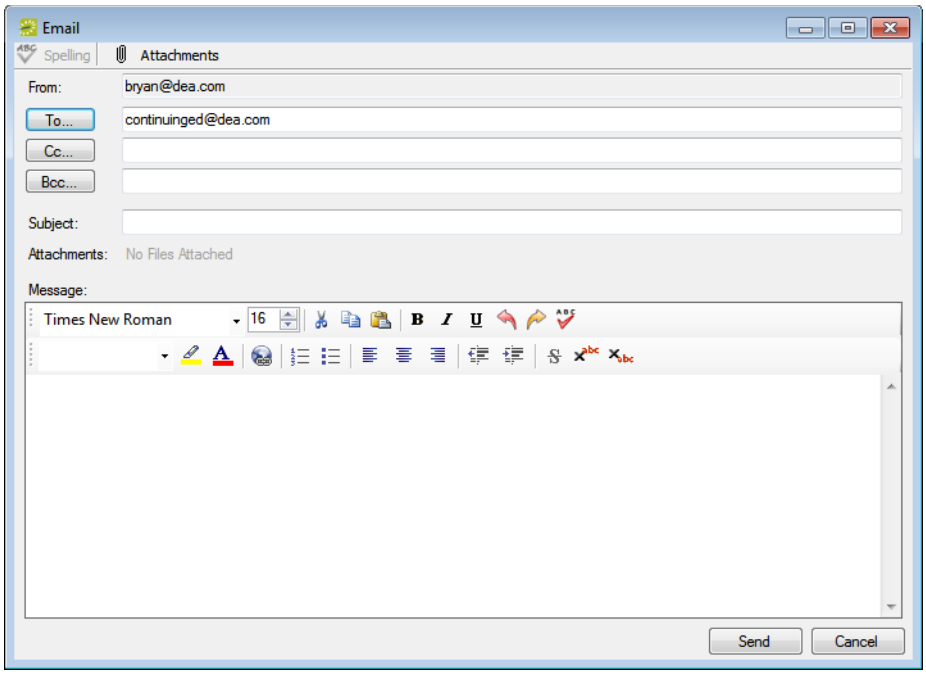
4. Optionally, in the Phase and Notes fields, enter information that indicates to the Domain Scheduler and academic units what part of the academic scheduling process is currently taking place, for example, “Course Review,” or “Planning” along with any supporting information or instructions.

Academic units can view this information in the EMS Campus Web Client.

5. Do one of the following:
   - If academic unit-level users are to have access to the term, select Available to Academic Units.
   - To remove the users’ access to the term, clear Available to Academic Units.
6. In the Mode section, do one of the following:
   - To enable Define & Edit mode, select Define & Edit Courses.
   - To disable Define & Edit mode, select Read Only or Set Preferences.
7. Click OK to close the Term dialog box and return to the Terms window, with the term still selected in the window.

8. On the Terms window, click Email to open an email that is pre-addressed to all academic unit-level users that have been defined in your EMS database. Complete and send the email as you normally would.

Figure 13-5: SMTP Email window



Reviewing and Modifying Courses

After a term has been made available to the academic units, the academic units can begin reviewing their courses and requesting additions, deletions and modifications as appropriate using the EMS Campus Web Client (typical) or the EMS Campus desktop client (if granted access).

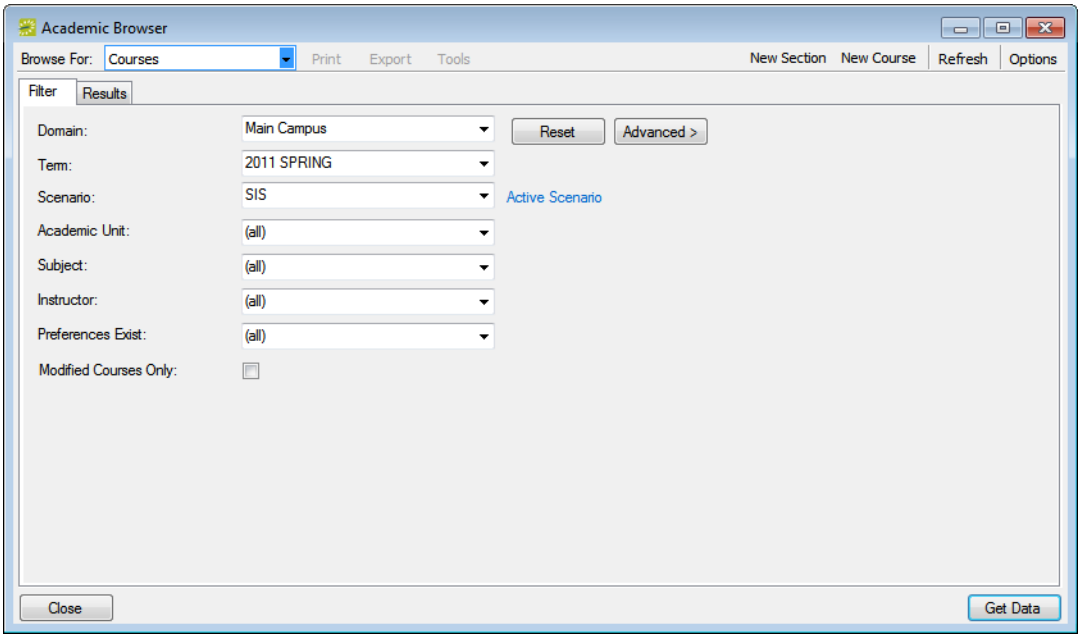
To review and modify courses

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-6: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Continue to one of the following:
   - "To add a new course in EMS Campus" below.
   - "To add a new section for a course" on page 403.
   - "To add a course date in EMS Campus" on page 404.
   - "To edit a course in EMS Campus" on page 406.
   - "To edit a course date in EMS Campus" on page 407.
   - "To cancel a course date in EMS Campus" on page 409.
   - "To cancel a course in EMS Campus" on page 411.

To add a new course in EMS Campus

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating an existing course, and then click Get Data.

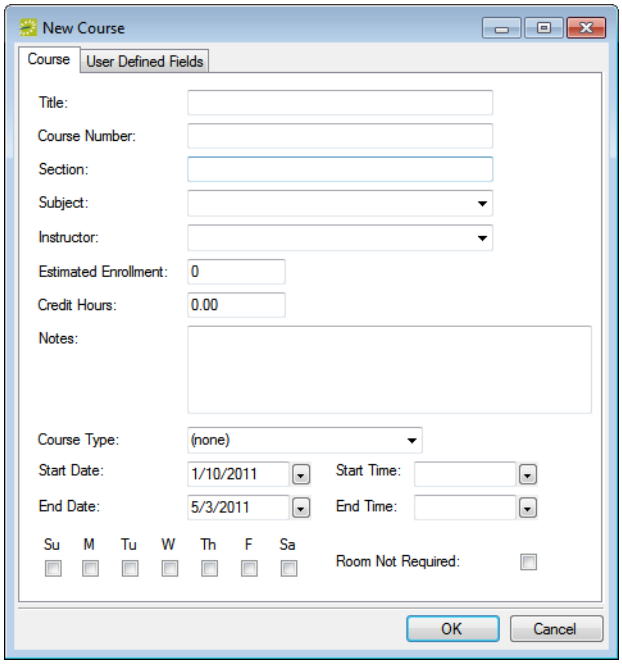
   The courses that meet your search criteria are displayed on the Results tab.

For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

2. Click New Course.

   The New Course dialog box opens. The Course tab is the active tab.

Figure 13-7: New Course dialog box



3. Complete the required information—title, course number, section, subject, instructor, estimated enrollment, credit hours, course type, and meeting pattern information—on the Course tab.
   - An optional Notes field is provided for the academic units to communicate miscellaneous information about the course to the Domain Scheduler.
   - Make sure to select Room Not Required if the course does not require a room, for example, an independent study class, a research class, and so on.
4. Open the User Defined Fields tab, and for any user-defined questions that are displayed on the tab, do the following:
   - Select the question, and then click Set Value to open a dialog box in which you can enter the answer to the question.
   - Click OK to close the dialog box and return to the User Defined Fields tab.

User-defined fields, or UDFs, are typically used by a Domain Scheduler to solicit additional user-supplied information about a course. See the EMS Setup Guide for more information about UDFs.

5. Click OK to close the New Course dialog box and return to the Academic Browser.
6. Click Refresh.

   "New" is displayed for the course state.

To add a new section for a course

To add a new section of an existing course, you must copy an existing course, and then modify the section number and any other pertinent information.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating an existing course, and then click Get Data.

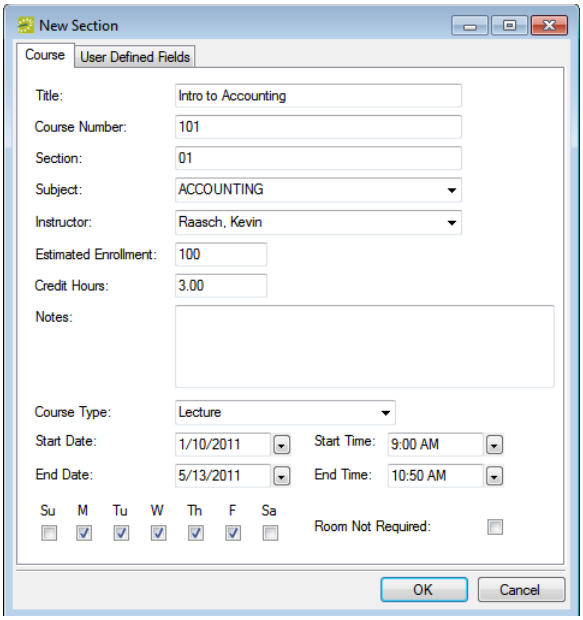
   The courses that meet your search criteria are displayed on the Results tab.

For detailed information about searching with the Academic Browser, see *"Searching with the Academic Browser" on page 507.*

2. Select the course that is to be copied, and then click New Section.

   The New Section dialog box opens. The fields are automatically populated with the information for the copied course.

Figure 13-8: New Section dialog box



3. Modify the section number and any other pertinent information as needed, and then click OK.

   A message opens indicating that the course was created successfully.

4. Click OK to close the message and return to the Academic Browser.

To add a course date in EMS Campus

To add a new date to a course in EMS Campus, you must find the course using the Academic Browser, and then modify the course date and other pertinent information in the Course Navigator.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the course, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

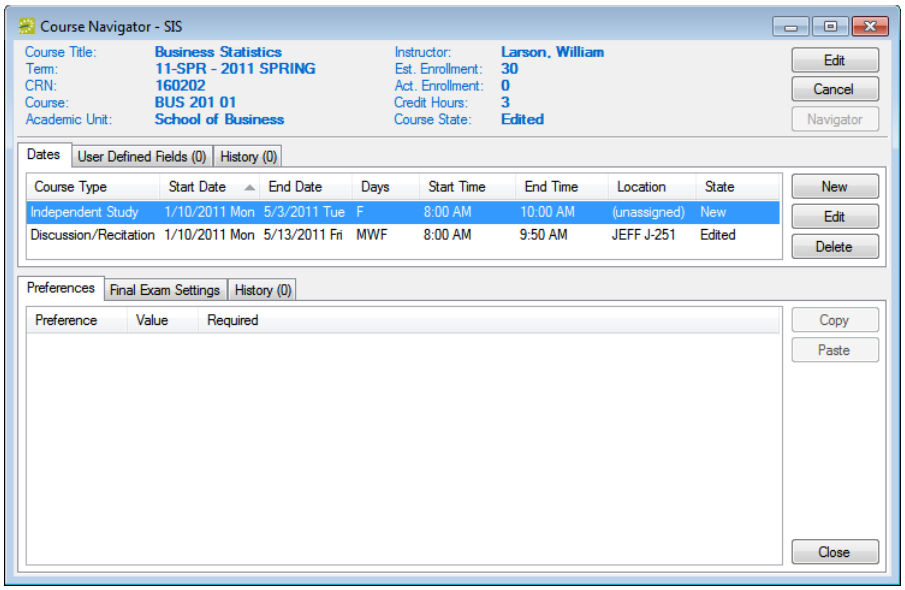
For detailed information about searching with the Academic Browser, see *"Searching with the Academic Browser" on page 507.*

2. In the search results, double-click the course to which you are adding a course date.

   The course opens in the Course Navigator.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

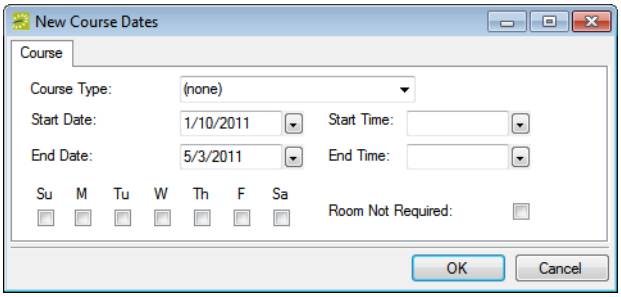
Figure 13-9: Course opened in the Course Navigator



3. Click New.

   The New Course Dates dialog box opens.

Figure 13-10: New Course Dates dialog box



4. Complete the required course information, and then click OK to close the New Course Dates dialog box and return to the Course Navigator.

   The course date state is set to "New" in the middle pane of the Course Navigator.

To edit a course in EMS Campus

To edit a course in EMS Campus, you must find the course using the Academic Browser, and then modify the course information in the Course Navigator.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the course, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

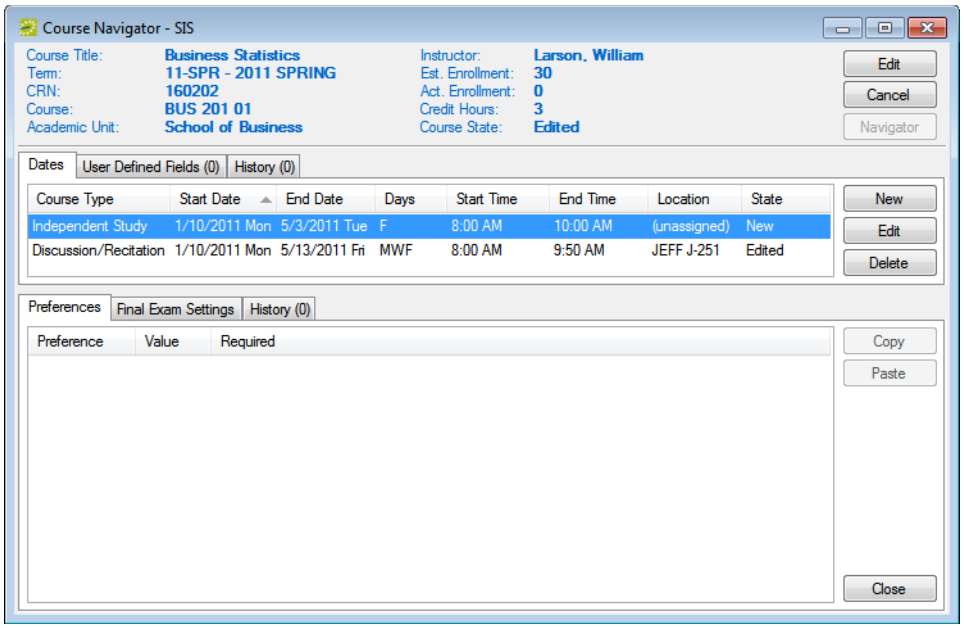
For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

2. In the search results, double-click the course that you are editing.

   The course opens in the Course Navigator.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

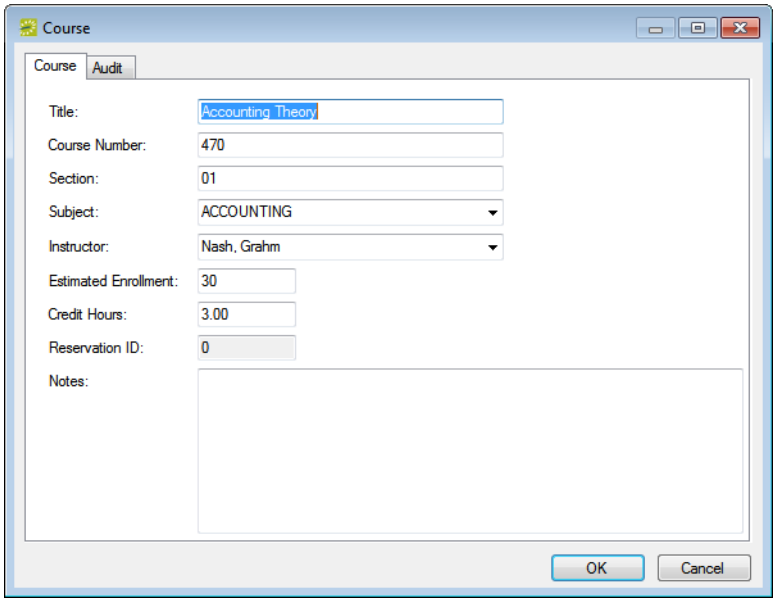
Figure 13-11: Course opened in the Course Navigator



3. Click Edit *in the top pane* of the Navigator.

   The Course dialog box opens.

Figure 13-12: Course dialog box



4. Modify the course information as needed, and then click OK to close the Course dialog box and return to the Course Navigator.

   The course state is set to “Edited” in the top pane of the Course Navigator.

To edit a course date in EMS Campus

To edit a course date in EMS Campus, you must find the course using the Academic Browser, and then modify the course date in the Course Navigator.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the course, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

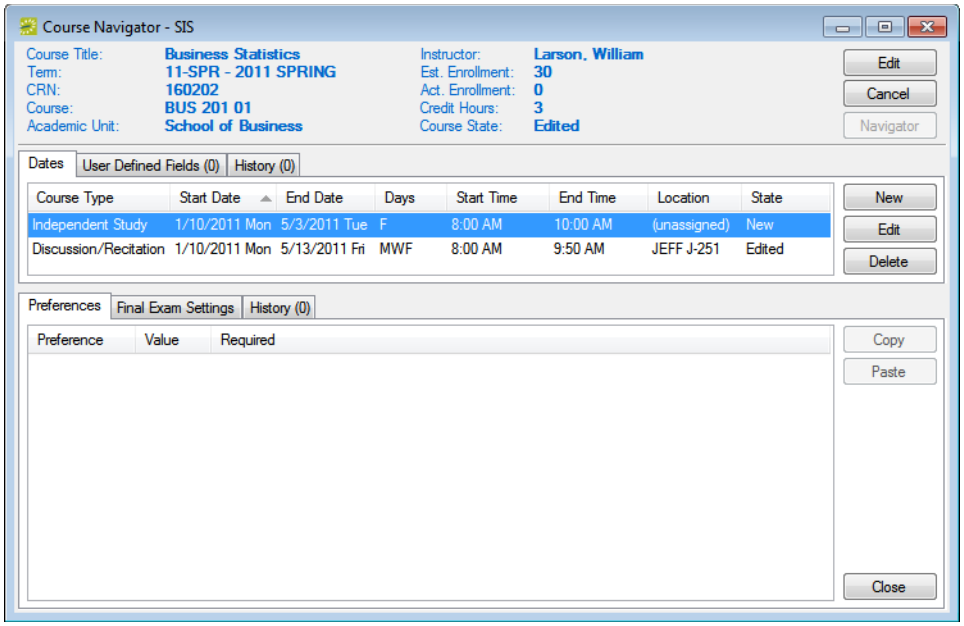
For detailed information about searching with the Academic Browser, see “Searching with the Academic Browser” on page 507.

2. In the search results, double-click the course for which you are editing the course date.

   The course opens in the Course Navigator. See Figure 13-13 on page 408.

For detailed information about working with the Course Navigator, see “Using the Course Navigator” on page 520.

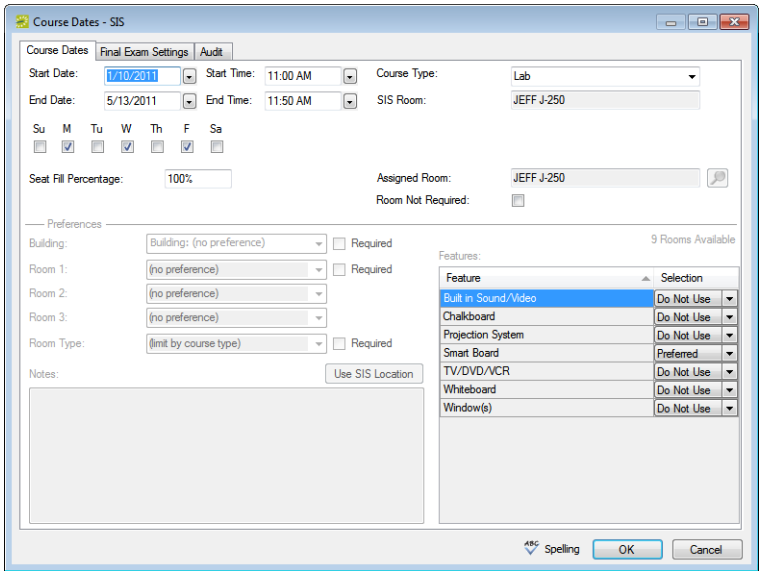
Figure 13-13: Course opened in the Course Navigator



3. In the *middle pane* of the Course Navigator, select the course date record that you are editing, and then click Edit.

   The Course Dates dialog box opens.

Figure 13-14: Course Dates dialog box



4. Modify the course dates as needed.
   - The room assigned to this course in the SIS is listed in the SIS Room text box. You cannot edit this field during Define and Edit Mode.
   - Make sure to select Room Not Required if this course date does not require a room (for example, independent study, research, and so on).
   - The Seat Fill Percentage, in conjunction with the estimated enrollment, is used to determine the size of the room needed for the class. For example, a Seat Fill Percentage of 50% and an estimated enrollment of 100 means that the course should be held in a room that can accommodate 200 people.

The Seat Fill Percentage is initially set to the default value that is specified in system parameters, but you can update the value on a per course date basis. See System Parameters in the EMS Setup Guide.

   - If you are editing a course date for a course that is cross-listed or sharing space with another course, you are provided with an option in the bottom pane of the Course Dates dialog box to apply your changes to the related course dates. To apply changes to the cross-listed courses, check the appropriate course date listings.

5. Click OK to close the Course dialog box and return to the Course Navigator.

   The course date state is set to “Edited” in the middle pane of the Course Navigator.

To cancel a course date in EMS Campus

To cancel a course date in EMS Campus, you must find the course using the Academic Browser, and then cancel the course date in the Course Navigator.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the course, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

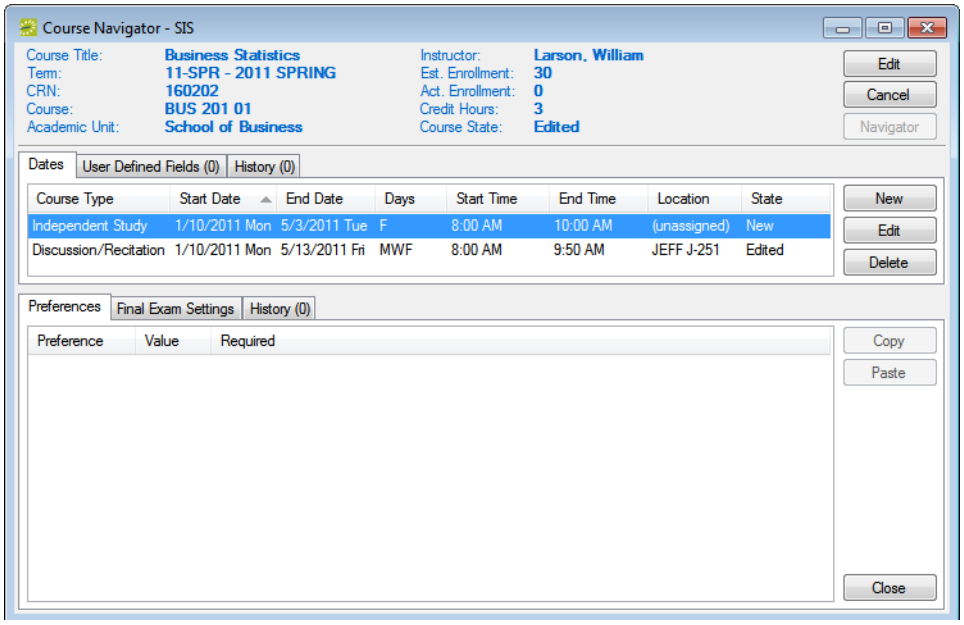
For detailed information about searching with the Academic Browser, see *“Searching with the Academic Browser” on page 507.*

2. In the search results, double-click the course for which you are canceling a course date.

   The course opens in the Course Navigator.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

Figure 13-16: Course opened in the Course Navigator



3. In the middle pane of the Course Navigator, select the course date record that you are canceling, and then in the top pane of the Navigator, click Cancel.

   A dialog box opens, asking you if it is OK to cancel the selected course.

4. Click Yes to close the dialog box and return to the Course Navigator.

   The course date state is set to "Cancelled" in the middle pane of the Course Navigator.

To reverse a course date cancellation, select the canceled course date in the Course Navigator, and then click Uncancel.

To cancel a course in EMS Campus

To cancel a course in EMS Campus, you must find the course using the Academic Browser, and then cancel the course in the Course Navigator.

1. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the course, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

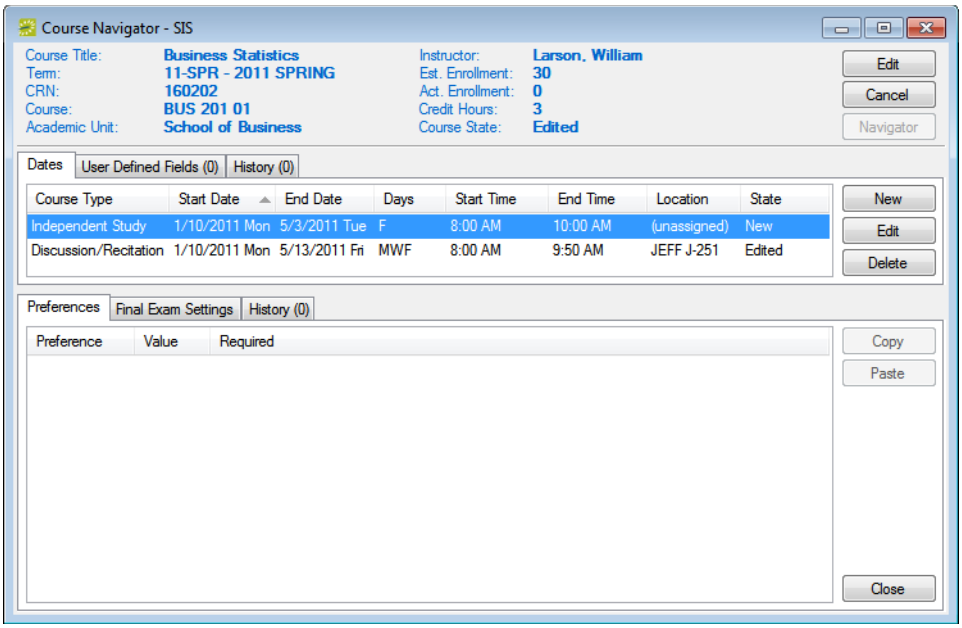
For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

2. In the search results, double-click the course that you are canceling.

   The course opens in the Course Navigator.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

Figure 13-17: Course opened in the Course Navigator



3. In the *top pane* of the Navigator, click Cancel.

   A dialog box opens, asking you if it is OK to cancel the selected course.

4. Click Yes to close the dialog box and return to the Course Navigator.

   The course state is set to “Cancelled” in the top pane of the Course Navigator. The state for every course date that is displayed in the middle pane of the Course Navigator is also set to “Cancelled.”

To reverse a course cancellation, open the canceled course in the Course Navigator, and then in the top pane of the Course Navigator, click Uncancel.

Working with Shared Space

The *shared space* designation is used for two or more courses that are not cross-listed in the SIS, but that are meant to be held in the same room. The shared space designation links the courses together for the set preferences, optimization, publishing, and final exam scheduling functions. Shared space is assigned in a parent-child relationship. If needed, you can change the parent designation. In addition, if courses are no longer to share space, then you can reverse the shared space designation. You can also review shared spaced designations.

Academic units that have the correct permissions can indicate shared space using the EMS Campus web client. You might want to review these shared space settings before working with shared space.

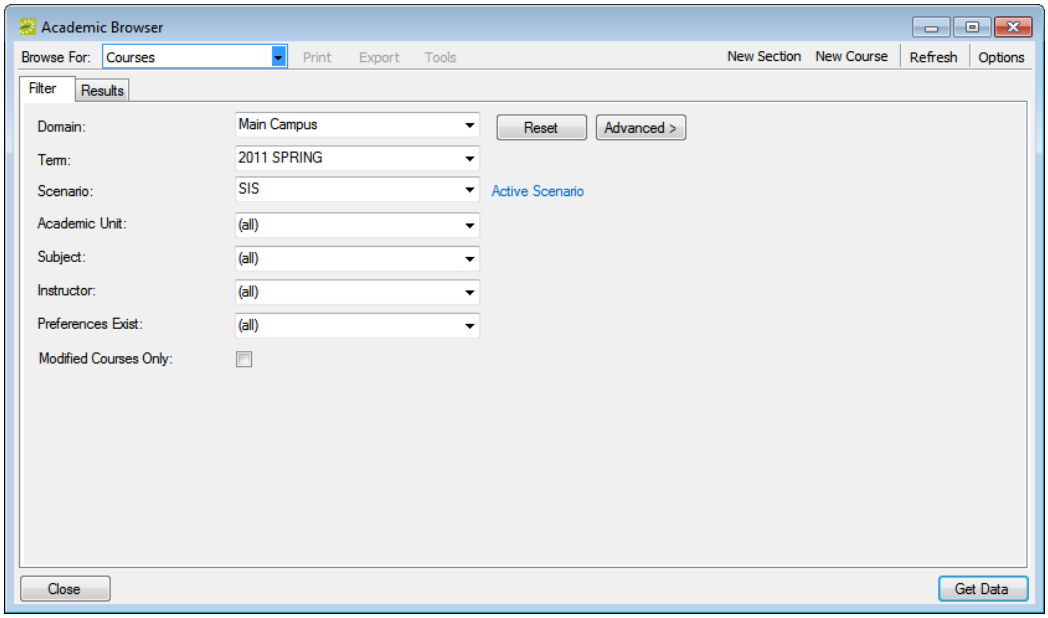
To assign shared space to courses

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-18: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses that are to share space, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. CTRL-click to select the courses that are to share space.
6. On the Tools menu, click Shares Space.

   A message opens asking you if you are sure that the selected courses are to share space?
7. Click Yes.

   The message closes and you return to the Academic Browser. The Shares Spaces designation is indicated in the browser. The parent item is indicated with *Parent, and the child item is indicated with the parent's Course Number and Section Number.

To change the parent designation for shared spaces/cross-listed spaces

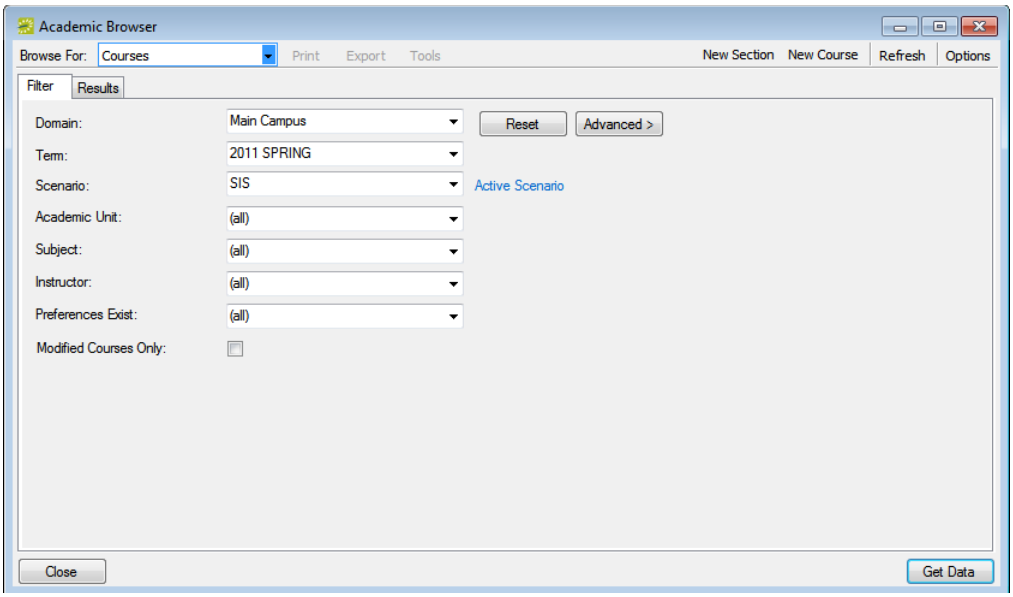
When you set the shared space designation for courses, EMS Campus arbitrarily specifies one of the courses as the parent course. The academic unit that controls the parent course is the unit that sets the preferences for the shared courses in the Set Preferences mode. If the academic unit that you want to set the preferences in the Set Preferences mode is not currently the parent course, then you can change the parent designation for the courses. Also, after you publish courses, you can change the room only for the parent course and the child course "just follows along." If the course on which you want to base the room change is not currently the parent course, then you can change the parent designation for the courses.

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-19: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the shared spaces courses, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

For detailed information about searching with the Academic Browser, see *"Searching with the Academic Browser" on page 507.*

5. CTRL-click to select the parent course and the child courses.
6. On the Tools menu, click Change Shared Space parent.

   The Shares Space Change Parent dialog box opens. This dialog box lists the parent class and all its child classes that share space.

Set Parent

7. Select the class that is to be the new parent, and then click Set Parent.

   A Set Parent dialog box opens, indicating that the selected course will be set as the parent for all the listed courses, and asking you if it is OK to continue.

8. Click Yes.

   The Set Parent dialog box closes. You return to the Academic Browser with the new parent designation indicated in the browser.

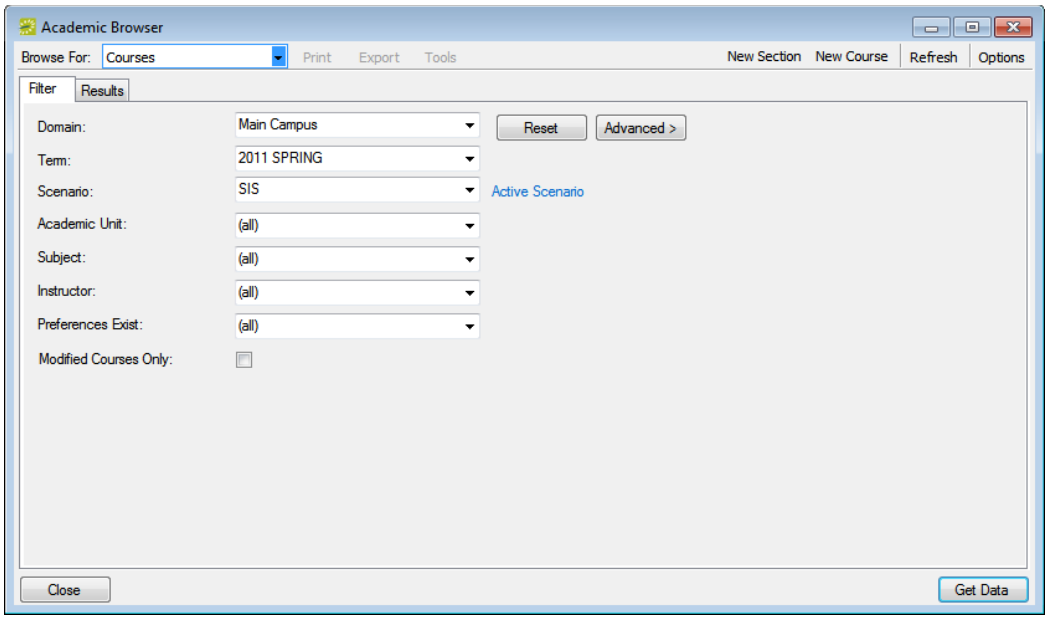
To reverse the shared space designation

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-21: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses that are to no longer share space, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. CTRL-click to select the courses that are to no longer share space.

6. On the Tools menu, click Does Not Share Space.

   A message opens asking you if you are sure that the selected courses are to no longer share space.

7. Click Yes.

   The message closes. You return to the Academic Browser, with the Shared Space designation removed for the selected courses.

To review shared space designations

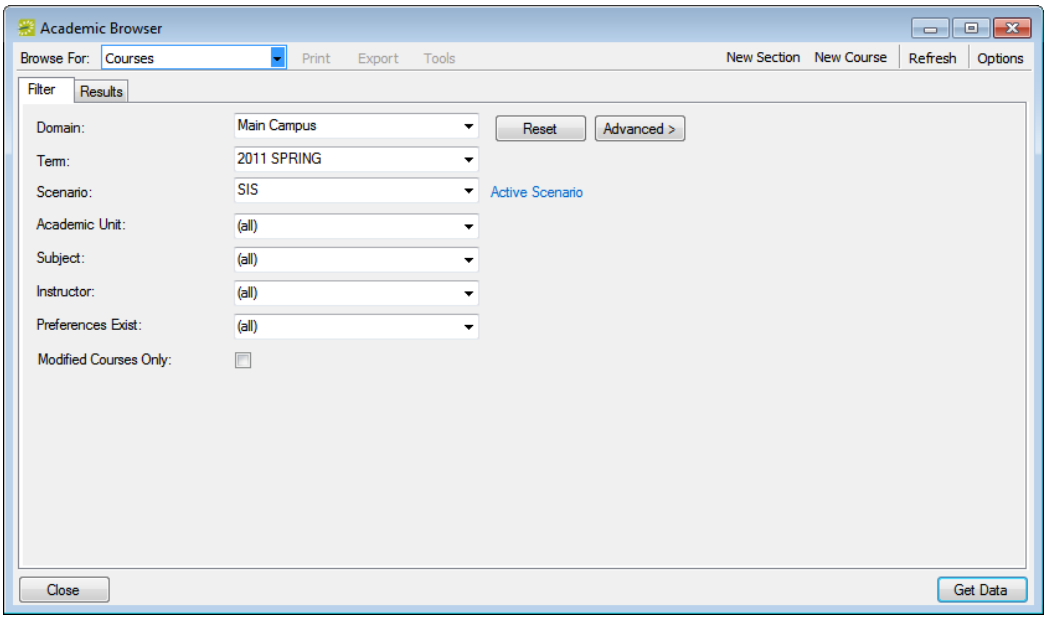
Academic units might designate shared space that they can review in the EMS Campus web client.

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-22: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses that are to be reviewed, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab. Use the information in the Shared Space column to identify and review the courses that share space. See Figure 13-23 on page 419.

For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

Identifying New/Modified/Canceled Courses

After the academic units have made their modifications to the course schedule, the Domain Scheduler must identify and compile a list of modifications and enter the approved changes in the Student Information System (SIS). EMS Campus flags course changes using a field named Course State. New, modified, and canceled courses are marked as "New," "Edited," and "Cancelled," respectively. Typically, the Domain Scheduler generates the Course Changes report to view and identify the requested course changes; however, if further clarification is needed, then the Domain Scheduler can use the Academic Browser and/or Course Navigator.

For detailed information about generating the Course Changes report, and the information that is contained in the report, see "Generating Academic Reports" on page 523.

Prior to reviewing the modifications, you can remove the term from your academic units. See "Enabling/Disabling a Term for Define & Edit Mode" on page 398.

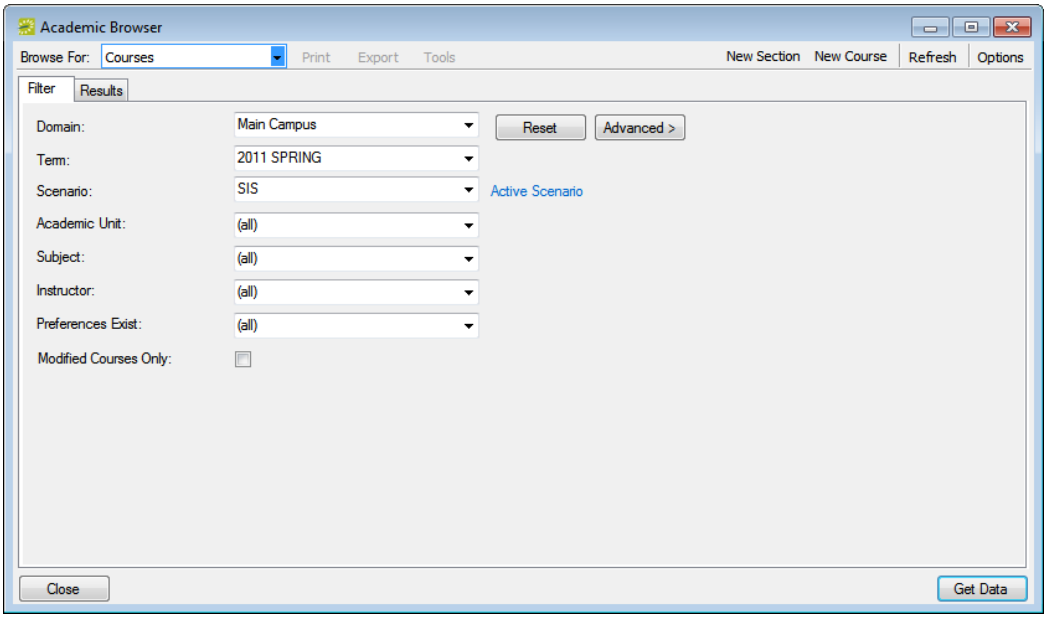
To identify new/modified/canceled courses

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-24: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.
4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses that are to be reviewed, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab. Use the information in the State column to identify the change made to each course that is listed.

For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

Figure 13-25: Academic Browser search results with State column shown

5. Optionally, double-click a course to open the course in the Course Navigator and view more detailed information about the course. See "Using the Course Navigator" on page 520.
6. After generating the list of course modifications, the Domain Scheduler must manually enter the approved course changes in the SIS. After data entry is complete, the scheduler must carry out the Sync Courses process (see "Synchronizing Courses" on page 393) to ensure that EMS Campus and the SIS are synchronized.

Chapter 13
Academic Planning (EMS Campus)

Specifying Room Preferences

Section Contents

- Overview of Specifying Room Preferences on page 425.
- Enabling/Disabling a Term for Set Preferences Mode on page 426.
- Specifying Room Preferences/Requirements on page 429.
- Reviewing and Verifying Room Preferences on page 437.

Chapter 13
Academic Planning (EMS Campus)

Overview of Specifying Room Preferences

Set Preferences is an optional mode in which the Domain Scheduler can solicit preferences from academic units about the type of rooms that would be suitable for each course that they teach. These preferences can then be used to run an optimization, or to have EMS automate room scheduling based on preferences and additional user-specified criteria. To enable and use Set Preferences Mode, the following steps are carried out:

1. The Domain Scheduler enables Set Preferences mode. See “Enabling/Disabling a Term for Set Preferences Mode” on page 426.
2. The academic units review courses and specify their room preferences and requirements using the EMS Campus Web Client (typical) or the EMS Campus desktop client (if granted access). See “Specifying Room Preferences/Requirements” on page 429.
3. The Domain Scheduler verifies and reviews the room preferences and requirements that the academic units have specified. See “Reviewing and Verifying Room Preferences” on page 437.

Enabling/Disabling a Term for Set Preferences Mode

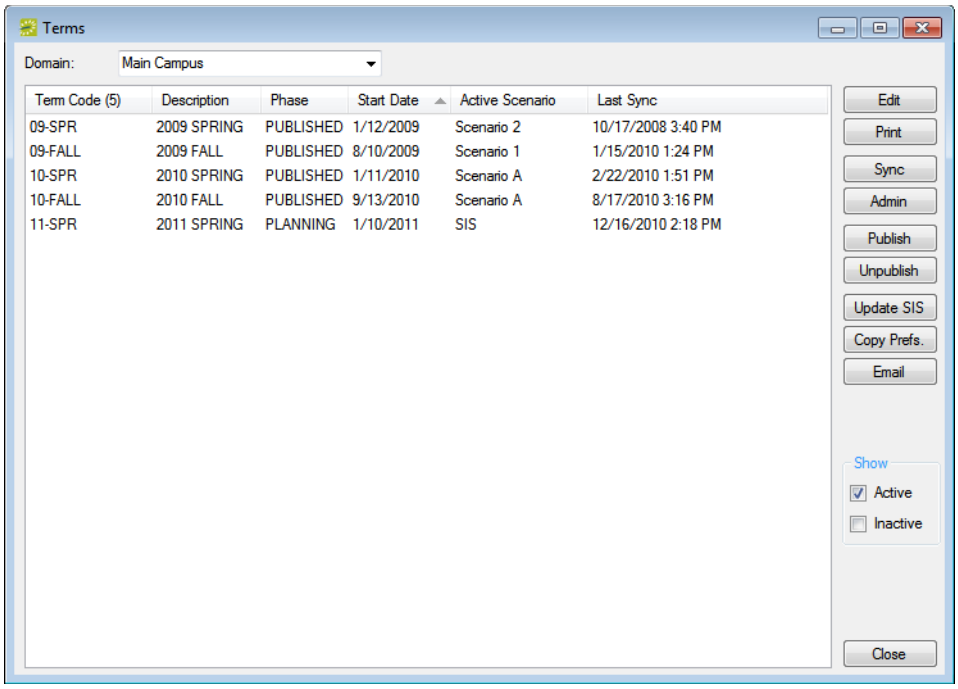
To enter the academic units' room preferences and requirements, the Domain Scheduler must enable Set Preferences mode. Additionally, if the Domain Scheduler wants to solicit these preferences and requirements from the academic units, they must make the term available to the academic units. Likewise, after the deadline has been reached for expressing room preferences and requirements, the scheduler must make the term unavailable to the academic units.

To enable/disable a term for Set Preferences mode

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-26: Terms window

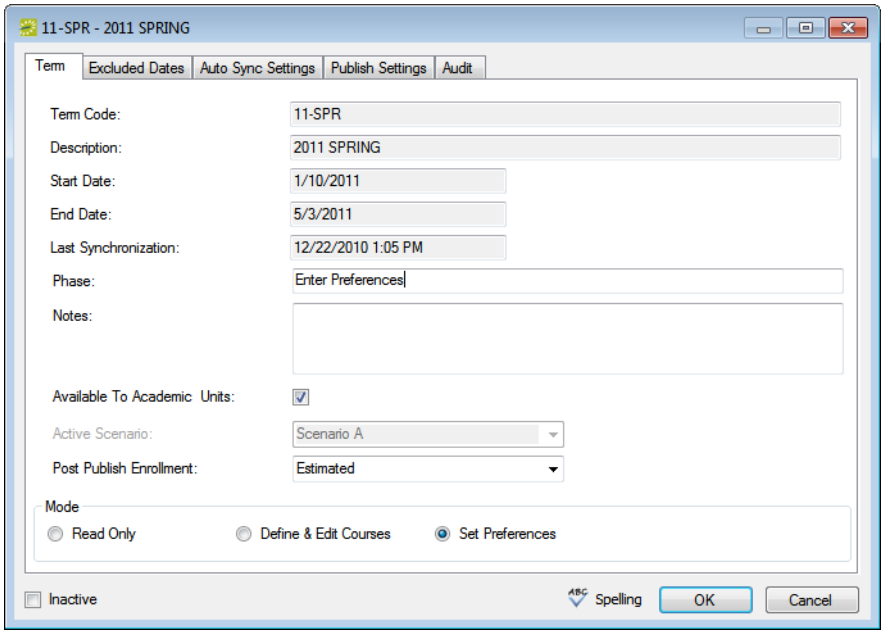


2. On the Domain dropdown list, select the correct domain.

3. Select the term for which you are setting the Set Preferences mode, and then click Edit.

   The Term dialog box opens. The Term tab is the active tab.

Figure 13-27: Term dialog box



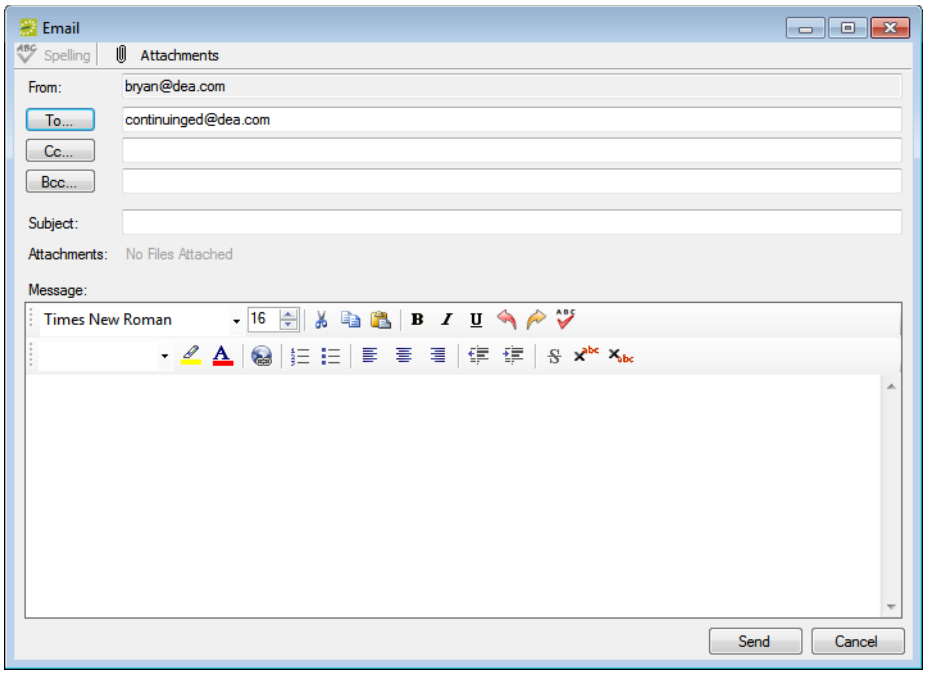
4. Optionally, in the Phase and Notes fields, enter information that indicates to the Domain Scheduler what part of the academic scheduling process is currently taking place, for example, “Enter Preferences,” or “Room Information” along with any supporting information or instructions.

The Phase field and the Notes field are displayed in the EMS Campus Web Client.

5. Do one of the following:
   - To give academic unit-level users access to the term, select Available to Academic Units.
   - To remove the users’ access to the term, clear Available to Academic Units
6. In the Mode section, select Set Preferences.
7. Click OK to close the Term dialog box and return to the Terms window, with the term still selected in the window.

8. On the Terms window, click Email to open an email that is pre-addressed to all academic unit-level users that have been defined in your EMS database. Complete and send the email as you normally would.

Figure 13-28: SMTP Email window



Specifying Room Preferences/Requirements

After the Domain Scheduler places the term in Set Preferences mode, three options that can be used in conjunction with each other, are available for completing the preferences and requirements phase. In addition, the Domain Scheduler can complete the phase independently, or they can solicit input from the academic units.

- The Domain Scheduler can use the Manage Terms Copy Preferences tool to copy the preferences and requirements from a previous term. See "To use the Manage Terms Copy Preferences tool" on page 430.
- The Domain Scheduler can use the Academic Browser Set Course Preferences tool to set preferences and requirements for multiple courses in a single step. See "To use the Academic Browser Set Course Preferences tool" on page 432.
- The Domain Scheduler can use the Course Navigator to set preferences and requirements on a course by course basis. See "To use the Course Navigator" on page 435.

If a course must take place in a specific room that you plan to exclude from optimization, you can pre-assign it to a specific room. This process is outlined during the Scenario phase. See "To create a pre-assignment scenario" on page 445.

For any of these methods, the following caveats apply:

- An academic unit -level user can *request* any building, area, or view and up to three rooms that have been defined for the domain with which it is associated.

If needed, you can set the Lock Academic Unit Room Access system parameter to limit the users' to their specific academic units. See System Parameters in the EMS Setup Guide.

- An academic unit can *require* only those buildings and rooms that have been assigned to its unit within the Academic Planning > Configuration > Academic Units area of EMS Campus. If the academic units specify requirements, then only a single room can be specified.
- Room types can be requested or required for all courses. By default the "limit to course type" selection is designated, but can be changed to honor a specific room type.

Configuration of the Course Types/Room Types matches is carried out in the Academic Planning > Configuration > Match Course Types/Room Types area of EMS Campus. See the EMS Setup Guide for detailed information.

- You can set features to Preferred or Required. The # of Rooms Available label that is displayed above the Features pane is dynamically updated based on the building, room type, and features selected.

- The Seat Fill Percentage, in conjunction with the estimated enrollment, is used to determine the size of the room needed for the class. For example, a Seat Fill Percentage of 50% and an estimated enrollment of 100 means that the course should be held in a room that can accommodate 200 people.

The Seat Fill Percentage is initially set to the default value that is specified in system parameters, but you can update the value on a per course date basis. See System Parameters in the EMS Setup Guide.

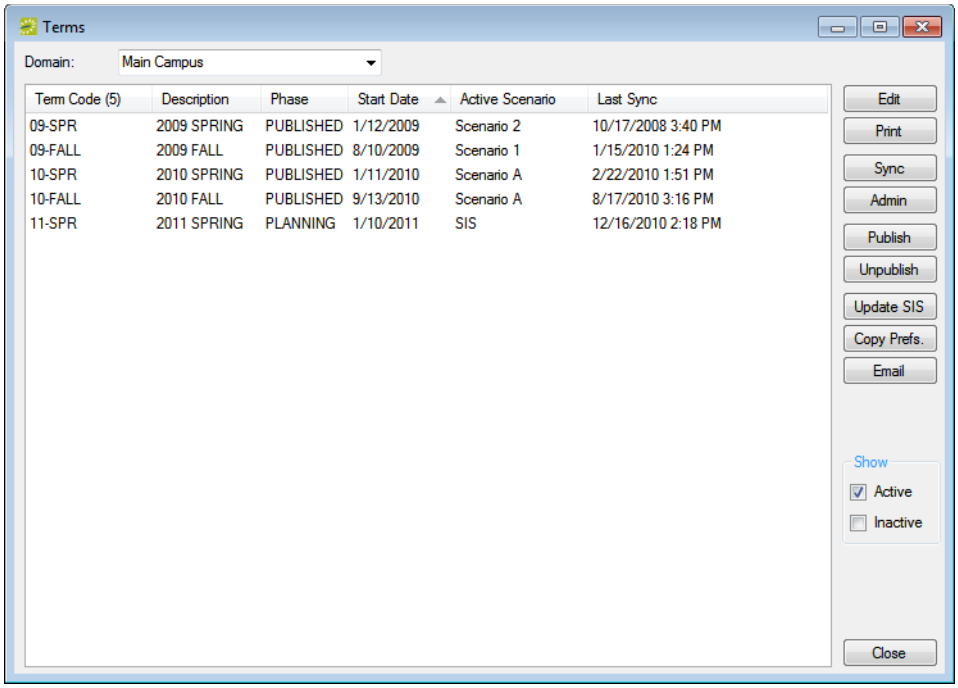
- If a course is cross-listed with another course, a Requires Different Room options is available. Typically, cross-listed courses are taught in the same space; however, if a cross-listed course should be taught in a unique location, select Requires Different room.

To use the Manage Terms Copy Preferences tool

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

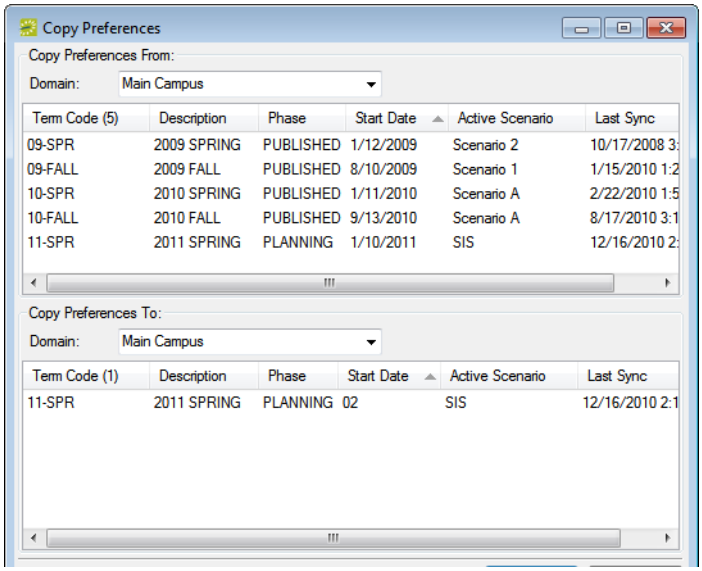
Figure 13-29: Terms window



2. Click Copy Prefs.

   The Copy Preferences dialog box opens.

Figure 13-30: Copy Preferences dialog box



3. In the Copy Preferences From pane, select the domain and term *from* which you want to copy room preferences and requirements.
4. In the Copy Preferences To pane, select the domain and term *to* which you want to copy your room preferences and requirements.

A term can be displayed in the To pane only if it is in Set Preferences mode.

5. Click OK.

   A message opens, informing you that copying preferences will overwrite any existing preferences, and asking you if it is OK to continue.

6. Click Yes.

   The message closes. After the preferences are copied, you return to the Terms window.

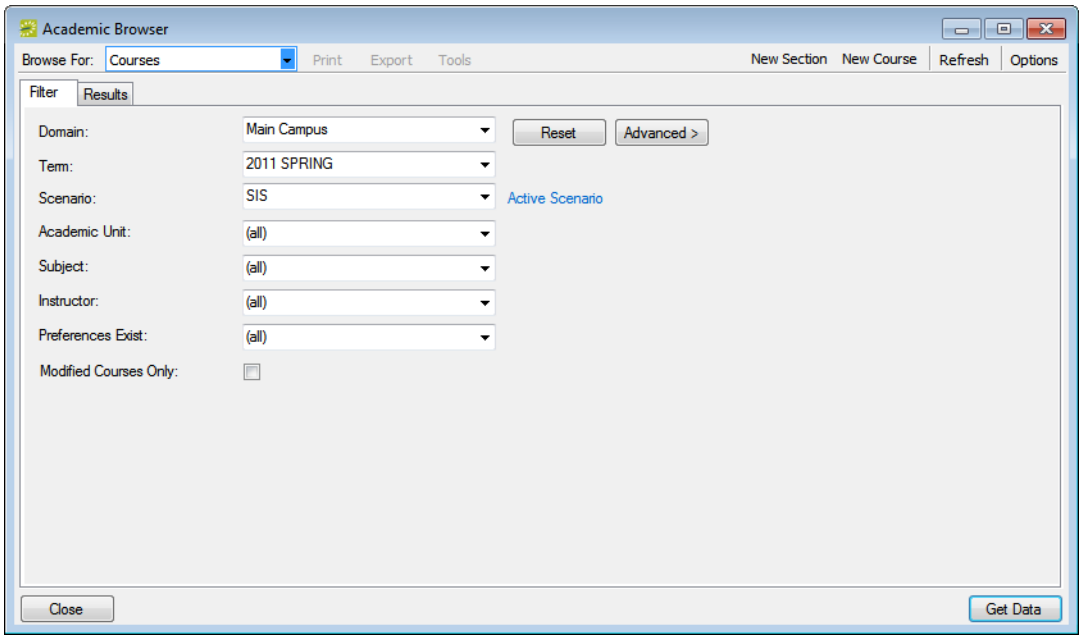
To use the Academic Browser Set Course Preferences tool

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-31: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses for which you want to set preferences and requirements, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

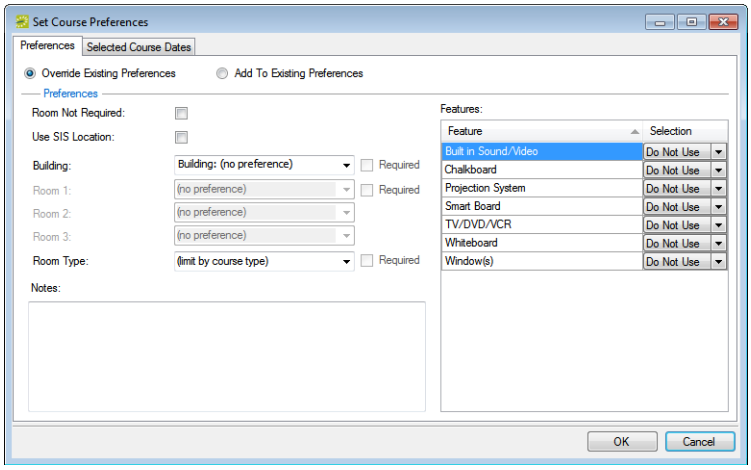
For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. CTRL-click to select the courses for which you are setting the room preferences and requirements.

6. On the Tools menu, click Set Course Preferences.

   The Set Course Preferences dialog box opens.

Figure 13-32: Set Course Preferences dialog box

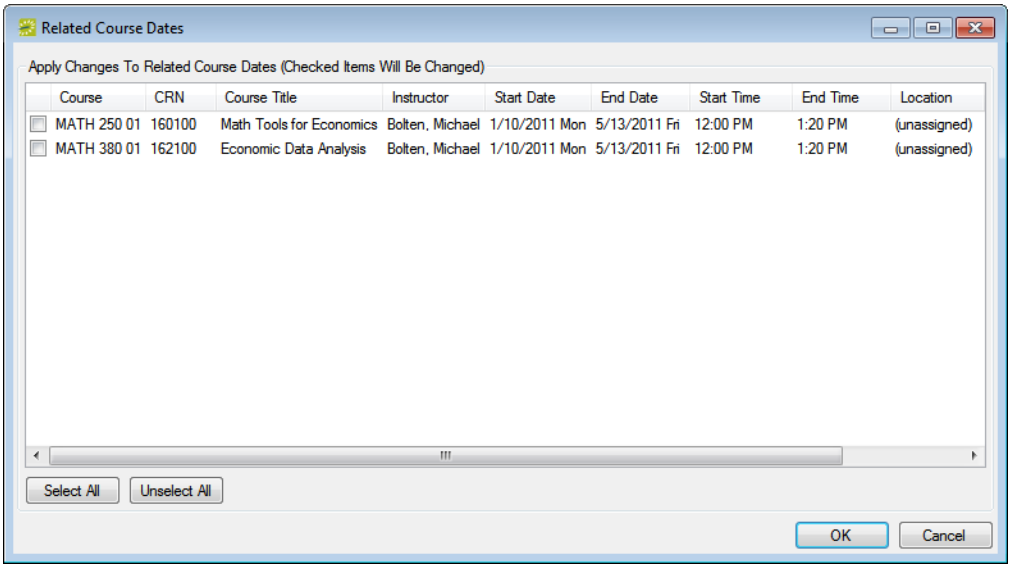


7. Indicate whether the preferences that you set are to override any existing preferences, or whether they are to be added to existing preferences.
8. Set your preferences for the selected courses.
9. Optionally, do one or both of the following:
   - In the Notes field, enter any pertinent or supporting information that substantiates or explains your preferences.
   - By default, the preferences/requirements that you specify are applied to all course dates for all selected courses. If the preferences/requirements are applicable for only specific course dates, open the Selected Course Dates tab, select the course dates for which these preferences/requirements are *not* applicable and then click Remove.
10. Click OK.

    Two results are possible:

    - If none of the selected courses are cross-listed and/or share space, then a message opens indicating whether the selected preferences will override any existing preferences, or be added to existing preferences and asking you if it is OK to continue. Go to Step 12.
    - If any of the selected courses are cross-listed and/or share space, and you did not select the corresponding cross-listed/shared space courses, then a Related Course Dates dialog box opens. This dialog box lists all the related courses that have not been selected. Go to Step 11.

Figure 13-33: Related Courses Dates



11. Optionally, select any or all of the related courses for which you want to set the same preferences/requirements, or do not select any of these related courses, and then click OK.

    A message opens indicating whether the selected preferences will override any existing preferences, or be added to existing preferences and asking you if it is OK to continue.

12. Click Yes.

    The message closes and another message opens indicating that the preferences were set successfully.

13. Click OK to close the second message and return to the Academic Browser.

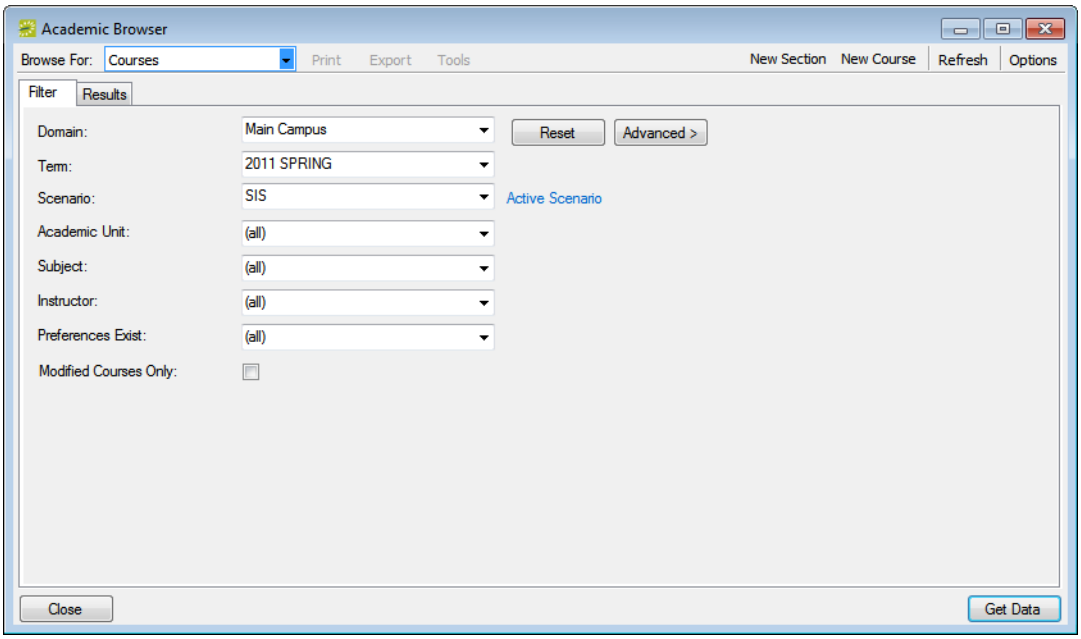
To use the Course Navigator

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-34: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses for which you want to set preferences and requirements, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

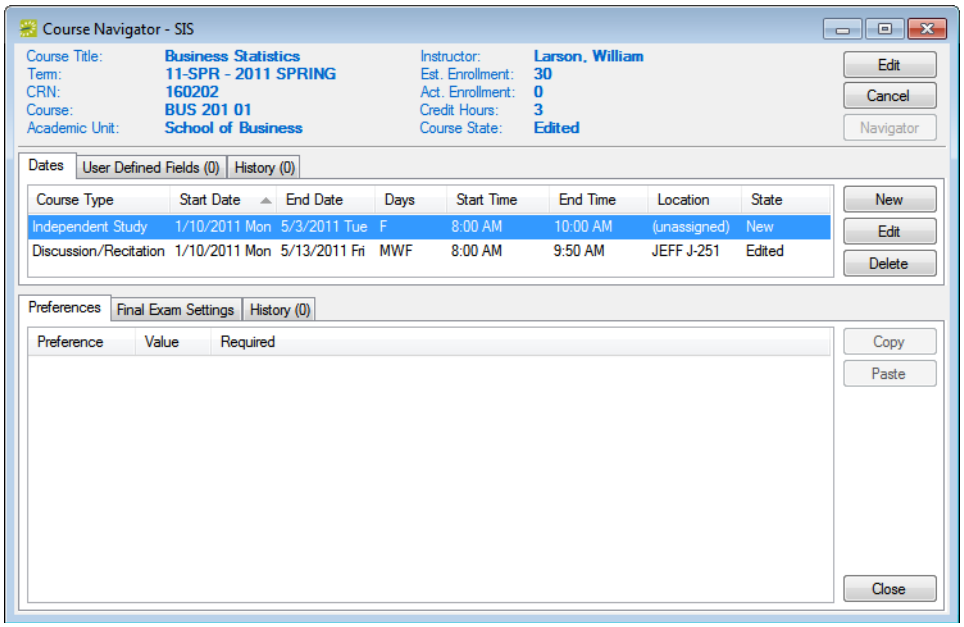
For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. In the search results, double-click the course for which you are setting the preferences/ requirements.

   The course opens in the Course Navigator. See Figure 13-3 on page 398.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

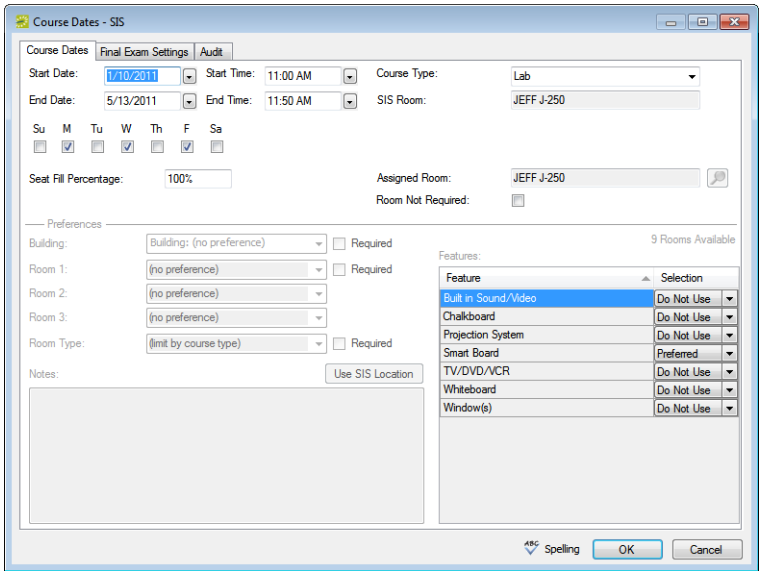
Figure 13-35: Course opened in the Course Navigator



6. In the middle pane of the Navigator, select the specific course date for which you are setting preferences/requirements, and then click Edit.

   The Course Dates dialog box opens.

Figure 13-36: Course Dates dialog box



7. Set the preferences/requirements for the course as needed, and then click OK.

   The Course Dates dialog box closes and you return to the Course Navigator. The preferences/requirements that you set for the course date are displayed on the Preferences tab in the lower pane of the Navigator.

Reviewing and Verifying Room Preferences

After room preferences and requirements are set, the Domain Scheduler reviews the individual course preferences and verifies that the preferences are complete and quantifies these preferences. The Domain Scheduler can also run the Course Preferences report and the Course Preferences Summary report to assist in this task.

For detailed information about generating the Course Preferences and Course Preferences Summary reports and the information that is contained in each report, see "Generating Academic Reports" on page 523.

Prior to reviewing or reporting on preferences, you can make the term unavailable to the academic units. See "Enabling/Disabling a Term for Set Preferences Mode" on page 426.

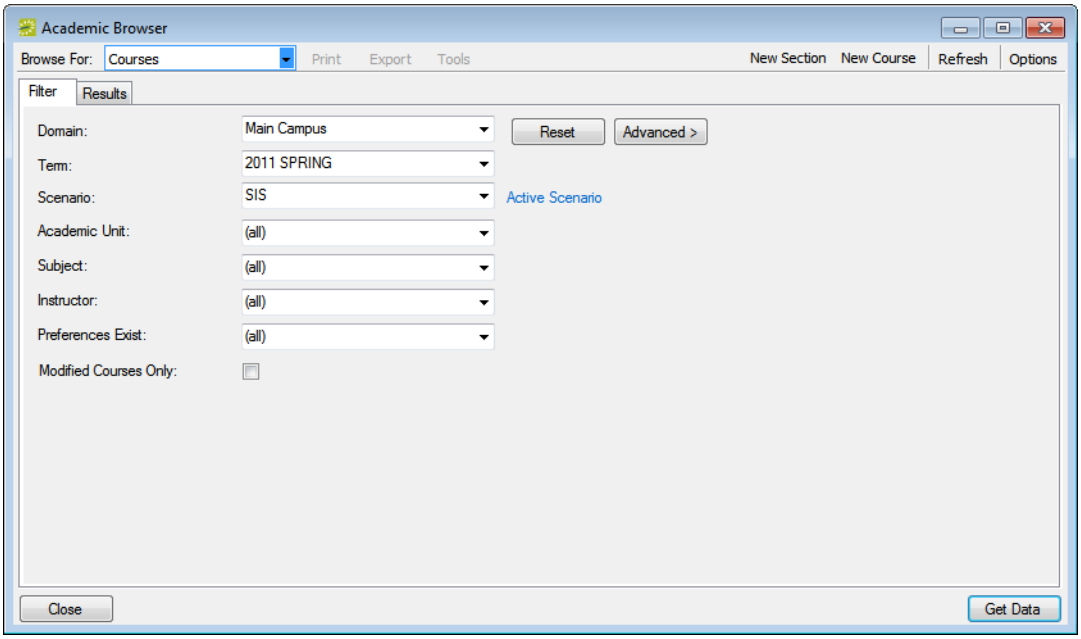
To review and verify room preferences

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-37: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses for which you want to review preferences and requirements, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

To identify preferences and requirements, for a Basic search, you should set Preferences Exist to Yes. For an Advanced search, you should select the Preferences Exist field (a Course Dates level field), and set the Preferences Exist filter to Yes. For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. In the search results, double-click the course for which you are reviewing the preferences/requirements.

   The course opens in the Course Navigator.

6. In the middle pane of the Course Navigator, select the course date for which you are reviewing the preferences.

   The preferences for the selected course date are displayed in the bottom pane of the Course Navigator on the Preferences tab.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

Chapter 13
Academic Planning (EMS Campus)

Overview of Room Assignments and Optimization

After the Domain Scheduler reviews and verifies the room preferences and requirements, room assignments must take place. If the room assignment process has already occurred outside of EMS within the SIS, the Domain Scheduler could simply publish the course schedule in EMS without any further effort. In most situations, however, courses will need to be assigned a room through the optimization process before the term can be published. To optimize the room assignments, and then assign rooms, the Domain Scheduler carries out the following steps either separately or in any combination as necessary to best suit their working needs:

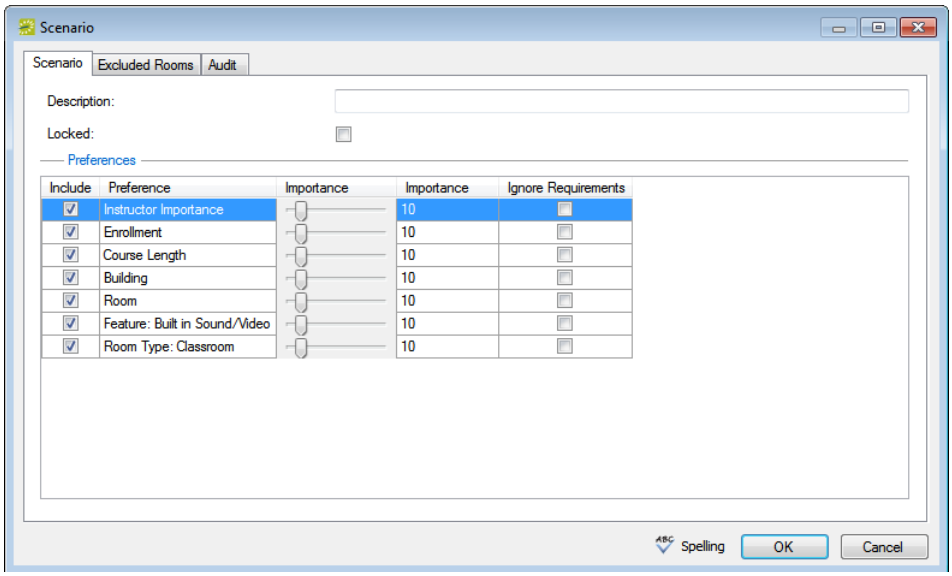
1. Pre-assignment—The Domain Scheduler manually assigns a selection of courses to rooms. Typically, the manual assignment takes place if these rooms are to be excluded in an optimization scenario after pre-assignment. For instance, if only a swimming course should be assigned to "Pool," then the Domain Scheduler could manually pre-assign Swimming and then exclude the pool in the optimization scenario. See "About Creating Scenarios and Optimization" on page 442 and "Creating Scenarios" on page 445.
2. Optimization—The EMS system automatically assigns rooms to courses based on room preferences, requirements, and weighted criteria. See "About Creating Scenarios and Optimization" on page 442 and "Creating Scenarios" on page 445.
3. Locking-In Assignments—After carrying out an optimization scenario, the Domain Scheduler locks in desired room assignments, and then re-optimizes the remaining portion of the optimization scenario. See "Assigning Rooms" on page 453.

The information in this section is presented as an ordered series of standalone procedures; however, the Domain Scheduler can carry out any of the procedures either separately or in any combination as necessary to best suit their working needs. This allows the Domain Scheduler to test a number of potential scenarios and compare placement results using various tools before choosing their final scenario for publishing.

About Creating Scenarios and Optimization

You create scenarios to test room assignments that have been given to courses for a term. In EMS, you can create two types of scenarios—a *pre-assignment* scenario and an *optimization* scenario. A pre-assignment scenario is a scenario in which a selection of courses are manually assigned to rooms, typically because the assigned rooms are to be excluded in an optimization scenario. In pre-assignment scenarios, the assignments are automatically considered "locked-in." An *optimization* scenario is a scenario in which EMS automatically assigns rooms to courses based on room preferences, requirements, and weighted criteria. The EMS optimization process can support 100% optimization, incremental optimization by academic unit, and/or a combination of pre-assignment and automated optimization.

Figure 13-39: Weight criteria for an optimization scenario



The optimization process assigns rooms to courses in three passes. The first optimization pass queries the term for all courses with *requirements*. These courses are scored based on the weightings (Importance) assigned to the requirements and processed in order of highest to lowest score. Any course with a requirement that cannot be accommodated remains unassigned and the room assignment must be manually resolved. The second optimization pass queries the term for all courses with *preferences*. Courses are processed from highest to lowest score. If an available room cannot be identified for a course with preferences, the optimization process begins to drop preferences (lowest weight first) from consideration in an effort to find and assign an available room. Using the Ignore Requirements option demotes a requirement to a preference and sends any class with the dropped requirement to this second optimization pass. The final optimization pass assigns rooms to all remaining courses without preferences. If the Include option for a preference is cleared, then any class with this preference is demoted to this third optimization pass.

Throughout the optimization process, the optimizer considers room capacity (the course's adjusted enrollment must fit within a room's capacity), looks for the best *seat fill* (a room with a capacity that most closely accommodates the estimated enrollment), and the best

room utilization (completely filling one room before moving on to another) to achieve the best room optimization possible. Built into the optimizer is “back to back instructor technology” which means that if an instructor teaches two classes in the same day, the optimizer places the instructor's courses in the same room if it is still available.

You can use the following variables to create a scale of weighed criteria:

- Instructor Importance—Instructor Importance is assigned in the Academic Planning (Configuration > Instructors) area of EMS Campus. Preferences belonging to those instructors who are marked as “Important” receive priority over those instructors who are not marked as important.
- Course Length—Course Length factors in the number of meeting occurrences for a class. For example, a class that meets five times per week might be given room assignment priority over a class that only meets twice per week.
- Enrollment—Enrollment uses a combination of the assigned weight *and* the following EMS Campus system parameters to determine the courses that are assigned rooms first.
    - Small Class Size (if less than xx students) - Determines what constitutes a “small” class.
    - Small Class Size Weight Adjustment - Adds/subtracts this number from the Enrollment weighting that is set in the optimization scenario.
    - Large Class Size (if more than xx students) - Determines what constitutes a “large” class.
    - Large Class Size Weight Adjustment - Adds/subtracts this number from the Enrollment weighting that is set in the optimization scenario.

For example, with all other weightings set to zero, consider the following configuration for these four settings:

- Weight assigned to Enrollment in scenario = 50
- Small Class Size (if less than xx students) = 10
- Small Class Size Weight Adjustment = -10
- Large Class Size (if more than xx students) = 75
- Large Class Size Weight Adjustment = +10

The following three courses would be scored and ranked for room assignment as shown below:

Course	Estimated Enrollment	Class Size	Initial Score	Class Adjustment Size	Final Score	Room Assignment Rank
A	100	Large	50	+10	60	1
B	50	Medium	50	+0	50	2
C	5	Small	50	-10	40	3

Although the process for your organization might vary, a typical approach for using scenarios to optimize room assignments is to first create a pre-assignment scenario to partially complete the assignment of rooms to courses for a term. You would then copy this pre-assignment scenario and modify the weighted values as needed to make an optimization scenario, and then run this optimization scenario to continue with the assignment of rooms to courses. You can create as many optimization scenarios as needed (either by copying an existing scenario or creating one "from scratch") and then use various tools to compare placement results before you choose your final scenario for publishing. (See "Evaluating optimization scenarios" below.)

Evaluating optimization scenarios

The Domain Scheduler can test an unlimited number of potential scenarios and compare results using various tools before they choose their final scenario for publishing. Both the Academic Browser and the Academic Book contain an Scenario dropdown list from which a specific scenario can be selected for viewing and evaluation. (See "Searching with the Academic Browser" on page 507 and "Using the Academic Book" on page 514.) The Scenarios window contains a Print option that provides access to the following reports that can be used to for evaluating scenarios—Scenario Results, Scenario Exceptions, Unmet Preferences, and Preferences Summary. Additional reports within the Academic Planning > Reports area are also available, including Classroom Optimization, Hourly Classroom Utilization, and Course Preferences. (See "Generating Academic Reports" on page 523.)

Creating Scenarios

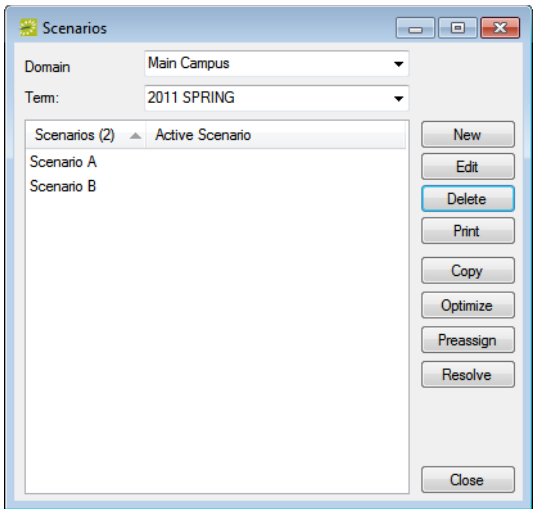
Although the process for your organization might vary, a typical approach for using scenarios to optimize room assignments is to first create a pre-assignment scenario to partially complete the assignment of rooms to courses for a term. You would then copy this pre-assignment scenario and modify it as needed to make an optimization scenario, and then run this optimization scenario to continue with the assignment of rooms to courses. You can create as many optimization scenarios as needed, either by copying an existing scenario or creating one "from scratch."

To create a pre-assignment scenario

1. On the EMS Campus menu bar, click Academic Planning > Courses > Optimization Scenarios.

   The Scenarios window opens. This window lists all the scenarios (pre-assignment and optimization) that are currently configured in your EMS database.

Figure 13-40: Scenarios window

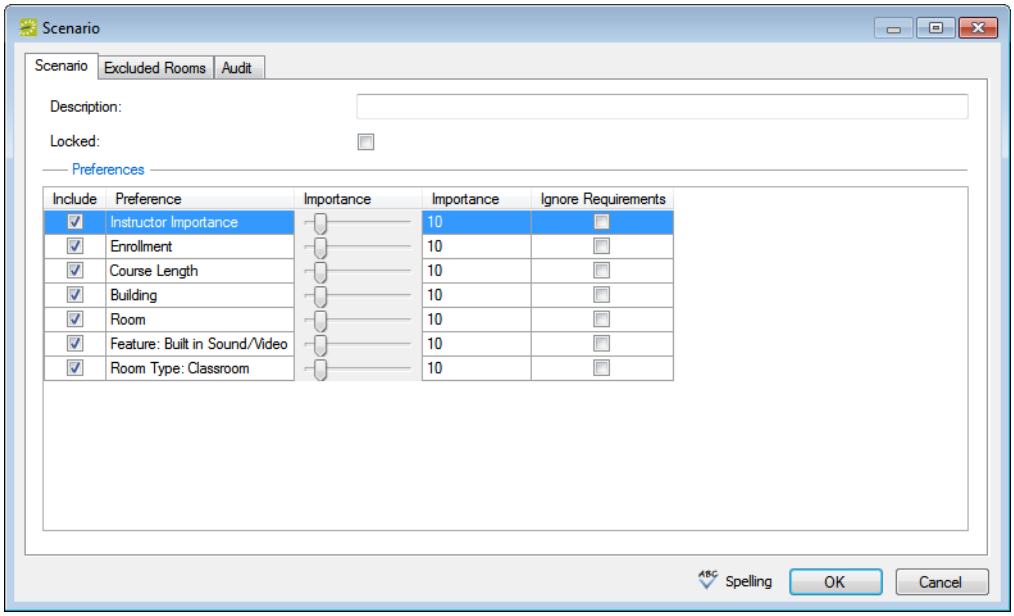


2. On the Domain dropdown list, select the domain for which you are creating the scenario, and on the Term dropdown list, select the term.

3. Click New.

   The Scenario dialog box opens. The Scenario tab is the active tab.

Figure 13-41: Scenario dialog box, Scenario tab



4. In the Description field, enter a name or description for the scenario, for example, Pre-assignment.

The name or description can be a maximum of 30 characters, including spaces.

Because all assignments in a pre-assignment scenario are manual, you do not need to set any weighted criteria or exclude any rooms.

5. Click OK.

   The Scenario dialog box closes. You return to the Scenarios window with the newly created scenario automatically selected.

6. Click Preassign.

   A message opens informing you that preassigning will set this term to Read Only and asking you if it is OK to continue.

7. Click Yes.

   The message closes and an Initializing Scenario progress dialog box opens. After the scenario is initialized, the progress dialog box closes, and the Preassign Rooms window opens. This window lists all the courses for the selected term and domain. Any courses that were previously pre-assigned are listed as Locked In.

Lock In
Unassigned Only:
Close

8. Optionally, do one or both of the following:

   - To view a course in the Course Navigator, double-click the course.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

   - To filter this list, do one or more of the following:
     - On the Academic Unit dropdown list, select an academic unit.
     - On the Subject Dropdown list, select a subject.
     - At the bottom of the window, select Unassigned Only.
     - Click on a column heading to sort by the heading.

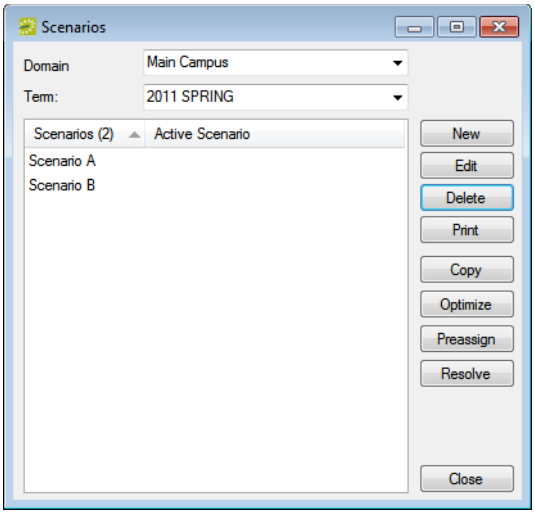
9. Continue to "Assigning Rooms" on page 453.

To create an optimization scenario

1. On the EMS Campus menu bar, click Academic Planning > Courses > Optimization Scenarios.

   The Scenarios window opens. This window lists all the scenarios (pre-assignment and optimization) that are currently configured in your EMS database.

Figure 13-43: Scenarios window



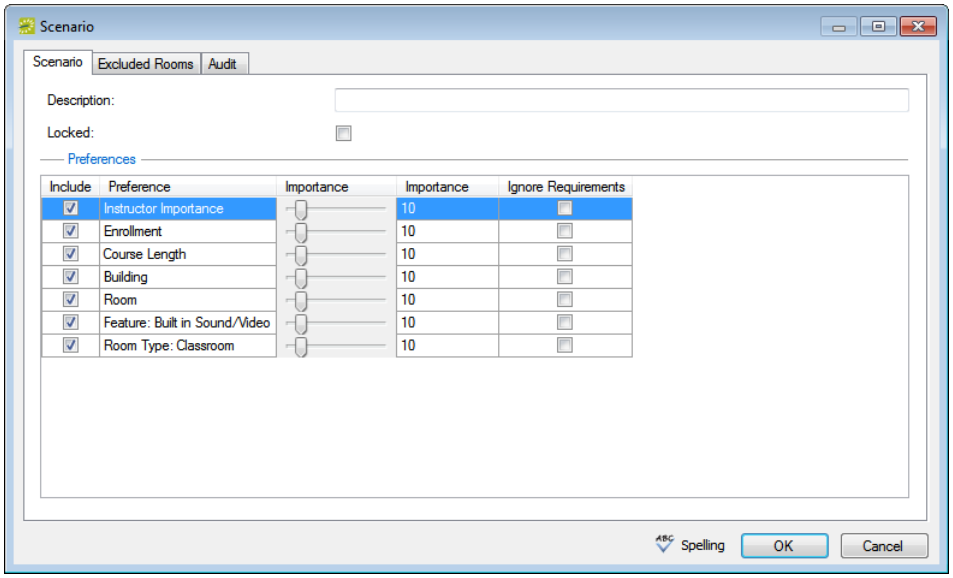
2. On the Domain dropdown list, select the domain for which you are creating the scenario, and on the Term dropdown list, select the term.

The remainder of this procedure describes how to create an optimization scenario "from scratch." You can also create an optimization scenario by copying an existing scenario. Select the scenario that you want to copy, and then click Copy. Remember, a common approach for using scenarios to optimize room assignments is to first create a pre-assignment scenario to partially complete the assignment of rooms to courses for a term. You would then copy this pre-assignment scenario and modify it as needed to make an optimization scenario.

3. Click New.

   The Scenario dialog box opens. The Scenario tab is the active tab.

Figure 13-44: Scenario dialog box, Scenario tab



4. In the Description field, enter a name or description for the scenario, for example, Scenario A.

The name or description can be a maximum of 30 characters, including spaces.

5. Do one or more of the following to set the weighted criteria:

   - By default, all preferences are included in the scenario. Clear the Include option for the preferences that are to be excluded from the weighted criteria.

Only the features that were selected during Set Preferences mode are displayed—this is not an exhaustive list of all your features.

   - For the preferences that are to be included, use the Importance slider bar to specify a weight for each preference, or enter a number in the Importance field.

Weights are arbitrary numbers that simply indicate the relative importance of one criterion to another. The importances do not have to add up to a particular "whole," for example, 100. For a detailed discussion about setting weighted criteria, see *"About Creating Scenarios and Optimization" on page 442.*

   - Some preferences might have been marked as Required by some academic units during the Set Preferences mode. Select Ignore Requirements as needed for any and all of the preferences.

6. Open the Excluded Rooms tab, and specify the rooms that *should not be assigned* to a course in this scenario (for example, rooms that have previously been assigned using a pre-assignment scenario) by doing the following:
   - On the Building dropdown list, select (all) buildings, or select a specific building.
   - On the Room Type dropdown list, leave the default value of (all), or select a specific room type.
   - In the Available list, select the room, or CTRL-click to select multiple rooms, and then click the Move (>) button to move the rooms to the Selected list.

If needed, you can repeat these steps for specific buildings until you have selected all the rooms in specific buildings that should be excluded.

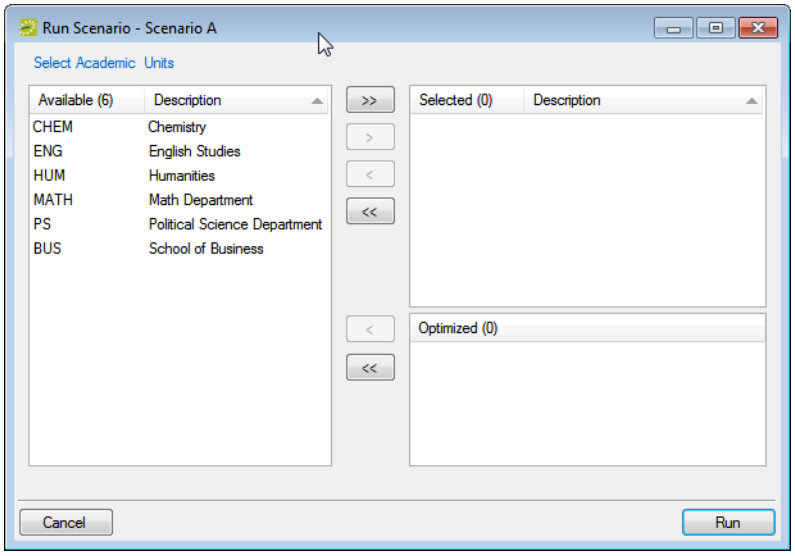
7. Click OK.

   The Scenario dialog box closes. You return to the Scenarios window with the newly created scenario automatically selected.

8. Click Optimize.

   The Run Scenario dialog box opens. This dialog box lists all the academic units that have courses for the selected term and domain.

Figure 13-45: Run Scenario dialog box



9. In the Available list, select the academic unit for which to run the optimization scenario, or CTRL-click to select multiple units, and then click the Move (>) button to move the units to the Select List.

10. Click Run.

    A message opens informing you that optimizing will set this term to Read Only for the selected academic units and asking you if it is OK to continue.

11. Click Yes.

    The message closes and an Initializing Scenario progress dialog box opens. After the scenario is initialized, the progress dialog box closes. An Optimization Results dialog box opens on top of the Resolve Room Assignments window. This dialog box indicates that the optimization was complete and it also indicates the number of courses assigned, the percent of total courses assigned, and the number of exceptions (the number of courses that could not be assigned).

At any time, if you need to review this information, click Print > Scenario Results.

12. Click OK.

    The Optimization Results dialog box closes and the Resolve Room Assignments window is now the active window. By default, this window lists only those courses for which rooms could *not* be assigned.

    Courses can remain unassigned for the following reasons:

    - Conflicts with another course: A course or courses that was ranked higher in preference criteria was assigned the room that this course required. Select the course to review the list of conflicting courses.
    - No space can hold course: The course had requirements that were so specific, no room was available that met the criteria either because the room does not exist, or it was excluded from the scenario.

Figure 13-46: Resolve Room Assignments window

13. Optionally, you can do one or more of the following:
    - If a course is unassigned because of a conflict, click once on the course to open a Conflicts tab in the lower part of the window. This tab lists all the courses that are in conflict with the selected course.
    - To view a course in the Course Navigator, double-click the course.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

- To filter this list, do one or more of the following:
  - On the Academic Unit dropdown list, select an academic unit.
  - On the Subject Dropdown list, select a subject.
  - Click on a column heading to sort by the heading.

You can also clear the Exceptions Only option at the bottom of the window to view a list of all courses (assigned and unassigned) for the selected domain and term. (Courses that were pre- assigned are listed as Locked-In).

14. Continue to "Assigning Rooms" on page 453.

If you are carrying out incremental optimization by academic unit, you must repeat this procedure for every academic unit that is to be optimized.

Assigning Rooms

After you have completed pre-assignment of rooms and/or room optimization, four options are available to resolve room assignments:

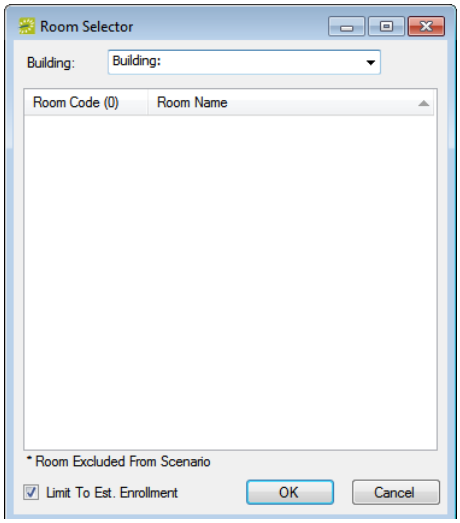
- Assign. The Assign option lists all rooms regardless of availability or preferences. It is intended to provide a means for the Domain Scheduler to quickly assign a room without going through the search process.
- Search. The Search option initially lists any preferences and requirements that were specified during the Set Preferences mode. The Domain Scheduler can use these preferences as a basis for a room search or they can specify and/or clear other criteria to complete the room search.
- Unassign. The Unassign option removes the Assigned status for a course. You can then use the Assign option or the Search option to assign a different room to the course. The Unassign option is available after you assign a room to a course, or search for a room, and then assign it to a course.
- Swap. The Swap option allows you to swap the room assignments of two courses. The swap option is only available after selecting two courses that have identical meeting patterns *and* that have been assigned to rooms.

To assign rooms to courses

1. Select the course to which a room is to be assigned.
2. On the Preassign Rooms window, or the Resolve Room Assignments window, click Assign.

   The Room Selector dialog box opens.

Figure 13-47: Room Selector dialog box



3. On the Building dropdown list, select (all) buildings or select a specific building that contains the rooms that are to be considered for assignment.

   The rooms are displayed in the dialog box. By default, only those rooms that can meet the enrollment expectations, regardless of availability are displayed. Rooms that are excluded from the scenario are marked with an asterisk (*), but you can override these rooms.

4. Optionally, to display all rooms in the Room Selector dialog box, clear the Limit to Est. Enrollment option.

5. Select a room, and then click OK.

   Two results are possible:

   - If the room could not be assigned to the course because of a conflict, then a message opens indicating this. Click OK to close the message, and repeat this step until you successfully assign a room to a course.
   - If the selected room can be assigned to the course, then the course is removed from the list and you return to the Preassignment window or Resolve Room Assignment window.

6. Repeat Step 2 through Step 5 until you have successfully assigned rooms to all courses for the term. After you have assigned a room to a course, at any time, you can do any of the following:

   - To change a room assignment for a course, select a course for which a room has been assigned, and then click Unassign. You can then repeat Step 2 through Step 5 to assign a room to the course.
   - Courses that were pre-assigned are listed as Locked In. To re-optimize any portion of the course assignments, select one or more assigned courses (CTRL-click to select multiple courses), and then click Lock In to lock in these additional courses, and then rerun your optimization scenario.
   - To swap the room assignments of two courses, CTRL-click to select two courses with identical meeting patterns, and then click Swap.

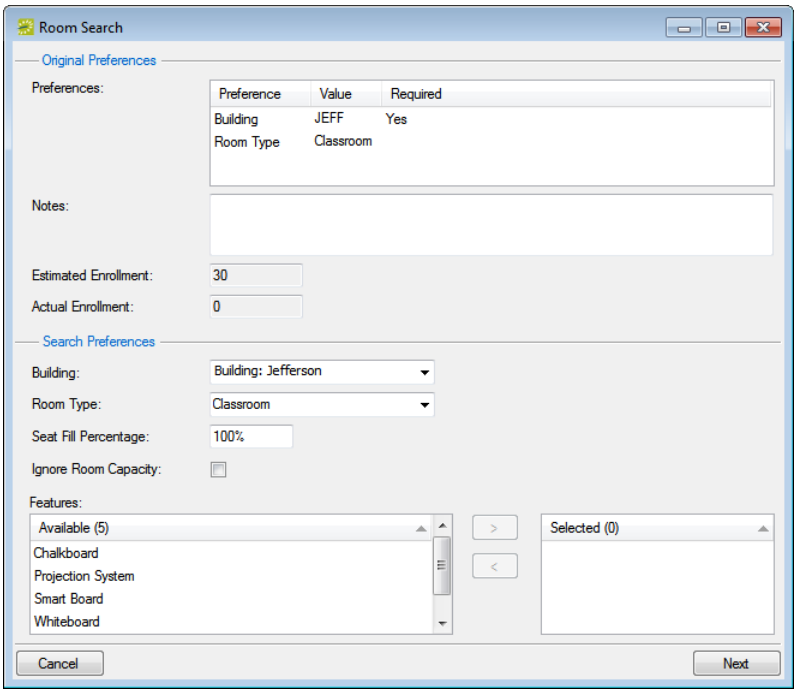
You can open the Resolve Room Assignments window at any time by clicking Resolve on the Scenarios window. The system does not require all courses to be assigned to rooms. Those courses that are left unassigned are placed in a special TBD room when publishing and can be assigned post-publish.

To search for rooms to assign to a course

1. Select the course to which a room is to be assigned.
2. On the Preassign Rooms window, or the Resolve Room Assignments window, click Search.

   The Room Search dialog box opens. The preferences or requirements that the academic unit specified for the selected course during the Set Preferences mode are displayed at the top of the dialog box. By default, these preferences are included in the search criteria.

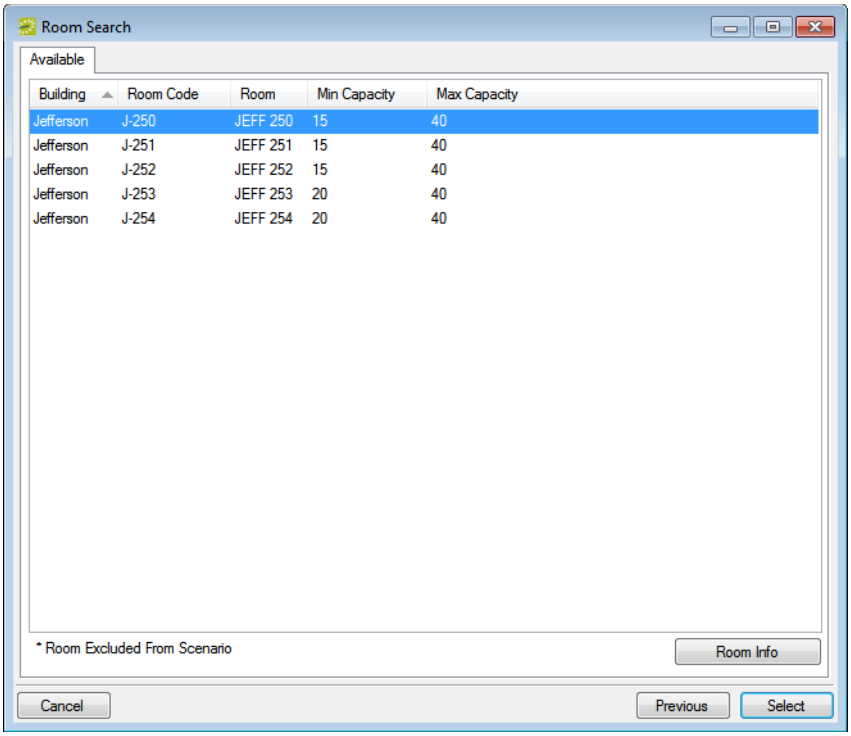
Figure 13-48: Room Search dialog box



3. In the Search Preferences (lower) pane of the dialog box, modify the search criteria as needed, and then click Next.

   The Room Search dialog box is updated with a list of rooms that meet your search criteria. Rooms that have been excluded from the scenario (because of pre-assignment or a conflict) are marked with an asterisk (*). See Figure 13-49 on page 456.

Figure 13-49: Room Search dialog box



4. Optionally, to view information about a room, select the room, and then click Room Info; otherwise, go to Step 5.

   The Room Info dialog box opens. The dialog box displays information about the room, including the room's properties, the setup type, the room's features, and so on. After you are done viewing the room's information, click Close to close the Room Info dialog box.

5. On the Room Search dialog box, select the room that is to be assigned to the course, and then click Select.

   The room is assigned to the course. You remain on the Preassignment window or the Resolve Assignments window. If the room is assigned from the Preassigned window, then it is also marked as Locked In.

6. Repeat this procedure as needed to assign rooms to courses. After you have assigned a room to a course, at any time, you can do one or both of the following:
   - If you want to change a room assignment for a course, select a course for which a room has been assigned, and then click Unassign. You can then repeat Step 2 through Step 5 to assign a room to the course.
   - Courses that were pre-assigned are listed as Locked In. If you would like to re-optimize any portion of the course assignments, select one or more assigned courses (CTRL-click to select multiple courses), and then click Lock In to lock in these additional courses, and then rerun your optimization scenario.
   - To swap the room assignments of two courses, CTRL-click to select two courses with identical meeting patterns, and then click Swap.

You can open the Resolve Room Assignments window at any time by clicking Resolve on the Scenarios window. The system does not require all courses to be assigned to rooms. Those courses that are left unassigned are placed in a special TBD room when publishing and can be assigned post-publish.

Academic Planning (EMS Campus)

Publishing a Term

Section Contents

- Overview of Publishing an Academic Term on page 461.
- Publishing a Term on page 463.
- Manually Updating Course Locations in the SIS on page 468.
- Unpublishing a Previously Published Term on page 470.

Chapter 13
Academic Planning (EMS Campus)

Overview of Publishing an Academic Term

After the Domain Scheduler has finalized the assignment of courses to rooms, either with the help of the EMS room optimization process or by using the scheme that was pulled from the SIS, the next step is to publish the course schedule for the term in EMS Campus. Publishing the course schedule causes the system to book the space in EMS, creating reservations and bookings. If the EMS Campus system parameter Manually update SIS is set to “No,” then the publishing process also updates course location information directly in the SIS; otherwise, the Domain Scheduler must manually update the SIS. Publishing an academic term consists of the following steps:

1. The Domain Scheduler publishes the term, which includes specifying statuses for courses in conflict and cross-listed courses. See “Publishing a Term” on page 463.
2. If needed, the Domain Scheduler manually updates the course locations in the SIS. See “Manually Updating Course Locations in the SIS” on page 468.
3. If needed, the Domain Scheduler can unpublish a previously published term. See “Unpublishing a Previously Published Term” on page 470.

Chapter 13
Academic Planning (EMS Campus)

Publishing a Term

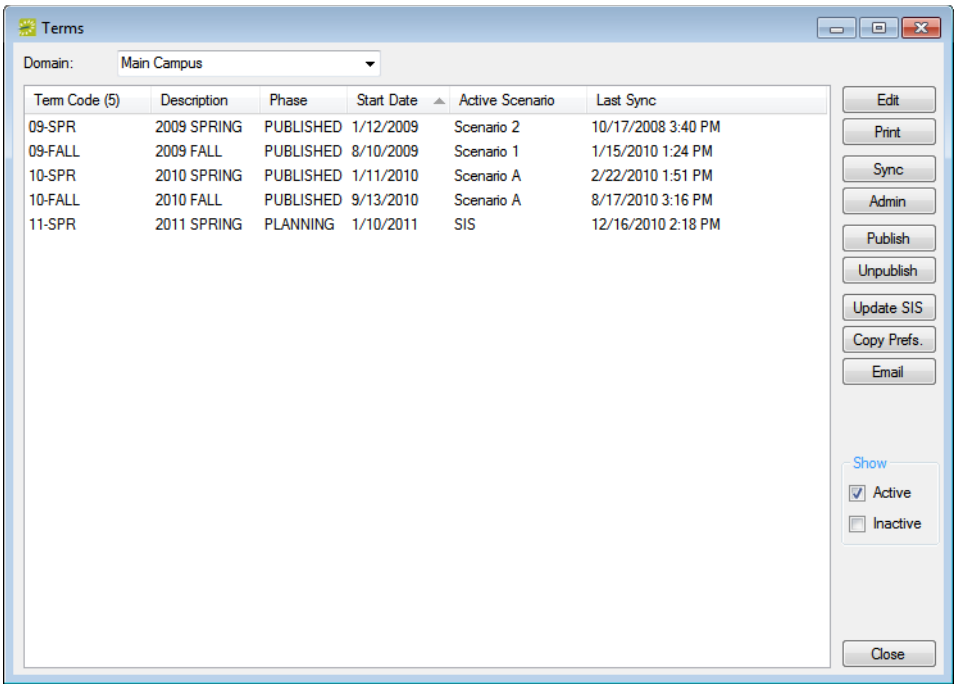
After the Domain Scheduler has finalized the assignment of courses to rooms, either with the help of the EMS room optimization process or by using the scheme that was pulled from the SIS, the next step is to publish the course schedule for the term in EMS Campus. Publishing the course schedule causes the system to book the space in EMS, creating reservations and bookings.

To publish a term

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

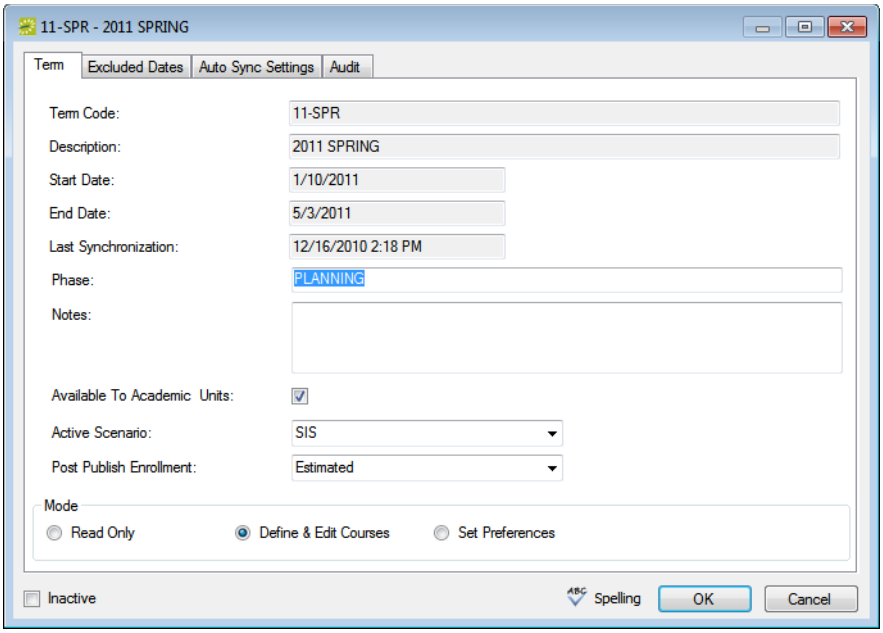
Figure 13-50: Terms window



2. On the Domain dropdown list, select the domain for which the term is being published.
3. Select the term that is being published, and then click Edit.

   The Term dialog box opens. The Term tab is the active tab. See Figure 13-51 on page 464.

Figure 13-51: Term dialog box, Term tab



4. Do the following:
   - Make sure that the Mode is set to Read Only and if the academic unit-level users are to have View access to the term, make sure that Available to Academic Units is selected.
   - On the Active Scenarios dropdown list, select the scenario that is being published.

The SIS scenario publishes room assignments that were previously defined in the SIS.

5. Optionally, in the Phase field and the Notes field, enter any information that is pertinent to the published schedules, for example, “Published” in the Phase field.
6. Open the Excluded Dates tab.
7. Select the dates that should be excluded during the publishing process.

This would include any dates where regularly scheduled classes do not take place, for example, breaks, holidays, and if applicable, final exams week.

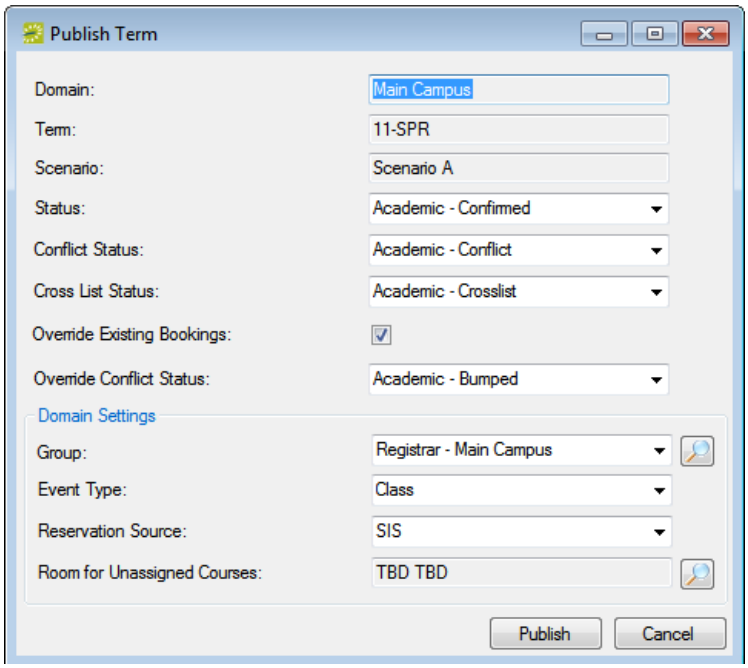
The Term dialog box closes. You return to the Terms window with the term that is to be published automatically selected.

Bookings are not created for excluded dates, which means that rooms can be scheduled for events and meetings, if needed.

8. Click Publish.

   The Publish Term dialog box opens. The Domain field, the Term field, and the Scenario field are automatically populated with the values that you previously selected and you cannot edit them.

Figure 13-52: Publish Term dialog box



9. Select the statuses required for publishing the term.

Status	Description
Status	The status that is used to book all rooms for course reservations and bookings that are created during the publishing process. **Note:** The status should be a Booked Space type.
Conflict Status	If you are publishing course room placements that were assigned in your SIS (the SIS scenario), then potentially you could have room booking conflicts created in your SIS. If a double booking is encountered during the publishing process, then the reservation and bookings for the conflicting course are published in this conflict status. **Note:** The status should be an Info Only type.
Cross List Status	The status that is used to book all cross-listed and shared space course reservations and bookings that are created during the publishing process. **Note:** The status should be an Info Only type.

Status	Description
Override Existing Bookings/Override Conflict Status	If another academic unit on campus, for example, the Student Union, is allowed to book events in academic space before the publishing process has taken place, then an event and course might be assigned to the same space. If Override Existing Bookings is selected and this situation is encountered during the publishing process, the event is "bumped" and its reservation and bookings are booked into this status. If Override Existing Bookings is not selected, then the conflicted bookings for the course are placed into the Override Conflict Status. **Note:** The Override Conflict Status should be an Info Only type.

10. Specify the Domain Settings for the term.

Setting	Description
Group	If a group has not been configured for each academic unit for which the term is being published, then the default value (as set in the Campus system parameters) is used. If needed, click the Search icon to open the Groups window and select the group that is to be used for the course reservations that are created during the publishing process. **Note:** The Group field might have a different label such as Organization, Department, and so on.
Event Type	The event type that is to be used for the course reservations and bookings that are created during the publishing process. If an event type has not been configured for the course type and/or academic unit for which the term is being published, then the default value is used. If needed, select a different value.
Reservation Source	Select the reservation source that is used for the course reservations and bookings that are created during the publishing process.
Room for Unassigned Courses	Click the Search icon to open the Room Selector dialog box and select the room in which to book the courses that have not been assigned in the SIS or in an optimization scenario. **Note:** Unassigned courses are typically booked in a special To Be Determined (TBD) room. Some organizations create a specific TBD building and/or room to accommodate this situation. The room must be an override description room. See the *EMS Setup Guide* for information about configuring a TBD building and/or room.

11. Click Publish.

    A message opens stating that publishing the term will set the term to Read Only and asking you if it is OK to continue.

12. Click Yes.

    A Publishing progress dialog box opens. After the term is published, the progress dialog box closes, and a message opens indicating that the term was published successfully.

13. Click OK to close the message and return to the Terms window.

If any errors are encountered during the publishing process, or if the EMS Campus system parameter Manually Update SIS/ERP System After Publishing is set to "Yes," then you can access your course list and manually update the course locations in your SIS. See *Manually Updating Course Locations in the SIS on page 468.*

Manually Updating Course Locations in the SIS

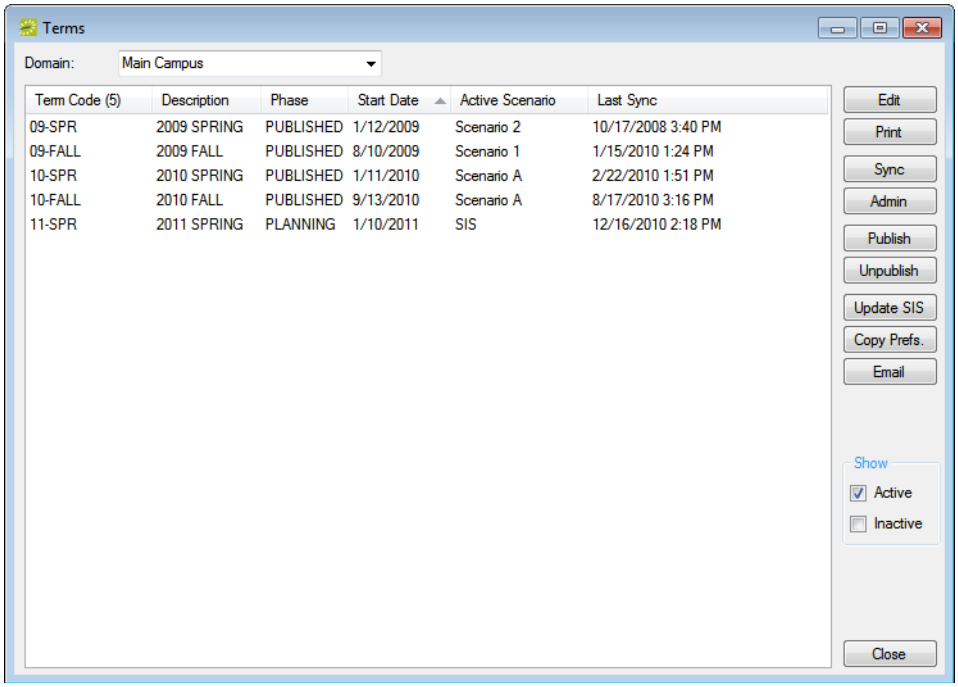
If any errors are encountered during the publishing process, or if the EMS Campus system parameter Manually Update SIS/ERP System After Publishing is set to “Yes,” then you can access your course list and manually update the course locations in your SIS.

To manually update course locations in the SIS

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-53: Terms window



2. On the Domain dropdown list, select the domain for which you are manually updating the course locations.
3. Select the term for which you are manually updating the course locations, and then click Update SIS.

   The Courses Not Updated in SIS window opens. This window lists all the courses that were not updated in the SIS along with an accompanying reason. If the reason is an error, you must resolve the error before you can continue with the manual publishing. If “Manual Publish” required is listed, then you can continue with this procedure. See Figure 13-54 on page 469.

   A message opens indicating that the updates were successful.

5. Click OK to close the message and return to the Terms window.

Unpublishing a Previously Published Term

For a variety of reasons, you might need to unpublish a previously published term, for example, you accidentally published the term using the wrong scenario, or you forgot to mark excluded dates before you published the term.

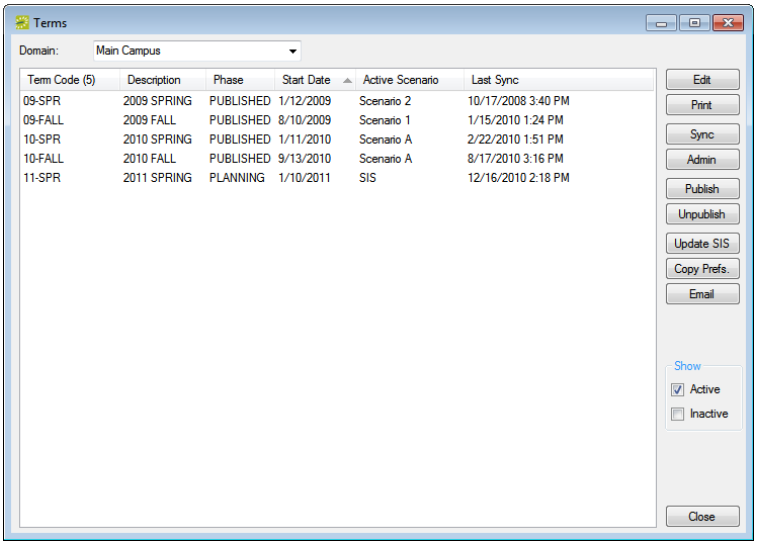
Even though you might have a valid reason for unpublishing a term, do not do so without great consideration. Unpublishing a term deletes all reservations and bookings that are associated with the term.

To unpublish a term

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-55: Terms window



2. On the Domain dropdown list, select the domain for which you are unpublishing the term.
3. Select the term that you are unpublishing, and then click Unpublish.

   A message opens indicating that unpublishing will remove all reservations and bookings for the selected term, and asking you if it is OK to continue.
4. Click Yes.

   The message closes. After the term is unpublished, a second message opens indicating that the term was successfully unpublished.
5. Click OK to close the second message and return to the Terms window.

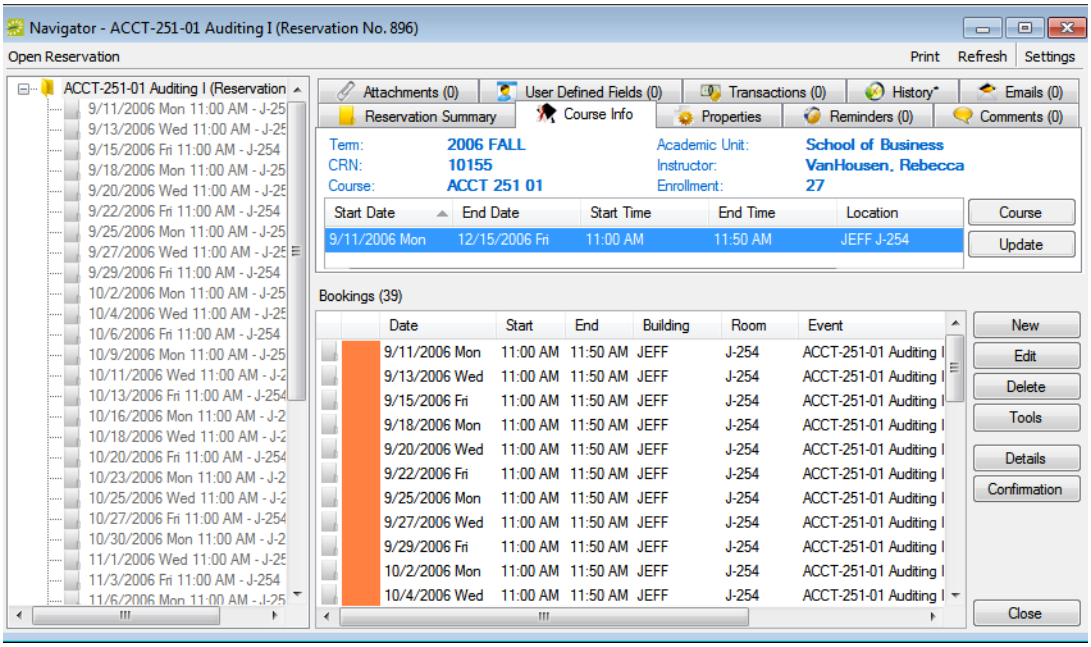
Chapter 13
Academic Planning (EMS Campus)

Reviewing Reservations and Resolving Room Assignments

After a course has been published, you can use the EMS Navigator (referred to simply as the Navigator) or the Reservation Book (referred to simply as the Book) to manage it just like any other EMS reservation and/or booking. The Course Info tab on the Navigator displays the course and the course date records for the course as it exists in your SIS. If you open a course in the Navigator that is cross-listed or shares space with another course, the Navigator displays both sets of reservations and bookings. You can review the reservations that have been made for a course and if needed, change the course room (location) for one or more of its bookings. If courses have an identical meeting pattern, you can also swap rooms (locations) between courses.

If you select a course date record, on the Course Info tab, and then click Course, the course opens in the Course Navigator.

Figure 13-56: Navigator with reservation and bookings for a course



After a term has been published, you can continue using the Academic Browser, the Academic Book and/or the Course Navigator to locate courses; however, for automation reasons, after a term is published, you should make room changes in EMS Campus and not in your SIS.

In a typical process, you would want to locate and review the following types of courses immediately after publishing:

- Courses in conflict—Use the Academic Browser to search for bookings in the academic conflict status that you designated, for example, Academic Conflict. (See "Searching with the Academic Browser" on page 507.) You can change the location to resolve the conflict (see "To change the course rooms (locations) for one or more bookings" below) or if the conflict was intentional, you can change the status to the academic share status that you designated, for example, Academic Shared. (See "To edit a booking in the Navigator" on page 97 or "To edit multiple bookings in the Navigator" on page 99.)

When you manually update the status to Shared, the courses are not linked in the same way as when marking them as Shared Space prior to publishing; however, manually updating the status does not result in these course being "cleared" from your Conflict list.

- Courses or events that were overridden by publishing—Use the Academic Browser to search for bookings in the status that you designated for override bookings, for example, Academic Bumped. (See "Searching with the Academic Browser" on page 507.) You might want to move these bookings to another location. (See "To change the course rooms (locations) for one or more bookings" below.)
- Courses that were left unassigned—Use the Academic Browser to search for bookings in the TBD room (See "Searching with the Academic Browser" on page 507.) You might want to move these courses to an actual room. (See "To change the course rooms (locations) for one or more bookings" below.)

To change the course rooms (locations) for one or more bookings

1. Open the course reservation in the Navigator. See:
   - "Viewing and Editing Reservations in the Reservation Book" on page 52.
   - "Opening a reservation directly in the Navigator" on page 71.
   - "Opening a reservation through a group" on page 72.
   - Chapter 4, "Search Tools," on page 177.

2. Do one of the following:
   - To update a course location for a single booking, see "To edit a booking in the Navigator" on page 97.
   - To update course locations for multiple bookings, see "Editing Multiple Bookings in the Navigator" on page 99.

The course location in the SIS does not update automatically unless all bookings that are specific to a meeting pattern within a reservation are changed to an identical alternate location. If for some reason, you want to manually update the SIS with a new location that was not assigned to all bookings, select the course date record on the Navigator Course Info tab, and then click the Update button.

To swap rooms between courses

If courses have an identical meeting pattern, you can also swap rooms between courses.

1. Open the Reservation Book. See "Viewing and Editing Reservations in the Reservation Book" on page 52.
2. In the Reservation Book, locate your course bookings.
3. Right-click one of the two bookings that you want to swap, and on the context menu that opens, click Swap Rooms With Another Course.
4. Select the second of your two bookings.

   A message opens asking you if you are sure that you want to swap rooms for the two courses.
5. Click Yes.

   The message closes. After the locations are swapped, the Reservation Book is updated to reflect the swap.

Post-Publish Processing of Courses

In most cases, courses are added, changed, or canceled in the SIS after the course schedule has been published in EMS. You can manually resynchronize and process these courses, or you can set options in EMS Campus to automatically resynchronize these courses. After these course are automatically resynchronized, they can be automatically processed as well, or you can manually process them. Also, at the point that actual enrollment should determine room assignment (that is, can a room's capacity handle the actual enrollment), you can process courses post-publish so that the courses are updated with the actual enrollment.

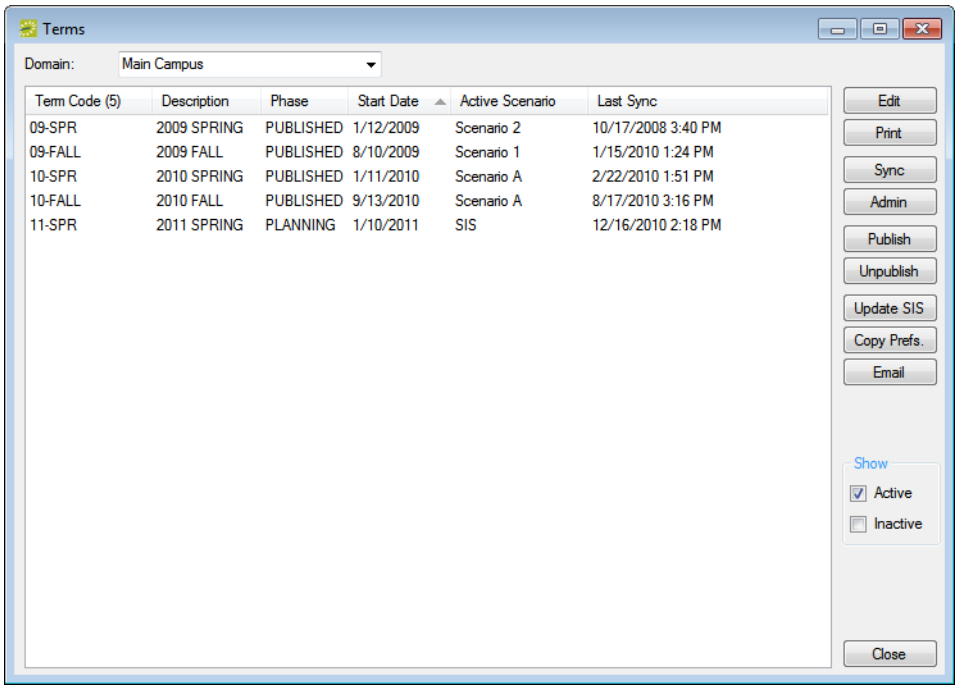
For automatic synchronizing to occur, the EMS Campus Auto Sync Service must be installed and configured. Refer to the EMS Installation manual for details.

To manually process courses post-publish

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

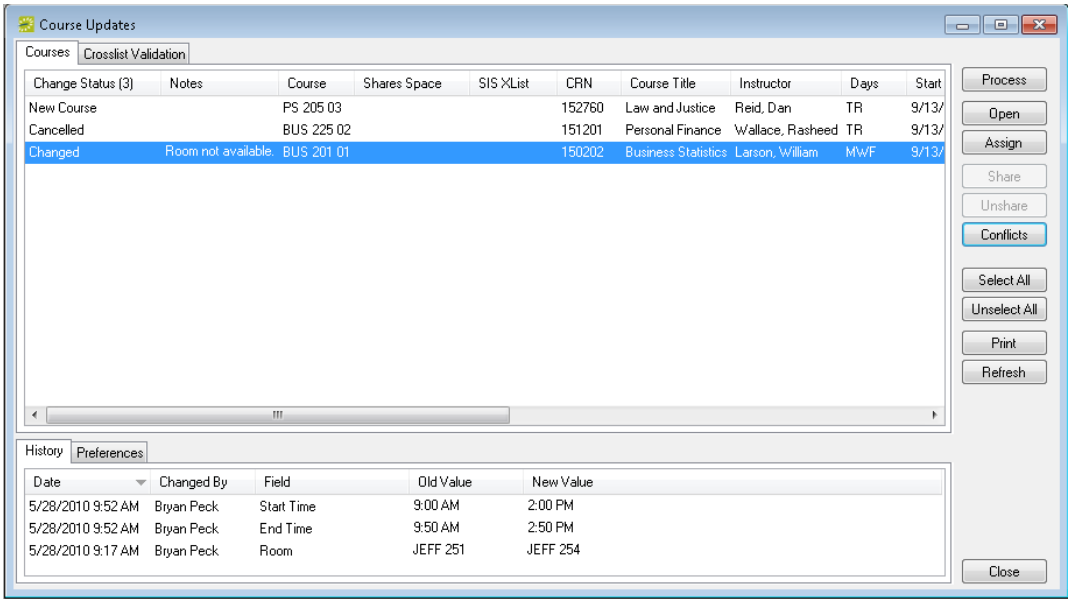
Figure 13-57: Terms window



2. Select the term which requires post-publish processing, and then click Sync.

   The Course Updates window opens. The Course tab is the active tab. This tab displays all the new courses, new course dates, changed courses, or canceled courses from the SIS. After processing, it also lists "Room Capacity Violations," or courses in which the designated enrollment (estimated or actual) has surpassed the capacity of the room. The Course Updates window also has a Crosslist Validation tab. When EMS changes a crosslist parent to accommodate a new course, course date, or change that is being processed, the cross-listed courses are displayed on the Crosslist Validation tab. The Crosslist Validation tab is for informational purposes only so that the Domain Scheduler is kept abreast of parent changes. If you are satisfied with the parent assignments, you can simply click Reviewed and the cross-listed courses are cleared from the tab; otherwise, a Set Parent option is available.

Figure 13-58: Course Updates window, Courses tab



3. Continue to one of the following:

   - "To process a canceled course post-publish" on page 478.
   - "To process a changed course post-publish" on page 478.
   - "To process a new course date post-publish" on page 479.
   - "To process a new course post-publish" on page 480.
   - "To process a Room Capacity Violation post-publish" on page 482.

The following procedures are presented in the order in which the post-publish processing should be carried out—cancellations, changes, new course dates, new courses, and then Room Capacity Violations.

To process a canceled course post-publish

1. Select the canceled course, or CTRL-click to select multiple courses.
2. Click Process.

   A message opens asking you if you are sure that you want to process the selected course dates.
3. Click Yes.

   After processing is complete, the message closes and the canceled courses are removed from the Course Updates window. The courses are canceled in EMS.

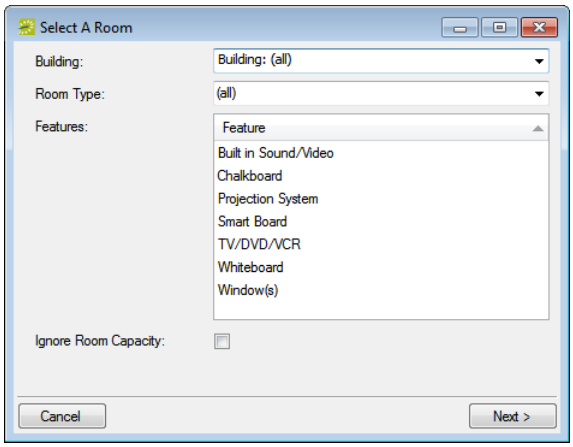
To process a changed course post-publish

A course is listed as changed if there has been a change to a day of the week, the start or end time, and/or the room in the SIS.

1. Select the changed course, or CTRL-click to select multiple courses.

   The change history for the selected courses is displayed on the History tab in the lower pane of the Course Updates window.
2. Optionally, if the Change Status for any of the selected courses resulted in a room not being available for a course, select the course and then click Conflicts to view the conflicts for the course.
3. Do one of the following:
   - If the Change Status for all the selected courses is simply Changed, then go to Step 6.
   - If the Change Status for any of the selected courses resulted in a room not being available for a course, and you want to assign a different room to the course, select the course, click Assign to open the Select A Room dialog box, and then go to Step 4; otherwise, go to Step 6.

Figure 13-59: Select A Room dialog box



4. Specify your search criteria, and then click Next.

   A list of rooms that meet your search criteria is displayed. The list includes any TBD rooms that have been configured.

5. Select the room that is to be assigned to the new courses, and then click Finish.

   The Select a Room dialog box closes and you return to the Course Updates window with the new courses still selected.

6. Click Process.

   A message opens asking you if you are sure that you want to process the selected course dates.

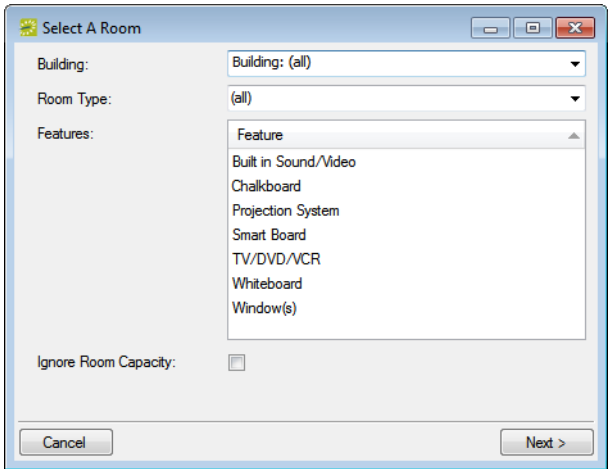
7. Click Yes.

After processing is complete, the message closes and the changed courses are removed from the Course Updates window. If a day of week change has been made, then processing course changes overwrites any individual booking changes that were previously made in EMS. If a change resulted in a room not being available for a course, and you did not select a new room for the course, then clicking Process again results in a message opening indicating this. By clicking OK, you merely acknowledge that the room is in conflict with another room, and the course date is placed in a conflict status. New bookings that are added manually in EMS or created through the final exam scheduling process are not impacted.

To process a new course date post-publish

1. Select the new course dates, or CTRL-click to select multiple new course dates.
2. If rooms have already been assigned to the course dates in the SIS and you want to keep these rooms, then go to Step 5; otherwise, click Assign to open the Select A Room dialog box, and then go to Step 3.

Figure 13-60: Select A Room dialog box



3. Specify your search criteria, and then click Next.

   A list of rooms that meet your search criteria is displayed. The list includes any TBD rooms that have been configured.

4. Select the room that is to be assigned to the new courses, and then click Finish.

   The Select a Room dialog box closes and you return to the Course Updates window with the new courses still selected.

Rooms can be processed without a room assignment. In this case, the course date is published in the TBD room that was specified when the term was published.

5. Click Process.

   A message opens asking you if you are sure that you want to process the selected course dates.

6. Click Yes.

   After processing is complete, the message closes and the new courses are removed from the Course Updates window. The courses are added in EMS.

To process a new course post-publish

1. Select the new course, or CTRL-click to select multiple new courses.
2. Do one of the following:
   - If rooms have already been assigned to the courses in the SIS and you want to keep these rooms, then go to Step 6.
   - If a room has already been assigned to the course in the SIS, but it is meant to share a room with another course, then click Share to open the Course Selector dialog box, and select the course with which to share the room, and then go to Step 6.

Rooms can be processed without a room assignment. In this case, the course date is published in the TBD room that was specified when the term was published.

6. Click Process.

   A message opens asking you if you are sure that you want to process the selected course dates.

7. Click Yes.

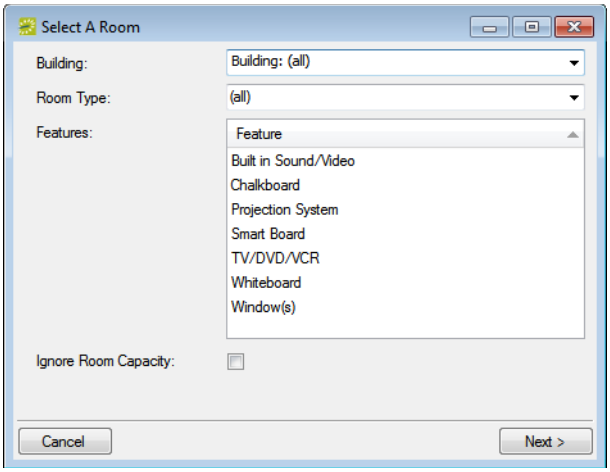
   After processing is complete, the message closes and the new courses are removed from the Course Updates window. The courses are added in EMS.

To process a Room Capacity Violation post-publish

If the enrollment for a class violates the maximum capacity for its assigned room, then the course is displayed on the Course Updates window with a change status of Room Capacity Violation.

1. Select the course, or CTRL-click to select multiple courses.
2. Do one of the following:
   - To assign the course to a new room, click Assign to open the Select a Room dialog box, then go to Step 3; otherwise, to leave the course in the same room, go Step 5.

Figure 13-64: Select A Room dialog box



3. Specify your search criteria, and then click Next.

   A list of rooms that meet your search criteria is displayed. The list includes any TBD rooms that have been configured.

4. Select the room that is to be assigned to the new course, and then click Finish.

   The Select a Room dialog box closes and you return to the Course Updates window with the new course still selected.

5. Click Process.

   A message opens asking you if you are sure that you want to process the selected course dates.

6. Click Yes.

   After processing is complete, the message closes and the new courses are removed from the Course Updates window. The courses are added in EMS.

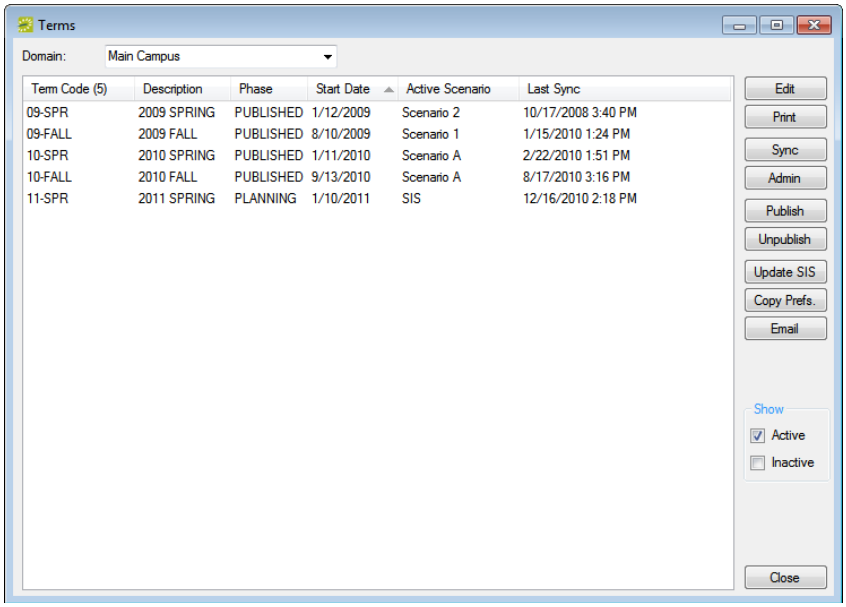
If you did not assign a new room to the course, then clicking Process merely acknowledges the room violation. The course remains in its same room.

To automatically process courses post-publish

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

Figure 13-65: Terms window

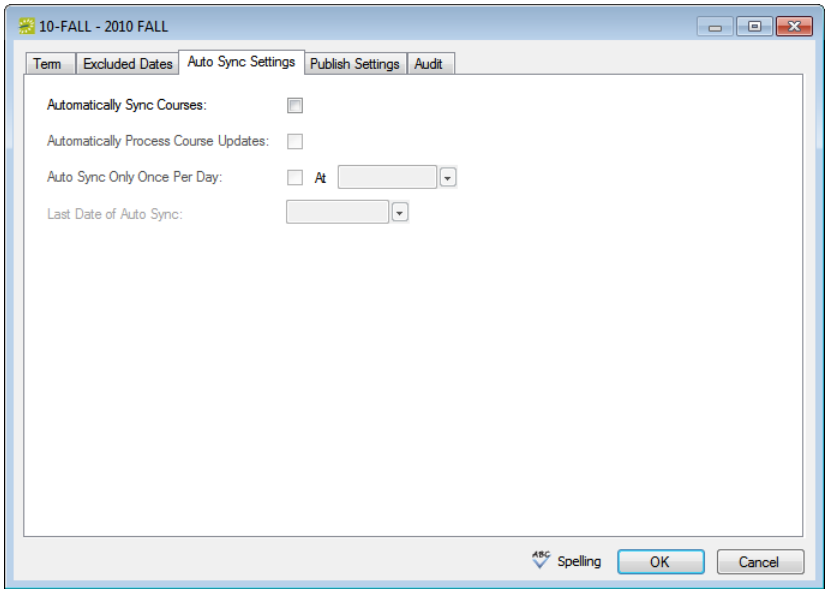


2. Select the term which requires post-publish processing, and then click Edit.

   The Term dialog box opens. The Term tab is the active tab.

3. Open the Auto Sync Settings tab.

Figure 13-66: Auto Sync Settings tab



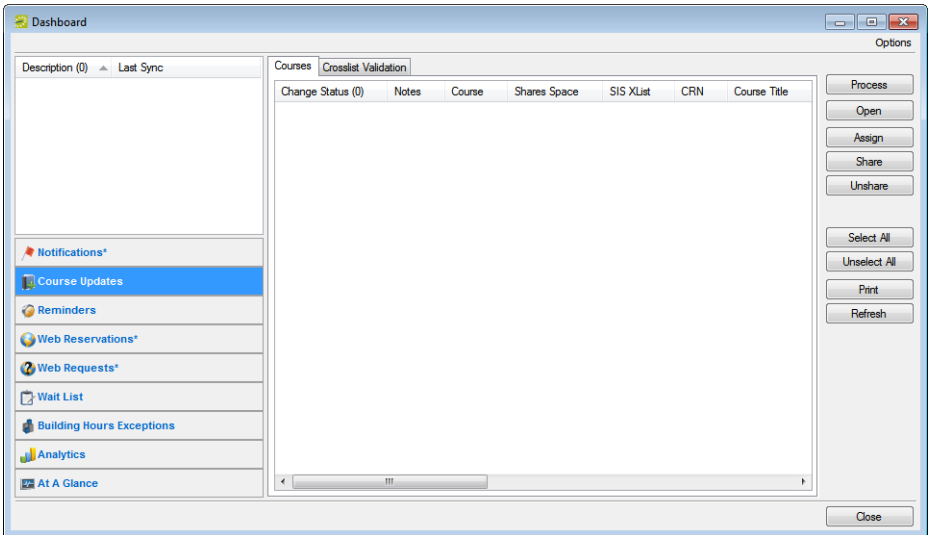
4. Specify your auto sync settings.

Setting	Description
Automatically Sync Courses	Select this option to automatically synchronize courses in your SIS. **Note:** In addition to this setting, three Campus system parameters that determine the specific types of updates that are to be auto-processed. See Campus system parameters in the *EMS Setup Guide*.
Automatically Process Course Updates	Select this option if EMS is to automatically process new courses, changes, and cancellations if possible. Leave the option blank to manually process new courses, changes and cancellations. (See "To manually process courses post-publish" on page 476.) **Note:** If this option is selected, and EMS *cannot* automatically process new courses, changes, and/or cancellations because of a conflict (for example, a room is not available), then you must manually process these courses. You must open the Course Updates tab on the EMS Dashboard, and then open the Courses sub-tab to view the courses in conflict that you must manually process. (See Figure 13-67 on page 485..) The Courses sub-tab is identical to the Course Updates window. See Chapter 5, "EMS Dashboard," on page 207 for information about working with tabs on the Dashboard window.
Auto Sync Only Once Per Day	If you do not select this option, then EMS automatically synchronizes the courses in your SIS according to the settings for the EMS Campus Auto Sync service.
Last Date of Auto Sync	Required value. Enabled after Automatically Synch Courses is selected. Select the last date on which synchronization is to be automatically carried out by EMS.

5. Click OK.

   The Term dialog box closes. You return to the Terms window.

Figure 13-67: Dashboard window, Course Updates tab



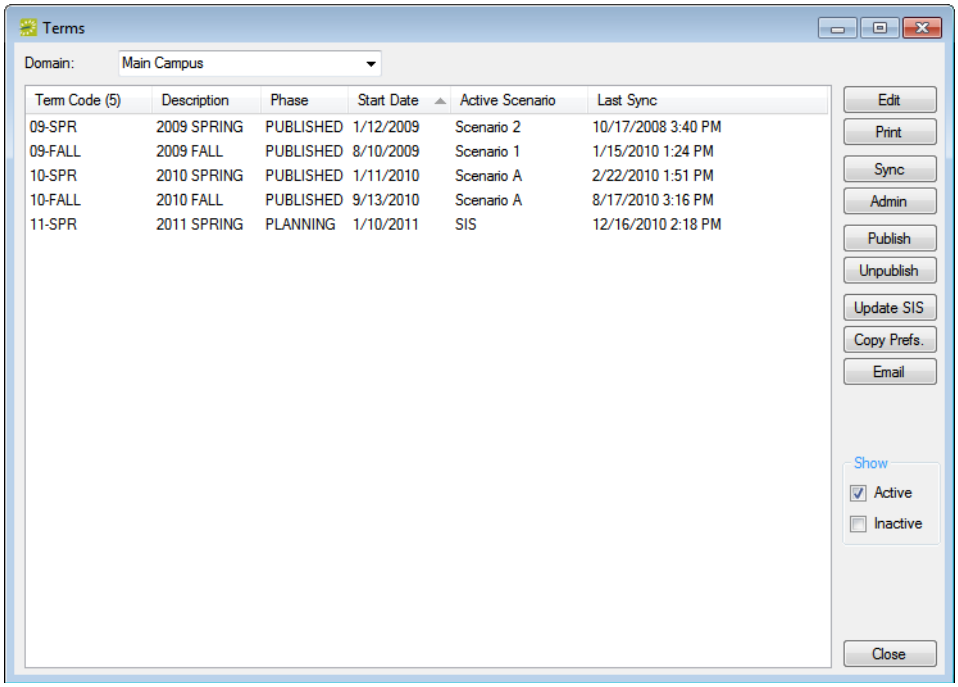
To process courses post-publish for enrollment

Typically, you publish your term in EMS prior to registration beginning. As a result, estimated enrollment is the most relevant value for searching for rooms with appropriate capacities. Closer to the start of the term, however, actual enrollment might become more relevant and you might need to change the setting so that EMS uses this value when searching for new rooms in the Navigator wizards and Course Updates window.

1. On the EMS Campus menu bar, click Academic Planning > Courses > Manage Terms.

   The Terms window opens.

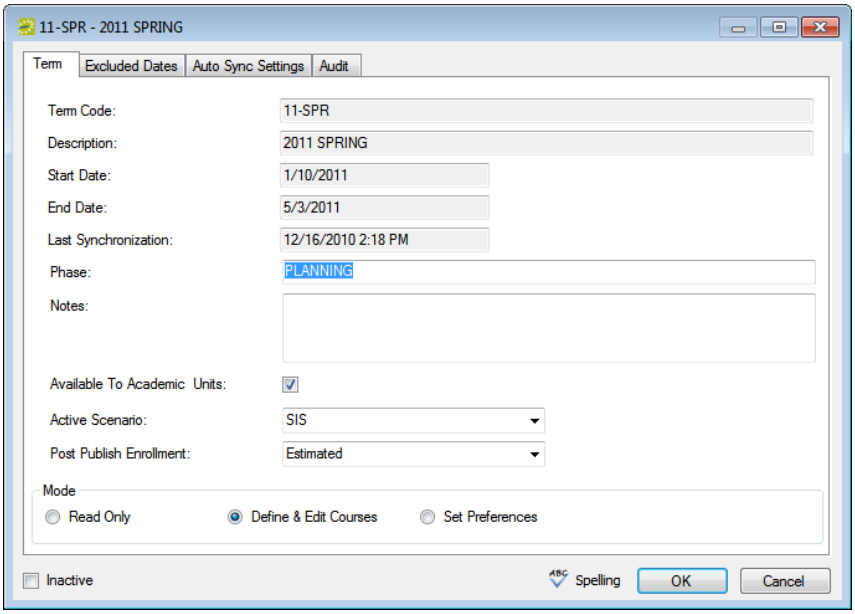
Figure 13-68: Terms window



2. Select the term which requires post-publish processing, and then click Edit.

   The Term dialog box opens. The Term tab is the active tab.

Figure 13-69: Term dialog box, Term tab



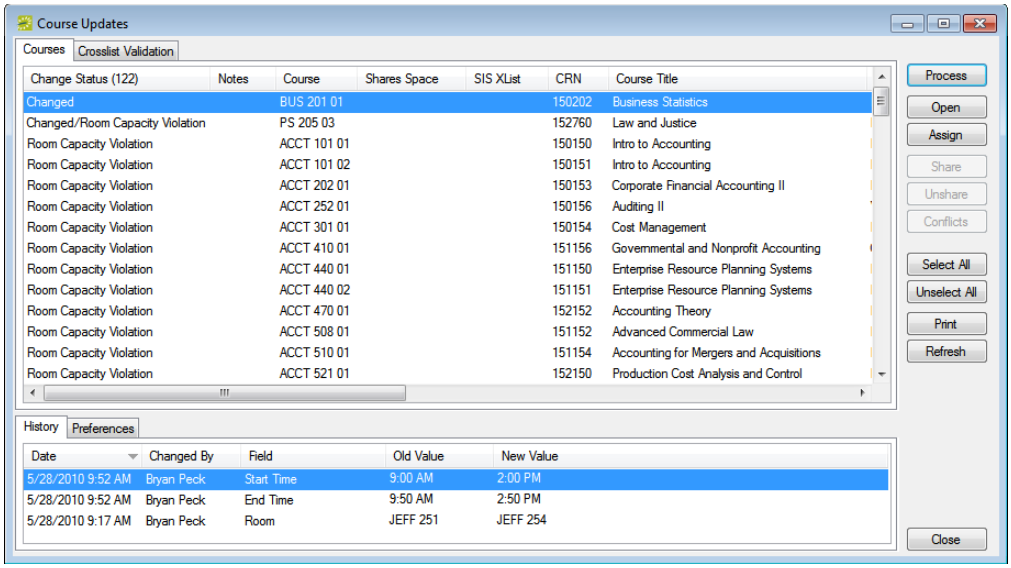
3. On the Post Publish Enrollment dropdown list, select Actual, and then click OK.

   The Term dialog box closes. You return to the Terms window with the term still selected.

4. Click Sync.

   A Synchronizing progress dialog box opens. After the synchronization is complete, the Course Updates window opens. If the actual enrollment for a class violates the maximum capacity for its assigned room, then the course is displayed on the window with a Change Status of Room Capacity Violation. See Figure 13-70 on page 488.

Figure 13-70: Course Updates window showing rooms with capacity violations



5. To assign the course to a new room, click Assign; otherwise, go to Step 8.

   The Select A Room dialog box opens.

6. Specify your search criteria, and then click Next.

   A list of rooms that meet your search criteria is displayed. The list includes any TBD rooms that have been configured.

7. Select the room that is to be assigned to the new courses, and then click Finish.

   The Select a Room dialog box closes and you return to the Course Updates window with the new courses still selected.

8. Click Process.

   A message opens asking you if you are sure that you want to process the selected course date.

9. Click Yes.

   After processing is complete, the message closes and the new courses are removed from the Course Updates window. The courses are added in EMS.

If you did not assign a new room to the course, then clicking Process merely acknowledges the room violation. The course remains in its same room.

Setting a Final Exam Schedule

At some point after a term has been published in EMS Campus, the Domain Scheduler must schedule the final exams for the term. EMS Campus provides the functionality to automate the final exam scheduling process using templates. The Domain Scheduler creates a final exam schedule template based on all unique course schedule patterns (for example, MWF 9am-9:50am, TR 1pm-2:20pm, and so on). In addition to creating a template, the Domain Scheduler has the flexibility to define common exams, specify the final exam schedules for specific courses, specify the final exam for multiple courses, and/or exclude certain courses from the final exam scheduling process.

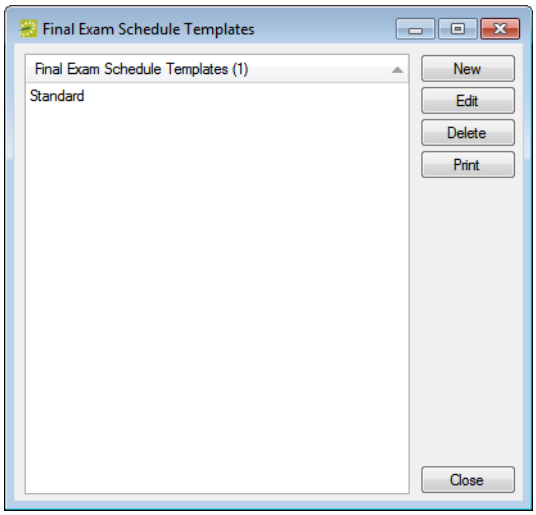
Unless otherwise specified in Final Exam Settings, EMS Campus attempts to schedule the final exam for a course in the same room that the course has been using for the term. The final exam session publishing process adds the final exam as a separate booking in the course's reservation.

To create a final exam schedule template

1. On the EMS Campus menu bar, click Academic Planning > Courses > Final Exam Schedule Templates.

   The Final Exam Schedule Templates window opens. This window lists all the final exam schedule templates that are currently configured in your EMS database.

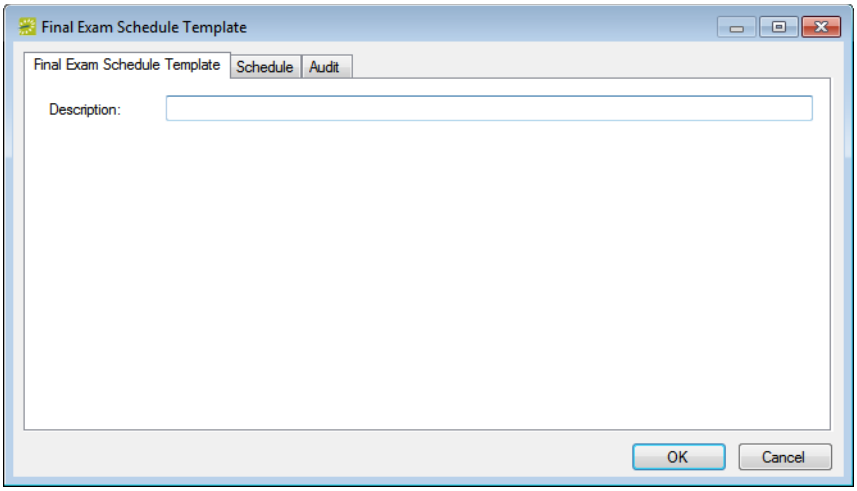
Figure 13-71: Final Exam Schedule Templates window



2. Click New.

   The Final Exam Schedule Template dialog box opens. The Final Exam Schedule Template tab is the active tab.

Figure 13-72: Final Exam Schedule Template dialog box, Final Exam Schedule Template tab

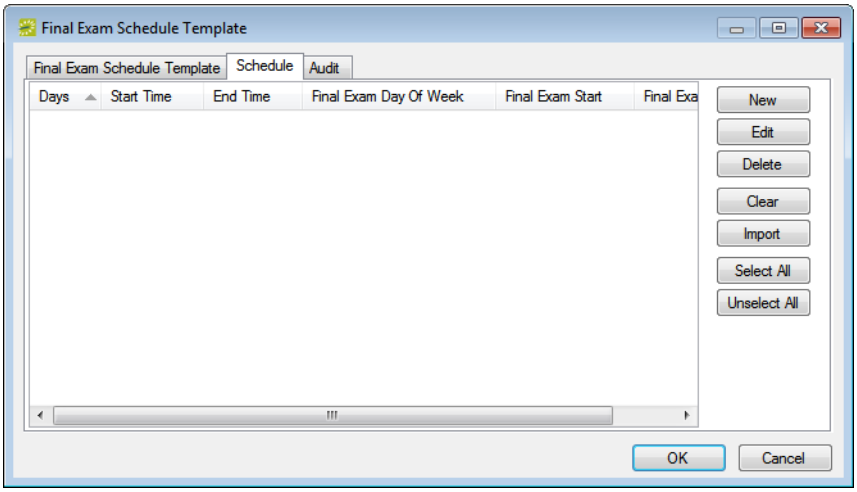


3. In the Description field, enter a name or description for the final exam schedule template, for example, Fall Finals.

The name or description can be a maximum of 30 characters, including spaces.

4. Open the Schedule tab.

Figure 13-73: Final Exam Schedule Template dialog box, Schedule tab



5. Continue to one of the following to create a list of unique course schedule patterns:
   - "To manually create a final exam schedule template" below.
   - "To import a term to create a final exam schedule template" on page 492.
   - "To import a file to create a final exam schedule template" on page 493.

To manually create a final exam schedule template

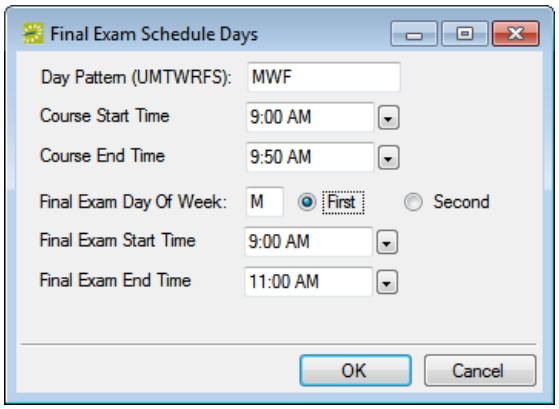
1. Click New.

   The Final Exam Schedule Days dialog box opens.

2. Enter the information for a unique course schedule pattern and the corresponding final exam day and time, and then click OK.

   The Final Exam Schedule Days dialog box closes. You return to the Schedule tab with the pattern displayed on the tab.

Figure 13-74: Final Exam Schedule Days dialog box (shown with information for a final exam schedule)



3. Repeat this procedure as many times as needed to create a final exam schedule template for each unique course schedule pattern in the term.
4. Click OK on the Final Exam Schedule Template dialog box.

   The dialog box closes. You return to the Final Exam Schedule Templates window with the newly configured final exam schedule template automatically selected.

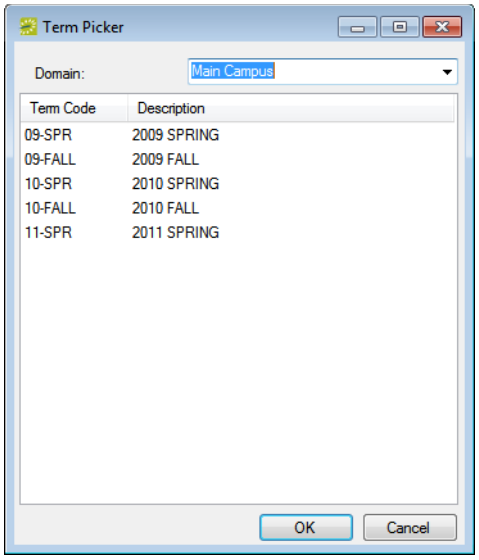
If any meeting patterns are left without a corresponding final exam time, then courses that fit that meeting pattern in the term will not have a final exam scheduled for them.

To import a term to create a final exam schedule template

1. Click Import, and on the dropdown list that opens, select Term.

   The Term Picker dialog box opens. The dialog box lists all the terms that are currently configured in your EMS database.

Figure 13-75: Term Picker dialog box



2. Select your Domain and Term for which you are creating the final exam schedule template, and then click OK.

   EMS scans the term and identifies unique meeting patterns to begin the template building process. After the import is complete, a message opens indicating this.

3. Click OK to close the message and return to the Schedule tab.

   The imported patterns are displayed on the Schedule tab.

4. Select an individual pattern, or CTRL-click to select multiple patterns, and then click Edit to open the Final Exam Schedule Days dialog box and assign the final exam day of the week and the final exam start and end times.

5. Click OK to close the Final Exam Schedule Days dialog box and return to the Schedule tab.

6. Click OK on the Final Exam Schedule Template dialog box.

   The dialog box closes. You return to the Final Exam Schedule Templates window with the newly configured final exam schedule template automatically selected.

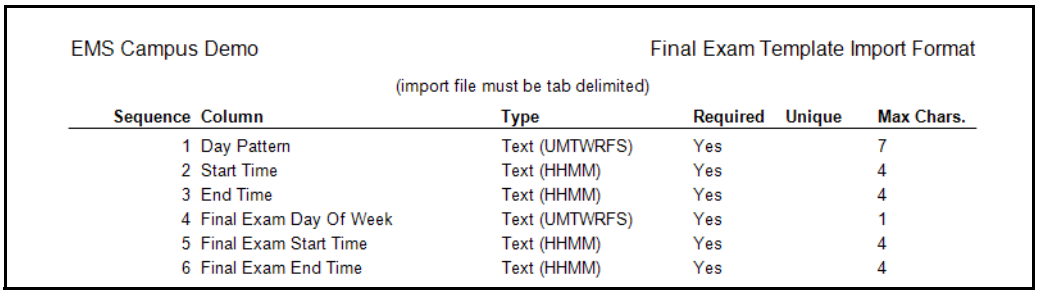
If any meeting patterns are left without a corresponding final exam time, then courses that fit that meeting pattern in the term will not have a final exam scheduled for them.

To import a file to create a final exam schedule template

You can import your course schedule patterns from a tab-delimited text file. To view the import file specifications, on the Final Exam Schedule Templates window, click Print > Import Format.

See Appendix E, Import File Specifications in the EMS Setup Guide for a table that details the Course Schedule Patterns import file specifications.

Figure 13-76: Course Schedule Patterns import file format



EMS Campus Demo — Final Exam Template Import Format

(import file must be tab delimited)

Sequence	Column	Type	Required	Unique	Max Chars.
1	Day Pattern	Text (UMTWRFS)	Yes		7
2	Start Time	Text (HHMM)	Yes		4
3	End Time	Text (HHMM)	Yes		4
4	Final Exam Day Of Week	Text (UMTWRFS)	Yes		1
5	Final Exam Start Time	Text (HHMM)	Yes		4
6	Final Exam End Time	Text (HHMM)	Yes		4

1. Click Import, and then on the dropdown list that opens, click File.

   The Open File dialog box opens.

2. Browse to and select the import file, and then click Open.

   The Open dialog box closes and the course schedule patterns are imported. After the import is complete, a message opens indicating this.

3. Click OK to close the message and return to the Schedule tab.

   The imported patterns are displayed on the Schedule tab.

4. Select an individual pattern, or CTRL-click to select multiple patterns, and then click Edit to open the Final Exam Schedule Days dialog box and assign the final exam day of the week and the final exam start and end times.

5. Click OK to close the Final Exam Schedule Days dialog box and return to the Schedule tab.

6. Click OK on the Final Exam Schedule Template dialog box.

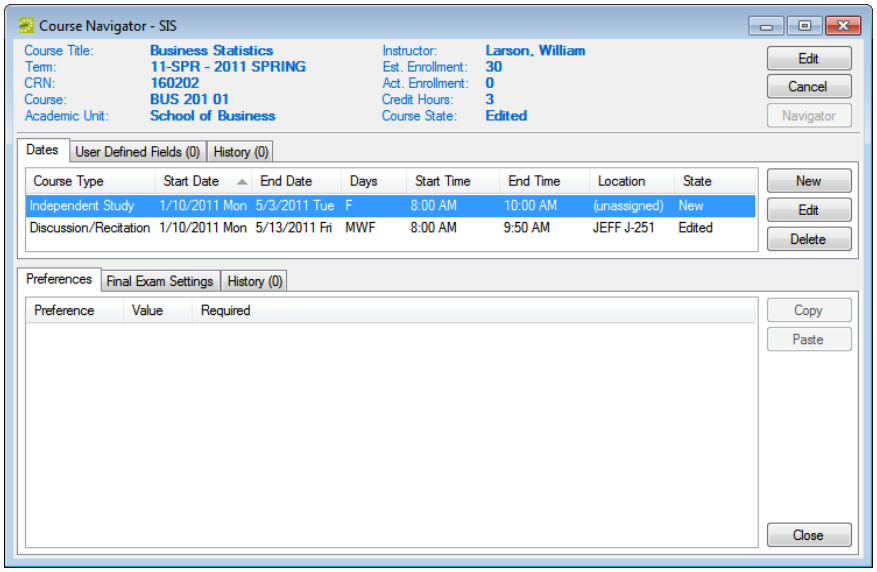
   The dialog box closes. You return to the Final Exam Schedule Templates window with the newly configured final exam schedule template automatically selected.

If any meeting patterns are left without a corresponding final exam time, then courses that fit that meeting pattern in the term will not have a final exam scheduled for them.

To specify final exam settings for a specific course

1. Open the specific course in the Course Navigator through either the Academic Browser, the Academic Book, or the Navigator.

Figure 13-77: Course opened in the Course Navigator

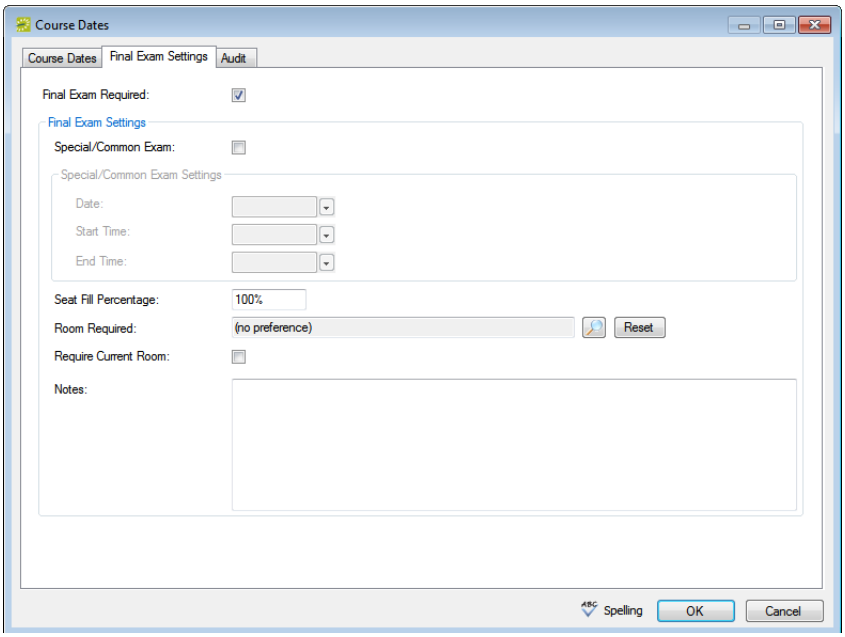


2. In the middle pane of the Navigator, select a course date record, and then click Edit.

   The Course Dates dialog box opens. The Course Dates tab is the active tab.

3. Open the Final Exam Settings tab.

Figure 13-78: Course Dates dialog box, Final Exam Settings tab



4. Do any of the following:
   - If a final exam is not required for the course, then clear the Final Exam Required option, and go to Step 5.

Typically, courses with multiple course dates, lab components, or short-term courses are marked as "No Exam Required."

   - If the course is meeting at a time other than what is specified by the template (see "To create a final exam schedule template" on page 489), select Special/Common Exam, and then enter the date, and start and end times for the special/common exam.
   - Optionally, if you would like the seat fill percentage to be a different value than the default value, update the seat fill percentage for the exam.
   - If the exam is to take place in a different room (not the same room that the course has been using all semester), click the Search icon next to Room Required to open the Room Selector dialog box and select a different room for the exam.
   - If the exam is to take place in the same room that the course has been using all semester, then select Require Current Room.

During publishing of the final exam session, if the same room is unavailable, EMS leaves the course unassigned for a manual search.

5. Optionally, in the Notes field, enter any information that is pertinent to the course or final exam.
6. Click OK.

   The Course Dates dialog box closes. You return to the Course Navigator with the course date still selected.

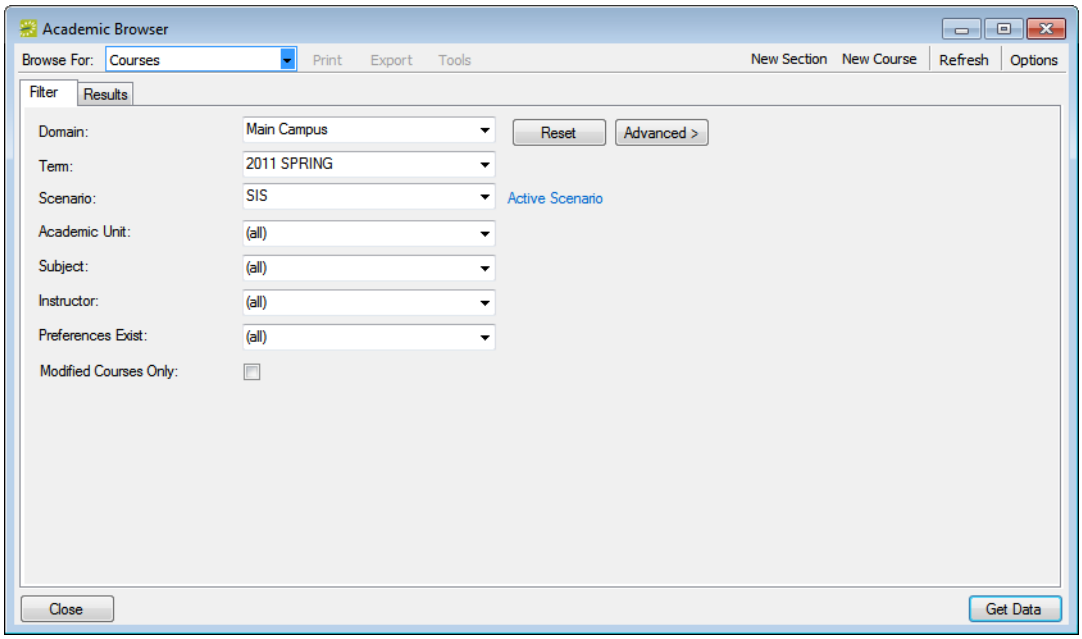
To specify final exam settings for multiple courses

1. On the EMS Campus menu bar, click Academic Planning > Courses > Academic Browser.

   The Academic Browser opens.

2. If needed, open the Filter tab.

Figure 13-79: Academic Browser, Filter tab



3. On the Domain dropdown list, select the appropriate domain and on the Term dropdown list, select the appropriate term.

4. Set any other criteria (academic unit, subject and so on) as needed to provide assistance in locating the courses for which you want to set preferences and requirements, and then click Get Data.

   The courses that meet your search criteria are displayed on the Results tab.

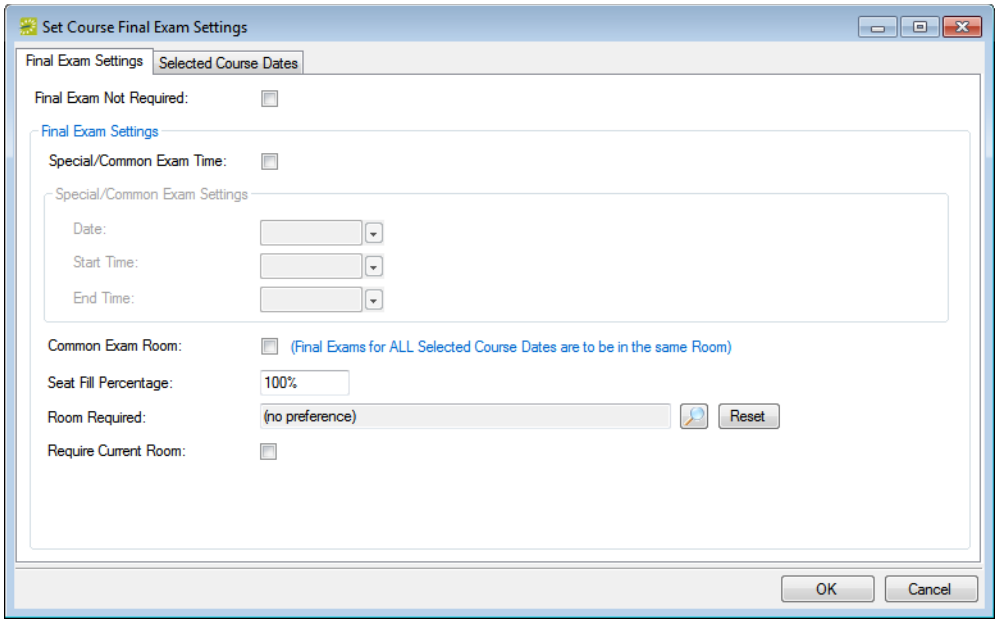
For detailed information about searching with the Academic Browser, see "Searching with the Academic Browser" on page 507.

5. In the search results, CTRL-click to select the multiple courses for which you are setting the final exam schedule.

6. On the Tools menu, click Set Final Exam Settings.

   The Set Course Final Exam Settings dialog opens. See Figure 13-80 on page 497.

Figure 13-80: Set Course Final Exam Settings dialog box



- If a final exam is not required for the courses, then clear the Final Exam Required option, and go to Step 7.

Typically, courses with multiple course dates, lab components, or short-term courses are marked as "No Exam Required."

- If the courses are meeting at a time other than what is specified by the template (see "To create a final exam schedule template" on page 489), select Special/Common Exam, and then enter the date, and start and end times for the special/common exam.

All the selected courses will meet at the date/time specified

- If the final exams for *all* the selected courses are to be in the same room, then select Common Exam Room.
- Optionally, if would like the seat fill percentage to be a different value than the default value, update the seat fill percentage for the exam.
- If the exam/exams are to take place in a different room (not the same rooms that the courses have been using all semester), click the Search icon next to Room Required to open the Room Selector dialog box and select a different room for the exams.

All courses will meet in this room for the final exams.

- If the exams are to take place in the same rooms that the courses have been using all semester, then select Require Current Room.

If no room is requested, or Require Current Room is selected, then each course will have the final exam in their own room. During publishing of the final exam session, if the same room is unavailable, EMS leaves the course unassigned for a manual search.

7. Optionally, in the Notes field, enter any information that is pertinent to the course or final exam.
8. Click OK.

   The Related Courses Dates dialog box opens. This dialog box lists all the courses that you selected on the Results tab of the Academic Browser.

Figure 13-81: Related Course Dates dialog box

Cancel

9. Select the courses to which the final exam settings are to be applied, or click Select All to select all the courses in a single step, and then click OK.

   A message opens indicating that any final exam settings that exist for the selected courses will be overwritten, and asking you if it is OK to continue.

10. Click Yes.

    A second message opens indicating that the final exam settings were successfully set.

11. Click OK to close the second message and the Related Course Dates dialog box.

    You return to the Results tab of the Academic Browser, with the courses still selected on the tab.

Publishing a Final Exam Session

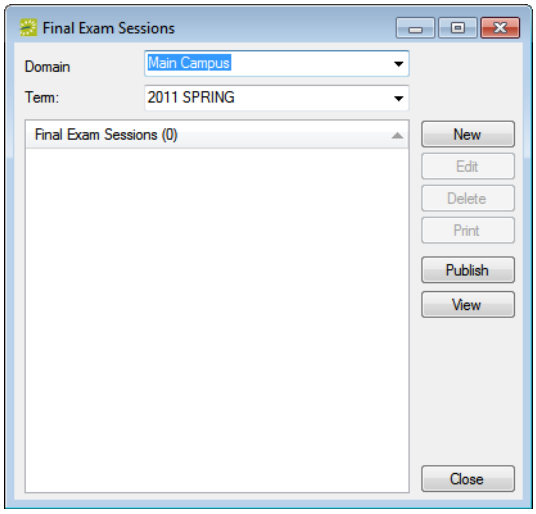
After the Domain Scheduler has created the final exam schedule template for the term, and updated any final exam settings, they must publish the final exam session. Publishing a final exam session is a two part process. First, the Domain Scheduler must create a final exam session and specify a start date for the session. Second, the Domain Scheduler must then apply a final exam schedule template to the final exam session and then they can publish the session.

To create a final exam session

1. On the EMS Campus menu bar, select Academic Planning > Courses > Final Exam Session.

   The Final Exam Sessions window opens. The window lists all the final exam sessions that have been published in your EMS database.

Figure 13-82: Final Exam Sessions window

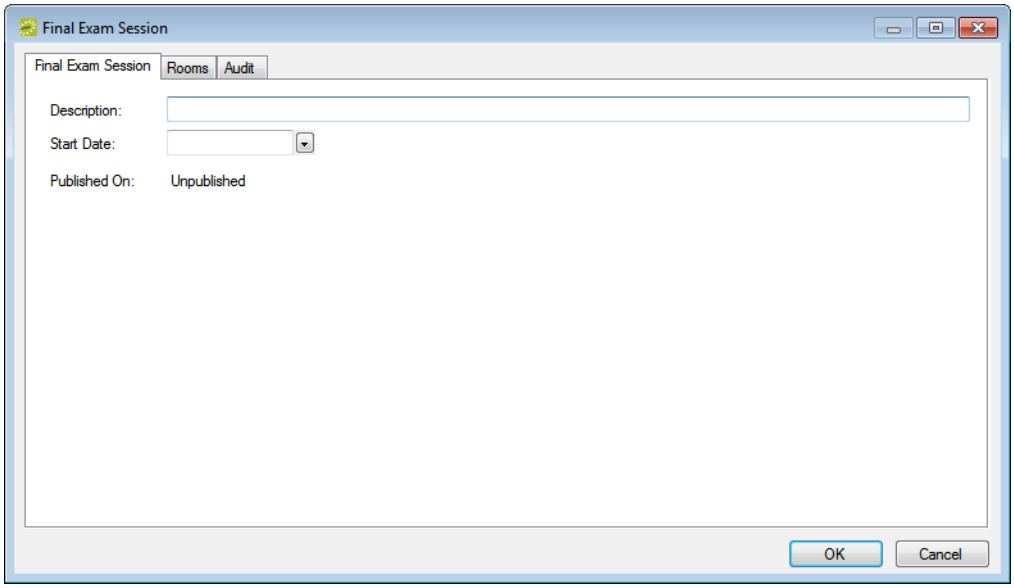


2. On the Domain dropdown list, select the campus for which you are publishing the final exam session, and on the Term dropdown list, select the term.

3. Click New.

   The Final Exam Session dialog box opens. The Final Exam Session tab is the active tab.

Figure 13-83: Final Exam Session dialog box, Final Exam Session tab



4. In the Description field, enter a name or description for the session, for example, Fall Finals 2011.

The name or description can be a maximum of 30 characters, including spaces.

5. Select a start date for the final exam session.

The final exam session will start on this date. Use the final exam template day of the week to schedule specific final exam dates. EMS can accommodate up to a two week final exam session.

6. Open the Rooms tab and select the rooms that are available to host final exams by doing the following:

   - On the Building dropdown list, select (all) buildings, or select a specific building.
   - On the Room Type dropdown list, leave the default value of (all), or select a specific room type.
   - In the Available list, select the room, or CTRL-click to select multiple rooms, and then click the Move (>) button to move the rooms to the Selected list.

If needed, you can repeat these steps for specific buildings until you have selected all the rooms in specific buildings that can host a final exam.

7. Click OK.

   The Final Exam Session dialog box closes. You return to the Final Exam Sessions window with the newly configured session automatically selected.

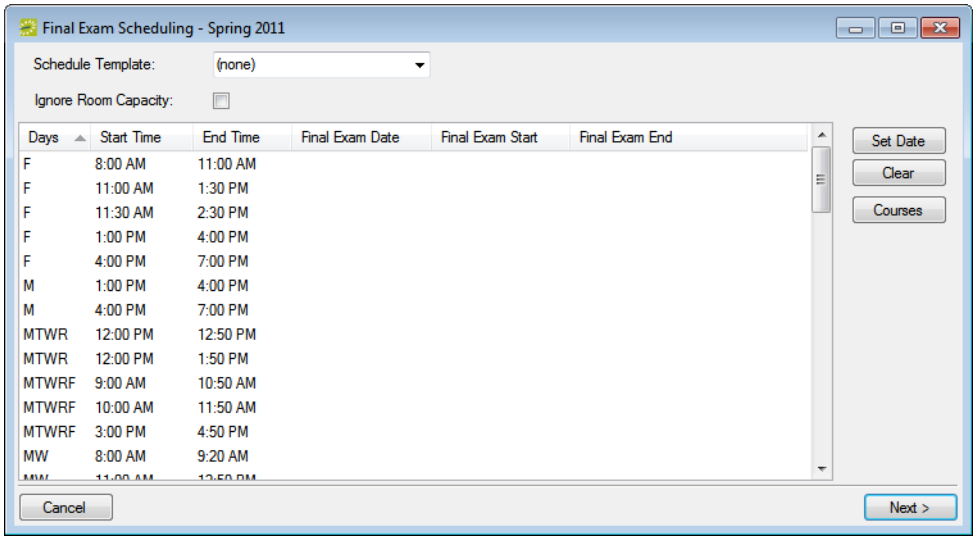
8. Continue to "To publish the final exam session."

To publish the final exam session

1. If you have not already done so, open the Final Exam Session dialog box and select the session that is to be published.
2. Click Publish.

   The Final Exam Scheduling window opens. This window lists all the unique course schedule patterns for the term for which you are publishing the final exam session.

Figure 13-84: Final Exam Scheduling window



3. On the Schedule Template dropdown list, select the final exam template that is to be used for the term, and optionally select Ignore Room Capacity if you do not want EMS to consider room capacity when assigning final exam sessions.

   The Final Exam Date, Final Exam Start, and Final Exam End columns are automatically populated based on the applied template.

4. If necessary, do one or more of the following:
   - Select a unique course schedule pattern and click Set Date to open the Final Exam Date dialog box and modify a pattern setting, or create a course schedule pattern that was not in the selected template.
   - Select a unique course schedule pattern and click Clear to clear the pattern setting, and then click Set Date to open the Final Exam Set dialog box and modify the pattern as needed.
5. Click Next.

   The Final Exam Scheduling window lists the summarizing information for any special/common exams that have been set for specific courses.
6. Optionally, select a course, and then click Open to view the course in the Course Navigator.
7. Click Finish.

   A message opens, indicating that you are about to publish the final exam schedule, and asking you if it is OK to continue.
8. Click Yes.

   The message closes. After the final exam session is published, a second message opens indicating this.
9. Click OK.

   The second message closes and the View Bookings window opens. By default, the window initially shows only those final exam bookings for which a room could *not* be scheduled.

Show Unassigned Only
Export
Open
Close

10. Optionally, do one or more or all of the following:
    - To view all final exam bookings, clear the Show Unassigned Only option.
    - To view a course in the Navigator, select the course, and then click Open.
    - To export the course list to a Microsoft Excel spreadsheet, click Export.

Unless the option to require the same room was selected for a course, course preferences can be considered and the final exam for the course can be scheduled in another room through optimization. Courses can be assigned to TBD if no rooms were available. Those courses that are in a different room than they were all semester have the NO flag in the same room column.

11. Click Close to close the View Bookings window and return to the Final Exam Sessions window.

The final exam session publishing process adds the final exam for each course as a separate booking in the course's reservation. After you publish a final exam session, you can find the final exam booking for a course by opening the course in the Navigator and expanding the reservation and scrolling to the bottom of the Reservation (left) pane, or to the bottom of the Bookings (lower right) pane. You can use the Final Exam Schedule report to review the final exam schedule or the Final Exam Settings report to view optional settings. (See “Generating Academic Reports” on page 523.) To open the View Bookings window again, click View on the Final Exam Sessions window. If you delete a final exam session, then all final exam bookings that are associated with the session are deleted.

- Using the Academic Book on page 514.
- Using the Course Navigator on page 520.

Chapter 13
Academic Planning (EMS Campus)

Searching with the Academic Browser

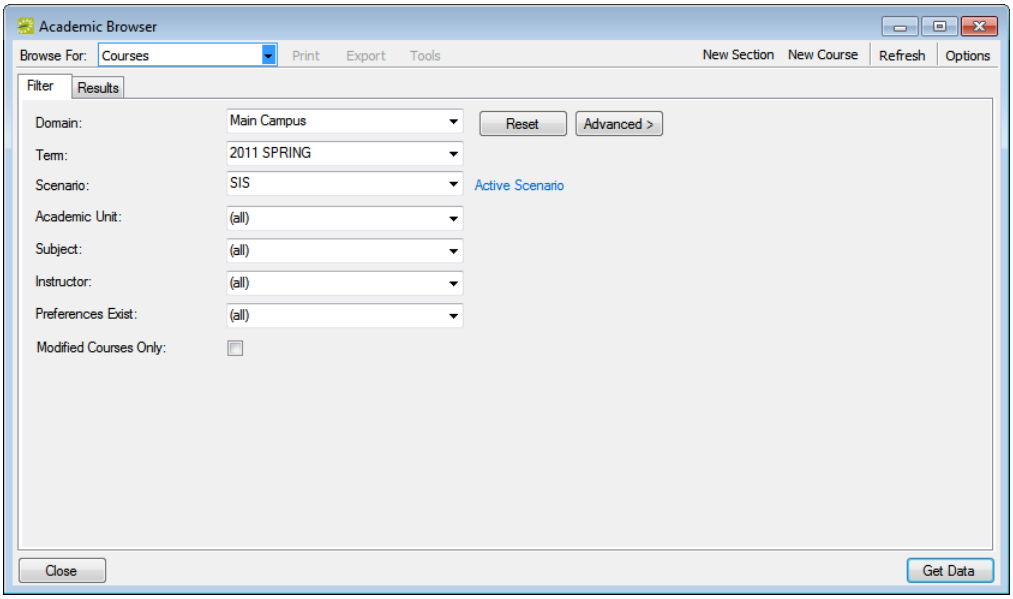
You can use the Academic Browser to search for courses or course dates. The results are displayed in a list view. When you carry out a search in the Academic Browser, you can carry out a basic search or an advanced search. A basic search is based on the basic information that you specify for a course when you first create it, such as the domain, the term, the academic unit, the subject, and so on. An advanced search is a field level search that is carried out at the course level, the course dates level, or the preference level or for published terms, at the reservation, booking or booking detail levels. For example, in an advanced search, you can specify criteria as granular as “courses with credit hours greater than 3.0.” After the search results are returned, you have a variety of options for working with the results, including sorting and grouping information or using the Tools menu to perform functions. The actions that you can carry out in the Academic Browser depend upon the mode (Read Only, Define and Edit Courses, or Set Preferences) that is enabled for the academic term with which you are working in EMS Campus.

To carry out a search in the Academic Browser

1. Do one of the following to open the Academic Browser:
   - On the EMS Campus toolbar, click the Academic Browser icon.
   - On the EMS Campus menu bar, click Academic Planning > Configuration > Academic Browser.

   The *first* time that the Academic Browser window opens, the Filter tab is set by default to a basic search; otherwise, the Filter tab is set to the search type (Basic or Advanced) that you last carried out.

Figure 13-86: Academic Browser, Basic Search options



2. Click the Basic/Advanced toggle to select the type of search that is to be carried out, and then continue to one of the following:
   - "To carry out a basic search in the Academic Browser" below.
   - "To carry out an advanced search in the Academic Browser" on page 510.

To carry out a basic search in the Academic Browser

1. On the Browse For dropdown list, select the item for which to search.
2. Enter the search criteria.

Field	Description
Domain	The domain for the course or course date.
Term	The term for the course or course date.
Scenario	Displays results for the specific optimization scenario selected. The "SIS" scenario displays room assignment information from your SIS.
Academic Unit	The academic unit for the course or course date.
Subject	The subject for the course or course date.
Instructor	The instructor for the course or course date.
Preferences Exist	Used to identify the rooms for the courses/course dates that have/do not have room preferences/requirements specified.
Modified Courses Only	Used during the Define and Edit mode to identify courses or course dates that have changed (new, canceled, and/or modified courses/ course dates).

3. Optionally, click Options and edit the default value for the additional search option Number of Records to Return.
4. Click Get Data or Refresh.

   The search results are displayed on the Results tab. If you have searched for courses, then the results include courses without course dates (meeting patterns). "Multiple" is displayed for those courses with more than one course date. If you have searched for course dates, courses without course dates are suppressed while courses with multiple meeting patterns are expanded. EMS schedules rooms only for courses with course dates. See Figure 13-88 on page 510.

5. Optionally, do one or more of the following:

   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To open an course in the Course Navigator, double-click the course entry on the Results tab.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - In Define & Edit mode, the New Course and New Section options are enabled.
   - Select a course, or CTRL-click to select multiple courses, and depending on the mode the following options are available on the Tools menu:
     - Set Preferences mode—Set Course Preferences (see “Specifying Room Preferences/Requirements” on page 429) and Clear Course Preferences. Click Clear Course Preferences to clear all the current preferences/requirements for the selected courses in a single step.
     - All Modes (including Read Only)—Set Shared Space, Unshare Space, Change Shares Space Parent (see “Working with Shared Space” on page 413) and Set Final Exam Settings. (See “Setting a Final Exam Schedule” on page 489.)

- All Modes (including Read Only)—Unsync Selected Courses, which deletes the selected course records from EMS.

You should use this option sparingly; however, it might be required post-publish if you want to share an existing course with an incoming course, or you need to address a cross-list situation.

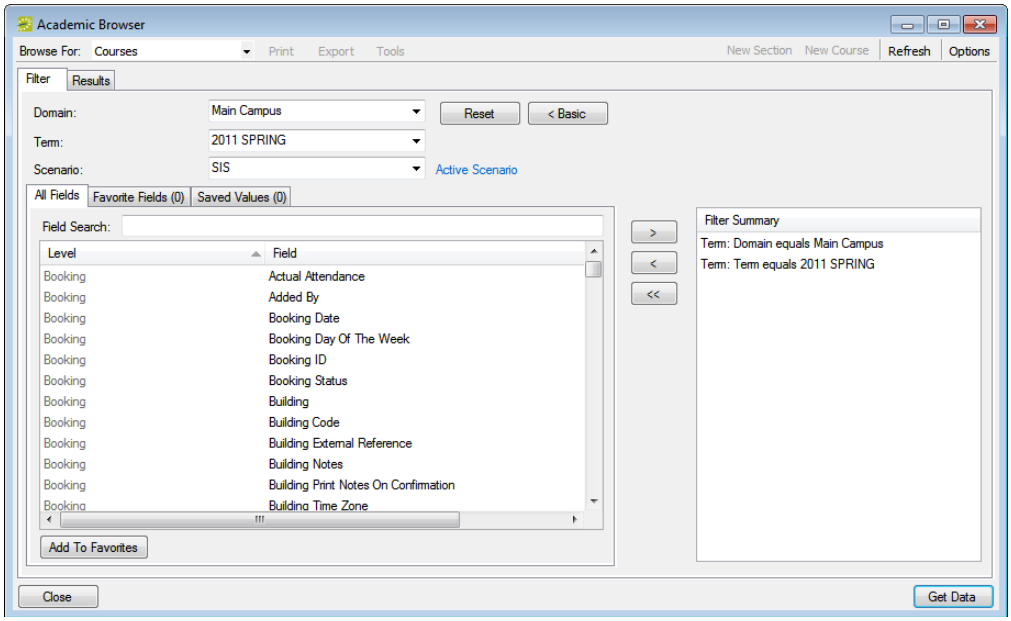
- In the Browse For field, select a different item for which to search. The Results tab is refreshed with the search results based on the item that you selected *and* the search criteria on the Filter tab.
- Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
- Click Refresh to requery the database based on the current search criteria.

6. Click Close.

   Any changes that you made to the search results columns (position, width, and so on) remain in effect for any other searches that you carry out. To reset the columns to their default values, see "Resetting Column Settings" on page 353.

To carry out an advanced search in the Academic Browser

Figure 13-88: Browser window, Advanced search options



1. On the Browse For dropdown list, select the item for which to search.
2. Select a domain, term, and/or scenario to search.

3. For each field level option by which to carry out the search:
   - Select the field level option, and then click the Move button (>).
   - When prompted, enter a value or define the limits for the option, and then click OK.

   The option is moved to the Filter Summary list.

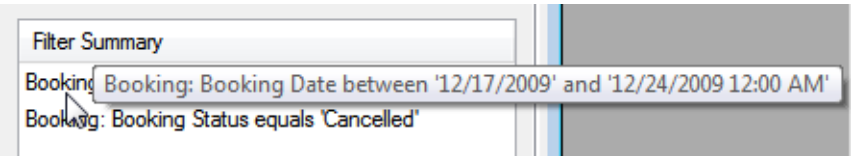
---

*To filter the list of available fields, in the Field Search field, enter a search string. Your search is limited to the exact order of the characters in the string, but the string can appear anywhere in the search results. For example, if you enter "add," search results can include **Add**ed by, Date **Add**ed, and Group **Add**ress Line 1.*

If you have specific fields and/or values by which you always want to carry out a search, then you do not have to filter the list of fields on the All Fields every time you carry out a search. Instead, you can select each of these fields on the All Fields tab, and then click Add to Favorites to add the field to the Favorite Fields tab or after you enter a value or define the limits for a field, you can click Save Value on the Filter dialog box. The next time that you carry out a search, you can simply open the Favorite Fields tab or the Saved Values tab to open your customized list of search fields.

To view a selected field option in its entirety in the Filter Summary list, rest the mouse pointer on the entry. A tooltip showing the complete field option information opens.

Figure 13-89: Viewing a selected field option in the Filter Summary list



4. Optionally, click Options and edit the default value for the additional search option Number of Records to Return.
5. Click Get Data or Refresh.

   The search results are displayed on the Results tab. If you have searched for courses, then the results include courses without course dates (meeting patterns). "Multiple" is displayed for those courses with more than one course date. If you have searched for course dates, courses without course dates are suppressed while courses with multiple meeting patterns are expanded. EMS schedules rooms only for courses with course dates. See Figure 13-90 on page 512.

6. Optionally, do one or more of the following:

   - To sort the search results, click any column heading.
   - To rearrange the search results, drag a column to a new location using the column heading.
   - To group results by a specific column, drag the column header as indicated on the Results tab.
   - To open an course in the Course Navigator, double-click the course entry on the Results tab.
   - Click Print to print the search results.
   - Click Export to export the search results to a Microsoft Excel spreadsheet.
   - In Define & Edit mode, the New Course and New Section options are enabled.
   - Select a course, or CTRL-click to select multiple courses, and depending on the mode the following options are available on the Tools menu:
     - Set Preferences mode—Set Course Preferences (see “Specifying Room Preferences/Requirements” on page 429) and Clear Course Preferences. Click Clear Course Preferences to clear all the current preferences/requirements for the selected courses in a single step.
     - All Modes (including Read Only)—Set Shared Space, Unshare Space, Change Shares Space Parent (see “Working with Shared Space” on page 413) and Set Final Exam Settings. (See “Setting a Final Exam Schedule” on page 489.)

- All Modes (including Read Only)—Unsync Selected Courses, which deletes the selected course records from EMS.

You should use this option sparingly; however, it might be required post-publish if you want to share an existing course with an incoming course, or you need to address a cross-list situation.

- In the Browse for field, select a different item for which to search. The Results tab is refreshed with the search results based on the item that you selected *and* the search criteria on the Filter tab.
- Click Filter to return to the Filter tab, make any necessary changes to the search criteria and repeat the search.
- Click Refresh to requery the database based on the current search criteria.

7. Click Close.

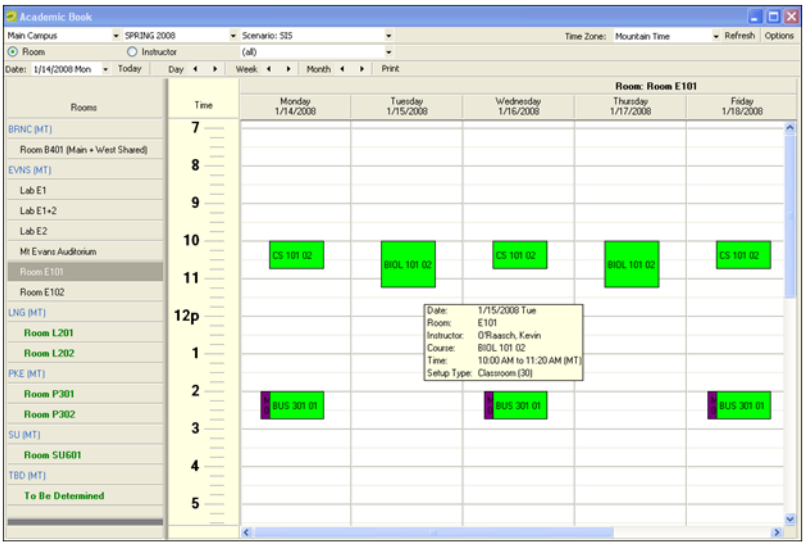
   Any changes that you made to the search results columns (position, width, and so on) remain in effect for any other searches that you carry out. To reset the columns to their default values, see “Resetting Column Settings” on page 353.

Using the Academic Book

The Academic Book provides a week-at-a glance graphical view of the courses that are assigned to a specific room or instructor. The view is for one room at a time as opposed to the Reservation Book, which shows all rooms one day at a time. The Academic Book shows only classes during the Planning phase of academic scheduling, but it shows both classes and events post-publish. To open the Academic Book, do one of the following:

- On the EMS Campus toolbar, click the Academic Book icon.
- On the EMS Campus menu bar, click Academic Planning > Courses > Academic Book.

Figure 13-91: Academic Book



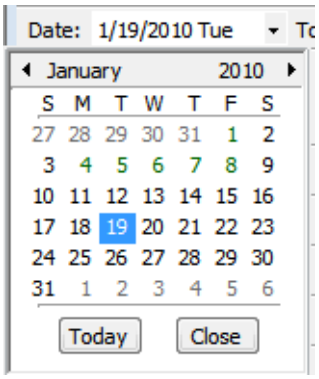
When the Academic Book first opens, if you are working with a future term, then the date is set to the first Monday of a full week of the term; otherwise, if you are working with a current term, then the date is set to the first Monday of the current week. In both cases, the display is filtered by Room and Building. You have many options available for working with the Academic Book and changing its default view to better suit your working needs, including:

- Changing the display date.
- Changing the view of courses by room.
- Changing the view of courses by instructor.
- Settings options that specify such things as what is to be displayed in the book when it first opens, mouse actions in the book, and so on.
- Viewing information about a specific course in a course tooltip.
- Opening a course in the Course Navigator.

To change the date display

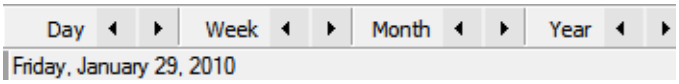
- On the Date field, click the dropdown arrow to open the Calendar. Use the scroll features (< and >) at the top of the calendar to change the month or year. To select a different date for a month, click the date.

Figure 13-92: Academic Book calendar



- Use the scroll features at the top of the reservation book display to scroll to a different day, week, month, year, or any different combination of these.

Figure 13-93: Academic Book calendar scroll features

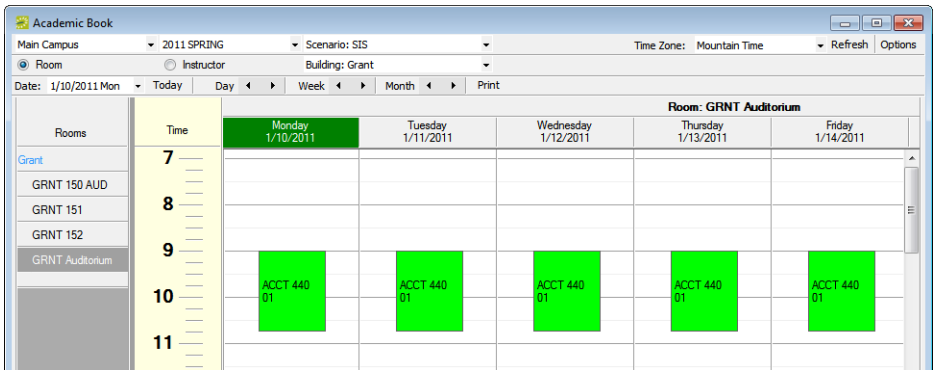


You can also manually enter a new date into the field. In all cases, the date that you choose specifies the start of the week that you are viewing. To view a full week, always select a Monday.

To change the view of courses by room

To change the view of courses by room, change any and all of the available display options—Domain, Term, Scenario (SIS by default or an Optimization scenario if optimization has taken place), the Building/Domain/View, and/or the Time Zone.

Figure 13-94: Academic Book, courses grouped by room



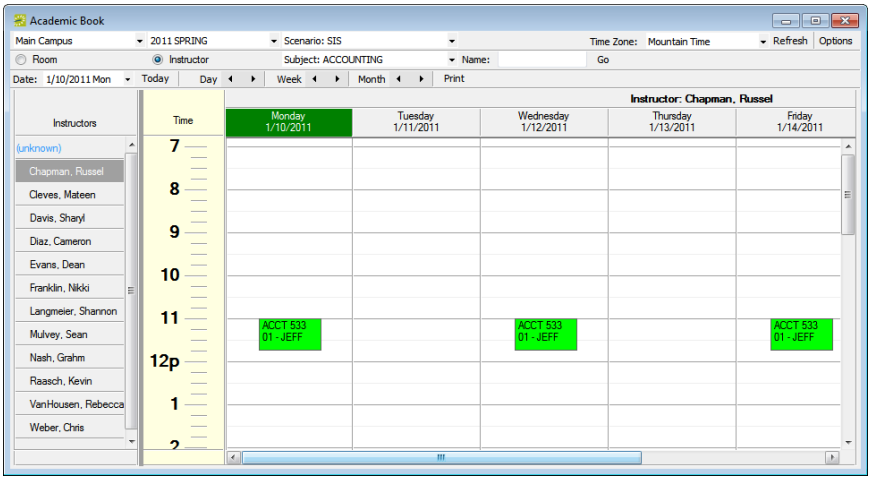
To change the view of courses by instructor

To change the view of courses to that by Instructor, click Instructor, and then, change any and all of the available display options—Domain, Term, Subject, and/or Time Zone. To filter the list by a specific instructor, enter a search string in the Name field, and then click Go. Click the name of an instructor in the left pane to see a list of courses that are scheduled for the instructor.

---

*Your search is limited to the exact order of the characters in the string, but the search is not case-sensitive and the string can appear anywhere in the search results. For example, if you enter "and" search results can include **And**erson, Scott, S**and**ers, Barry, and so on.*

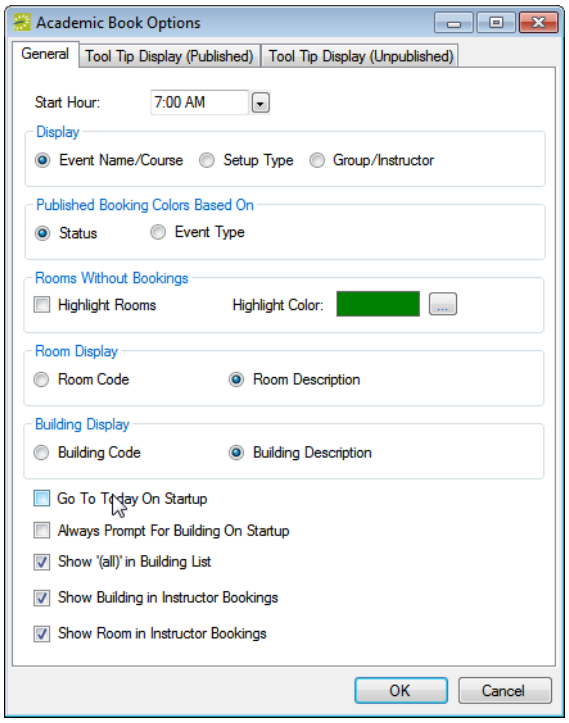
Figure 13-95: Academic Book, courses grouped by instructor



To set options for the Academic Book

Click Options in the upper right hand corner of the Academic Book to open the Academic Book options dialog box. You use the options on this dialog box to specify such things as what is to be displayed in the book when it first opens, mouse actions in the book, and so on.

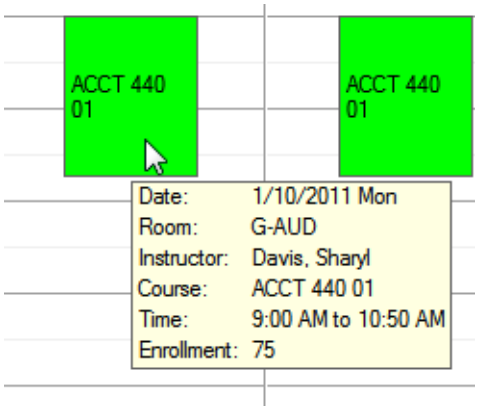
Figure 13-96: Academic Book Options dialog box, General tab



Option	Description
General tab	
Start Hour	The starting time for the Time grid that is displayed in the Academic Book.
Display	• Event Name/Course—Display the event name/course in the course entry. • Setup Type—Show the setup type and count in the course entry. • Group/Instructor—Show the group name/instructor name in the course entry.
Published Booking Colors Based On	For published courses, whether the fill color for a course entry is to be based on the Status color palette or on the Event Type color palette that has been determined in Configuration.
Rooms Without Bookings	The color with which rooms without bookings are highlighted in the Academic Book.
Room Display	• Room Code—Show the room code in the Room list when the courses are grouped by room. • Room Description—Show the room description in the Room list when the course are grouped by room.

Option	Description
Building Display	• Building Code—Show the building code in the Rooms list when the courses are grouped by room. • Building Description—Show the building description in the Rooms list when the coursed are grouped by room.
Go to Today on Startup	Not applicable.
Always Prompt for Building on Startup	Opens the Building dropdown list when the Academic Book first opens, which requires that you select a building, domain, or view before you can continue, as opposed to simply opening the building that you last viewed in the Academic Book.
Show (all) in Building list	Make (all) buildings an available option in the Building dropdown list, as opposed to having to choose a single building.
Show Building in Instructor Bookings	Show the Building Code in the course entry when courses are grouped by instructor (space permitting).
Show Room in Instructor Bookings	Show the Room Code in the course entry when courses are grouped by instructor (space permitting).
Tooltip Display (Unpublished)—Select the information that is to be displayed when the mouse pointer is placed on the entry for an unpublished course in the Academic Book.	
Tooltip Display (Published)—Select the information that is to be displayed when the mouse pointer is placed on the entry for a published course in the Academic Book.	

Figure 13-97: Tooltip for a course entry in the Academic Book

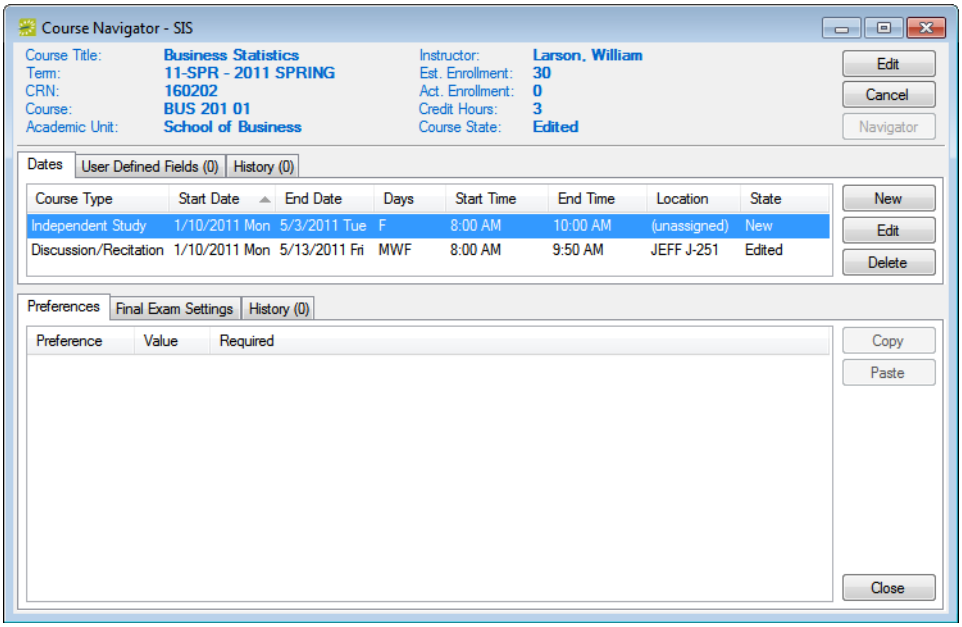


To open a course in the Navigator

Double-click a course entry in the Academic Book to open the course in the Course Navigator.

For detailed information about working with the Course Navigator, see "Using the Course Navigator" on page 520.

Figure 13-98: Course opened in the Course Navigator



Using the Course Navigator

The Course Navigator is a window in EMS Campus that you use to view and manage all aspects of a course, including editing and canceling courses, adding, editing, and canceling course dates, specifying room preferences for a course, and so on. You can access the Course Navigator from the Academic Browser, the Academic Book, and the EMS Navigator. Different tabs and panes on the Course Navigator provide different information about a course and course dates. The actions that you can carry out in the Course Navigator depend upon the mode (Read Only, Define and Edit Courses, Set Preferences) that is enabled for the academic term with which you are working in EMS Campus.

To access the Course Navigator

- To access the Course Navigator from the Academic Browser, for an *unpublished* course, double-click the course in the search results to open the course in the Course Navigator.
- To access the Course Navigator from the Academic Book, for a *published* course, double-click the course entry in the Academic Book to open the course in the Navigator, and then click Course on the Course Info tab to open the course in the Course Navigator.
- To access the Course Navigator from the EMS Navigator, do the following:
  - On the toolbar, click the Navigator icon

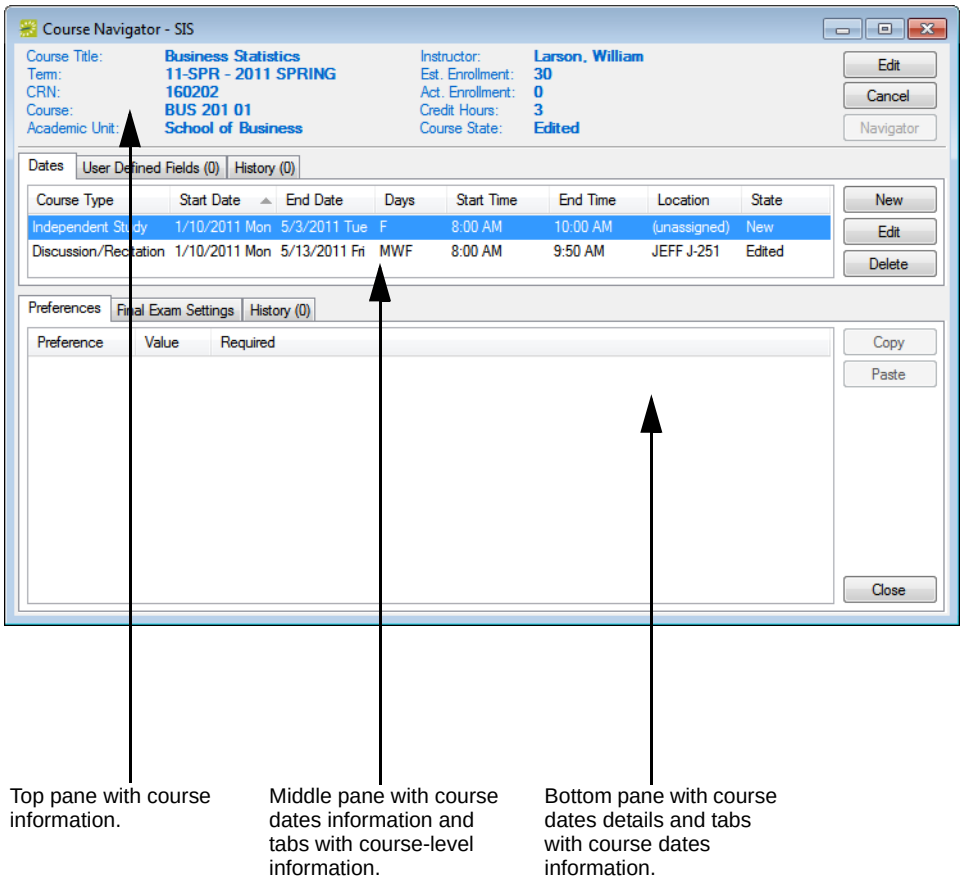
 to open the Open Navigator dialog box
  - On the Open dropdown list, select Course to open a Domain dropdown list and a Term dropdown list.

Figure 13-99: Open Navigator dialog box

  - Select a domain and a term.
  - In the CRN field, enter the CRN (course reference number) for the course.
  - Click OK to open the course in the Course Navigator.

Course Navigator window layout

Figure 13-100: Course Navigator



The top pane of the Course Navigator displays information about a selected *course*—the course title, the course term, the current course state (New, Edit, Unchanged, or Cancelled), and so on. The middle pane of the Course Navigator displays information about each of the *course dates* for the course. To view the indicated information for a course date, select a course date in the middle pane of the Course Navigator, and then open the appropriate tab (Dates, User Defined Fields, Shares Spaces, Preferences, or Final Exam Settings). The History tabs in the middle and lower pane provide audit information for course records and course date records. To view changes made to *course-level* information, open the History tab in the *middle* pane of the Course Navigator. To view changes made to *course date-level* information, select a course date in the middle pane, and then open the History tab in the *bottom* pane of the Course Navigator.

Available actions in the Course Navigator

The actions that you can carry out in the Course Navigator depend upon the mode (Read Only, Define and Edit Courses, Set Preferences) that is enabled for the academic term with which you are currently working with in EMS Campus.

Mode	Available Actions
Read-Only	The default mode in which the Navigator is placed if you have not selected any other mode. No actions are available.
Define and Edit	• Add course dates • Edit a course • Edit course dates • Cancel course dates • Cancel courses **Note:** These changes require update in the SIS. See “Enabling/ Disabling a Term for Define & Edit Mode” on page 398 for more information.
Set Preferences	Set preferences for a course on a course date by course date basis.

Generating Academic Reports

For any academic report, you can specify the parameters, options, and format for the report, or you can generate the report according to *memorized* settings. (For detailed information about a memorized report, see "Memorized report" on page 278.) Not all reports require the same parameters, nor do they all have the same options available. In addition, you can generate different reports in different formats.

All subjects must belong to an academic unit to be displayed on an academic report. Refer to the EMS Setup Guide for detailed information about configuring academic units and synchronizing subjects.

For brevity and ease, the parameters that are available for each report are not detailed in this section.

To generate a report

1. On the EMS Campus menu bar, click Academic Planning > Reports to open the Reports menu, and then click the option for the report that you are generating. For example, to generate the Course List report, click Academic Planning > Reports > Course List.
2. On the Setup dropdown list, do one of the following:
   - To generate the report according to the filter settings that you want (parameters, options, and so on), leave user-specified selected, then go to Step 3.
   - To run the report with filter settings that have been saved, or *memorized,* select the memorized report, and then go to Step 4.

For detailed information about memorized reports, see "Memorized report" on page 278.

3. Specify the report parameters, options, and format. See:

"Course List" on page 525.	"Academic Unit Statistics" on page 528.	"Over/Under Utilization" on page 529.
"Course Changes" on page 526.	"Academic Time Block Utilization" on page 528.	"Prime Time Usage" on page 530.
"Preferences Summary" on page 527.	"Classroom Utilization" on page 529.	"Final Exam Settings" on page 530.
"Unmet Preferences" on page 527.	"Hourly Classroom Utilization" on page 529.	"Final Exam Schedule" on page 531.
"Instructor Back to Back" on page 527.		

4. Optionally, do one or both of the following:
   - Click Print Preview.

     A preview of the report opens onscreen.
   - To print a hard copy of the confirmation, specify the number of copies that are to be printed, and then click Print.
5. Click Close.

   Unless you change the setup, all subsequent reports will be generated and printed according to the parameters and options that you have specified and in the format that you specified. If you want to save certain settings so that you do not have to adjust the filter settings every time you run the report, you can memorize the report. (See “Memorized report” on page 278.)

Course List

Description	Options
Provides a list of courses and course dates. **Note:** This report is often sent out to academic units for review when the Domain Scheduler is finished with room assignments.	There are options to include courses without room assignments and to print User Defined Fields that are associated with courses. Formats include: • By Course • By Instructor • By Day of Week • By Location • By Estimated Enrollment • By Start Time • By Subject • By Course Type

Course Changes

Description	Options

Used during Define and Edit Mode to capture changes made by the academic units to courses and course dates so that the Domain Scheduler can data enter these changes into the SIS.	• Format Choices
	  • All changes for term - when selected, all changes for the term (even changes that have possibly already been data-entered into the SIS) will be included on the report.
	  • *Changes since last synchronization - When checked, the report will include only changes that have been made since the last time that the term has been synchronized.
	• Show Room Changes - If selected, the report includes changes to rooms (post-publish only).
	• Show Cancelled Courses Only - If selected, the report includes only cancellations.
	• Show New Courses Only - If selected the report includes only new courses.
	• Show Edited Courses Only - If selected, the report includes only changes.
	• Show Latest Changes Only - If this option is selected, and a single value has been changed multiple times, the report includes only the most recent change for the field.
	• Hide Change Details - If selected, audit trail details are hidden on the report.
	• Show All Courses - If selected, all courses, even those without changes, are shown in the report.
	• Show User Defined Fields - If selected, the report includes any user defined fields that have been completed.
	• *Show Notes - If selected, any user-supplied notes are shown in the report.
	Note: The options that are marked with an asterisk (*) are the recommended options for the most inclusive reports.

Preferences Summary

Description	Options
When in Set Preference mode, this report is used to summarize the number of each type of preference or requirement, the number of the preferences that can be met from the optimization process, and the number of preferences that cannot be met from the optimization process. You can generate this report for each different scenario that was optimized.	N/A

Unmet Preferences

Description	Options
When in Set Preference mode, this report is used to list the courses that had preferences or requirements that were not met during the optimization process. You can generate this report for each different scenario that was optimized.	N/A

Instructor Back to Back

Description	Options
This report lists the courses that have instructors who are scheduled to teach two courses at the same time (Conflicts) and instructors who are teaching back to back (within the time gap that is specified in Options).	• Days of the week to be included in the instructor's schedule. • The time gap between classes on the specified days that determines "back to back."

Academic Unit Statistics

Description	Options
This report includes the following statistics for course dates that have been scheduled into rooms: • Number of sections per department • Percentage of the total sections • Number of class meetings • Percentage of the total class meetings • Number of class hours • Percentage of class hours • Average estimated enrollment • Average actual enrollment	• The days of the week to be included in the report. • Include course dates that have not been assigned into a room.

Academic Time Block Utilization

Description	Options
This report can be used after publishing to see the percent utilization of your rooms, based on the number of time blocks that you specify. For instance, if you hold 50 minute courses from 8:00 - 5:00 (9 blocks) and have one evening course from 6:00 - 9:00 (1 block) Monday through Friday (x5), you would have 50 blocks per week.	N/A

Classroom Utilization

Description	Options
This report can be used to analyze the percent that your rooms are utilized compared to a number of hours and the percentage of seats full (actual enrollment compared to room capacity). The report includes the following information: • Number of class meetings • Class hours • Percent utilization • Average estimated enrollment • Average actual enrollment • Maximum capacity • Percent seat fill	• The days of the week to be included • The low and high utilization thresholds • The number of hours to be considered.

Hourly Classroom Utilization

Description	Options
This report calculates the percent that a room is used during each hour of the day. Formats include detailed (percent for each hour of each room specified) and chart (a chart of each hour for overall).	• The days of week to be reviewed • The hours of the day that are to be reviewed

Over/Under Utilization

Description	Options
This report measures courses that have an actual adjusted enrollment over the maximum capacity for the room or under the minimum capacity for the room.	• To show or not to show All Courses (regardless if they fall outside capacity thresholds)

Prime Time Usage

Description	Options
This report displays the number of sections (courses) with room assignments that fall within the specified time range (prime time). Display fields include: • Total Number of sections offered • Percent of those sections in prime time • Number of sections in prime time • Average estimated enrollment • Average actual enrollment	• The days of the week to be included in the report. • Include courses that have not been assigned into a room.

Final Exam Settings

Description	Options
This report outlines any final exam settings marked on courses for preparation of publishing the final exam schedule.	• Show all courses - Displays all courses and their corresponding settings. • Show Final Exam Not Required - Limits the report to those courses that had “No Exam Required” specified. • Show Special/Common Exams - Limits the report to only those courses with special/common exams settings.

Final Exam Schedule

Description	Options
This report displays a list of courses with their corresponding final exam date, time, and room as assigned by the final exam session.	• All Assigned - All courses that have been assigned to a room by the final exam session. • Different Rooms - All courses that have been scheduled in room that was not the same that was used all semester for the course for the final exam. • Unassigned - All courses that have not been scheduled in a room for the final exam. • Final Exam Not Scheduled - All courses for which no final exam was scheduled.
